Chinati - Marianne Stockebrand 2020

A beautiful book on the famed Chinati Foundation in Marfa, Texas The Chinati Foundation, a world-famous destination for large-scale contemporary art, was founded by Donald Judd (1928-1994) to preserve and present a select number of permanent installations that were inextricably linked to the surrounding landscape in Marfa, Texas. This handsome publication, first published in 2010 and now available with a new chapter devoted to the permanent installation by Robert Irwin that was inaugurated in 2016 and a new foreword by Jenny Moore, director of the Chinati Foundation, describes how Judd developed his ideas of the role of art and museums from the early 1960s onward, culminating in the creation of Chinati. The individual installations featured here include work by John Chamberlain, Dan Flavin, David Rabinowitch, Roni Horn, Ilya Kabakov, Richard Long, Ingólfur Arnarsson, Carl Andre, Claes Oldenburg and Coosje Van Bruggen, and John Wesley, as well as by Judd himself. The book also features a complete catalogue of the collection and writings by Judd relating to Chinati and Marfa. Published in association with the Chinati Foundation/La Fundación Chinati

I Think You're Totally Wrong - David Shields 2015-09-01

Caleb Powell always wanted to become an artist, but he overcommitted to life; his former professor David Shields always wanted to become a human being, but he overcommitted to art. The stay-at-home dad (three young girls) and the workaholic writer (eighteen books) head to the woods to spend four days together in a cabin, arguing life vs. art. *I Think You're Totally Wrong* is an impassioned, funny, probing, fiercely inconclusive, nearly-to-the-death debate. Shields and Powell talk about everything—marriage, family, sports, sex, happiness, drugs, death, betrayal, and (of course) writers and writing—in the name of exploring and debating their central question: the lived life versus the examined life. There are no teachers or students here, no interviewers or interviewees, no masters of the universe—only a chasm of uncertainty, in a dialogue that remains dazzlingly provocative and entertaining from start to finish. James Franco's film adaptation of *I Think You're Totally Wrong*, starring the authors, premiered in 2015.

Methane Biocatalysis: Paving the Way to Sustainability - Marina G. Kalyuzhnaya 2018-06-20

This book provides in-depth insights into the most recent developments in different areas of microbial methane and methanol utilization, including novel fundamental discoveries in genomics and physiology, innovative strategies for metabolic engineering and new synthetic approaches for generation of feedstocks, chemicals and fuels from methane, and finally economics and the implementation of industrial biocatalysis using methane consuming bacteria. Methane, as natural gas or biogas, penetrates every area of human activity, from households to large industries and is often promoted as the cleanest fuel. However, one should not forget that this bundle of energy, carbon, and hydrogen comes with an exceptionally large environmental footprint. To meet goals of long-term sustainability and human well-being, all areas of energy, chemicals, agriculture, waste-management industries must go beyond short-term economic considerations and target both large and small methane emissions. The search for new environment-friendly approaches for methane capture and valorization is an ongoing journey. While it is not yet apparent which innovation might represent the best solution, it is evident that methane biocatalysis is one of the most promising paths. Microbes are gatekeepers of fugitive methane in Nature. Methane-consuming microbes are typically small in number but exceptionally big in their impact on the natural carbon cycle. They control and often completely eliminate methane emission from a variety of biological and geothermal sources. The tremendous potential of these microbial systems, is only now being implemented in human-made systems. The book addresses professors, researchers and graduate students from both academia and industry working in microbial biotechnology, molecular biology and chemical engineering.

I'm Getting My Act Together and Taking it on the Road - Nancy Ford 1980

This classic of 1970s feminism is a "consideration of life and love from the point of view of a woman taking her first steps along the rocky road of independence. Today is entertainer Heather Jones' 39th birthday, and to celebrate, she is preparing a new act for her nightclub opening that evening. Her new act is very personal, 'an explanation of where I'm coming from,' she tells her chagrined manager, Joe; she wants to describe what it feels like to be approaching 40 and learning to make her own way. ('Oh, you're not 39,' Joe insists. 'Look at these lines in my face,' she retorts. 'We'll fix it with the lights,' he replies.) Through the songs and sketches that comprise her act--and through the constant interruptions by Joe with his own hilariously revealing, chauvinistic comments and complaints--Heather tells of the trials of becoming her own independent woman, of doing her 'Strong Woman Number,' as she puts it. Poignantly wry, she tells of growing up in the pre-feminist 1950s ('The woman has to go 75% of the way because the man will go only 25%, if that much,' her mother instructed her); of her failed marriage, plagued by a lack of communication and emotional dishonesty; of trying to go it alone, discovering that she has become 'so self-sufficient I'm so easy to leave'--her lover thinks she's the most wonderful woman he has ever known, 'and yet, where is he? Right back there with his wife.' Here is a play that will strike the light of recognition in every reader, a clever, uplifting look at life in the 'age of liberation.'"--Adapted from dust jacket of Doubleday edition.

Radical Hollywood - Paul Buhle 2003-08-01

A controversial and fascinating rewriting of the history of cinema's golden age. *Radical Hollywood* is the first comprehensive history of the Hollywood Left. From the dawn of sound movies to the early 1950s, Paul Buhle and Dave Wagner trace the political and personal lives of the screenwriters, actors, directors, and producers on the Left and the often decisive impact of their work upon American film's Golden Age. Full of rich anecdotes, biographical detail, and explorations of movies well-known, unjustly forgotten, and delightfully bizarre, the book is "an intelligent, well argued and absorbing examination of how politics and art can make startling and often strange bedfellows" (Publishers Weekly). Featuring an insert of rare film stills *Radical Hollywood* relates the story-behind-the-story of films in such genres as crime, women's films, family cinema, war, animation, and, particularly, film noir.

What Does the President Do? - Kathleen Connors 2017-07-15

"The U.S. president is the face of the United States to the rest of the world. However, he or she doesn't have unlimited power within the country. The president has certain powers given by the Constitution, including the ability to make treaties, appoint some important government officials, and veto laws. Readers learn the many duties of the president in simple, clear language appropriate for both younger readers and older readers looking for a succinct review of the topic. Fact boxes supplement the main content with important details about checks and balances, amendments, and more that affect the presidency today."

Hollywood Highbrow - Shyon Baumann 2007-10-14

Today's moviegoers and critics generally consider some Hollywood products--even some blockbusters--to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie "art." Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In *Hollywood Highbrow*, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as

artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies--and not just European ones--deserved to be considered art.

Western Skies - Darden Smith 2022-03-05

Part prose, part album, and part photographic essay, *Western Skies* is a stunning homage to the mythologies of Texas. Amid a series of road trips across West Texas, Austin-based singer-songwriter Darden Smith found himself writing songs at the wheel and taking Polaroid photographs of the stark and ghostly terrain. Inspired by the spirit of the landscape, Smith scribbled his observations in a notebook and found new life in old lyrics--and between the prose, the music, and the images he captured with his camera, *Western Skies* came vividly to life. This beautifully designed and collectible book features everything Smith captured and created during his travels. The perfect companion piece to his latest album, also titled *Western Skies*, the book collects the sights and sounds of West Texas in a truly immersive and transportive way.

The 8-Hour Diet - David Zinczenko 2013-12-03

A paradigm-shifting diet plan that allows you to eat anything you want, as much as you want--and still strip away 20, 40, 60 pounds, or more. After conducting extensive research at the Salk Institute and the National Institute on Aging, poring over copious amounts of new research in intermittent fasting, and engaging 2,000 people for a test panel, bestselling authors David Zinczenko and Peter Moore determined that people can lose remarkable amounts of weight eating the foods they like best--as long as they eat within a set 8-hour time period. Fasting is, of course, an ancient spiritual and health practice, but it's also a way to sidestep many of the ills of the modern world--including diabetes, heart disease, and cognitive impairment. Zinczenko and Moore demonstrate how simply observing this timed-eating strategy, even just three days a week, will reset your metabolism so that you can enter fat-burning mode first thing in the morning--and stay there all day long. And by focusing on eight critical, nutrient-rich Powerfoods, you can build in a second layer of protection against Alzheimer's, heart disease, and even the common cold. In the book, you will find motivating strategies, delicious recipes, and an 8-minute workout routine to maximize calorie burn. The 8-Hour Diet promises to strip away unwanted pounds and give you the focus and willpower you need to reach your goals for weight loss and life.

The Secret Life of Puppets - Victoria Nelson 2003-11-01

In one of those rare books that allows us to see the world not as we've never seen it before, but as we see it daily without knowing, Victoria Nelson illuminates the

deep but hidden attraction the supernatural still holds for a secular mainstream culture that forced the transcendental underground and firmly displaced wonder and awe with the forces of reason, materialism, and science. In a backward look at an era now drawing to a close, *The Secret Life of Puppets* describes a curious reversal in the roles of art and religion: where art and literature once took their content from religion, we came increasingly to seek religion, covertly, through art and entertainment. In a tour of Western culture that is at once exhilarating and alarming, Nelson shows us the distorted forms in which the spiritual resurfaced in high art but also, strikingly, in the mass culture of puppets, horror-fantasy literature, and cyborgs: from the works of Kleist, Poe, Musil, and Lovecraft to Philip K. Dick and virtual reality simulations. At the end of the millennium, discarding a convention of the demonized grotesque that endured three hundred years, a Demiurgic consciousness shaped in Late Antiquity is emerging anew to re-divinize the human as artists like Lars von Trier and Will Self reinvent Expressionism in forms familiar to our pre-Reformation ancestors. Here as never before, we see how pervasively but unwittingly, consuming art forms of the fantastic, we allow ourselves to believe.

Microbial Production of Food Ingredients, Enzymes and Nutraceuticals - Brian McNeil 2013-03-21

Bacteria, yeast, fungi and microalgae can act as producers (or catalysts for the production) of food ingredients, enzymes and nutraceuticals. With the current trend towards the use of natural ingredients in foods, there is renewed interest in microbial flavours and colours, food bioprocessing using enzymes and food biopreservation using bacteriocins. Microbial production of substances such as organic acids and hydrocolloids also remains an important and fast-changing area of research. Microbial production of food ingredients, enzymes and nutraceuticals provides a comprehensive overview of microbial production of food ingredients, enzymes and nutraceuticals. Part one reviews developments in the metabolic engineering of industrial microorganisms and advances in fermentation technology in the production of fungi, yeasts, enzymes and nutraceuticals. Part two discusses the production and application in food processing of substances such as carotenoids, flavonoids and terpenoids, enzymes, probiotics and prebiotics, bacteriocins, microbial polysaccharides, polyols and polyunsaturated fatty acids. Microbial production of food ingredients, enzymes and nutraceuticals is an invaluable guide for professionals in the fermentation industry as well as researchers and practitioners in the areas of biotechnology, microbiology, chemical engineering and food processing. Provides a comprehensive overview of microbial flavours and colours, food bioprocessing using enzymes and food biopreservation using bacteriocins Begins with a review of key areas of systems biology and metabolic engineering, including methods and developments for filamentous fungi Analyses the use of microorganisms for the production of natural molecules for use in foods, including microbial production of food flavours and carotenoids
