Canvey Island - Robert Hallmann 2006

Canvey Island, an island in the River Thames estuary off the coast of Essex, has a unique history. Its location has seen it welcome diverse people through the ages: from those who first came to harvest the seawater salt, to the Romans and traders who found it an entry point into the British Isles, to shepherds, cheese makers, and many others. Customer reviews: "Robert has done a wonderful job including covering areas not found in other publications on Canvey Island's history. A 'can't put down' book!" 9 June 2007, Dave Bullock, Prittlewell, Essex "This is an excellent book depicting Canvey's past, well written and informative, a must for any local or historian." 27 March 2009, R Shinn, Essex "This book outlines the true history of Canvey. I found it to be a fascinating journey through many hundreds of years. It has been thoroughly researched by the author. Many pictures I have never seen before, together with a little bit of the author's humour. It is a definite must for both Canveyites and expats alike." Councillor Joan Liddiard, Canvey Island, Essex

Islands - Mark Easton 2022-10-11

"A spellbinding serial voyage in which encounters with islands across time are gathered, displayed and reburnished. Memoir becomes morality, as the oldest human myths challenge present neglect and political malfunction." – Iain Sinclair "Illuminating, incisive and beautifully written." – Kirsty Young "From ancient Crete to modern Canvey, this is a fascinating voyage around island identity, exploring isolation and imagination through a wealth of stories from around the world." – Martha Kearney "A timely and original exploration of the liminalities of islands and the waters that envelop them: by turns beguiling, enchanting and ultimately affirming." – Sir Anthony Seldon "This is a huge theme which Mark Easton pursues with vigorous and beautifully clear prose. His archipelagic fascination is contagious. Read this and the maps in your mind will never be quite the same again." – Peter Hennessy *** No man is an island, wrote John Donne. BBC Home Editor Mark Easton argues the opposite: that we are all islands, and it is upon the contradictory shoreline where isolation meets connectedness, where 'us' meets 'them', that we find out who we truly are. Suggesting that a continental bias has blinded us, Easton chronicles a sweep of 250 million years of island history: from Pangaea (the supercontinent mother of all islands) to the first intrepid islanders pointing their canoes over the horizon, from exploration to occupation, exploitation to liberation, a hopeful journey to paradise and a chastening reminder of our planet's fragility. But that is only half of this mesmerising book: aided by the muse he names Pangaea, Easton also interweaves reflections on what he calls 'the psychological islands that form the great archipelago of humankind'. Taking readers on an enchanting adventure, he illustrates how understanding islands and island syndrome might help humanity get closer to the truth about itself. Brave, intelligent and haunting, *Islands* is a deep dive into geography, myth, literature, politics and philosophy that reveals nothing less than a map of the human heart.

Canvey Island - Geoff Barsby 2004-01-01

In this further selection of archive images the Canvey Island of the past has been evocatively recreated using over 200 photographs, postcards and engravings which illustrate the diverse history of this fascinating Essex island. This volume documents the important events and features which have shaped the island's history. From the time the pioneering engineer Brigadier-General R. B. Colvin built the bridge that connected Canvey Islanders to their neighbour Benfleet, to the beginnings of the resort that flourished in the heyday of the 1950s seaside holiday, Canvey Island has supported a unique and fascinating community. When Dutch settlers established one of the earliest communities on the island in the seventeenth century, their concern about providing defence from the sea's ravages was to be of paramount importance to future inhabitants. Despite numerous breaches of the sea wall defences Canvey Island has survived and continues to be a prominent feature in the south Essex landscape. Canvey Island: The Second Selection is a valuable pictorial history which will delight those who live and have lived in this area and for those who wish to revisit the former island communities as they used to be.

Spatial Behavior in Haredi Jewish Communities in Great Britain - Shlomit Flint Ashery 2019-09-25

This book focuses on the strict orthodox Jewish (Haredi) community, which comprises many sects whose communal identity plays a central role in everyday life and spatial organization. The research reveals and analyses powerful mechanisms of residential segregation acting at the apartment-, building- and near-neighbourhood levels. Identifying the main engines of spontaneous and organised neighbourhood change and evaluating the difficulties of liberalism dealing with non-autonomous individuals in the housing market sheds light on similar processes occurring in other city centres with diverse population groups. Highlighting the impact of various organisational levels on the spatial structure of the urban enclave, the book focuses on the internal dynamics of ethno-religious enclaves that emerge from three levels of action: (1) individuals' relationships with their own and other groups; (2) the community leadership's powers within the group and in respect of other groups; and (3) government directives and tools (e.g. planning). The study examines how different levels of communal organisation are reflected in the residential patterns of four British communities: the Litvish communities of Golders Green and Gateshead, and the Hassidic communities of Stamford Hill and Canvey Island.

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

No Sleep Till Canvey Island - Will Birch 2003

It began with an outrageous press trip to New York to launch unknown rock band Brinsley Schwarz, which went disastrously wrong, and it went on to launch the careers of Ian Dury, Elvis Costello and Joe Strummer. The pub rock scene of the early 1970s was one of the most eventful and important in British music history.

Guidelines for Developing Quantitative Safety Risk Criteria - CCPS (Center for Chemical Process Safety) 2009-08-31

Written by a committee of safety professionals, this book creates a foundation document for the development and application of risk tolerance criteria. Helps safety managers evaluate the frequency, severity and consequence of human injury. Includes examples of risk tolerance criteria used by NASA, Earthquake Response teams and the International Maritime Organization, amongst others. Helps achieve consistency in risk-based decision-making. Reduces potential liabilities in the use of quantitative risk tolerance criteria through reference to an industry guidance document.

Lees' Loss Prevention in the Process Industries - Frank Lees 2005-01-25

Over the last three decades the process industries have grown very rapidly, with corresponding increases in the quantities of hazardous materials in process, storage or transport. Plants have become larger and are often situated in or close to densely populated areas. Increased hazard of loss of life or property is continually highlighted with incidents such as Flixborough, Bhopal, Chernobyl, Three Mile Island, the Phillips 66 incident, and Piper Alpha to name but a few. The field of Loss Prevention is, and continues to, be of supreme importance to countless companies, municipalities and governments around the world, because of the trend for processing plants to become larger and often be situated in or close to densely populated areas, thus increasing the hazard of loss of life or property. This book is a detailed guidebook to defending against these, and many other, hazards. It could without exaggeration be referred to as the "bible" for the process industries. This is THE standard reference work for chemical and process engineering safety professionals. For years, it has been the most complete collection of information on the theory, practice, design elements, equipment, regulations and laws covering the field of process safety. An entire library of alternative books (and cross-referencing systems) would be needed to replace or improve upon it, but everything of importance to safety professionals, engineers and managers can be found in this all-encompassing reference instead. Frank Lees' world renowned work has been fully revised and expanded by a team of leading chemical and process engineers working under the guidance of one of the world's chief experts in this field. Sam Mannan is professor of chemical engineering at Texas A&M University, and heads the Mary Kay O'Connor Process Safety Center at Texas A&M. He received his MS and Ph.D. in chemical engineering from the University of Oklahoma, and joined the chemical engineering department at Texas A&M University as a professor in 1997. He has over 20 years of experience as an engineer, working both in industry and academia. New detail is added to chapters on fire safety, engineering, explosion hazards, analysis and suppression, and new appendices feature more recent disasters. The many thousands of references have been updated along with standards and codes of practice issued by authorities in the US, UK/Europe and internationally. In addition to all this, more regulatory relevance and case studies have been included in this edition. Written in a clear and concise style, Loss Prevention in the Process Industries covers traditional areas of personal safety as well as the more technological aspects and thus provides balanced and in-depth coverage of the whole

field of safety and loss prevention. * A must-have standard reference for chemical and process engineering safety professionals * The most complete collection of information on the theory, practice, design elements, equipment and laws that pertain to process safety * Only single work to provide everything; principles, practice, codes, standards, data and references needed by those practicing in the field

Canvey Island - James Runcie 2012-06-01

It is 1953 in Canvey Island. Len and Violet are at a dance. Violet's husband George sits and watches them sway and glide across the dance floor, his mind far away, trapped by a war that ended nearly ten years ago. Meanwhile, at home, a storm rages and Len's wife Lily and his young son Martin fight for their lives in the raging black torrent. The night ends in a tragedy that will reverberate through their lives. This poignant novel follows the family's fortunes from the austerity of the post-war years to Churchill's funeral, from Greenham Common to the onset of Thatcherism and beyond, eloquently capturing the very essence of a transforming England in the decades after the war. It is a triumph of understated emotion, a novel about growing up and growing old, about love, hope and reconciliation.

Understanding Great Expectations - George Newlin 2000

The fourth companion to a novel by or the works generally by Charles Dickens (1812-70) Newlin has produced. In a collection of primary documents, collateral readings, and essays, most of them excerpts from longer pieces he explores such aspects as what a gentleman of the early 19th century was, apprenticeship and the blacksmith, and making a fortune in Australia.

Flood Recovery, Innovation and Response - David G. Proverbs 2008

Recent catastrophes, from the 2004 Indian Ocean tsunami and the ravaging of New Orleans in the aftermath of Hurricane Katrina, to the 2007 floods in Bangladesh, England, and Texas, have made the world very ware of the need for better management of the response to flooding and of the rehabilitation of damaged areas. This book contains papers originally presented at the First International Conference on Flood Recovery Innovation and Response (FRIAR), held in London, UK, which brought together academics, practitioner, and government officials to share information on the state of the art in this field. The conference papers address one of six main themes: Risk management in relation to flood events and climate change; Pre-event planning (both short- and long-term) and business continuity; Management of major events so that coherent and seamless frameworks of support are created; Post damage restoration and recovery; Victims of flooding - including physiological and psychological public health risks; and International and national government policy. This book contains papers originally presented at the First International Conference on Flood Recovery Innovation and Response (FRIAR), held in London, UK. The papers presented at the conference are grouped into the following six main themes. Within the themes, papers cover such topics as: Flood defence methods; Financial and insurance issues; Coping strategies; Adaptive capacity; and Rural vs urban community approaches. The book will be of interest to practitioners, researchers, planners and all others interested in the topic of flooding.

England & Wales Island Bagging - Lisa Drewe 2021-10-07
England & Wales Island Bagging by Lisa Drewe is a stunning and informative guide to the islands of England, Wales, the Channel Islands and the Isle of Man. It is ideal for swimmers, kayakers, adventure travellers, wildlife spotters and ice cream connoisseurs. Go on an inspirational and fascinating coastline journey – familiar islands are visited, such as Lundy and the Isle of Wight; others are less well known, such as Gwini in Pembrokeshire and Coquet Island in Northumberland. Almost 300 islands are included, from larger, populated islands to remote, uninhabited islets – some can be reached by foot at low tide, others have ferry services, and some you will need your own transport, or be content to view them from the mainland. Once you've found your island this book introduces you to the best sites on the island to appreciate: hidden beaches and coves, the tastiest local food and the wildlife that can be seen in the locality. Watch the Cemlyn Bay terns on Anglesey, go paddleboarding around Mersea Island in Essex, walk in the footsteps of pilgrims on Lindisfarne in Northumberland, or enjoy ice cream from one of the smallest dairy herds in the country on St Agnes in the Isles of Scilly ... it's all there to be enjoyed in England & Wales Island Bagging.

Geography 360° Core Pupil Book 1 - Ann Bowen 2004
Separate Core and Foundation Books ensure that ALL pupils' needs are supported at exactly the right level. Identical pagination and coverage of the same topics makes them easy to use. Clear objectives for each unit helps pupils understand the purpose of their work. A self-assessment checklist at the end for pupils to check and follow-up their understanding and the 360 review page at the end of each chapter provides a ready-made assessment for teachers and a useful review for pupils.

A skills reference section can be used as a quick reminder and practice for skills such as drawing pictograms, bar charts and using atlases. Key words are highlighted and explained when first introduced in a unit to aid comprehension. Popular topics such as Earthquakes and Volcanoes are included in Book 3 to help maintain pupils' interest in Geography and encourage them to continue with the subject at GCSE level.

Treasured Islands - Peter Naldrett 2021-06-24

Islands represent adventure, mystery, wilderness and escapism. Surrounded by water, they're somewhere to run away to, to be marooned on, to find a paradise... The British Isles includes some 194 inhabited islands (out of a total of over 6,000), ranging from remote lost worlds to famous and popular holiday spots. And **Treasured Islands** includes them all, in one enticing package. This wonderfully comprehensive and inspiring guide starts off with a Best of... section, highlighting the ten best islands for foodies, wildlife, adrenaline-junkies and pure escapism. Then, region by region, the author explores the UK's most wonderful islands, including: Shetlands, Fair Isle, Orkneys, Outer
