Time-Driven Activity-Based Costing - Robert S. Kaplan 2007-02-22
In the classroom, ABC looks like a great way to manage a company's resources. But many executives who have tried to implement ABC on a large scale in their organizations have found the approach limiting and frustrating. Why? The employee surveys that companies used to estimate resources required for business activities proved too time-consuming, expensive, and irritating to employees. This book shows you how to implement time-driven activity-based costing (TDABC), an easier and

more powerful way to implement ABC. You can now estimate directly the resource demands imposed by each business transaction, product, or customer. The payoff? You spend less time and money obtaining and maintaining TDABC data—and more time addressing problems that TDABC reveals, such as inefficient processes, unprofitable products and customers, and excess capacity. The authors also show how to use TDABC to link strategic planning to operational budgeting, to enhance the due diligence process for mergers and acquisitions, and to support continuous improvement activities such as lean management and benchmarking. In presenting their model, the authors define the two questions required to build TDABC: 1) How much does it cost per time unit to supply resource capacity for each business process? 2) How much resource capacity (time) is required to perform work for a company's many transactions, products, and customers? The book demonstrates how to develop simple, valid answers to these two questions. Kaplan and Anderson illustrate the TDABC approach with a wealth of case studies, in diverse settings, based on actual implementations.

FUNDAMENTALS OF FINANCIAL MANAGEMENT - BHABATOSH BANERJEE 2015-05-01

Financial Management is so crucial for any organization—public or private sector—as profit maximization and increasing the shareholder value depend, to a large measure, on efficient and effective financial management of the company or firm. With this end in view, Professor Bhabatosh Banerjee, drawing from his expertise and his rich and long years of experience, gives a masterly analysis of the fundamental principles of financial management along with their applications. While retaining the distinguishing features of the previous edition, the book is now a much more comprehensive one on Financial Management. Significant changes have been incorporated into the chapters relating to cost of capital, analysis of leverages, capital structure theories and planning, capital budgeting decision, working capital management, changes in financial position, accounting ratios and financial statement analysis, mergers and acquisitions and corporate governance for further value addition of the book. The book is logically organized into five parts—Part I: Basic Concepts, Part II: Financial and Dividend Decisions, Part III: Investing in Long-term and Short-term Assets, Part IV: Performance Analysis and Measurement, Part V: Contemporary Topics—to enable the students to understand the concepts, with suitable cases, chronologically and more effortlessly. This book is primarily intended as a text for the students of commerce and management courses. It will also be highly useful for those appearing in CA and ICWAI examinations. In addition, the text will benefit practising finance and accounting professionals, corporate managers, and participants in management development programs. **KEY FEATURES** • Includes numerous illustrations, worked-out problems and exercises covering recent questions in university and professional examinations. • Gives corporate practices in professional management, wherever found necessary. This will enable the students to acquaint themselves with real-life situations. • Provides Case Studies in a few complex chapters to enhance the analytical and presentation skills of the students in a classroom setting.

International Handbook of Accounting Education and Certification - Kwabena Anyane-Ntow 2014-06-28

This is the first work of its kind. Original contributions from leading academicians, practitioners and accounting associations from around the world make this handbook a unique source of information on international accounting education and certification processes. A uniform format in most of the chapters allows for easy comparison between countries. This volume documents the development of accounting education and practice at country and global levels; studies the sensitivity of accounting education and practices to the unique socio-economic needs of its environment; and allows comparative studies at a time when attempts have begun to harmonize accounting education internationally. Most importantly, it shows how educational programmes around the world are preparing future accounting professionals to deal with the rapid technological and environmental changes of the 21st century.

Reproductive Politics and the Making of Modern India - Mytheli Sreenivas
2021-05-03

Open-access edition: DOI 10.6069/9780295748856 Beginning in the late nineteenth century, India played a pivotal role in global conversations about population and reproduction. In *Reproductive Politics and the Making of Modern India*, Mytheli Sreenivas demonstrates how colonial administrators, postcolonial development experts, nationalists, eugenicists, feminists, and family planners all aimed to reform reproduction to transform both individual bodies and the body politic. Across the political spectrum, people insisted that regulating reproduction was necessary and that limiting the population was essential to economic development. This book investigates the often devastating implications of this logic, which demonized some women's reproduction as the cause of national and planetary catastrophe. To tell this story, Sreenivas explores debates about marriage, family, and contraception. She also demonstrates how concerns about reproduction surfaced within a range of political questions—about poverty and crises of subsistence, migration and claims of national sovereignty, normative heterosexuality and drives for economic development. Locating India at the center of transnational historical change, this book suggests that Indian developments produced the very grounds over which reproduction was called into question in the modern world. The open-access edition of *Reproductive Politics and the Making of Modern India* is freely available thanks to the TOME initiative and the generous support of The Ohio State University Libraries.

The Philosopher's Stone for Sustainability - Yoshiki Shimomura 2012-09-19

Industrial Product-Service Systems (IPS2), which is defined as “an integrated industrial product and service offering that delivers value in use,” has expanded rapidly over the last decade. IPS2 has allowed us to achieve both high added value and high productivity and has enriched our QOL by improving the performance of products and services. We are now struggling with many awkward issues related to sustainability, but IPS2 is expected to be the “philosopher’s stone” for solving these issues. Following the pattern of conferences held in Cranfield in 2009, Linköping in 2010, and Braunschweig in 2011, the fourth International CIRP Conference on Industrial Product-Service Systems, held on November 8-9, 2012, in Tokyo, will cover various aspects of IPS2. Topics planned for this year’s

conference reflect the latest IPS2 information in both the natural sciences and humanities and include case studies from various industries. IPS2 is still a relatively new field, so it is important to keep track of the entire context in order to promote more cross-sectional cooperation between multimodal fields and disciplines. The fourth International CIRP Conference on Industrial Product-Service Systems will serve as a vital platform for such collaborations and the discussion of new scientific ideas.
