**Understanding Development and Proficiency in Writing - Philip Durrant**  
2021-03-18

Quantitative corpus research on written language development has expanded rapidly in recent years, assisted by the ever-increasing power and accessibility of software capable of reliably analysing huge collections of learner writing. For this work to reach its full potential, it is important that researchers have a strong understanding of its methodological foundations and of the existing empirical evidence base on which it can build. This book provides the most comprehensive discussion to date of research in this area. Covering both first and second language learning contexts, it sets out a coherent theoretical framework and systematically reviews studies published over the last seventy years in order to establish

what such research has taught us about written language development, what it hasn't taught us, and what we should do next. Timely and original, this is an essential reference work for academic researchers and students of first and second language writing.

*INVESTIGATING  
COMPARABILITY OF WRITING  
TASKS WITH PICTURE  
PROMPTS IN AN IN-HOUSE  
ENGLISH PROFICIENCY TEST*

- YALI SHI 2022-04-28

For security reasons, using parallel writing tasks within or across different test administrations is common practice in large-scale language testing. Lack of task comparability would result in unjustified variance in test performance and

consequently jeopardize test validity and fairness. Thus, it is crucial for test developers to gather empirical evidence from different aspects to substantiate the fairness argument that scores are consistent and score-based decisions are impartial across parallel tasks. Despite many studies hitherto on writing task comparability, those addressing picture-prompt writing tasks in an integrated manner have remained quite underexplored.

Therefore, this book investigates the comparability of five writing tasks with picture prompts randomly assigned across testing occasions in an in-house English proficiency test (EPT) of a comprehensive university from three perspectives—the scores, the texts, and the raters and test takers.

Results show that task difficulty is not comparable either in terms of some lexical, syntactic and content features elicited or as judged by raters and test takers, which could be related with topic familiarity and conceptual clarity of the picture prompt. Yet, overall task comparability is achieved in not only final scores but also score distribution and classification accuracy. The findings support the fairness argument for EPT writing and provide theoretical, practical and methodological implications.

*The Routledge Handbook of Second Language Acquisition and Language Testing* - Paula Winke  
2020-12-28

This Handbook, with 45 chapters written by the world's leading scholars in second language acquisition (SLA) and

language testing, dives into the important interface between SLA and language testing: shared ground where researchers seek to measure second language performance to better understand how people learn their second languages. The Handbook also reviews how to best measure and evaluate the second language (L2) learners' personal characteristics, backgrounds, and learning contexts to better understand their L2 learning trajectories. Taking a transdisciplinary approach to research, the book builds upon recent theorizing and measurement principles from the fields of applied linguistics, cognitive science, psychology, psycholinguistics, psychometrics, educational measurement, and social psychology.

The Handbook is divided into six key sections: (1) Assessment concepts for SLA researchers, (2) Building instruments for SLA research, (3) Measuring individual differences, (4) Measuring language development, (5) Testing specific populations, and (6) Measurement principles for SLA researchers.

**Listening in the Language Classroom** -

John Field 2009-01-22

This book challenges the orthodox approach to the teaching of second language listening, which is based upon the asking and answering of comprehension questions. The book's central argument is that a preoccupation with the notion of 'comprehension' has led teachers to focus upon the product of listening, in the form of answers to questions,

ignoring the listening process itself. The author provides an informed account of the psychological processes which make up the skill of listening, and analyses the characteristics of the speech signal from which listeners have to construct a message. Drawing upon this information, the book proposes a radical alternative to the comprehension approach and provides for intensive small-scale practice in aspects of listening that are perceptually or cognitively demanding for the learner. Listening in the Language Classroom was winner of the Ben Warren International Trust House Prize in 2008.
