Playing the Trompowsky - Richard Pert 2013
If like most chess players you have a limited amount of time that you can spend studying, but you still want to push for an advantage with White,

then the Trompowsky is a great choice. The Trompowsky, 1.d4 Nf6 2.Bg5, has not been as deeply investigated as many of the main lines, and it is an attacking opening that is tricky for Black to face. As well as providing an attacking repertoire for White with the ambitious Trompowsky Attack, the author also covers 2.Bg5 against the Dutch Defense, as well as the Pseudo-Tromp, 1.d4 d5 2.Bg5.

New in Chess Yearbook 136 - Jan Timman 2020-11-16

New In Chess Yearbook, which appears four times a year, contains all major new chess opening developments. Each issue brings you dozens of new ideas on the cutting edge of modern chess theory. An accessible way to keep up to date with main line opening theory. Indispensable for advanced

players.

Openings for Amateurs - Pete Tamburro 2014-06-07

Learning how to start a game of chess is one of the most daunting tasks facing intermediate adult and young chess players. Award-winning chess teacher and championship scholastic coach Pete Tamburro offers practical guidance for avoiding common pitfalls at the chessboard, as well as effective strategies for meeting troublesome openings and a choice of openings reflecting his focus on ideas over memorization.

Caro-Kann Defence - Anatoly Karpov 2006

Anatoly Karpov shows how Black can not only survive White's aggression in the open lines of the Panov, but counterpunch and dominate the opening. He selects and analyzes the

many lines which provide Black not only with security but also with active play.

The Caro-Kann - Lars Schandorff 2010

In chess the Caro-Kann opening is one of Black's most reliable answers to 1.e4. It is a regular favorite of elite players, who know that computer-aided preparation now threatens the sharpest lines of the Sicilian or Ruy Lopez (at the very least with a forced draw). The Caro-Kann is less susceptible to such forcing lines - Black sets out to equalize in the opening, and win the game later. Grandmaster Lars Schandorff reveals a bulletproof chess opening repertoire and lucidly explains how Black should play the middlegame and endgame.

Unconventional Approaches to Modern Chess Volume 1 - Alexander Ipatov

2019-04-28

In this highly original book, Grandmaster Ipatov shares the chess philosophy that helped him become a top chess grandmaster. Contrary to the generally accepted norms that permeate the modern chess world, he argues that spending most of one's training time on studying opening theory and memorizing trending lines until move 30 is wrong. However, this is exactly how most beginners start learning chess nowadays. Some strong grandmasters also fall into this trap when they prioritize opening theory amongst other aspects of the game. This often leads to fundamental gaps in one's chess understanding which is really hard to fix, especially for young players. Ipatov's ideology lies in that one should work on enhancing his general chess understanding and

take on a surprise-first approach when it comes to playing openings in order to avoid opponents' preparation in the mainstream theory and take them out of book in the early stage of the game. Most of the book is comprised of Alexander Ipatov's original analyses covering a variety of offbeat opening lines from both White and Black's perspective. His recent match against the 2018 US Chess Champion Sam Shankland, where Ipatov implemented a novelty on move two - something unheard of in the modern era with millions of games being played to date - serves as a good illustration that the philosophy deserves more attention and research than it currently has. This book serves to fill in this gap and welcome more debate on the subject. Mastering the Chess Openings - John

Watson 2006

Presents information on the ideas and strategies for chess openings.

Win with the Caro-Kann - Sverre Johnsen 2021-03-04

The Caro-Kann is a rare beast among chess openings. While respected as a sound and safe way to start the game, it also avoids symmetry or simplification. This allows Black many ways to keep the game unbalanced and play for a win. Two Norwegian opening experts provide a set of options that take full advantage of this flexibility. In the main line, you are given a choice between the 4...Bf5 and the 5...exf6 systems - but both strictly in their modern dynamic forms! In the latter, Hansen is a world-leading authority, with a wealth of experience to explain the typical mistakes White makes when

facing this deceptively tricky line. By studying his material, you will be well ahead of the game in this rapidly-evolving system. For instance, the critical improvements over the Duda-Carlsen game in 2020 were already in Hansen's files from two years earlier. The other recommended systems for Black are also aggressive and very much the '21st-century Caro-Kann'. It's 3...c5 against the Advance, in which Hansen is also an outstanding specialist. The Panov Attack is answered with ...g6 lines - strategically ideal, and nowadays backed up by amazing modern computer analysis. Against the Two Knights, we are offered an ...exf6 option as well as the ...Bg4 approach. The repertoire is completed with good sensible recommendations against almost every other

conceivable move White can throw at the Caro-Kann. This extremely up-to-date book has an innovative structure, with 'lessons', model games and theory 'magnifiers'. Sverre Johnsen is a chess analyst, researcher, organizer, trainer and writer from Norway. He is co-author of Win with the London System and Win with the Stonewall Dutch, two of the best-selling openings books of recent years. Grandmaster Torbjorn Ringdal Hansen is also from Norway. He is one of the founders of the chess retail business Sjakket and works full-time as a chess trainer. He was the first coach of Magnus Carlsen (in 1999) and currently works with several grandmasters.

Starting Out - Joe Gallagher 2002
In this easy-to-read guide, Grandmaster Joe Gallagher goes back

to the basics of the Caro-Kann, studying the key principles of its many variations.

The Caro-Kann - Cyrus Lakdawala 2012

This new series provides an ideal platform to study chess openings. By continually challenging the reader to answer probing questions throughout the book, the Move by Move format greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of opening knowledge. Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn. This is an excellent way to study any chess opening and at the same time improve your general chess skills and knowledge. In this book, Cyrus Lakdawala examines the Caro-Kann,

which enjoys a richly deserved reputation as one of Black's most reliable defences. It provides an ideal blend of soundness and dynamism, which allows Black to create counterplay from a solid platform. Lakdawala shares his experience and knowledge of the Caro-Kann, presents a repertoire for Black and provides answers to all the key questions. Essential guidance and training in the Caro-Kann Includes a Caro-Kann repertoire for Black Utilizes an ideal approach to chess study

Complete Defense to King Pawn

Playing the Caro-Kann - Lars Schandorff
2021-03-26

The Caro-Kann is renowned as a top-tier chess defence to 1.e4, and Lars Schandorff's Grandmaster Repertoire book on this opening received rave reviews. As GM Zenon Franco Ocampos put it, "I cannot imagine a better way of converting into a Caro-Kann player." A decade later, Schandorff is back with a completely new repertoire which improves on his previous work in every way. Playing

the Caro-Kann offers a complete repertoire for Black after 1.e4 c6, based on 2.d4 d5 followed by 3.e5 Bf5 or 3.Nc3 dxe4 4.Nxe4 Nf6 5.Nxf6+ exf6. With cutting-edge analysis, thorough explanations of positional motifs and instructively annotated illustrative games, this book is essential reading for anyone with an interest in the Caro-Kann.

The 100 Best Chess Games of the 20th Century, Ranked - Andrew Soltis
2006-02-21

How does one determine the "best" chess games? What one may see as brilliant, another may see as simply necessary. Like some art lovers, chess fans claim that they know a good game when they see it, and that they know better from good. But "best"? How is this articulated? This book, itself a work of art, is

brought together by the use of five criteria: the overall aesthetics (clever and relentless are insufficient qualities); the originality (e.g., not yet another white knight sacrifice in a Sicilian); the level of opposition (the loser played very well); the soundness (i.e., are the moves refutable with perfect play?), accuracy (few of the moves are second-best), and difficulty (the winner overcame major obstacles) of the game; and finally the overall breadth and depth (one wants a series of sparkling ideas, with no dry patches). The 100 best games were taken from an initial field of about 7,000 played from 1900 through 1999 that had already gained some attention in magazines, books and periodicals. Three hundred games were

then selected that appeared to have features consistent with the criteria. The 300 games were evaluated with scores--points given for each category of criteria. The games were then ranked, one to 100, by the score they received. No attempt was made to balance the selection according to period, nationality of players or opening. Also included is a chapter on the most overrated games of the twentieth century and one on games that would have made the list if... Includes 335 diagrams, an index of players and an index of openings by ECO codes.

1000 Best Short Games of Chess - Irving Chernev 2013-02

Perhaps if you owned one of the four or five great chess libraries of the world, you could, by diligent search, find most or all of these delectable

nuggets. But who has either the time or the assets. So, Mr. Chernev, who has both, has provided us here with 1000 of the sweetest sugar-coated pills in all chess literature. Each introduced with a brief, pungent or witty commentary. Chess brevities have always exercised a special attraction for lovers of the royal game. It may be well that we welcome the punishment inexorably meted out for some trifling slip. Maybe it's our inherent sadism that makes us enjoy the spectacle of speedy punishment doled out to someone else, just as a fight fan thrills to a one-round knockout. Perhaps it's only our inherent laziness after all, to play over a brevity, one often need not bother to set up the pieces. Be that as it may, its popularity is universal. And here are the best of

them, gathered together in one volume, for your pleasure and enjoyment. Many of us know instances galore of beginners becoming a cropper after only a few moves through the "scholar's mate" or some other absurdity not necessarily so primitive. Yet it would be quite wrong to assume that only duffers suffer the ignominy of a speedy knockout. The victim may well be a famous master, as you will discover to your surprise, delight and, most of all, your deep, deep satisfaction. After all, if Morphy can be mated in 12 moves, Capablanca defeated in 13, and Lasker blitzed in 14, who are we to hide our heads in shame?

Bologan's Caro-Kann - Victor Bologan
2018-06-20

The Caro-Kann is one of the most important and popular responses to

1.e4. World champions Botvinnik, Petrosian, Karpov and Anand have played this reliable chess opening in many of their games. Present-day elite players such as Hikaru Nakamura and Fabiano Caruana are proving that the 'drawish' reputation of the Caro-Kann no longer holds in modern chess. Victor Bologan presents a complete Caro-Kann repertoire for Black that is much more than just a lucidly explained and highly playable set of responses. In many lines Bologan provides – as he has done in his other recent major chess opening books for New In Chess – two options to handle the Black position. Bologan's explanations are accessible for a wide range of players and he provides the reader with a thorough grounding in the strategic and tactical motifs. During his research,

Bologan has found many new ideas and resources. After reading and studying this book you are bound win many exciting games with Bologan's Caro-Kann!

Taming Wild Chess Openings - John Watson 2015-11-04

Effective recipes for club players No matter how unconventional, irrational or even crazy a chess opening is, sooner or later every chess player will have to face it. When that happens, you can count on a well-prepared opponent who is more than happy to roll out his pet line. John Watson and Eric Schiller provide club players with solutions to a huge selection of these rarely-played or tricky chess openings. They concentrate upon ideas and strategy, with enough analysis to satisfy the needs of practical play. Only when a

sharp reply is required, Watson and Schiller will recommend a more complex variation filled with tactics. In the vast majority of cases they present a simple and safe way to approach the position, requiring little memorization and still leading to a promising game. There is a lot of fun material in this book, and you may be surprised to see how even strong grandmasters have indulged in the craziest variations. Chess isn't all main lines and 20 moves of theory!

The Modernized Caro-Kann - Daniel Fernandez 2018-09

The Caro-Kann Defence, long renowned for being a solid and reliable defence against 1.e4, is undergoing a renaissance at the moment. In addition to being a mainstay in the repertoires of a recent World

Champion (Viswanathan Anand) and a 2018 World Championship candidate (Ding Liren), it is being flooded with new and creative ideas from a range of other top players, notably Anand's Indian Olympiad teammates Vidit and Adhiban. The pawn structures in this opening leave considerable room for individual interpretation. This book is written for the Black side, though new ideas for White are suggested and old ones occasionally improved. It contains not only the author's personal take on how to deal with all major White tries after 1.e4 c6, but also a range of alternatives for Black- to cater for different types of Caro-Kann player. This repertoire builds on the existing state of theory, taking it in novel, exciting and decidedly modern directions, while not

forgetting about the opening's sound strategic underpinnings.

A Vigorous Chess Opening Repertoire for Black - Or Cohen 2014-05-22

In amateur chess games, the most popular opening move for White is 1.e4, and the most reliable reply for Black is 1..e5, says FIDE Master Or Cohen. In this book, Cohen has created a vibrant and robust opening repertoire for Black after 1...e5, based on the Petroff Defence. Cohen presents inventive ways for Black to fight for the initiative in this dependable opening. He covers the entire spectrum, the main variations as well as the most unexpected and bizarre sidelines. In case White does not allow the Petroff, Cohen offers a set of recommendations for Black that is no less important and principled; his repertoire against the Vienna and

the King's Gambit, for example, is new and explosive. Most amateur White players faced with the Petroff will think that they will have an easy time, based on the peaceful reputation of this great opening among top grandmasters. Black players who have studied Or Cohen's book will make their life quite miserable. *Play the Caro-Kann* - Egon Varnusz 1991

Gone are the days when the Caro-Kann was adopted only with a view to playing for a draw. The 1980s saw a great resurgence of interest in the defence at all levels, and, while the Caro-Kann justly retained its reputation as Black's most solid response to 1 e4, the development of new ideas in both attack and defence has created a thoroughly modern and dynamic opening system suitable for

players of all temperaments. This revised and updated second edition provides a comprehensive review of current theory and, with over 60 complete games, illustrates the practical application of the key tactical and strategical ideas.

Chess Openings for White Explained - Lev Alburt 2010

"A must for every chess player!"-- Anatoly Karpov, 12th World Chess Champion

Beating the Open Games - Mihail Marin 2007

Acclaimed author and chess grandmaster Mihail Marin presents an opening repertoire for Black against the Open Games. This means providing an answer to 1.e4, but not considering the main lines of the Spanish Opening. This includes openings such as the Scotch, the

Vienna, the Spanish Exchange Variation, and even the notorious Kings Gambit. Marin uses his renowned writing skills to explain the ideas behind each move, so Beating the Open Games escapes the standard opening book trap of being a boring list of analysis. Marin has based the book mainly on his own repertoire and reveals many original moves and ideas. After studying this book the reader will not only have an excellent repertoire but also a deeper understanding of chess.

Fundamental Chess Openings - Paul van der Sterren 2009

- * The perfect survival guide to the chess openings
- * All openings covered
- * Detailed verbal explanations of plans for both sides
- * Up-to-date and featuring many tips and recommendations
- * Insights into the

'character' of each opening * Written by one of the world's foremost opening experts The first moves of a chess game define the nature of the whole struggle, as both players stake their claim to the critical squares and start to develop their plans. It is essential to play purposefully and to avoid falling into traps or reaching a position that you don't understand. This is not a book that provides masses of variations to memorize. Paul van der Sterren instead offers a wealth of ideas and explanation, together with the basic variations of each and every opening. This knowledge will equip players to succeed in the opening up to good club level, and provide a superb grounding in opening play on which to build a more sophisticated repertoire. The strategies he

explains will, unlike ever-changing chess opening theory, remain valid as long as chess is played, and so the time spent studying this book will be rewarded many times over. Grandmaster Paul van der Sterren has won the Dutch Championship on two occasions, and in 1993 reached the Candidates stage of the World Chess Championship. He is an internationally renowned chess writer and editor: he was one of the founding editors of *New in Chess*, for whose Yearbooks he has contributed more than 150 opening surveys.

How to Play the Caro-Kann Defence - Raymond D. Keene 1989

Play the Caro-Kann - Jovanka Houska 2007

In *Play the Caro-Kann*, International Master Jovanka Houska presents the

reader with a concise and trustworthy repertoire within this popular and dynamic opening, providing a solution against all of White's main possibilities. Houska examines the important tactical and strategic plans for both sides, arming the reader with enough information to begin playing the Caro-Kann with confidence in his or her own games.

How to Beat 1 D4 - James Rizzitano 2005

Rizzitano, author of Understanding Your Chess, presents a full repertoire for Black against 1 d4, based on the Queen's Gambit Accepted (QGA). The QGA is an extremely popular opening amongst players of all levels, as it gives Black free development and counterpunching potential, especially if White takes up the challenge and tries to set up

a broad pawn centre. The QGA's soundness is shown by the number of top-class grandmasters who have used it in critical games - it was a key factor in Short's victory over Karpov, and has even been used by Garry Kasparov at world-championship level. Rizzitano has chosen to recommend dependable main lines of the QGA, and throughout emphasizes how Black can create winning chances and White's typical ways to go wrong. The repertoire is completed by a set of weapons against White's alternatives to offering the Queen's Gambit, ranging from the stolid Colle to the weird Hodgson Attack and the reckless Blackmar-Diemer.

Caro-kann - Tim Sawyer 2016-08-12
Welcome to the Caro-Kann Defence chess opening. Play to win after 1.e4 c6. Tim Sawyer analyzes 120 games.

This expanded version matches the 2016 Kindle edition. It includes updated commentary, and an Index of Names to Games. The author tells stories and explains the chess opening strategy and tactics. Win in the Caro-Kann Defence. Be active! Punish your opponent. Play an opening used by every world champion for the past 100 years from one side or the other. Grandmasters in the past who played this as Black pieces include Capablanca, Botvinnik, Smyslov, Bronstein, Petrosian, Karpov, Kasparov and Anand. Most of the games in this book were played by the author. Many were against masters, experts and club players over 45 years of play. The author shows you typical examples in this proven defence. Follow ideas to surprise your opponent and win. This book

covers all the main variations after 1.e4 c6 2.d4 d5. That includes the 3.Nc3 Classical, 3.exd5 Exchange and Panov, 3.e5 Advance and the 3.f3 Fantasy Variation. Also included is the Blackmar-Diemer Gambit O'Kelly variation. The games tell stories about fascinating chess players. Examine a huge variety of openings from main lines to gambits. Find creative ideas and ways to improve. Have fun playing chess. Enjoy this book!

Chess Opening Essentials - Stefan Djuric 2015-09-01

Most chess opening books are either too detailed or too shallow. Chess Opening Essentials has exactly the right balance and is an accessible primer and a reference book at the same time. It gives a flavour of how every opening works and explains the

similarities with other openings, as well as the differences. In addition, it also points at the various middlegame plans that apply after the opening has ended. Beginning and improving chess players should get this powerful book before they buy ANY other chess opening book! *Helps beginners to develop a solid understanding of fundamental opening ideas *Gives casual players the ability to choose the opening that suits their style and taste *A tool for club players to test and review their opening repertoire *A reference book to which advanced players keep returning The authors do not propagate forcing tactical variations to be memorized mechanically, but explain what you should actually be trying to achieve when playing the opening of your choice. They include

the main alternative responses and give clear indications for further study. * Comprehensive: covers all main variations likely to arise * Easy-to-use: important moves and key positions are highlighted in colour * Long-lasting: it doesn't outdate because it is about basics – not the latest fashions * Complete: explains the plans and counterplans for both Black and White * Down-to-earth: simple, verbal introductions (not a database dump full of dead trees) * Convenient: every opening is illustrated with a number of instructive games

Pawn Power in Chess - Hans Kmoch
2013-04-09

Profoundly original book demonstrates how basic relationships of one or two pawns constitute winning strategy. Multitude of examples illustrate

theory. 182 diagrams. Index of games.

A Chess Opening Repertoire for Blitz & Rapid - Evgeny Sveshnikov

2016-03-23

In modern chess, faster time controls have become more important than ever. Every day, countless numbers of rated blitz and rapid games are being played in online and over-the-board competitions and championships. In blitz chess it is important to make

the right decisions quickly and almost instinctively. That is why world-famous opening expert Grandmaster Evgeny Sveshnikov and his son, International Master Vladimir Sveshnikov, have created an opening repertoire for club players that is forcing, both narrow and deep, and aggressive. The aim is to be in control as much as possible. You want to be the one who decides which opening is going to be played, you want to dictate the strategical and technical choices. And you want to keep the pressure, increasing your opponent's chances to stumble. If you play the lines the Sveshnikovs have selected, you will not end up in positions where finding the theoretically best move is all-important, but in positions where it is relatively easy to spot the moves

with the greatest practical effect. Your results will improve and you will probably end up playing their variations in 'slow chess' as well.

The Extreme Caro-Kann - Alexey

Bezgodov 2014-08-01

Alexey Bezgodov presents an unusual idea for White against the ever popular Caro-Kann Defence. The Russian Grandmaster and chess opening expert advocates a very early deviation, the annoying and little explored 3.f3!?. This move may look unimpressive at first sight, but it considerably complicates life for Caro-Kann players, as it makes Black's main problem bigger: the development of his bishop on c8. Small wonder that an increasing number of strong grandmasters, such as Vassily Ivanchuk, Alexander Morozevich and Judit Polgar, have

incorporated this move in their repertoire. After 3.f3!?, the bishop on c8 has nowhere to go, and Black will often struggle to avoid enduring problems. White's chances to obtain an advantage are substantial, as Bezgodov shows in this fascinating new chapter in modern chess opening theory, packed with original analysis and clear explanations.

The Caro-Kann Revisited - - Rambaldi

Francesco 2020-07-14

This book presents a comprehensive, ready-to-use, and high-quality repertoire for Black against 1.e4. With meticulous analysis and in-depth explanations, the author demonstrates how the Caro-Kann Defense can be used successfully by players of any level. He also draws on his experience and on his trove of novel ideas to present a new take on the Caro-Kann:

one that emphasizes Black's dynamic options while maintaining a solid and flexible setup.

Understanding the Chess Openings -

Sam Collins 2005

An invaluable guide to how modern chess openings are played. This major new work surveys all chess openings, providing a guide to every critical main line and featuring extensive descriptions of the typical strategies for both sides. These commentaries will be welcomed by all club and tournament players, as they will better help them handle middlegame positions arising from each opening.

The Final Theory of Chess - Gary M. Danelishen 2008

The Final Theory of Chess constructs an aggressive opening repertoire based primarily upon the use of

computer analysis. The work lays a solid foundation upon which further computer analysis may be built in order to solve the game. 404 pp. (Games/Gamebooks)

First Steps: The French - Cyrus Lakdawala

The French Defence is a highly reliable response to 1 e4 which is popular at all levels. With the first two moves, Black creates a solid foundation in the centre and seeks to put pressure on White's position in the early middlegame. In this book, International Master Cyrus Lakdawala explains the basic ideas in the French and examines the important variations. The key ideas are emphasized with notes, tips and warnings and the reader's understanding is tested with frequent exercises. This book tells you

everything you need to know in order to take your first steps with the French Defence. First Steps is a new opening series and is ideal for improving players who want simple and straightforward explanations. First Steps emphasizes: * the basic principles * the basic strategies * the key tricks and traps First Steps books are based around carefully selected instructive games which demonstrate exactly what both sides are trying to achieve. There is enough theory to enable the improving player to get to grips with the opening without feeling overwhelmed. If you want to take up a new opening, First Steps is the ideal place to start.

My First Chess Opening Repertoire for White - Vincent Moret 2016-05-11
Every chess player needs to decide

which openings he is going to play. But where do you start? The risk of drowning in the turbulent sea of opening theory is only too real for beginning amateurs. Often your goals and ambitions will be misguided. If you are trying to win in 20 moves, copy what's in fashion among top-GM's or memorize variations, you are wasting your time. Most likely you will never get to play your 'preparation' and end up aimlessly switching from one opening to the other. Experienced French chess trainer Vincent Moret provides a complete, ready-to-go chess opening repertoire for White with a sound set of lines that do not outdate rapidly, do not require memorization and are easy to digest for beginners and post-beginners. To show the typical plans and the underlying ideas in the

various lines of his repertoire, Moret not only selected games of grandmasters. He mainly uses games of young, improving players to highlight the errors they tend to make. With many exercises to test your understanding of the ideas behind the repertoire.

First Steps - John Emms 2018-02-02

First Steps books are based around carefully selected instructive games which demonstrate exactly what both sides are trying to achieve. There is enough theory to enable the improving player to get to grips with the opening without feeling overwhelmed.

The Classical Sicilian - Alex Yermolinsky 2006

Chess Explained is a new series of books about chess openings. They are not theoretical works in the traditional sense, but more a series

of lessons from a chess expert with extensive over-the-board experience with an opening. You will gain an understanding of the opening and the middlegames to which it leads, enabling you to find the right moves and plans in your own games. It is as if you were sitting at the board with a chess coach answering your questions about the plans for both sides, the ideas behind particular moves, and what specific knowledge you need to have. The Classical Sicilian is one of the most popular and respected systems of the Sicilian, and has been used frequently by players such as Anand, Kramnik and Shirov. Black develops his pieces more quickly than in many Sicilian systems, and intricate piece-play often results. The Classical Sicilian arises after the

moves 1 e4 c5 2 Nf3 d6 3 d4 cxd4 4
Nxd4 Nf6 5 Nc3 Nc6. White's most
popular and critical response is the
Richter-Rauzer Attack, and recent
years have seen a diversification in
the plans for both sides in this
perennially popular line. Against

White's alternatives to the Rauzer,
Yermolinsky covers lines that retain
the independent significance of the
Classical move-order, such as 6 Bc4
Qb6 - a line in which he is a leading
specialist.
