**Missional Church** - Daniel L. Guder 1998-02-09

What would a theology of the Church look like that took seriously the fact that North America is now itself a mission field? This question lies at the foundation of this volume written by an ecumenical team of six noted missiologists—Lois Barrett, Inagrace T. Dietterich, Darrell L. Guder, George R. Hunsberger, Alan J. Roxburgh, and Craig Van Gelder. The result of a three-year research project undertaken by The Gospel and Our Culture Network, this book issues a firm challenge for the church to recover its missional call right here in North America, while also offering the tools to help it do so. The authors examine North America s secular culture and the church s loss of dominance in today s society. They then present a biblically based theology that takes seriously the church s missional vocation and draw out the consequences of this theology for the structure and institutions of the church.

**Cities of the Mississippi** - John William Reys 1994

Spectacular modern aerial photographs of twenty-three of the towns dramatically illustrate changes to the urban scene and demonstrate the lasting influence of the initial city patterns on subsequent growth.

**The Therapy of the Christian Body** - Brian Brock 2018-09-27

The troubles and ills of the church today can only be understood and healed when Christians begin to face up to their hidden alliances with the Corinthians of the first century and embrace both the Apostle's diagnosis and therapy offered in the epistle. This is the challenge of *The Malady and Therapy of the Christian Body*, a two-volume commentary by two leading theologians that presents the fruits of a reading strategy that deliberately reflects ecclesial commitment by "reading the Apostle over against ourselves." Sharing their discoveries about the way Paul deals with questions of factionalism, sexuality, legal conflict, idolatry, dress codes, and eating habits,

Brock and Wannewetsch demonstrate how neither the malady nor the therapy that Paul describes conforms to dominant analyses of the malaise of the contemporary church, which tend to be as "organ centered" as modern medicine. The authors describe the way the Apostle engages in "feeling-into" the organic whole of the body in order to detect blockages to the healthy flow of powers by redirecting their vision to how God is working among them toward the "building up" of the Christian body. The book breaks new ground in crossing the traditional disciplinary boundaries between biblical studies, systematic theology, and theological ethics.

**The Art of the Idea** - John Hunt 2013-04-16

"An original and beautiful book. It suggests that the surest way to liberate ourselves is through the power of our ideas." —Nelson Mandela Foundation "This is not just one of those books that makes you think. It challenges you to think. It demands that you think, and to beware of all those obstacles that would stop you from trusting your instincts and finding an idea." —Lee Clow, Global Director of Media Arts, TBWA\Chiat Day As an award-winning playwright, author, and Worldwide Creative Director of TBWA, John Hunt has witnessed again and again the power of original thinking to transform both companies and individuals. In *The Art of the Idea*, Hunt addresses everyone from the global boardroom to the man on the street, bridging the gap with ease. Few can argue with Hunt's claim that it is ideas that move the world forward, and he refreshingly articulates that anyone can play: there is no hierarchy to original thinking. *The Art of the Idea* provides a toolbox for achieving excellence and offers a new way of defining your world. By illustrating how to create space so ideas can breathe, it provides a lifeline to those who find themselves stuck in a rut. Unassuming, original, and accessible, the publication includes insights by this leader in creative thinking, and is accompanied by 20 original paintings and collages by the internationally acclaimed South African artist Sam Nhlengethwa. *The Art of the Idea* grants permission to trust our instincts, endure initial ridicule, and practice thinking as a team sport. Whatever your idea is about ideas, this book will change it.

**Play, Pain and Religion** - Alison Robertson 2021

Play, Pain and Religion is the first consideration of the practices associated with BDSM (bondage, domination, sadism and masochism) in the context of religious studies scholarship. The focus is an exploration of BDSM experience as it emerges from the complex interactions of kink activities and relationship. Experiences categorised by BDSM practitioners as 'religious' and 'spiritual' are commonly described in the same terms, and given the same value, as descriptions of experiences which are not so categorised. Play, Pain and Religion examines practitioner accounts of BDSM experience alongside those practitioners' personal identification with these terms. This book argues that the significance of a given experience is not located solely within any intrinsic quality ascribed to it but in subsequent constructions around the nature and meaning of the event. It examines some such constructions, moving away from absolute definitions of religion or religions to consider the religious as an active process of meaning-, world- and story-making. By using this 'religioning' framework, this book examines ways in which BDSM can potentially be used in such processes. Play, Pain and Religion is a valuable resource for scholars of religion and of kink, for people interested in the complexities of ascribing meaning and value to human behaviour, and for kinksters interested in their own kink and why it is they do what they do.

**The Industries of the Future** - Alec Ross 2016-02-02

Leading innovation expert Alec Ross explains what's next for the world, mapping out the advances and stumbling blocks that will emerge in the next ten years—for businesses, governments, and the global community—and how we can navigate them. While Alec Ross was working as Hillary Clinton's Senior Advisor on Innovation, he traveled to forty-one countries. He visited some of the toughest places in the world—from refugee camps of Congo to Syrian war zones. From phone-charger stands in Rwanda to R&D labs in South Korea, Ross has seen what the future holds. Over the past two decades, the Internet has radically changed markets and businesses worldwide. In *The Industries of the Future*, Ross shows us what's next, highlighting the best opportunities for progress and explaining why countries thrive or sputter. He examines the specific fields that will most shape our economic future over the next ten years, including cybercrime and cybersecurity, the commercialization of genomics, the next step for big data, and the coming impact of digital technology on money, payments, and markets. And in each of these realms, Ross addresses the toughest questions: How will we have to adapt to the changing nature of work? Is the prospect of cyberwar sparking the next arms race? How can the world's rising nations hope to match Silicon Valley in creating their own innovation hotspots? Ross

blends storytelling and economic analysis to give a vivid and informed perspective on how sweeping global trends are affecting the ways we live, incorporating the insights of leaders ranging from the founders of Google and Twitter to defense experts like David Petraeus. *The Industries of the Future* takes the intimidating, complex topics that many of us know to be important and boils them down into clear, plain-spoken language. This is an essential work for understanding how the world works—now and tomorrow—and a must-read for businesspeople, in every sector, from every country.

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1914 edition. Excerpt: ...identical, is as much at home in the art of reasoning as anywhere else: and this is why no science, whether biology or any other, can offer any kind of reasoning, of which mathematics does not supply a simpler and purer counterpart. Thus, we are enabled to eliminate the only remaining portion of the old philosophy which could even appear to offer any real utility; the logical part, the value of which is irrevocably absorbed by mathematical science.--Comte, A. *Positive Philosophy*, Martineau, (London, 1875), Vol. 1, pp. 321-322. 1316. We know that mathematicians care no more for logic than logicians for mathematics. The two eyes of exact science are mathematics and logic: the mathematical sect puts out the logical eye, the logical sect puts out the mathematical eye; each believing that it can see better with one eye than with two. De Morgan, A. Quoted in F. Cajori: *History of Mathematics* (New York, 1897), p. 316. 1316. The progress of the art of rational discovery depends in a great part upon the art of characteristic (ars characteristica). The reason why people usually seek demonstrations only in numbers and lines and things represented by these is none other than that there are not, outside of numbers, convenient characters corresponding to the notions.--Leibnitz, G. W. *Philosophische Schriften Gerhardt Bd. 8*, p. 198. 1317. The influence of the mathematics of Leibnitz upon his philosophy appears chiefly in connection with his law of continuity and his prolonged efforts to establish a Logical Calculus.... To find a Logical Calculus (implying a universal philosophical language or system of signs) is an attempt to apply in theological and philosophical investigations an analytic method analogous to that which had proved so successful in... *Hinsdale Genealogy* - Herbert Cornelius Andrews 1906

**Al-Anons Twelve Steps & Twelve Traditions** - Al-Anon Family Group Headquarters, Inc 2005-12-01**Urban School Leadership** - Tom Payzant 2010-11-04

This important book, written by educational expert and urban school leader, Tom Payzant, offers a realistic understanding of what urban school leadership looks like from the inside. Payzant shares his first-hand knowledge of the unique managerial, instructional, and political tasks of this role. Effectively combining practical lessons and research, *Urban School Leadership* includes in-depth analysis of various leadership concerns. The book covers topics such as improving student achievement, working with unions, building community, and maintaining and developing resources. Most importantly, it offers stories of real school leaders whose successes and missteps reveal the inherent "messiness" of this difficult job. *Urban School Leadership* is part of the Jossey-Bass Leadership Library in Education series. "This important book provides compelling examples of how effective leaders can have hope, see progress, and achieve success for all children in the schools and districts they lead."—Richard Riley, former United States Secretary of Education "Tom Payzant is one of the few people who could provide such a comprehensive, useful book for educational leaders at all levels. This very practical book is grounded in the important experiences and impressive judgment of one of our nation's most

successful school superintendents"—Jon Schnur, co-founder and CEO, New Leaders for New Schools "Tom Payzant is one of the finest urban educators of our generation. Urban School Leadership is compelling, crisp, and wise—providing a clear path for those dedicated to improving the trajectory of children's lives."—Timothy F.C. Knowles, executive director, Center for Urban School Improvement, University of Chicago "Urban School Leadership is a must read for anyone interested in the landscape of urban public education in America."—Beverly Hall, superintendent, Atlanta Public Schools

**Research in Data Science** - Ellen Gasparovic 2019-03-25

This edited volume on data science features a variety of research ranging from theoretical to applied and computational topics. Aiming to establish the important connection between mathematics and data science, this book addresses cutting edge problems in predictive modeling, multi-scale representation and feature selection, statistical and topological learning, and related areas. Contributions study topics such as the hubness phenomenon in high-dimensional spaces, the use of a heuristic framework for testing the multi-manifold hypothesis for high-dimensional data, the investigation of interdisciplinary approaches to multi-dimensional obstructive sleep apnea patient data, and the inference of a dyadic measure and its simplicial geometry from binary feature data. Based on the first Women in Data Science and Mathematics (WiSDM) Research Collaboration Workshop that took place in 2017 at the Institute for Computational and Experimental Research in Mathematics (ICERM) in Providence, Rhode Island, this volume features submissions from several of the working groups as well as contributions from the wider community. The volume is suitable for researchers in data science in industry and academia.

*William Sheppard, Cromwell's Law Reformer* - Nancy L. Matthews 2004-07-08

This study presents a full account of Sheppard's employment under Oliver Cromwell's Protectorate as well as an examination of his family background and education, his religious commitment to John Owen's party of Independents and his legal philosophy. An appraisal of all Sheppard's legal works, including those written during the Civil War and the Restoration period, illustrates the overlapping concerns with law reform, religion and politics in his generation. Sheppard had impressively consistent goals for the reform of English law and his prescient proposals anticipate the reforms ultimately adopted in the nineteenth century, culminating in the Judicature Acts of 1875-8. Dr Matthews examines the relative importance of Sheppard's books to his generation and to legal literature in general. The study provides a full bibliography of Sheppard's legal and religious works and an appendix of the sources Sheppard used in the composition of his books on the law.

*Theological Education* - Andrew M. Bain 2018-01-08

This volume draws upon historical and theological sources and empirical research to provide a unique and diverse perspective on theological education in the twenty-first century. The volume develops and promulgates the best thinking about theological education by drawing upon the breadth of expertise represented by the faculty of colleges within the Australian College of Theology. This volume not only produces crucial insights for the future of theological education around the world but gives the Australian theological sector a voice to make its own unique contribution to the global dialogue about theological education.

**Sweeney Astray** - Seamus Heaney 2014-01-13

Sweeney Astray is Seamus Heaney's version of the medieval Irish work Buile Suibne. Its hero,

Mad Sweeney, undergoes a series of purgatorial adventures after he is cursed by a saint and turned into a bird at the Battle of Moira. Heaney's translation not only restores to us a work of historical and literary importance but offers the genius of one of our greatest living poets to reinforce its claims on the reader of contemporary literature.

**Opening Men's Eyes** - Michael Cardo 2012-02-20

Peter Brown, leader of South Africa's Liberal Party until its demise in 1968, is one of the unsung heroes of South Africa's struggle against apartheid in pursuit of non-racial democracy. In *Opening Men's Eyes*, author Michael Cardo tells the story of how a privileged youngster growing up in the all-white world of racially conservative Natal settler society had the scales of racial prejudice removed from his eyes and how he set about opening the eyes of his compatriots. Cardo brings to life Brown's friendships across the colour bar with the likes of Archie Gumede, later one of the founders of the United Democratic Front, and his close relationship with the celebrated novelist Alan Paton, author of *Cry, The Beloved Country*. The book provides the first documented history of the Liberal Party, and shows how it was radicalised under Brown's leadership. *Opening Men's Eyes* offers a fascinating sidelight on South Africa's political and intellectual history.

**The Inevitable** - Kevin Kelly 2017-06-06

"A quintessential work of technological futurism." - James Surowiecki, strategy + business, "Best Business Books 2017 - Innovation" From one of our leading technology thinkers and writers, a guide through the twelve technological imperatives that will shape the next thirty years and transform our lives Much of what will happen in the next thirty years is inevitable, driven by technological trends that are already in motion. In this fascinating, provocative new book, Kevin Kelly provides an optimistic road map for the future, showing how the coming changes in our lives—from virtual reality in the home to an on-demand economy to artificial intelligence embedded in everything we manufacture—can be understood as the result of a few long-term, accelerating forces. Kelly both describes these deep trends—interacting, cognifying, flowing, screening, accessing, sharing, filtering, remixing, tracking, and questioning—and demonstrates how they overlap and are codependent on one another. These larger forces will completely revolutionize the way we buy, work, learn, and communicate with each other. By understanding and embracing them, says Kelly, it will be easier for us to remain on top of the coming wave of changes and to arrange our day-to-day relationships with technology in ways that bring forth maximum benefits. Kelly's bright, hopeful book will be indispensable to anyone who seeks guidance on where their business, industry, or life is heading—what to invent, where to work, in what to invest, how to better reach customers, and what to begin to put into place—as this new world emerges.

**The (Im)possibility of Forgiveness** - Dion A. Forster 2019-09-10

The findings from this study go beyond biblical-theological scholarship on forgiveness. Dion Forster boldly succeeds in showing that creating conditions for deeper human connection transforms impossibility into possibility and shines a light on the face of "the Other", who can now be forgiven. --Pumla Gobodo-Madikizela, Professor and Research Chair of Historical Trauma and Transformation, Stellenbosch University Dion Forster refuses to accept the conclusion that understandings of forgiveness may be so different and complex across social, racial and cultural groups in South Africa that actual forgiveness may be impossible. Using Matthew 18:15-35 as a meeting ground, he gathers ordinary Methodist Christians for cross cultural, intergroup Bible reading. He draws upon the philosophical integral theory of Ken Wilber, the insights of intergroup contact theory and the methods of critical biblical exegesis to organize, analyse and understand this encounter. What emerges is a hopeful conclusion that differing conceptions of forgiveness - its challenges and possibilities - can be understood, shared and perhaps, actualized across social, racial and cultural barriers." --Bruce C. Birch, Dean and Professor of Biblical Theology, Wesley Theological Seminary Reading Dion Forster on the (im)possibility of forgiveness, I was once again struck by our desperate need to learn more about ourselves and one another, but also about the meaning of forgiveness in our respective communities. This is an excellent example of the potential of Intercultural Bible Reading. Forster not only makes an outstanding academic contribution with implications for New Testament studies, Systematic and Public Theology, but also for flesh and blood communities wrestling with the possibilities and perils of forgiveness. --Juliana Claassens, Professor of Old Testament Studies and Head of Department, Chair of the Gender Unit, Stellenbosch University This book deals with contested and topical matters. Biblical hermeneutics has always been contested - how to read and understand Biblical passages. Things become even more contested when such passages are read inter-culturally; they become even more contested when the words are about contested personal and social issues, like Jesus' words on forgiveness in Matthew 18. Empirical studies like this show how deeply contested such readings truly are in the context of South African churches, with their painful histories of division and conflict. Future academic work will, therefore, benefit from the creative and careful methodological approach developed in this study. However, this

book offers much more than academic promise - precisely because of the theme, so topical today and without doubt topical for a long time to come and in many other places in our contemporary world as well. Forster offers resources for reading and conversation for everyone concerned with public life today. This is public theology in action, showing how faith matters - without prescribing answers, but rather by invitation to join an informed discussion. --Dirk J Smit, The Rimmer and Ruth deVries Professor of Reformed Theology and Public Life, Princeton Theological Seminary

**Reality Radio** - John Biewen 2010-03-15

Over the last few decades, the radio documentary has developed into a strikingly vibrant form of creative expression. Millions of listeners hear arresting, intimate storytelling from an ever-widening array of producers on programs including This American Life, StoryCorps, and Radio Lab; online through such sites as Transom, the Public Radio Exchange, Hearing Voices, and Soundprint; and through a growing collection of podcasts. Reality Radio celebrates today's best audio documentary work by bringing together some of the most influential and innovative practitioners from the United States, Canada, the United Kingdom, and Australia. In these nineteen essays, documentary artists tell--and demonstrate, through stories and transcripts--how they make radio the way they do, and why. Whether the contributors to the volume call themselves journalists, storytellers, even audio artists--and although their essays are just as diverse in content and approach--all use sound to tell true stories, artfully. **Destructive Trends in Mental Health** - Rogers H. Wright 2013-01-22

This book takes as its inspiration the assumption that the atmosphere of intellectual openness, scientific inquiry, aspiration towards diversity, and freedom from political pressure that once flourished in the American Psychological Association has been eclipsed by an "ultra-liberal agenda," in which voices of dissent, controversial points of view, and minority groups are intimidated, ridiculed and censored. Chapters written by established and revered practitioners explore these important issues within the contexts of social change, the ways in which mental health services providers view themselves and their products, and various economic factors that have affected healthcare cost structure and delivery. In short, this book is intended to help consumers, practitioners, and policy makers to become better educated about a variety of recent issues and trends that have significantly changed the mental health fields.
