The Social Life of Coffee - Brian Cowan 2008-10-01
What induced the British to adopt foreign coffee-drinking customs in the seventeenth century? Why did an entirely new social institution, the coffeehouse, emerge as the primary place for consumption of this new drink? In this lively book, Brian Cowan locates the answers to these questions in the particularly British combination of curiosity, commerce, and civil society. Cowan provides the definitive account of the origins of coffee drinking and coffeehouse society, and in so doing he

reshapes our understanding of the commercial and consumer revolutions in Britain during the long Stuart century. Britain's virtuosi, gentlemanly patrons of the arts and sciences, were profoundly interested in things strange and exotic. Cowan explores how such virtuosi spurred initial consumer interest in coffee and invented the social template for the first coffeehouses. As the coffeehouse evolved, rising to take a central role in British commercial and civil society, the virtuosi were also transformed by their own invention.

A Falconry Manual - Frank Lyman Beebe 1984

A Falconry Manual is a comprehensive, extensively updated version of his out of print book- *Hawks, Falcons and Falconry* (Hancock House 1976) and *The Compleat Falconer* (Hancock House 1992). Drawing on over 50 years of field experience and research, Beebe presents an exhaustive summary of the behavior, capture, and training of the-birds-of-prey. It was Beebe's field studies and practical experience that led to his pioneering successes in breeding captive falcons in the early 1960s. His artistic talents not only contribute to

the concise illustrations on how to capture and train birds but how to easily make all falconry hardware. One of the all-time best books for new Apprentices to learn about training a new hawk or falcon and one of the best selling falconry books ever produced.

Good Products, Bad Products: Essential Elements to Achieving Superior Quality - James Adams 2012-01-06

What is the secret behind every successful product? Why are people willing to pay more for a BMW than a Chevrolet? How could Apple iPhones represent only 4% of the world's cell phone market in 2011 but take in 50% of the profits? The answer is quality. In this provocative new book, bestselling author James L. Brands of Faith - Mara Einstein 2007-09-14

In a society overrun by commercial clutter, religion has become yet another product sold in the consumer marketplace, and faiths of all kinds must compete with a myriad of more entertaining and more convenient leisure activities. Brands of Faith argues that in order to compete effectively faiths have had to become brands -- easily recognizable symbols and spokespeople with whom religious prospects can make immediate connections. Mara Einstein shows how religious branding has expanded over the past twenty years to create a blended world of commerce and faith where the sacred becomes secular and the secular sacred. In a series of fascinating case studies of faith brands, she explores the significance of branded church courses, such as Alpha and The Purpose Driven Life, mega-churches, and the popularity of the televangelist Joel Olsteen and television presenter Oprah Winfrey, as well as the rise of Kaballah. She asks what the consequences of this religious marketing will be, and outlines the possible results of religious commercialism -- good and bad. Repackaging religion -- updating music, creating teen-targeted bibles -- is justifiable and necessary. However, when the content

becomes obscured, religion may lose its unique selling proposition -- the very ability to raise us above the market.

Apprentice Study Guide -

Creativity - Mihaly Csikszentmihalyi 2009-10-13

"Although the benefits of this study to scholars are obvious, this thought-provoking mixture of scholarly and colloquial will enlighten inquisitive general readers, too." -- Library Journal (starred review) The classic study of the creative process from the bestselling author of Flow. Creativity is about capturing those moments that make life worth living. Legendary psychologist Mihaly Csikszentmihalyi ("The leading researcher into 'flow states.'" -- Newsweek) reveals what leads to these moments--be it the excitement of the artist at the easel or the scientist in the lab--so that this knowledge can be used to enrich people's lives. Drawing on nearly one hundred interviews with

exceptional people, from biologists and physicists, to politicians and business leaders, to poets and artists, as well as his thirty years of research on the subject, Csikszentmihalyi uses his famous flow theory to explore the creative process. He discusses such ideas as why creative individuals are often seen as selfish and arrogant, and why the "tortured genius" is largely a myth. Most important, he explains why creativity needs to be cultivated and is necessary for the future of our country, if not the world.

Ice-Candy-Man - Bapsi Sidhwa 2000-10-14

Surveillance Valley - Yasha Levine 2018-02-06
The internet is the most effective weapon the government has ever built. In this fascinating book, investigative reporter Yasha Levine uncovers the secret origins of the internet, tracing it back to a Pentagon counterinsurgency surveillance project. A visionary

intelligence officer, William Godel, realized that the key to winning the war in Vietnam was not outgunning the enemy, but using new information technology to understand their motives and anticipate their movements. This idea -- using computers to spy on people and groups perceived as a threat, both at home and abroad -- drove ARPA to develop the internet in the 1960s, and continues to be at the heart of the modern internet we all know and use today. As Levine shows, surveillance wasn't something that suddenly appeared on the internet; it was woven into the fabric of the technology. But this isn't just a story about the NSA or other domestic programs run by the government. As the book spins forward in time, Levine examines the private surveillance business that powers tech-industry giants like Google, Facebook, and Amazon, revealing how these companies spy on their users for profit, all while doing double duty as military and intelligence contractors. Levine shows that the military and Silicon Valley are effectively inseparable: a military-digital complex that permeates everything connected to the internet, even coopting and weaponizing the antigovernment privacy movement that sprang up in the wake of Edward Snowden. With deep research, skilled storytelling, and provocative arguments, *Surveillance Valley* will change the way you think about the news -- and the device on which you read it.

The Shakespeare Secret - J. L. Carrell 2010-01-07
A modern serial killer - hunting an ancient secret. A woman is left to die as the rebuilt Globe theatre burns. Another woman is drowned like Ophelia, skirts swirling in the water. A professor has his throat slashed open on the steps of Washington's Capitol building. A deadly serial killer is on the loose, modelling his murders on

Shakespeare's plays. But why is he killing? And how can he be stopped? A gripping, shocking page turner, *The Shakespeare Secret* masterfully combines modern murder and startling true revelations from the life of Shakespeare. It has been acclaimed as one of the most compulsively readable thrillers of recent years.

The Compleat Falconer - Frank Lyman Beebe 1992

A veritable how-to of Frank Beebe's lifetime experience. Included are plates of 32 original paintings and more than 100 illustrations and drawings. What is Falconry? Really it is just bird watching, although a rather dramatic, specialized, glamorized, and historical kind of bird watching. It involves the taking of a predatory bird into the same kind of familiar, loosely controlled relationship with man as is so well known and so commonplace with a dog or a horse; then, with the relationship established, going out hunting in the company of that predatory bird in a partnership in which the bird is the primary hunter and the human plays the lesser part. The human becomes a bird watcher or, if involved, in the menial capacity of a bird dog to flush quarry or as an assistant in subduing quarry already taken. It is an ancient, honorable, and rather humbling relationship, as old in time as that of man and dog or man and horse. With the exception of eagles, most of the birds involved are smaller than the most ordinary house cat or Pekinese dog and are about as dangerous to people. They are accordingly much less dangerous than any ordinary-sized dog and infinitely less dangerous than is the smallest pony. Their acquisition and their use, therefore, needs no more in the way of imposed control than does the keeping of the most inoffensive dog or cat. This book is about falconry. It deals with the acquiring and the care, control, and training of the

kinds of raptorial birds most suited to this ancient relationship and also, as far as is now possible, describes and identifies the birds of falconry. Of the determined and devious twenty-year efforts, extending from 1964 to 1987, by nature preservationist groups and government agencies to control, constrain, institutionalize, and finally to simply criminalize falconry, this book will contain only enough to orient a newcomer. Some of this had to be included, somewhat reluctantly; it is highly condensed and closely edited to allow some comprehension of why and how contemporary falconry has become so different from its traditional past as to require a new book with quite different priorities and orientation than heretofore. The training procedures I propose in this book differ significantly from the traditional procedures reiterated in all previous books on falconry and are especially oriented toward the training of these domestic hawks and falcons. Because they are essentially man made, these birds come to the falconer not only devoid of fear and of hunting experience but also devoid of those subtle disciplines imposed by natural selection with which the traditional procedures were, by trial and error, so perfected to cope.

The Empathy Exams - Leslie Jamison 2014-04-01

From personal loss to phantom diseases, *The Empathy Exams* is a bold and brilliant collection, winner of the Graywolf Press Nonfiction Prize A Publishers Weekly Top Ten Essay Collection of Spring 2014 Beginning with her experience as a medical actor who was paid to act out symptoms for medical students to diagnose, Leslie

Jamison's visceral and revealing essays ask essential questions about our basic understanding of others: How should we care about each other? How can we feel another's pain, especially when pain can be assumed, distorted, or performed? Is empathy a tool by which to test or even grade each other? By confronting pain—real and imagined, her own and others'—Jamison uncovers a personal and cultural urgency to feel. She draws from her own experiences of illness and bodily injury to engage in an exploration that extends far beyond her life, spanning wide-ranging territory—from poverty tourism to phantom diseases, street violence to reality television, illness to incarceration—in its search for a kind of sight shaped by humility and grace.

Falconry and Hawking - Phillip Glasier 1998-08-31

The 4,000-year-old sport of falconry, once the pastime of royalty and aristocracy, is still thriving with clubs throughout the UK and the US. Phillip Glasier's book is a classic text on the subject and considered the definitive guide for falconers. It covers all aspects of falconry from its history and development to training, housing, tools, equipment and skills. There are chapters on: Handling the new arrival •Condition •Manning and early training •Flying free and getting fit •Flying falcons out of the hood •Flying shortwings •Game Hawking •Moulting •Lost Hawks •Hack and Hacking back •Dogs for Hawking •Making hoods, belts, bags and gloves Glasier also gives complete details of all the birds most commonly used, and reveals their character and individual temperaments in his own case histories. With every technique explained through step-by-step instructions and illustrated with over 170 photographs and diagrams, "Falconry and Hawking" is an essential reference for falconers throughout the world.

The Consolations of Philosophy - Alain De Botton
2013-01-23

From the author of *How Proust Can Change Your Life*, a delightful, truly consoling work that proves that philosophy can be a supreme source of help for our most painful everyday problems. Perhaps only Alain de Botton could uncover practical wisdom in the writings of some of the greatest thinkers of all time. But uncover he does, and the result is an unexpected book of both solace and humor. Dividing his work into six sections -- each highlighting a different psychic ailment and the appropriate philosopher -- de Botton offers consolation for unpopularity from Socrates, for not having enough money from Epicurus, for frustration from Seneca, for inadequacy from Montaigne, and for a broken heart from Schopenhauer (the darkest of thinkers and yet, paradoxically, the most cheering). Consolation for envy -- and, of course, the final word on consolation -- comes from Nietzsche: "Not everything which makes us feel better is good for us." This wonderfully engaging book will, however, make us feel better in a good way, with equal measures of wit and wisdom.

The World's Worst Assistant - Sona Movsesian 2022-07-19
An Instant New York Times Bestseller From Conan O'Brien's longtime assistant and cohost of his podcast, Conan O'Brien Needs a Friend, a completely hilarious and irreverent how-to guide for becoming a terrible, yet unfireable employee, spilling her trade secrets for minimizing effort while maximizing the rewards. Sona Movsesian didn't wake up one day and decide to become the World's Worst Assistant. Achieving such greatness is a gradual process--one that starts with long hours and hard work before it eventually descends into sneaking low-dosage edibles into your lunch and napping on your

boss's couch. With a foreword from Conan O'Brien, *The World's Worst Assistant* is populated with hysterical black-and-white illustrations, comics, and more. It's a mixture of how-tos (like *How to Nap at Work* and *How to Watch TV at Your Desk*), tips for becoming untouchable (like memorizing social security and credit card numbers and endearing yourself to friends and family), and incredible personal stories from Sona's twelve years spent working for Conan that put their adorable closeness and professional dysfunction on display. In these pages, Sona will explain her descent from eager, hard-working, ambitious, detail-orientated assistant to self-awarded title-holder for the worst in history. This book is irresistible fun you'll want to give to every young professional in your life. For readers of heartfelt humor like that of Phoebe Robinson and Colin Hanks, *The World's Worst Assistant* is a chance for fans, viewers, and listeners of Conan's shows and podcast to fall in love with Sona and Conan all over again.

Teaching Translation from Spanish to English - Allison Beeby Lonsdale 1996

While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beeby Lonsdale questions this view. In her innovative book, she demonstrates how teachers can guide their students by showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics illuminate the translation process. Challenging long-held assumptions, she establishes a fascinating framework on which to base the structure of a professional prose-translation class. Her original contributions to the question of directionality and to the specific strategies of translating are applicable to not only the teaching of translation from Spanish to

English, but to other teaching situations and to other pairs of languages as well. She also reviews the latest attempts in translation theory to define and contextualize ideal translator competence, student translator competence, and general translation strategies. Beeby Lonsdale completes her book by applying her conclusions to selecting and organizing the content of teaching translation from Spanish to English. She illustrates one or more of the basic translation principles through 29 teaching units, which are prefaced by objectives, tasks, and commentaries for the teacher, and through 48 task sheets, which show how to present the material to students.

Idea Man - Paul Allen 2011-04-28

By his early thirties, Paul Allen was a world-famous billionaire-and that was just the beginning. In 2007 and 2008, *Time* named Paul Allen, the cofounder of Microsoft, one of the hundred most influential people in the world. Since he made his fortune, his impact has been felt in science, technology, business, medicine, sports, music, and philanthropy. His passion, curiosity, and intellectual rigor-combined with the resources to launch and support new initiatives-have literally changed the world. In 2009 Allen discovered that he had lymphoma, lending urgency to his desire to share his story for the first time. In this long-awaited memoir, Allen explains how he has solved problems, what he's learned from his many endeavors-both the triumphs and the failures-and his compelling vision for the future. He reflects candidly on an extraordinary life. The book also features previously untold stories about everything from the true origins of Microsoft to Allen's role in the dawn of private space travel (with SpaceShipOne) and in discoveries at the frontiers of brain science. With

honesty, humor, and insight, Allen tells the story of a life of ideas made real.
