New Directions in Child Abuse and Neglect Research - National Research Council 2014-03-25

Each year, child protective services receive reports of child abuse and neglect involving six million children, and many more go unreported. The long-term human and fiscal consequences of child abuse and neglect are not relegated to the victims themselves -- they also impact their families, future relationships, and society. In 1993, the National Research Council (NRC) issued the report, *Understanding Child Abuse and Neglect*, which provided an overview of the research on child abuse and neglect. *New Directions in Child Abuse and Neglect Research* updates the 1993 report and provides new recommendations to respond to

this public health challenge. According to this report, while there has been great progress in child abuse and neglect research, a coordinated, national research infrastructure with high-level federal support needs to be established and implemented immediately. New Directions in Child Abuse and Neglect Research recommends an actionable framework to guide and support future child abuse and neglect research. This report calls for a comprehensive, multidisciplinary approach to child abuse and neglect research that examines factors related to both children and adults across physical, mental, and behavioral health domains--including those in child welfare, economic support, criminal justice, education, and health care systems--and assesses the needs of a variety of subpopulations. It should also clarify the causal pathways related to child abuse and neglect and, more importantly, assess efforts to interrupt these pathways. New Directions in Child Abuse and Neglect Research identifies four areas to look to in developing a coordinated research enterprise: a national strategic plan, a national surveillance system, a new generation of researchers, and changes in the federal and state programmatic and policy response.

A Practical Guide to the Evaluation of Child Physical Abuse and Neglect - Angelo P. Giardino 2010-06-09

As we near the 50th anniversary of the landmark article by C. Henry Kempe and his colleagues entitled "The Battered Child Syndrome", which ushered in the modern era of professional attention by pediatricians and other child health professionals, we have reason for both celebration and concern. We can take heart that over the recent decades, a great deal of professional attention focused on the problem of child abuse and neglect. In every state of the country, there are mandatory reporting laws that require nurses, physicians, and social workers to report suspicions of maltreatment to the appropriate authorities for investigation. The act of reporting provides legal immunity to the reporter except when performed in bad faith. Progress in

understanding the factors that place children at risk for harm from physical abuse and neglect now permits prevention and intervention. The peer-reviewed literature dealing with child abuse and neglect has proliferated with high quality work being done and reported on the many dimensions related to the epidemiology, mechanism, treatment, and prognosis of child maltreatment. Efforts are being directed toward developing an evidence-based approach to the prevention of child abuse and neglect. These are some of the positives. However, negatives exist and remain reasons for concern. Despite a tremendous amount of attention to the problem of maltreatment, there are at least 3 million reports of suspected child abuse and neglect made annually, with nearly 1 million cases being substantiated.

Assessing Dangerousness - Jacquelyn C. Campbell, PhD, RN, FAAN 2007-05-25

All of the contributors to this multidisciplinary volume have faced the difficult task of assessing the risk of family violence in a wide variety of settings--courts, clinics, shelters, emergency rooms, protective service offices, schools, batterer intervention programs, violence prevention programs, and more. Their combined experience in research and practice makes this an indispensable resource for all clinicians required to make predictions about violent behavior. Key features of this new edition include: Coverage of a wide breadth of clinical and court situations requiring threat assessments A review of the latest assessment instruments New findings on predicting fatal child abuse Legal and ethical issues in

risk assessment

The Emotionally Absent Mother - Jasmin Lee Cori 2010-09-14

Was your mother too busy, too tired, or too checked-out to provide you with the nurturing you needed as a child? Men and women who were “undermothered” as children often struggle with intimate relationships, in part because of their unmet need for maternal care. The Emotionally Absent Mother will help you understand what was missing from your childhood, how this relates to your mother’s own history, and how you can fill the “mother gap” by: Examining the past with compassion for yourself and your mother Finding the child inside of you and learning to mother yourself Opening to the archetype of the Good Mother Allowing friends and loved ones to provide support, guidance, and other elements of good mothering that you missed

Through reflections, exercises, and clear explanations, psychotherapist Jasmin Lee Cori helps adult sons and daughters heal the wounds left by mothers who failed to provide the essential ingredients that every child needs. She traces perceived personal “defects” back to mothering deficits, relieving self-blame. And, by teaching today’s undermothered adults to cultivate the mothering they missed, she helps them secure a happier future—for themselves and their children.

Mandated Reporting of Child Abuse and Neglect - Dr.

Kenneth Lau, LCSW 2008-12-02

"[A] concise and detailed description of a very complex issue...rich in detail and insight." --Leslie J. Temme, LCSW School of Social Work, Adelphi University "[A] 'must have' resource for practicing professionals and an invaluable teaching tool for social work students....This is precisely the book that mandated reporters seek to assist in the reporting process and understanding their legal obligations." --Keva M. Miller, PhD, LCSW School of Social Work, Portland State University In all states, social workers are required to report suspected child abuse and neglect, and face serious penalties if they fail to do so. But not all cases of abuse are obvious. Mandated reporters are thus confronted with a host of both legal and ethical quandaries when filing a report: What are the responsibilities of mandated

reporters? What are appropriate grounds for reporting abuse? How and when should a report be made? Does reporting suspected abuse violate client confidentiality? What if my employer encourages me not to report my suspicions? Addressing these questions and more, this book provides clear definitions of different types of child abuse, including physical, sexual, and emotional, and delineates guidelines on how to identify risk factors and signs of child maltreatment. The authors also clarify difficult ethical issues, including client confidentiality and privileged communication, and present numerous case studies and theoretical vignettes culled from their own experiences as social workers. This guide will be the one resource mandated reporters and social work students cannot do without.

This book draws on my years of practice to present an all-encompassing view of maltreatment, in its various guises, from symptoms of abuse and neglect to motivations of those who abuse and neglect children, as well as how the social services system intervenes. The questions asked of me by students, social service workers, and trainees have helped to shape the direction of the book. The responses from faculty reviewers who teach courses in child welfare have further fine-tuned what is presented here. My experiences not only as a protective social worker but also as a therapist treating victims,

families, and perpetrators and now as a clergywoman have helped to provide ideas for the illustrations and examples"--

Key Terms in each chapter are defined when first introduced and appear in the book's glossary. Conclusions and Definitions help students focus on the key concepts introduced in each chapter. The book opens with the background on child maltreatment including its history, an overview of the research, and the risk factors. Details about mandated reporting are also explored. Different forms of maltreatment--physical abuse, neglect, psychological maltreatment, sexual abuse, fetal abuse, and Munchausen by Proxy Syndrome--are then examined, along with resiliency, in a new chapter to this edition. Incidence estimates and consequences for each type of maltreatment are provided. Legal issues including forensic interviewing are then reviewed. The book concludes with what happens to a child after a report is filed along with suggestions for preventing child maltreatment. Intended as a text for courses in child abuse, child maltreatment,

family violence, or sexual and intimate violence taught in psychology, human development, education, criminal justice, social work, sociology, women's studies, and nursing, this book is also an invaluable resource to workers who are mandated reporters of child maltreatment and/or anyone interested in the problem. This book is based on the legal system and the Child Protection System in the United States of America.
