Paediatric and Neonatal Critical Care Transport

- Peter Barry 2003-04-18

Sick babies and children are moved between hospitals for many reasons, often to receive specialist care and treatment not available locally. For the transfer to be safe and effective it is necessary to plan carefully for these occasions, and for the doctors and nurses attending the transport to be able to provide intensive care on the move. The book provides

guidance in both of these major areas. The first section - 'Planning for Safe and Effective Transport' - details issues to be considered by senior staff in setting-up or modernising a transport programme. General principles and relevant physiology are outlined, and vehicles and equipment are discussed in depth. The second section - 'Practical Transport Management' - is concerned with different patient groups and key clinical issues. These include the distinctive features of neonatal and paediatric patients, and management of airway, breathing and circulation. Other chapters discuss airborne transport, pharmacology, trauma, and special interventions for transport such as extracorporeal membrane oxygenation and inhaled nitric oxide.

Love by Night - SK Williams 2021-02-02

More of a story than a collection of poetry, *Love by Night* will whisk you away from your world and into the dreamy romantic night. *Love by Night* begins with anxious hesitation and

nervous attraction, grows into tender affection, blossoms into passionate love, delves deep into whimsical dreams, and finally builds an image of an idyllic future together, as the reader develops along with the two characters of this poetic story. Written as a conversation between two points of view in constant change and flux with each other, this book invites the reader into the conversation about the love that connects one person to another, but also all of us to each other. Through this written testament to the emotional journeys books can take us on, S. K. Williams breaks down stereotypes, sexism, relationship roles, and brings awareness to mental health, grief, anxiety, depression, how to move forward, how to love in a healthy way, and, most of all, how to love yourself when it feels impossible.

Tried & Tested - James Nswana 2021-10-05

Tried & Tested is A Book filled with many biblical characters that were tested by very unusual situations during their time. Isn't it ironic that today, we are living in uncertain times too and we are being tested & tried just as they were. From the biblical stories we outline, some were successful, and others failed. The ones that passed the test were given great rewards. 'Remember, short cuts make long delays.' The author points out a few life lessons on being tested. He also shows us the reasons why others passed, and others failed the test. These lessons have great rewards for those that pass them. Whenever God has tested us, we always emerge as pure gold when we stand firm to the end. One

of the metaphors that the Bible says about life is that it is just a test. The Lord tests people's character, faith, obedience, love, generosity, endurance, integrity, and loyalty. Character is both developed and revealed by testing.

The Happiest Baby on the Block - Harvey Karp, M.D. 2008-11-19

Perfect for expecting parents who want to provide a soothing home for the newest member of their family, *The Happiest Baby on the Block*, the national bestseller by respected pediatrician and child development expert Dr. Harvey Karp, is a revolutionary method for calming a crying infant and promoting healthy sleep from day one. In perhaps the most important parenting book of the decade, Dr. Harvey Karp reveals an extraordinary treasure sought by parents for centuries --an automatic "off-switch" for their baby's crying. No wonder pediatricians across the country are praising him and thousands of Los Angeles parents, from working moms to superstars like Madonna and Pierce Brosnan, have turned to him to learn the secrets for making babies happy. Never again will parents have to stand by helpless and frazzled while their poor baby cries and cries. Dr. Karp has

found there IS a remedy for colic. "I share with parents techniques known only to the most gifted baby soothers throughout history ...and I explain exactly how they work." In a innovative and thought-provoking reevaluation of early infancy, Dr. Karp blends modern science and ancient wisdom to prove that newborns are not fully ready for the world when they are born. Through his research and experience, he has developed four basic principles that are crucial for understanding babies as well as improving their sleep and soothing their senses: ·The Missing Fourth Trimester: as odd as it may sound, one of the main reasons babies cry is because they are born three months too soon. ·The Calming Reflex: the automatic reset switch to stop crying of any baby in the first few months of life. ·The 5 "S's": the simple steps (swaddling, side/stomach position, shushing, swinging and sucking) that trigger the calming reflex. For centuries, parents have tried these methods only to fail because, as with a knee reflex, the

calming reflex only works when it is triggered in precisely the right way. Unlike other books that merely list these techniques Dr. Karp teaches parents exactly how to do them, to guide cranky infants to calm and easy babies to serenity in minutes...and help them sleep longer too. ·The Cuddle Cure: the perfect mix the 5 "S's" that can soothe even the most colicky of infants. In the book, Dr. Karp also explains: What is colic? Why do most babies get much more upset in the evening? How can a parent calm a baby--in mere minutes? Can babies be spoiled? When should a parent of a crying baby call the doctor? How can a parent get their baby to sleep a few hours longer? Even the most loving moms and dads sometimes feel pushed to the breaking point by their infant's persistent cries. Coming to the rescue, however, Dr. Karp places in the hands of parents, grandparents, and all childcare givers the tools they need to be able to calm their babies almost as easily as...turning off a light. From the Hardcover edition.
