The American Marshall Plan Film Campaign and the Europeans - Maria Fritsche 2018-02-08

The US government launched the European Recovery Programme, otherwise known as the 'Marshall Plan', in order to save war-torn Europe from collapse in 1948. Yet while much is known about the economic side of the Marshall Plan, the extensive film campaign that accompanied it has been largely overlooked until now. The American Marshall Plan Film Campaign and the Europeans is the first book to explore the use of the Marshall Plan films and, importantly, their distribution and reception across Europe. The study examines every available film – the 170 that remain from the 200 estimated to have been made – and looks at how they were designed to instil hope, argue the case for economic restructuring and persuade the Europeans of the superiority of the liberal-capitalist system. The book goes on to reason that the films served as a powerful weapon in the cultural Cold War, but that the European audiences were by no means

passive victims of the US propaganda effort. Maria Fritsche discusses the Marshall Plan films in the context of countries across Western, Northern and Southern Europe, covering the majority of the 17 European countries that participated in the Plan in the process. The book incorporates 70 images and utilises a vast number of archival sources to explore the strategies the US adopted to sway the minds of the Europeans, the problems they encountered in the process and, not least, the varied responses of the European audiences. It is a vital study for any scholar or student keen to know more about postwar recovery in Europe, the legacy of the Second World War or America's relationship with Europe in the 20th century.

Historian Nicolaus Mills explores the Marshall Plan in all its dimensions to provide valuable lessons from the past about what America can and cannot do as a superpower.

Post-Imperium - Dmitri V. Trenin 2011-08-01

The war in Georgia. Tensions with Ukraine and other nearby countries. Moscow's bid to consolidate its "zone of privileged interests" among the Commonwealth of Independent States. These volatile situations all raise questions about the nature of and prospects for Russia's relations with its neighbors. In this book, Carnegie scholar Dmitri Trenin argues that Moscow needs to drop the notion of creating an exclusive power center out of the post-Soviet space. Like other former European empires, Russia will need to reinvent itself as a global player and as part of a wider community. Trenin's vision of Russia is an open Euro-Pacific country that is savvy in its use of soft power and fully reconciled with its former borderlands and dependents. He acknowledges that this scenario may sound too optimistic but warns that the alternative is not a new version of the historic empire but instead is the ultimate marginalization of Russia.

The United States and Western Europe Since 1945 - Geir Lundestad 2005-08-11

Based on new and existing research by a world-class scholar, this is the first book in twenty years to examine the dynamics of the entire American-West European relationship since 1945. The relationship between the United States and Western Europe has always been crucial and recent events dictate that it is

becoming ever more so. In this important new work, Geir Lundestad analyses the balance between the cooperation and conflict which has characterized this relationship in the post-war period. He examines talk of transatlantic drift, and the strain now apparent between the USA and the nation states of Western Europe. In the concluding section, Lundestad offers a topical view of the future of transatlantic interaction. Throughout the work Lundestad's much cited 'empire by invitation' thesis is both put into practice and extended in time and scope. This book is essential reading for anyone interested in one of the most important and enduring international relationships of the last sixty years. *The Global Findex Database 2017* - Asli Demirguc-Kunt 2018-04-19

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk.

Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of

global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

The Armed Forces Officer - Richard Moody Swain 2017

The Marshall Plan - Benn Steil 2018-02-13
Winner of the 2018 American Academy of Diplomacy Douglas Dillon Award Shortlisted for the 2018 Duff Cooper Prize in Literary Nonfiction “[A] brilliant book...by far the best study yet” (Paul Kennedy, The Wall Street Journal) of the gripping history behind the Marshall Plan and its long-lasting influence on our world. In the wake of World War II, with Britain’s empire collapsing and Stalin’s on the rise, US officials under new Secretary of State George C. Marshall set out to reconstruct western Europe as a bulwark against communist authoritarianism. Their massive, costly, and ambitious undertaking would confront Europeans and Americans alike with a vision at odds with their history and self-conceptions. In the process, they would drive the creation of

NATO, the European Union, and a Western identity that continue to shape world events. Benn Steil's "thoroughly researched and well-written account" (USA TODAY) tells the story behind the birth of the Cold War, told with verve, insight, and resonance for today. Focusing on the critical years 1947 to 1949, Benn Steil's gripping narrative takes us through the seminal episodes marking the collapse of postwar US-Soviet relations—the Prague coup, the Berlin blockade, and the division of Germany. In each case, Stalin's determination to crush the Marshall Plan and undermine American power in Europe is vividly portrayed. Bringing to bear fascinating new material from American, Russian, German, and other European archives, Steil's account will forever change how we see the Marshall Plan. "Trenchant and timely...an ambitious, deeply researched narrative that...provides a fresh perspective on the coming Cold War" (The New York Times Book Review), The Marshall Plan is a polished

and masterly work of historical narrative. An instant classic of Cold War literature, it "is a gripping, complex, and critically important story that is told with clarity and precision" (The Christian Science Monitor).

Marshall Plan Modernism - Jaleh Mansoor
2016-09-09

Focusing on artwork by Lucio Fontana, Alberto Burri, and Piero Manzoni, Jaleh Mansoor demonstrates and reveals how abstract painting, especially the monochrome, broke with fascist-associated futurism and functioned as an index of social transition in postwar Italy. Mansoor refuses to read the singularly striking formal and

procedural violence of Fontana's slit canvasses, Burri's burnt and exploded plastics, and Manzoni's "achromes" as metaphors of traumatic memories of World War II. Rather, she locates the motivation for this violence in the history of the medium of painting and in the economic history of postwar Italy. Reconfiguring the relationship between politics and aesthetics, Mansoor illuminates how the monochrome's reemergence reflected Fontana, Burri, and Manzoni's aesthetic and political critique of the Marshall Plan's economic warfare and growing American hegemony. It also anticipated the struggles in Italy's factories, classrooms, and streets that gave rise to Autonomia in the 1960s. Marshall Plan Modernism refigures our understanding of modernist painting as a project about labor and the geopolitics of postwar reconstruction during the Italian Miracle.
