Mathematics for Machine Learning - Marc Peter Deisenroth 2020-04-23

The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

The Way of the Linguist - Steve Kaufmann 2005-11

The Way of The Linguist, A language learning odyssey. It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across frontiers and language barriers like never before. The Internet brings different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia. Why do not more people do the same? In his book *The Way of The Linguist, A language learning odyssey*, Steve offers some answers. Steve feels anyone can learn a language if they want to. He points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.

Teach Yourself Russian - Daphne M. West 2002-08

This is a complete course in understanding, speaking and writing Russian. Master the Russian Alphabet, a Handwriting Practice Workbook - Lang Workbooks 2019-09-11

Do you want to perfect your handwriting? Do you need a trustworthy resource to teach your small children to trace the Russian alphabet? Then this workbook is the perfect companion for your studies. In it, you'll find all the modern Russian consonants and vowels, including upper and lower case variations in both the print and cursive handwriting styles. Your benefits: Clear large letters make it easy to recognize even the most detailed of the Russian characters. Detailed stroke order instructions provide you with a strong foundation to build your skills. Dedicated "Trace and Learn" sections are designed to imprint proper stroke technique onto

your muscle memory. Font variations in both the print and cursive form of each letter train your brain to recognize alternative character styles easily. Simple pronunciation guidelines prevent you from feeling overwhelmed while helping you to understand the basic sound of each letter. As a bonus, for each character, you'll find extra 8.5 x 11 inches pages fully dedicated to the handwriting practice of that letter, in both print and cursive, uppercase and lowercase, with and without a guiding background light-gray letter. Feel free to photocopy these pages as you wish to extend the lifetime value of your workbook. Special information: As with all Lang Workbooks, this work is a labor of love. Accordingly, if you are a teacher, a student of Russian, or homeschooling your children, then you can photocopy any part of this workbook for your own, or your students, personal use. Learning to write the Russian script by heart has never been made easy.

Automate the Boring Stuff with Python, 2nd Edition - Al Sweigart 2019-11-12

The second edition of this best-selling Python book (over 500,000 copies sold!) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic Automate the Boring Stuff with Python, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to:

- Search for text in a file or across multiple files
- Create, update, move, and rename files and folders
- Search the Web and download online content
- Update and format data in Excel spreadsheets of any size
- Split, merge, watermark, and encrypt PDFs
- Send email responses and text notifications
- Fill out online forms

Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in Automate the Boring Stuff with Python, 2nd Edition.

Confidence Project - Rob Yeung 2017-09-07

START YOUR CONFIDENCE PROJECT NOW Follow the practical advice within the book and undertake THE CONFIDENCE PROJECT; a complete plan for helping you make better decisions and take action in order to fulfil your true potential. Often the only thing separating successful people from the crowd is the self-belief they have running around inside their heads and their innate self-confidence. This book isn't about promoting unrealistic positive thinking - it will help you understand the complex psychology of your beliefs, your assumptions, opinions, values, attitudes, judgements, biases and delusions, and provide a pathway to more confidence. Some of us overestimate ourselves and are overconfident or even unwittingly arrogant and unable to see our flaws. Others underestimate ourselves and are unaware of our full potential. The reality is the most of us overestimate ourselves in some respects and underestimate ourselves in others. This book will open your eyes, doing away with unhelpful beliefs and instilling new, more helpful beliefs about yourself and the world.
