Education and Society in the Middle East and North

Africa - Milton George
2020-01-17

In the past, the Middle East and the so-called Muslim world used to be beacons of learning and critical thought. Although historical variables—such as conquest, internal conflict, and colonization—demoted their position on the global stage, changes are now in the offing. In these interesting times, a growing number of educators, thinkers and visionaries are trying both to find and to generate new approaches to the past, present, and future of the region. This book is a collection of articles which reflect on various aspects related to education and society in the Middle East and North Africa (also known as the MENA region), their peoples and educational processes. It provides a platform for people to join the global conversation and to contribute to it with data which are relevant to regional concerns, research and practices. This is necessary because many of the theories

and research findings which are still being used to understand the region were generated elsewhere and, despite their lack of regional representativeness, were generalized as the most trustworthy interpretive tools across the world. Hence, there is a need for the world to open up to the voices from the MENA region.
