Outstanding Teaching - Andy Griffith
2012-09-30
At the end of every week many teachers leave

school exhausted. In an era when responsibility for exam results lies with them and not their students it's time to redress the balance so that students take more of the responsibility for their learning. A class can be skilled and motivated to learn without a teacher always having to lead. Engaging learners in this way unpicks intrinsic

motivation, the foundation that underpins a productive learning environment and helps to develop independent learning. Based on five years of intensive research through Osiris Education's award-winning Outstanding Teaching Intervention programme, during which the authors have trained more than 500 teachers to teach over 1,300 lessons in schools nationwide, this book is packed with proven advice and innovative tools developed in these successful outstanding lessons. Written in the same humorous, thought-provoking style with which they both teach and train, Andy and Mark aim to challenge all who teach, from NQTs to seasoned professionals, to reflect on their day-to-day practise and set an agenda for sustainable improvement.

Handbook of Natural Language Processing - Nitin Indurkha 2010-02-22

The Handbook of Natural Language Processing, Second Edition presents practical tools and techniques for implementing natural language processing in computer systems. Along with removing outdated material, this edition updates every chapter and expands the content to

include emerging areas, such as sentiment analysis. New to the Second Edition *Greater Financial Crisis Management and Democracy* - Bettina De Souza Guilherme 2020-12-09
This open access book discusses financial crisis management and policy in Europe and Latin America, with a special focus on equity and democracy. Based on a three-year research project by the Jean Monnet Network, this volume takes an interdisciplinary, comparative approach, analyzing both the role and impact of the EU and regional organizations in Latin America on crisis management as well as the consequences of crisis on the process of European integration and on Latin America's regionalism. The book begins with a theoretical introduction, exploring the effects of the paradigm change on economic policies in Europe and in Latin America and analyzing key systemic aspects of the unsustainability of the present economic system explaining the global crises and their interconnections. The following chapters are

divided into sections. The second section explores aspects of regional governance and how the economic and financial crises were managed on a macro level in Europe and Latin America. The third and fourth sections use case studies to drill down to the impact of the crises at the national and regional levels, including the emergence of political polarization and rise in populism in both areas. The last section presents proposals for reform, including the transition from finance capitalism to a sustainable real capitalism in both regions and at the inter-regional level of EU-LAC relations. The volume concludes with an epilogue on financial crises, regionalism, and domestic adjustment by Loukas Tsoukalis, President of the Hellenic Foundation for European and Foreign Policy (ELIAMEP). Written by an international network of academics, practitioners and policy advisors, this volume will be of interest to researchers and students interested in macroeconomics, comparative regionalism, democracy, and

financial crisis management as well as politicians, policy advisors, and members of national and regional organizations in the EU and Latin America.

The Parliament of Man - Paul Kennedy
2007-09-04

The Parliament of Man is the first definitive history of the United Nations, from one of America's greatest living historians. Distinguished scholar Paul Kennedy, author of the bestselling *The Rise and Fall of Great Powers*, gives us a thorough and timely account that explains the UN's roots and functions while also casting an objective eye on its effectiveness and its prospects for success in meeting the challenges that lie ahead. Kennedy shows the UN for what it is: fallible, human-based, often dependent on the whims of powerful national governments or the foibles of individual administrators—yet also utterly indispensable. With his insightful grasp of

six decades of global history, Kennedy convincingly argues that "it is difficult to imagine how much more riven and ruinous our world of six billion people would be if there had been no UN."

American Catholics in the Protestant Imagination - Michael P. Carroll 2007-11-12

Arts of Living on a Damaged Planet - Anna Lowenhaupt Tsing 2017-05-30

Living on a damaged planet challenges who we are and where we live. This timely anthology calls on twenty eminent humanists and scientists to revitalize curiosity, observation, and transdisciplinary conversation about life on earth. As human-induced environmental change threatens multispecies livability, Arts of Living on

a Damaged Planet puts forward a bold proposal: entangled histories, situated narratives, and thick descriptions offer urgent "arts of living." Included are essays by scholars in anthropology, ecology, science studies, art, literature, and bioinformatics who posit critical and creative tools for collaborative survival in a more-than-human Anthropocene. The essays are organized around two key figures that also serve as the publication's two openings: Ghosts, or landscapes haunted by the violences of modernity; and Monsters, or interspecies and intraspecies sociality. Ghosts and Monsters are tentacular, windy, and arboreal arts that invite readers to encounter ants, lichen, rocks, electrons, flying foxes, salmon, chestnut trees, mud volcanoes, border zones, graves, radioactive waste—in short, the wonders and terrors of an unintended epoch. Stage to Studio - James P. Kraft 2020-03-03
Award for Best Research in the Field of Record Labels or Manufacturers from the Association for Recorded Sound Collections Winner of the Kenneth W. Baldrige Prize from the Phi Alpha Theta Honor Society, Hawaii Region Between the late nineteenth and mid-twentieth century, technology transformed the entertainment industry as much as it did such heavy industries as coal and steel. Among those most directly affected were musicians, who had to adapt to successive inventions and refinements in audio technology—from wax cylinders and gramophones to radio and sound films. In this groundbreaking study, James P. Kraft explores the intersection of sound technology, corporate power, and artistic labor during this disruptive period. Kraft begins in the late nineteenth century's "golden age" of musicians, when demand for skilled instrumentalists often exceeded supply, analyzing the conflicts in

concert halls, nightclubs, recording studios, radio stations, and Hollywood studios as musicians began to compete not only against their local counterparts but also against highly skilled workers in national "entertainment factories." Kraft offers an illuminating case study in the impact of technology on industry and society—and a provocative chapter in the cultural history of America.

The United Nations, Peace and Security - Ramesh Thakur 2006-06-08

Preventing humanitarian atrocities is becoming

as important for the United Nations as dealing with inter-state war. In this book, Ramesh Thakur examines the transformation in UN operations, analysing its changing role and structure. He asks why, when and how force may be used and argues that the growing gulf between legality and legitimacy is evidence of an eroded sense of international community. He considers the tension between the US, with its capacity to use force and project power, and the UN, as the centre of the international law enforcement system. He asserts the central importance of the rule of law and of a rules-based order focused on the UN as the foundation of a civilised system of international relations. This book will be of interest to students of the UN and international organisations in politics, law and international relations departments, as well as policymakers in the UN and other NGOs.

The Cambridge Guide to Homer - Corinne Ondine Pache 2020-03-05

From its ancient incarnation as a song to recent translations in modern languages, Homeric epic remains an abiding source of inspiration for both scholars and artists that transcends temporal and linguistic boundaries. The Cambridge Guide to Homer examines the influence and meaning of Homeric poetry from its earliest form as ancient

Greek song to its current status in world literature, presenting the information in a synthetic manner that allows the reader to gain an understanding of the different strands of Homeric studies. The volume is structured around three main themes: Homeric Song and Text; the Homeric World, and Homer in the World. Each section starts with a series of 'macropedia' essays arranged thematically that are accompanied by shorter complementary 'micropedia' articles. The Cambridge Guide to Homer thus traces the many routes taken by Homeric epic in the ancient world and its continuing relevance in different periods and cultures.

War and Genocide in South Sudan - Clémence Pinaud 2021-02-15

Using more than a decade's worth of fieldwork in South Sudan, Clémence Pinaud here explores the relationship between predatory wealth accumulation, state formation, and a form of racism—extreme ethnic group entitlement—that

has the potential to result in genocide. War and Genocide in South Sudan traces the rise of a predatory state during civil war in southern Sudan and its transformation into a violent Dinka ethnocracy after the region's formal independence. That new state, Pinaud argues, waged genocide against non-Dinka civilians in 2013-2017. During a civil war that wrecked the region between 1983 and 2005, the predominantly Dinka Sudan People's Liberation Army (SPLA) practiced ethnically exclusive and predatory wealth accumulation. Its actions fostered extreme group entitlement and profoundly shaped the rebel state. Ethnic group entitlement eventually grew into an ideology of ethnic supremacy. After that war ended, the semi-autonomous state turned into a violent and predatory ethnocracy—a process accelerated by independence in 2011. The rise of exclusionary nationalism, a new security landscape, and inter-ethnic political competition contributed to the start of a new round of civil war in 2013, in which

the recently founded state unleashed violence against nearly all non-Dinka ethnic groups. Pinaud investigates three campaigns waged by the South Sudan government in 2013-2017 and concludes they were genocidal—they sought to destroy non-Dinka target groups. She demonstrates how the perpetrators' sense of group entitlement culminated in land-grabs that amounted to a genocidal conquest echoing the imperialist origins of modern genocides. Thanks to generous funding from TOME, the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellopen.org) and other repositories. [Introduction to the New Statistics](#) - Geoff Cumming 2016-10-04

This is the first introductory statistics text to use an estimation approach from the start to help readers understand effect sizes, confidence intervals (CIs), and meta-analysis ('the new statistics'). It is also the first text to explain the new and exciting Open Science practices, which

encourage replication and enhance the trustworthiness of research. In addition, the book explains NHST fully so students can understand published research. Numerous real research examples are used throughout. The book uses today's most effective learning strategies and promotes critical thinking, comprehension, and retention, to deepen users' understanding of statistics and modern research methods. The free ESCI (Exploratory Software for Confidence Intervals) software makes concepts visually vivid, and provides calculation and graphing facilities. The book can be used with or without ESCI. Other highlights include: - Coverage of both estimation and NHST approaches, and how to easily translate between the two. - Some exercises use ESCI to analyze data and create graphs including CIs, for best understanding of estimation methods. -Videos of the authors describing key concepts and demonstrating use of ESCI provide an engaging learning tool for traditional or flipped classrooms. -In-chapter exercises and

quizzes with related commentary allow students to learn by doing, and to monitor their progress. - End-of-chapter exercises and commentary, many using real data, give practice for using the new statistics to analyze data, as well as for applying research judgment in realistic contexts. -Don't fool yourself tips help students avoid common errors. -Red Flags highlight the meaning of "significance" and what p values actually mean. - Chapter outlines, defined key terms, sidebars of key points, and summarized take-home messages provide a study tool at exam time. - <http://www.routledge.com/cw/cumming> offers for students: ESCI downloads; data sets; key term flashcards; tips for using SPSS for analyzing data; and videos. For instructors it offers: tips for teaching the new statistics and Open Science; additional homework exercises; assessment items; answer keys for homework and assessment items; and downloadable text images; and PowerPoint lecture slides. Intended for introduction to statistics, data analysis, or

quantitative methods courses in psychology, education, and other social and health sciences, researchers interested in understanding the new statistics will also appreciate this book. No familiarity with introductory statistics is assumed.

Complementarity in the Line of Fire - Sarah M. H. Nouwen 2013-11-07

"This book follows as LAW"--

Federalism and the European Union - Michael Burgess 2002-09-11

A revisionist interpretation of the post-war evolution of European integration and the European Union (EU), this book reappraises and reassesses conventional explanations of European integration. It adopts a federalist approach which supplements state-based arguments with federal political ideas, influences and strategies. By exploring the philosophical and historical origins of federal ideas and tracing their influence throughout the whole of the EU's evolution, the book makes a significant contribution to the scholarly debate about the nature and development of the EU. The book looks at federal ideas stretching back to the sixteenth century and demonstrates their fundamental continuity to contemporary

European integration. It situates these ideas in the broad context of post-war western Europe and underlines their practical relevance in the activities of Jean Monnet and Altiero Spinelli. Post-war empirical developments are explored from a federalist perspective, revealing an enduring persistence of federal ideas which have been either ignored or overlooked in conventional interpretations. The book challenges traditional conceptions of the post-war and contemporary evolution of the EU, to reassert and reinstate federalism in theory and practice at the very core of European integration. **Silk (Movie Tie-in Edition)** - Alessandro Baricco 2008-12-10

Katherine - Anya Seton 2013

bookdown - Yihui Xie 2016-12-12

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can

number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

Holy Women, Holy Men - Church Publishing, 2010

Fully revised and expanded, this new work is the first major revision of the liturgical calendar of the Episcopal Church in more than 40 years! It is the official revision of Lesser Feasts and Fasts and authorized by the 2009 General Convention. All commemorations in Lesser Feasts and Fasts have been retained, and many new ones added. Three scripture readings (instead of current two) are provided for all minor holy days. Additional new material includes a votive mass of the Blessed Virgin Mary, many more ecumenical commemorations, plus a proper for space exploration. For years the oft revised volume, Lesser Feasts and Fasts (LFF), has served parishes and individuals mark part of the holiness of each day by providing Scripture readings, a collect, a Eucharistic preface, and a narrative about those remembered on the church's calendar that day whose lives have witnessed to the grace of God. Holy Women, Holy Men

(HWHM) is a major effort to revise, but also to expand and enrich LFF. Where LFF provided two readings (gospel and other New Testament) plus a psalm, HWHM adds an Old Testament citation. Where LFF was limited to few non-Anglicans in the post-reformation period (and few non-Episcopalians after 1789), HWHM dramatically broadens appreciation for other Christians and their traditions. Over-emphasis on clergy is redressed by additional laity, males by females, and "in-church" activities by contributions well beyond the workings of institutional agendas. These almost daily commemorations occupy over 600 of the book's 785 pages, by far the lion's share of its content. Remaining sections address: principles of revision and guides for future revision; liturgical propers for seasons (Advent/Christmas, Lent, and Easter); and new propers for a miscellany of propers usable with individuals (or events) not officially listed in the formal calendar. Two cycles of propers for daily Eucharist are also included, one covering a six

week period, the other a two year cycle.
