The Role of Comparative Philosophy in Bosnia and Herzegovina - Nevad Kahteran

2021-09-20

This collection of essays highlights that, despite its history of conflict, Bosnia and Herzegovina has a real enthusiasm for comparative philosophy. It illustrates the role of this type of philosophy in Bosnian culture and links it with developments in other parts of the world and other cultures. Part One consists of essays that have appeared, in slightly revised versions, in a number of journals and books that focus on relevant resources introducing this field in our region and especially Bosnia and Herzegovina, while Part Two consists of interviews with prominent scholars outside of this country. The book examines the challenges confronting the teaching of comparative philosophy within the university-level philosophy curriculum in Bosnia and Herzegovina and the surrounding countries in the Balkans, a part of the world where multicultural societies are the norm. Facing the twenty-first century, these confluences and cross-currents are increasingly gaining importance, especially in this region, with a comparativism of ethnocentrism and multiculturalism becoming a way of challenging stereotypes.

Existentialism - David Edward Cooper 1990-01-01

First published in 1990, Existentialism is widely regarded as a classic introductory survey of the topic. It has helped to renew interest in existentialist philosophy. Cooper places existentialism within the great traditions of philosophy, & argues that it deserves as much attention from analytic philosophers as it has always received on the continent. Discussions of the self & others, & of "Angst" & absurdity lead into chapters on existential freedom & the prospects for an existentialist ethics. Writers discussed include Husserl, Jaspers, Buber, Marcel, & Ortega. David E. Cooper provides a sympathetic, original account of a mainstream movement of philosophical thought, reconstructed from the best writing of Heidegger, Sartre, Merleau-Ponty & others.

A Practical Guide to World Philosophies - Monika Kirloskar-Steinbach 2021-01-14

Traditions throughout the world and across history have tackled fundamental questions about the human condition. This one-of-a-kind guide shows how these different philosophies can be effectively studied together. Monika Kirloskar-Steinbach's and Leah Kalmanson's introduction marks a break from conventional approaches. Instead of assuming philosophy has always operated with a single, easily identifiable conceptual framework across space and time, which we call-and have always called-philosophy, they attest to the plurality of concepts and methods adopted at different times and places. The book serves as a practical teaching guide to the theoretical and methodological diversification of philosophy as practiced in academia today. Complementing the Bloomsbury Introductions to World Philosophies series, it covers a variety of traditions featured in the book series, exploring how Anglo-American, Chinese, Indian, African, Islamicate, and Maori thinkers have all addressed fundamental questions such as: · How do we understand ourselves and our relations to others? · How do we understand our world? · How do we seek knowledge, share knowledge, and, importantly, intervene in the norms of received knowledge when needed? Featuring teaching notes, discussion questions, and a list of further reading, this is a book packed with the background, guidance, and tools required to teach

different philosophies. Through it we come to see why making room for different conceptual frameworks improves our understanding of ourselves and the worlds we live in.

William Blake as Natural Philosopher, 1788-1795 - Joseph Fletcher 2021-12-07

William Blake as Natural Philosopher, 1788-1795 takes seriously William Blake's wish to be read as a natural philosopher, particularly in his early works, and illuminates the way that poetry and visual art were for Blake an imaginative way of philosophizing. Blake's poetry and designs reveal a consistent preoccupation with eighteenth-century natural philosophical debates concerning the properties of the physical world, the nature of the soul, and God's relationship to the material universe. This book traces the history of these debates, and examines images and ideas in Blake's illuminated books that mark the development of the monist pantheism in his early works, which contend that every material thing is in its essence God, to the idealism of his later period, which casts the natural world as degenerate and illusory. The book argues that Blake's philosophical thought was not as monolithic as has been previously characterized, and that his deepening engagement with late eighteenth-century vitalist life sciences, including studies of the asexual propagation of the marine polyp, marks his metaphysical turn. In contrast to the vast body of scholarship that emphasizes Blake's early religious and political positions, William Blake as Natural Philosopher draws out the metaphysics underlying his commitments. In so doing, the book demonstrates that pantheism is important because it entails an ethics that respects the interconnected divinity of all material objects – not just humans – which in turn spurns hierarchical power structures. If everything is alive and essentially divine, Blake's early work implies, then everything is worthy of respect and capable of giving and receiving infinite delight. Therefore, one should imaginatively and joyfully immerse oneself in the community of other beings in which one is already enmeshed. Often in the works discussed in this book, Blake offers negative examples to suggest his moral philosophy; he dramatizes the disastrous individual and social consequences of humans behaving as if God were a transcendent, immaterial, nonhuman demiurge, and as if they were separate from and ontologically superior to the degraded material universe that they see as composed of inert, lifeless atoms. William Blake as Natural Philosopher traces the evolution of eighteenth-century debates over the vitalist qualities of life and the nature of the soul both in the United Kingdom and on the continent, devoting significant attention to the natural philosophy of Newton, Locke, Berkeley, Leibniz, Buffon, La Mettrie, Hume, Joseph Priestley, Erasmus Darwin, and many others.

[Mind and Body in Early China](#) - Edward Slingerland 2018-11-23

Mind and Body in Early China critiques Orientalist accounts of early China as the radical, "holistic" other. The idea that the early Chinese held the "strong" holist view, seeing no qualitative difference between mind and body, has long been contradicted by traditional archeological and qualitative textual evidence. New digital humanities methods, along with basic knowledge about human cognition, now make this position untenable. A large body of empirical evidence suggests that "weak" mind-body dualism is a psychological universal, and that human sociality would be fundamentally impossible without it. Edward Slingerland argues that the humanities need to move beyond social constructivist views of culture, and embrace instead a view of human cognition and culture that integrates the sciences and the humanities. Our interpretation of texts and artifacts from the past and from other cultures should be constrained by what we know about the species-specific, embodied commonalities shared by all humans. This book also attempts to broaden the scope of humanistic methodologies by employing team-based qualitative coding and computer-aided "distant reading" of texts, while also drawing upon our current best understanding of human cognition to transform our basic starting point. It has implications for anyone interested in comparative religion, early China, cultural studies, digital humanities, or science-humanities integration.

[Asian Heritage Management](#) - Kapila D. Silva 2013

The prevalent global heritage discourse has been primarily Euro-centric in its origin, premise, and praxis. Diverse cultural, historical, and geographical contexts, such as that of Asia, call for more context-specific approaches to heritage management. This book explores this complexity of managing the cultural heritage in Asia. Case studies include sites of Angkor, Himeji Castle, Kathmandu Valley, Luang Prabang, Lumbini, and Malacca, and the book uses these to explore the religious worldviews, heritage policies, intangible heritage dimensions, traditional preservation practices, cultural tourism, and the notion of cultural landscape that are crucial in understanding the cultural heritage in Asia. It critiques the contemporary regulatory frameworks in operation and focuses on the issues of global impact on the local cultures in the region. The book goes on to emphasize the need for integrated heritage management approaches that encompass the plurality of heritage conservation concerns in Asian countries. Themes are discussed from the vantage point of heritage scholars and practitioners in the South, Southeast, and East Asia. This book thus presents a distinctive Asian perspective which is a valuable source for students and

practitioners of heritage within and beyond the Asian context.

Duncan Richter explains each philosopher's thoughts on ethics, virtue, and character and discusses ensuing objections to each philosopher's arguments. Along the way, students are encouraged to think about their own lives, what it meant to be good, and why or, rather, if they should be good. Key terms appear for the first time in boldface, questions end each chapter, and suggestions for further reading are provided throughout."--Publisher's description.

[When Children Love to Learn](#) - Elaine Cooper 2004-04-07

They're hallmarks of childhood. The endless "why" questions. The desire to touch and taste everything. The curiosity and the observations. It can't be denied-children have an inherent desire to know. Teachers and parents can either encourage this natural inquisitiveness or squelch it. There is joy in the classroom when children learn-not to take a test, not to get a grade, not to compete with each other, and not to please their parents or their teachers-but because they want to know about the world around them! Both Christian educators and parents will find proven help in creating a positive learning atmosphere through methods pioneered by Charlotte Mason that show how to develop a child's natural love of learning. The professional educators, administrators, and Mason supporters contributing to this volume give useful applications that work in a variety of educational settings, from Christian schools to homeschools. A practical follow-up to *Crossway's For the Children's Sake*, this book follows a tradition of giving serious thought to what education is, so that children will be learning for life and for everlasting life.

[Pursuits of Wisdom](#) - John M. Cooper 2012-05-27

This is a major reinterpretation of ancient philosophy that recovers the long Greek and Roman tradition of philosophy as a complete way of life--and not simply an intellectual discipline. Distinguished philosopher John Cooper traces how, for many ancient thinkers, philosophy was not just to be studied or even used to solve particular practical problems. Rather, philosophy--not just ethics but even logic and physical theory--was literally to be lived. Yet there was great disagreement about how to live philosophically: philosophy was not one but many, mutually opposed, ways of life. Examining this tradition from its establishment by Socrates in the fifth century BCE through Plotinus in the third century CE and the eclipse of pagan philosophy by

Christianity, Pursuits of Wisdom examines six central philosophies of living--Socratic, Aristotelian, Stoic, Epicurean, Skeptic, and the Platonist life of late antiquity. The book describes the shared assumptions that allowed these thinkers to conceive of their philosophies as ways of life, as well as the distinctive ideas that led them to widely different conclusions about the best human life. Clearing up many common misperceptions and simplifications, Cooper explains in detail the Socratic devotion to philosophical discussion about human nature, human life, and human good; the Aristotelian focus on the true place of humans within the total system of the natural world; the Stoic commitment to dutifully accepting Zeus's plans; the Epicurean pursuit of pleasure through tranquil activities that exercise perception, thought, and feeling; the Skeptical eschewal of all critical reasoning in forming their beliefs; and, finally, the late Platonist emphasis on spiritual concerns and the eternal realm of Being. Pursuits of Wisdom is essential reading for anyone interested in understanding what the great philosophers of antiquity thought was the true purpose of philosophy--and of life.

Kant, Race, and Racism - Huaping Lu-Adler 2023

Kant scholars have paid relatively little attention to his raciology. They assume that his racism, as personal prejudice, can be disentangled from his core philosophy. They also assume that racism contradicts his moral theory. In this book, philosopher Huaping Lu-Adler challenges both assumptions. She shows how Kant's raciology--divided into racialism and racism--is integral to his philosophical system. She also rejects the individualistic approach to Kant and racism. Instead, she uses the notion of racism as ideological formation to demonstrate how Kant, from his social location both as a prominent scholar and as a lifelong educator, participated in the formation of modern racist ideology. As a scholar, Kant developed a ground-breaking scientific theory of race from the standpoint of a philosophical investigator of nature or Naturforscher. As an educator, he transmitted denigrating depictions of the racialized others and imbued those descriptions with normative relevance. In both roles, he left behind, as one of his legacies, a worldview that excluded non-whites from such goods as recognitional respect and candidacy for cultural and moral achievements. Scholars who research and teach Kant's philosophy therefore have an unshakable burden to take part in the ongoing antiracist struggles, through their teaching practices as well as their scholarship. And they must do so with a pragmatic attention to nonideal social realities and a deliberate orientation toward substantial racial justice, equality, and inclusion. Lu-Adler pushes the discourse about Kant and racism well beyond the old debates about whether he was racist or whether his racism contaminates his philosophy. By foregrounding the lasting legacies of Kant's raciology, her work calls for a profound reorientation of Kant scholarship.

A Philosophy of Gardens - David E. Cooper 2006-02-02

Why do gardens matter so much and mean so much to people? That is the intriguing question to which David Cooper seeks an answer in this book. Given the enthusiasm for gardens in human civilization ancient and modern, Eastern and Western, it is surprising that the question has been so long neglected by modern philosophy. Now at last there is a philosophy of gardens. Not only is this a fascinating subject in its own right, it also provides a reminder that the subject-matter of aesthetics is broader than the fine arts; that ethics is not just about moral issues but about 'the good life'; and that environmental philosophy should not focus only on 'wilderness' to the exclusion of the humanly shaped environment. David Cooper identifies garden appreciation as a special human phenomenon distinct from both from the appreciation of art and the appreciation of nature. He explores the importance of various 'garden-practices' and shows how not only gardening itself, but activities to which the garden especially lends itself, including social and meditative activities, contribute to the good life. And he distinguishes the many kinds of meanings that gardens may have, from representation of nature to emotionalexpression, from historical significance to symbolization of a spiritual relationship to the world. Building on the familiar observation that, among human beings' creations, the garden is peculiarly dependent on the cooperation of nature, Cooper argues that the garden matters as an epiphany of an intimate co-dependence between human creative activity in the world and the 'mystery' that allows there to be a world for them at all. A Philosophy of Gardens will open up this subject to students and scholars of aesthetics, ethics, and cultural and environmental studies, and to anyone with a reflective interest in things horticultural.

James Fenimore Cooper - Wayne Franklin 2008-10-01

James Fenimore Cooper (1789–1851) invented the key forms of American fiction—the Western, the sea tale, the Revolutionary War romance. Furthermore, Cooper turned novel writing from a polite diversion into a paying career. He influenced Herman Melville, Richard Henry Dana, Jr., Francis Parkman, and even Mark Twain—who felt the need to flagellate Cooper for his “literary offenses.” His novels mark the starting point for any history of our environmental conscience. Far from complicit in the cleansings of Native Americans that characterized the era, Cooper’s fictions traced native losses to their economic sources. Perhaps no other American writer stands in greater need of a major reevaluation than Cooper. This is the first treatment of Cooper’s life to be based on full access to his family papers. Cooper’s life, as Franklin relates it, is the story of how, in literature and countless other endeavors, Americans in his period sought to solidify their political and cultural economic independence from Britain and, as the Revolutionary generation died, stipulate what the maturing republic was to become. The first of two volumes, James Fenimore Cooper: The Early Years covers Cooper’s life from his boyhood up to 1826, when, at the age of thirty-six, he left with his wife and five children for Europe.

Animals and Misanthropy - David E. Cooper 2018-02-02

This engaging volume explores and defends the claim that misanthropy is a justified attitude towards humankind in the light of how human beings both compare with and treat animals. Reflection on differences between humans and animals helps to confirm the misanthropic verdict, while reflection on the moral and other failings manifest in our treatment of animals illuminates what is wrong with this treatment. Human failings, it is argued, are too entrenched to permit optimism about the future of animals, but ways are proposed in which individual people may accommodate to the truth of misanthropy through cultivating mindful, humble and compassionate relationships to animals. Drawing on both Eastern and Western philosophical traditions David E. Cooper offers an original and challenging approach to the complex field of animal ethics.

Meaning - David E. Cooper 2014-12-18

Meaning is one of our most central and most ubiquitous concepts. Anything at all may, in suitable

contexts, have meaning ascribed to it. In this wide-ranging book, David Cooper departs from the usual focus on linguistic meaning to discuss how works of art, ceremony, social action, bodily gesture, and the purpose of life can all be meaningful. He argues that the notion of meaning is best approached by considering what we accept as explanations of meaning in everyday practice and shows that in these situations we are explaining the appropriate fit of an item - whether a word or an artwork - with something larger than or outside of itself. This fuller account of meaning explores questions of the meaning of meaning and tackles issues such as whether meaning is just a misleading 'folk' term for something more basic, whether there really is meaning at all, and whether we should strive for meaning or let our lives 'just be' rather than mean. By taking the problem of meaning out of the technical philosophy of language and providing a more general account, Cooper is able to offer new insights into the import, function, and status of meaning that will be of interest not only to philosophers of language but to students and philosophers working in areas such as epistemology and metaphysics.

Senses of Mystery - David E. Cooper 2017-07-20

In this beautifully written book, David E. Cooper uses a gentle walk through a tropical garden – the view of the fields and hills beyond it, the sound of birds, voices and flutes, the reflection of light in water, the play of shadows among the trees and the presence of strange animals – as an opportunity to reflect on experiences of nature and the mystery of existence. Covering an extensive range of topics, from Daoism to dogs, from gardening to walking, from Zen to Debussy, Cooper succeeds in conveying some deep and difficult philosophical ideas about the meaning of

life in an engaging manner, showing how those ideas bear upon the practical question of how we should relate to our world and live our lives. A thought-provoking and compelling book, *Senses of Mystery* is a triumph of both storytelling and philosophy.

Philosophy and Jurisprudence in the Islamic World - Peter Adamson 2019-09-02

This book brings together the study of two great disciplines of the Islamic world: law and philosophy. In both sunni and shiite Islam, it became the norm for scholars to acquire a high level of expertise in the legal tradition. Thus some of the greatest names in the history of Aristotelianism were trained jurists, like Averroes, or commented on the status and nature of law, like al-Fārābī. While such authors sought to put law in its place relative to the philosophical disciplines, others criticized philosophy from a legal viewpoint, like al-Ghazālī and Ibn Taymiyya. But this collection of papers does not only explore the relative standing of law and philosophy. It also looks at how philosophers, theologians, and jurists answered philosophical questions that arise from jurisprudence itself. What is the logical structure of a well-formed legal argument? What standard of certainty needs to be attained in passing down judgments, and how is that standard reached? What are the sources of valid legal judgment and what makes these sources authoritative? May a believer be excused on grounds of ignorance? Together the contributions provide an unprecedented demonstration of the close connections between philosophy and law in Islamic society, while also highlighting the philosophical interest of texts normally studied only by legal historians.

Easy Beauty - Chloé Cooper Jones 2022-04-05

A New York Times Notable Book of 2022 * *Vulture's* #1 Memoir of 2022 * A Washington Post, Los Angeles Times, USA TODAY, Time, BuzzFeed, Publishers Weekly, Booklist, and New York Public Library Best Book of the Year From Chloé Cooper Jones—Pulitzer Prize finalist, philosophy

professor, Whiting Creative Nonfiction Grant recipient—an “exquisite” (Oprah Daily) and groundbreaking memoir about disability, motherhood, and the search for a new way of seeing and being seen. “I am in a bar in Brooklyn, listening to two men, my friends, discuss whether my life is worth living.” So begins Chloé Cooper Jones’s bold, revealing account of moving through the world in a body that looks different than most. Jones learned early on to factor “pain calculations” into every plan, every situation. Born with a rare congenital condition called sacral agenesis which affects both her stature and gait, her pain is physical. But there is also the pain of being judged and pitied for her appearance, of being dismissed as “less than.” The way she has been seen—or not seen—has informed her lens on the world her entire life. She resisted this reality by excelling academically and retreating to “the neutral room in her mind” until it passed. But after unexpectedly becoming a mother (in violation of unspoken social taboos about the disabled body), something in her shifts, and Jones sets off on a journey across the globe, reclaiming the spaces she’d been denied, and denied herself. From the bars and domestic spaces of her life in Brooklyn to sculpture gardens in Rome; from film festivals in Utah to a Beyoncé concert in Milan; from a tennis tournament in California to the Killing Fields of Phnom Penh, Jones weaves memory, observation, experience, and aesthetic philosophy to probe the myths underlying our standards of beauty and desirability and interrogates her own complicity in upholding those myths. “Bold, honest, and superbly well-written” (Andre Aciman, author of *Call Me By Your Name*) *Easy Beauty* is the rare memoir that has the power to make you see the world, and your place in it, with new eyes.
