*Teaching and Learning in Higher Education in India and Australia* - James Arvanitakis 2019-07-11

This book presents insights into the current state of higher education, emerging pedagogies and innovative technology-driven learning techniques in research and teaching. Focussing specifically on the higher education models in India and Australia, the volume explores concerns and policy interventions that will help promote research capability and culture. Globalisation, rise of information technology and the massification of education has shifted the foundations of higher education and universities in the world. This volume examines the best support structures that will allow educators to face the challenge of the increasingly diverse community of learners and teachers entering higher education; their varied levels of aspirations and expectations; the influence of technology in pedagogical practices; and the shrinking funds for teaching and research. By using case studies from India and Australia the book also looks at the benefits of cross-cultural collaborations in research and education. Comprehensive and resourceful, this volume will be useful for academics and scholars of education, higher education and research, sociology, public policy, development studies and for NGOs and think tanks working in these areas.

*Women and Work in Ireland* - Margret Fine-Davis 2020-10-19

This book chronicles the evolution of women's participation in the labour force in Ireland over the last five decades. This was largely spearheaded by married women and mothers, leading to many related social issues including childcare, flexible working, the sharing of domestic work and work-life balance. The book presents empirical data on these topics, drawn from the author's research spanning several decades, and shows how attitudes have evolved and influenced the development of social policy. The book begins by exploring the factors which predisposed some married women to enter the workplace in the early 1970s while most did not and examines the relative well-being of housewives and employed married women. It demonstrates the effects the anti-discrimination legislation of the 1970s had on women's perceived discrimination over time, showing that women initially denied their own discrimination. The history of childcare policy is examined from the early Government Working Party reports of the 1980s to the evolution of childcare policy in Ireland. Issues of work-life balance are presented through cross-cultural comparisons from Ireland and several European countries, and key questions are asked, such as "are men who work part-time seen as less

serious about their careers?" The concluding chapter focuses on how women's role in the workplace impacts on men and gender relations. Questions are posed concerning the ways in which men's roles need to adapt and the extent to which workplaces and social policy also need to change to accommodate men and women's needs for work-life balance. The book will be of interest to social scientists and to students. It will be a valuable resource for courses in the sociology of work and the family, gender studies, social psychology and Irish studies. By providing quantitative data in an accessible form, it will also provide a valuable case study for courses in social research methods.

*Critical Perspectives on Gender Equality Policies and Practices for Staff in Higher Education* - Sarah Barnard 2022-09-13

**The League of Ireland** - Conor Curran 2022-12-30

2021 saw the centenary of the formation of the League of Ireland, the Republic of Ireland's primary professional association football league. This new collection draws on the work of a number of leading historians of Irish soccer and seeks to examine a number of previously under-researched aspects relating to the league. The book examines the initial growth of clubs in Dublin and the Free State League's early turbulent history, while the impact of Irish players and administrators on the development of soccer clubs at home and abroad is also assessed. Following the partition of Ireland in 1921, players continued to move from Dublin clubs to those in Northern Ireland and this is also discussed, particularly in light of the Troubles of 1968-1998. Despite the migration of many Irish-born players to Britain, the League of Ireland has also attracted internationally based players and the impact of this is also examined. The role of the league in the provision of players for the Irish Olympic team is also explored, as is the work of SARI in its attempts to eradicate racism from Irish sport. This publication aims to commemorate some of those who have strived to maintain the League of Ireland's presence against the backdrop of what has become the world's most attractive football league, located in Ireland's neighbour, England. It will be of interest to researchers and advanced students of Sports, History,

Sociology and Politics. This book was originally published as a special issue of the journal, *Soccer & Society*.

**Young Adult Development at the School-to-Work Transition** - E.

Anne Marshall 2021-01-18

The school-to-work transition is a critical part of the human life-span for young adults, their families, and society. The timing of the transition varies greatly and its co-occurrence with a number of other life transitions make it challenging to summarize or generalize. Individual differences and normative developmental factors, as well as external contextual factors such as global pandemics, changing economic circumstances, workplace demands, and cultural shifts, intersect to create a range of challenges and opportunities for those navigating this transition. Written by internationally renowned scholars in developmental psychology, applied psychology, counseling, and sociology, the chapters in this book highlight the trends, issues, and actions that researchers, academics, practitioners, and policy makers need to consider in order to effectively support young adults' transition to work pathways. This volume provides an explicitly international perspective on this area, broad coverage of psychological topics on the school-to-work transition, and an inclusive focus on sub-groups and minority groups, making it a must-read for those who support young adults as they move from school to work.

*Psychology of Career Adaptability, Employability and Resilience* - Kobus Maree 2017-12-05

This book examines how the career counselling profession should respond to the changes in the world of work that have resulted from the increasing need to communicate faster and disseminate information more efficiently. It emphasizes the twin aims of enhancing a persons' career adaptability and helping them to become more employable, rather than linearly trying to find a job and remaining in one organisation for their entire career-lives. The book shows that, to achieve these aims, people need to acquire career resilience, especially since the world of work no longer provides workers with work-holding environments for the duration of their career-lives. It takes into account historical analyses which show that whenever major technological change has occurred and widespread job losses have ensued, people have managed to use the new technology to create new employment opportunities. Readers from career psychology and management research, vocational and professional career coaching, and students of career psychology will find this book delivers sound, updated theory demonstrating how perceived threats in the 21st century can conceivably be turned into opportunities.

*Arts and Cultural Management* - Constance DeVereaux 2018-09-03

Arts and Cultural Management: Sense and Sensibilities in the State of the Field opens a conversation that is much needed for anyone identifying arts management or cultural management as primary areas of research, teaching, or practice. In the evolution of any field arises the need for scrutiny, reflection, and critique, as well as to display the advancements and diversity in approaches and thinking that contribute to a discipline's forward progression. While no one volume could encompass all that a discipline is or should be, a representational snapshot serves as a valuable benchmark. This book is addressed to those who operate as researchers, scholars, and practitioners of arts and cultural management. Driven by concerns about quality of life, globalization, development of economies, education of youth, the increasing mobility of cultural groups, and many other significant issues of the twenty-first century, governments and individuals have increasingly turned to arts and culture as means of mitigating or resolving tough policy issues. For their growth, arts and culture sectors

depend on people in positions of leadership and management who play a significant role in the creation, production, exhibition, dissemination, interpretation, and evaluation of arts and culture experiences for publics and policies. Less than a century old as a formal field of inquiry, however, arts and cultural management has been in flux since its inception. What is arts and cultural management? remains an open question. A comprehensive literature on the discipline, as an object of study, is still developing. This State of the Discipline offers a benchmark for those interested in the evolution and development of arts and cultural management as a branch of knowledge alongside more established disciplines of research and scholarship.

The Human Rights-Based Approach to Higher Education - Jane Kotzmann 2018-04-05

A human right to higher education was included in the International Covenant on Economic Social and Cultural Rights (ICESCR), which came into force in 1976. Yet the world has changed significantly since the ICESCR was drafted. State legislation and policies have generally followed a neoliberal trajectory, shifting the perception of higher education from being a public good to being a commodity able to be bought and sold. This model has been criticized, particularly because it generally reinforces social inequality. At the same time, attaining higher education has become more important than ever before. Higher education is a prerequisite for many jobs and those who have attained higher education enjoy improved life circumstances. This book seeks to determine: Is there still a place for the human right to higher education in the current international context? In seeking to answer this question, this book compares and contrasts two general theoretical models that are used to frame higher education policy: the market-based approach and the human rights-based approach. In the process, it contributes to an understanding of the likely effectiveness of market-based versus human rights-based approaches to higher education provision in terms of teaching and learning. This understanding should enable the development of more improved, sophisticated, and ultimately successful higher education policies. This book contends that a human rights-based

approach to higher education policy is more likely to enable the achievement of higher education purposes than a market-based approach. In reaching this conclusion, the book identifies and addresses some strategic considerations of relevance for advocates of a human rights-based approach in this context.

Sports Law in Ireland - Laura Donnellan 2017-02-24

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Ireland deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policymakers access to sports law at this specific level. Lawyers representing parties with interests in Ireland will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

**Education Policy in Ireland Since 1922** - Brendan Walsh 2022-04-18

This book examines educational policy at primary, secondary and university level in Ireland from the foundation of the State to the present day. Primarily an attempt to set policy within a historical context, the book draws together compelling research on the evolution of key changes in topics as diverse as the use of corporal punishment, the evolution of skills policy in post-primary settings and the development of the universities in the post-1922 period. The book includes detailed analysis of more recent policy initiatives and changes in, initial teacher education, curriculum change, and special and inclusive education and will be of interest to those working in the various fields, students and the general public. It presents detailed discussions of change in the Irish education system, demonstrating how policy initiatives, particularly since the early 1990s, have brought about significant transformation at all levels. In doing so, the book also demonstrates that the origin of change often lay in earlier developments, particularly those of the mid-1960s. Policy development is closely linked to external factors and influences and chapters on academic selection and teachers' recollections of policy, for example, set developments within the wider historical context employing the views and recollections of teachers so that the influence of change on day-to-day practice is revealed.

*Policy Analysis in Ireland* - Hogan, John 2021-03-05

Leading Irish academics and policy practitioners present a current and comprehensive study of policy analysis in Ireland. Contributors examine policy analysis at different levels of government and governance including international, national and local and in the civil service, as well as non-government actors such as NGOs, interest groups and think tanks. They investigate the influential roles of the European Union, the public, science, quantitative evidence, the media and gender expertise in policy analysis. Surveying the history and evolution of public policy analysis in Ireland, this authoritative text addresses the current state of the discipline, identifies post-crisis developments and considers future

challenges for policy analysis.

*Law and Gender in Modern Ireland* - Lynsey Black 2019-02-21

*Law and Gender in Modern Ireland: Critique and Reform* is the first generalist text to tackle the intersection of law and gender in this jurisdiction for over two decades. As such, it could hardly have come at a more opportune moment. The topic of law and gender, perhaps more so than at any other time in Irish history, has assumed a dominant place in political and academic debate. Among scholars and policy-makers alike, the regulation of gendered bodies, and the legal status of sexual and gendered identities, is now a highly visible fault line in public discourse. Debates over reproductive justice (exemplified by the recent referendum to remove the '8th Amendment'), increased rights for lesbian, gay, bisexual and transgender persons (including the public-sanctioned introduction of same-sex marriage) and the historic mistreatment of women and young girls have re-shaped Irish public and political life, and encouraged Irish society to re-examine long-unchallenged gender norms. While many traditional flashpoints remain such as abortion and prostitution/sex work, there are also new questions, including surrogacy and the gendered experience of asylum frameworks, which have emerged. As policy-makers seek to enact reforms, they face a population with increasingly polarised perceptions of gender and a legal structure ill-equipped for modern realities. This edited volume directly addresses modern Irish debates on law and gender. Providing an overview of the existing rules and standards, as well as exploring possible options for reform, the collection stands as an important statement on the law in this jurisdiction, and as an invaluable resource for pursuing gendered social change. While the edited collection applies a doctrinal methodology to explain current statutes, case law and administrative practices, the contributors also invoke critical gender, queer and race perspectives to identify and problematise existing (and potential) challenges. This edited collection is essential reading for all who are interested in law, gender and processes of social change in modern Ireland.

**Migration and the Making of Ireland** - Bryan Fanning 2021-11-02  
Ireland has been shaped by centuries of emigration as millions escaped poverty, famine, religious persecution, and war. But what happens when we reconsider this well-worn history by exploring the ways Ireland has also been shaped by immigration? From slave markets in Viking Dublin to social media use by modern asylum seekers, *Migration and the Making of Ireland* identifies the political, religious, and cultural factors that have influenced immigration to Ireland over the span of four centuries. A senior scholar of migration and social policy, Bryan Fanning offers a rich understanding of the lived experiences of immigrants. Using firsthand accounts of those who navigate citizenship entitlements, gender rights, and religious and cultural differences in Ireland, Fanning reveals a key yet understudied aspect of Irish history. Engaging and eloquent, *Migration and the Making of Ireland* provides long overdue consideration to those who made new lives in Ireland even as they made Ireland new.

*Employability via Higher Education: Sustainability as Scholarship* - Alice Diver 2019-09-23

This book discusses the topic of graduate employability from the premise that in this era of ‘massification,’ economic austerity, and political uncertainties, higher education (HE) no longer guarantees a clear ‘work place advantage.’ Divided into three sections, the book offers theoretical and philosophical discourses on the ‘HE quandary,’ whilst taking into account – and critiquing – political, temporal, and national contexts. It culminates in an investigation into specific discipline areas. It offers insights into the way that institutions, decision-makers, academics, and professional support staff can work together towards ensuring that our graduates are able to cope with the varied demands and challenges of modern job markets. It harnesses arguments and reflections on the breadth and depth of the functions of HE, such as social transformation, promoting principles of social justice, and providing opportunities. It

grounds these in a triadic model for enhancing student engagement and holistic learning, namely, the emotional, cognitive, and behavioural aspects. As an anthology, it is forward-gazing in terms of the sustainability debate, whilst still offering evidence-based, research-grounded, practical suggestions to readers looking for tips and tools of the trade.

*OECD Skills Studies OECD Skills Strategy Northern Ireland (United Kingdom) Assessment and Recommendations* - OECD 2020-06-23

*Uncovering Food Poverty in Ireland* - Drew, Michael 2022-05-26

Michael Drew’s review of the causes and effects of food poverty in Ireland offers the first full-length study of this significant and protracted issue that has been exacerbated by COVID-19. The book brings together the complex picture emerging from interviews with users of food aid. Their pathways into and through food poverty are impacted by the policies and practices of government and employers with wide-ranging implications. The work explores the international landscape of food poverty and situates both experiences and responses in a comparative context. It considers how these results contribute to an understanding of the problem and what action should be taken.

*Handbook of Innovative Career Counselling* - Jacobus G. Maree 2019-07-20

This book examines a topic widely regarded as the most pressing in career counselling today, i.e., how to ensure that everyone receives

career counselling and that all workers have the opportunity to engage in sustainable, decent work. The author holds that career counselling should not only advance workers' self- and career construction, helping them design successful career-lives and make social contributions, and live purposeful lives - it should also expound new theoretical approaches and interventions. Furthermore, the book criticizes global society for overlooking the basic needs of many workers, especially the most vulnerable and disadvantaged. An important feature of the book is its emphasis on promoting a creative and innovative approach to career counselling so as to better answer contemporary career-related questions. It offers guidance on how to advance entrepreneurship and help workers develop critical thinking, curiosity, creativity, collaboration, and communication skills. In this way the book promotes innovation in career counselling and maps the way forward in a theoretical and practical manner that helps clients 'flourish' rather than merely 'survive' in turbulent times impacted by the fourth wave in psychology, career counselling, the economy, as well as the 4th industrial revolution (Work 4.0).

[Handbook of Research on Cybersecurity Risk in Contemporary Business Systems](#) - Adedoyin, Festus Fatai 2023-03-27

The field of cybersecurity is becoming increasingly important due to the continuously expanding reliance on computer systems, the internet, wireless network standards such as Bluetooth and wi-fi, and the growth of "smart" devices, including smartphones, televisions, and the various devices that constitute the internet of things (IoT). Cybersecurity is also one of the significant challenges in the contemporary world, due to its complexity, both in terms of political usage and technology. The Handbook of Research on Cybersecurity Risk in Contemporary Business Systems examines current risks involved in the cybersecurity of various business systems today from a global perspective and investigates critical business systems. Covering key topics such as artificial intelligence, hacking, and software, this reference work is ideal for computer scientists, industry professionals, policymakers, researchers, academicians, scholars, instructors, and students.

The chapters provide an overview of implementations in different regions of the world and provide numerous examples that can be transferred to other higher education institutions.

**Getting Skills Right Career Guidance for Adults in a Changing World of Work** - OECD 2021-01-26

Career guidance is a fundamental policy lever to help adults successfully navigate a constantly evolving labour market through advice and information on job and training opportunities. The COVID-19 pandemic has underscored the importance of career guidance services. This report scopes out initiatives in the area of career guidance for adults in OECD countries.

**Women and Careers** - Marilee Reimer 2018-10-24

The unifying theme of *Women and Careers* is women's educational and employment success, with the objective of profiling supportive public policy in global contexts from Atlantic Canada to Western Europe, Australia and China. It takes up the career processes of women from marginalized groups who have been underrepresented historically: women who are the first generation to graduate from university in both Atlantic Canada (New Brunswick) and China and rural women from the eastern most Canadian province (Newfoundland and Labrador). It examines the situation of marginalized Protestant women in Belfast, Northern Ireland, who benefit from a European Union program that supports their political and social involvement in an economically underdeveloped region and previously unimagined in a country once wrought by sectarian violence. A policy analysis of an Atlantic Canadian region after the dominant forestry industry leaves takes up policy options and women's possible agency should economic support return for small business networks and social enterprise, e.g., credit unions, food and social housing cooperatives. Proactive employment equity programs in Finland's Applied Science Institute and Switzerland's Forestry Institute provide cutting edge examples of diversity and inclusion policies in education and academia. A comparative study of Canada and Australia of two leading public service employers illustrates incremental outcomes for women managers and professionals but raises the ultimate question of the pace and necessary political will required to remove barriers to gender equality in countries with major gender inequities. *Women and Careers* examines a series of institutional contexts transnationally and the impact of policies, programs and economic re-structuring on careers outcomes. It displays the latest research on the topic and will be of interest both to students at an advanced level, academics, reflective practitioners, and diversity managers. It addresses the topics with regard to women's education and employment and will interest researchers, academics and policymakers in the fields of women's employment and career studies, diversity programs, organization studies, development policy, gender studies and globalization.

*Race Discrimination and Management of Ethnic Diversity and Migration at Work* - Joana Vassilopoulou 2019-08-28

*Race Discrimination and Management of Ethnic Diversity and Migration at Work* analyses nine countries' perspectives on Diversity Management and their increasing awareness of diversity, equality, racism and discrimination within companies and organisations throughout Europe. *Women, Inequality and Media Work* - Anne O'Brien 2019-05-30  
*Women, Inequality and Media Work* investigates how women experience gender inequality in film and television production industries. Examining women's place in the production of media is vital to understanding the broader and related question of how women are (mis)represented in media content. This book goes behind the camera to explore the world of women working in media industries and unpacks the systemic gender inequality that they experience at work. It argues that women internalize their experience of gender inequality by adopting various beliefs: whether it is that gender does not matter in the workplace; that the workplace is now post-feminist; or by adopting a sense of self as liminal, neither fully included nor excluded from the industry. Drawing on detailed academic research and empirical investigation, *Women, Inequality and Media Work* is an important and timely book for students, researchers and those working in media industries.

*European Pain Management* - Christopher Eccleston 2017-12-07

The European Pain Federation EFIC is made up of Chapters of the International Association for the Study of Pain (IASP). Its Health Care Professionals look after a population of over 740 million people in its 37 member countries. *European Pain Management* provides a review of the organization and delivery of pain care in the 37 European countries. Leaders in the field of pain management from each country offer a chapter on how their health and pain care services are organized, the demands of their specific populations, the specific national challenges they face, and examples of innovations and advances. After this comprehensive summary, key experts in the field discuss issues that are pertinent to all the European nations; ranging from working with young people to managing opioids, and the rise of pain as a specialism. The

final chapter pulls together themes from across the entire book, making a call to envision a new form of pain management for a new Europe. European Pain Management provides an authoritative summary, description, and discussion of the challenges and opportunities for improving the care of people living in pain.

**Recent Trends in International Migration of Doctors, Nurses and Medical Students** - OECD 2019-07-25

This report describes recent trends in the international migration of doctors and nurses in OECD countries. Over the past decade, the number of doctors and nurses has increased in many OECD countries, and foreign-born and foreign-trained doctors and nurses have contributed to a significant extent. New in-depth analysis of the internationalisation of medical education shows that in some countries (e.g. Israel, Norway, Sweden and the United States) a large and growing number of foreign-trained doctors are people born in these countries who obtained their first medical degree abroad before coming back. The report includes four case studies on the internationalisation of medical education in Europe (France, Ireland, Poland and Romania) as well as a case study on the integration of foreign-trained doctors in Canada.
