2014-04-04

First published in 1996. Routledge is an imprint of Taylor & Francis, an informa company.

Reading as Rhetorical Invention - Doug Brent 1992

Noting that teaching the research paper seldom gets below surface conventions, this book surveys the work of key theorists in rhetoric, past and present, and seeks to change the way teachers and students think about the relationship between writers and readers. Focusing on theorists who see the creation of knowledge as a social process, the book discusses reader response and discourse processing theories and develops a model of how an individual evolves a set of beliefs about the world. Chapters of the book are: (1) Starting Points; (2) Reading as Construction; Reading as Communication; (3) From Interpretation to Belief; (4) The Rhetoric of Reading as a Critical Technique; and (5) Implications for Teaching and for the Art of Rhetoric. Each chapter includes footnotes, and a five-page bibliography is attached. (NKA)

Thinking from A to Z - Nigel Warburton 2000

With 'Thinking from A to Z', Nigel Warburton presents an alphabetically arranged guide to help readers understand the art of arguing. This fully updated edition has many new entries including lawyer's answer, least worst option, stonewalling, sunk-cost fallacy and tautology.

OREGON WRITES OPEN WRITING TEXT. (PRODUCT ID 23840147). - JENN. KEPKA 2018

Introduction to Interdisciplinary Studies - Allen F. Repko 2016-10-12

The Second Edition provides a comprehensive introduction to interdisciplinary studies with an approach that is succinct, conceptual, and practical. Completely updated to reflect advances in the literature on research, learning, and assessment, the book describes the role of both disciplines and interdisciplinarity within the academy, and how these have evolved. Authors Allen F. Repko, Rick Szostak, and Michelle Phillips Buchberger effectively show students how to think like interdisciplinarians in order to facilitate their working with topics, complex problems, or themes that span multiple disciplines.

Making Sense of the Critical Curriculum - Jennifer E. Lerner 2007

Critical Learning for Social Work Students - Sue Jones 2013-05-13

Social work agencies want newly-qualified workers who can practice as highly motivated and self-flourishing professionals. To get to this stage, social work degree students need to be critical, analytical and evaluative in their thinking, reading and writing. And while lecturers may highlight this need when marking assignments, there is limited space to explore these topics within an already tight social work curriculum. This revised second edition helps to tackle this problem and goes to the heart of these essential skills. By using practical examples and interactive features *Critical Learning for Social Work Students* will help guide you through your degree and on to becoming a fully-developed and critical practitioner. It covers key areas of critical thinking such as developing a clear and logical argument as well as the application of self-evaluation and understanding the 'professional self'. For this edition there is a new chapter on developing emotional intelligence.

Visual Thinking Strategies - Philip Yenawine 2013-10-01

"What's going on in this picture?" With this one question and a carefully chosen work of art, teachers can start their students down a path toward

deeper learning and other skills now encouraged by the Common Core State Standards. The Visual Thinking Strategies (VTS) teaching method has been successfully implemented in schools, districts, and cultural institutions nationwide, including bilingual schools in California, West Orange Public Schools in New Jersey, and the San Francisco Museum of Modern Art. It provides for open-ended yet highly structured discussions of visual art, and significantly increases students' critical thinking, language, and literacy skills along the way. Philip Yenawine, former education director of New York's Museum of Modern Art and cocreator of the VTS curriculum, writes engagingly about his years of experience with elementary school students in the classroom. He reveals how VTS was developed and demonstrates how teachers are using art—as well as poems, primary documents, and other visual artifacts—to increase a variety of skills, including writing, listening, and speaking, across a range of subjects. The book shows how VTS can be easily and effectively integrated into elementary classroom lessons in just ten hours of a school year to create learner-centered environments where students at all levels are involved in rich, absorbing discussions.

Reception Study - James L. Machor 2001

First Published in 2001. Routledge is an imprint of Taylor & Francis, an informa company.

Everything's An Argument with Readings - Andrea A. Lunsford 2018-10-30

A streamlined argument guide plus provocative thematic reader, *Everything's an Argument with Readings* helps students understand and analyze the arguments around them as well as create their own. Lucid explanations cover the classical rhetoric of the ancient Greeks through the multimodal rhetoric of today, with professional and student models of every type. New attention to rhetorical listening skills teaches students to communicate effectively and ethically as they work through potentially contentious discussions in and outside the classroom. Thoroughly updated with fresh new selections in both the guide and the reader, this edition of *Everything's an Argument* captures the issues and images that matter to students today. LaunchPad for *Everything's an Argument* provides unique, book-specific materials for your course, such as brief quizzes to test students' comprehension of chapter content and of each reading selection.

LearningCurve--adaptive, game-like practice--helps students master important argument concepts, including fallacies, claims, and evidence. Also available in a brief version without the reader.

Models for Critical Thinking - Rutherford Albert 2019-08-17

Stay alert and avoid being tricked. Apply logic and analysis to your everyday life. Detect hidden assumptions, spot inconsistencies, and recognize dishonesty. The quality of our lives is determined by the quality of our thinking. And the quality of our thinking is often determined by the quality questions we ask from ourselves. Critical thinking is the art of asking relevant, necessary, and meaningful questions to discover the objective truth behind words, events, and opinions in general. Today we have more access to information than ever before. Information influences our world view and decisions often without us noticing it. Following wrong idols can lead us to bad decisions which lead to unhappiness and a dissatisfying life. When what's "right, beautiful, successful, and cool" gets dictated around us we often forget to think for ourselves and make our own choices. Thus we make bad decisions based on the opinion of others - not even our own. Who should make your life choices for you? You've put your own thoughts, wishes, and opinions off for too long. It's time for that to change. *Models for Critical Thinking* provides you with unique insights into the nature of thinking and reasoning - why are we often so wrong, why we are so inclined to avoid the responsibility of thinking for ourselves, and how can we develop solid, objective patterns of thought. This book is a guide for the notoriously "trusting," "overwhelmed," and "gullible". It is a deep psychological dive into what makes us stop thinking for ourselves, and how to systematically combat those compulsions. It's a book that stands apart from others because of the plethora of real-life examples, studies, and solutions. If you wish to add to your critical thinking toolkit, you'll find the step-by-step answer in here. *Models for Critical Thinking* lays out: - The function of critical thinking and its main obstacles. - The varied elements of critical reasoning. - Important abilities and traits of critical thinkers. - The vocabulary of critical analysis, - The models essential to critical thinking. The most secure way of making good decisions is to have well-practiced and predictable strategies that you can use when you are faced with a problem that requires deeper analysis. This book will provide you with helpful exercises and tips to help you can find better solutions to your problems. - Learn the essential critical thinking skills when reading, writing, and speaking; - Be on your guard for hidden cognitive traps when shopping and interacting with advertisers. - Discover the tools and strategies can help you become a more disciplined thinker, developing your analytical, reasoning, and reflective thinking skills. Be ready to learn. Be ready to argue intellectually. - Learn to read between the lines and assess the validity of statements. - Identify and separate logical and illogical reasoning. - Learn how to construct a fair, well-reasoned argument with the help of formal and

informal logic. As a physicist and computer scientist, I was always looking for logical, well-founded answers to questions. Yet, I needed to stay open to question my knowledge fairly often, revise my beliefs held, and unlearn some.

Collaborative Learning and Writing - Kathleen M. Hunzer 2014-01-10

Although most writing instructors know the benefits of collaborative learning and writing in college writing classes, many remain unsure how to implement collaborative techniques successfully in the classroom. This collection provides a diversity of voices that address the "how tos" of collaborative learning and writing by addressing key concerns about the process. Fresh essays consider the importance of collaborative work and peer review, the best ways to select groups in classes, integration of collaborative learning techniques into electronic environments, whether group learning and writing are appropriate for all writing classes, and ways special populations can benefit from collaborative activities. Despite its challenges, collaborative learning can prove remarkably effective and this study provides the advice to make it work smoothly and successfully.

The Ideas of Karl Marx - Stefano Petrucciani 2020-09-10

This book offers a complete presentation of the most important themes of Marx's thought, following the development of Marx's theory from the beginning to his death and offering a reconstruction and analysis that covers the whole of Marx's life and works. Each chapter presents one of the central topics of Marx's reflection: the confrontation with the Hegelian theory of the State (1843); the critique of political liberalism in the "On the Jewish Question"; the discovery of Political Economy in the Manuscripts of 1844; the new theory of history developed in *The German Ideology*; the political theory and the revolution of 1848; the critique of political economy from the *Grundrisse to Capital*; and the political thought of the last Marx (the Paris Commune and the critique of the German Social Democratic Party). Stefano Petrucciani is Professor of Political Philosophy at the University of Rome La Sapienza, Italy.

Understanding and Evaluating Research - Sue L. T. McGregor 2017-10-25

Understanding and Evaluating Research: A Critical Guide shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report. View the brief Table of Contents for this book.

Guiding Students Into Information Literacy - Chris Carlson 2009

Presents practical guidance of student activities involving reports and projects, from conception to the finished product, and includes handouts, websites, a bibliography, and an appendix with examples of research papers.

A Handbook for the Study of Suicide - Seymour Perlin 1975

Assessment for Learning Within and Beyond the Classroom - Siew Fun Tang 2016-06-29

These conference proceedings focus on "Assessment for Learning: Within and Beyond the Classroom" in recognition of the power of assessment for learning as a way of boosting student performance. They explore the breadth, depth and quality of the best models and practices, strategies, lessons learnt and discuss cases of successful implementation of assessment within the classroom and beyond, including the virtual space. They also provide fertile ground for stimulating and comparing responsive assessment approaches and practices in relatively new areas of assessment such as graduate capability assessment in view of the need for educational institutions to evidence graduate employability.

Writing Unleashed - Sybil Priebe 2019

"Welcome to *Writing Unleashed*, designed for use as a textbook in first-year college composition programs, written as an extremely brief guide for

students, jam-packed with teachers' voices, students' voices, and engineered for fun."--Foreword.

Feminism and Modern Philosophy - Andrea Nye 2004-07-31

A feminist approach to the history of modern philosophy reveals new insights into the lives and works of major figures such as Jean-Jacques Rousseau and David Hume, and is crucial to an appreciation of the advent of feminist philosophy. *Feminism and Modern Philosophy* introduces students to the main thinkers and themes of modern philosophy from different feminist perspectives, and highlights the role of gender in studying classic philosophical texts. This book shows how the important figures in the history of modern philosophy have been reinterpreted by feminist theory, including: * feminist critiques of Descartes' rationalism * Locke's 'state of nature' as it relates to the family * the charges of misogyny levelled against Kant In addition, the book introduces lesser-studied texts and interpretations, such as: * the metaphysics of Leibniz's contemporary, Anne Conway * Annette Baier's recent presentation and defence of Hume *Feminism and Modern Philosophy: An Introduction* is written in an accessible and lively style, and each chapter ends with a helpful annotated guide to further reading. It will be appropriate for philosophy as well as gender studies courses looking at the development of modern western thought.

Metacognition in Literacy Learning - Susan E. Israel 2006-06-17

This volume provides the first comprehensive, research-based examination of metacognition in literacy learning. Bringing together research findings from reading, linguistics, psychology, and education, it is logically organized as follows: Part I provides the theoretical foundation that supports the teaching of metacognition; Parts II and III provide new methods for metacognitive

assessment and instruction in literacy contexts at all grade levels; and Part IV provides new information on integrating metacognition into professional development programs. Key features include: *Chapter Structure. Teacher reflections at the beginning of each chapter illustrate teacher thinking about the chapter topic and metacognitive connections at the end of each chapter link its content with that of the preceding and following chapters.

*Contributor Expertise. Few volumes can boast of a more luminous cast of contributing authors (see table of contents). *Comprehensiveness. Twenty chapters organized into four sections plus a summarizing chapter make this the primary reference work in the field of literacy-based metacognition. This volume is appropriate for reading researchers, professional development audiences, and for upper-level undergraduate and graduate level courses in reading and educational psychology.

Critical Reading in Higher Education - Karen Manarin 2015-12-15

Faculty often worry that students can't or won't read critically, a foundational skill for success in academic and professional endeavors. "Critical reading" refers both to reading for academic purposes and reading for social engagement. This volume is based on collaborative, multidisciplinary research into how students read in first-year courses in subjects ranging from scientific literacy through composition. The authors discovered the good (students can read), the bad (students are not reading for social engagement), and the ugly (class assignments may be setting students up for failure) and they offer strategies that can better engage students and provide more meaningful reading experiences.

Speak Out, Call In - Meggie Mapes 2019

Critical Thinking - Gregory Bassham 2008

This clear, learner-friendly text helps today's students bridge the gap between everyday culture and critical thinking. The text covers all the basics of critical thinking, beginning where students are, not where we think they should be. Its comprehensiveness allows instructors to tailor the material to their individual teaching styles, resulting in an exceptionally versatile text.

The Sponsored Life - Leslie Savan 2010-06-17

How does a blatant lying in TV commercials—like Joe Isuzu's manic claims—create public trust in a product or a company? How does a company associated with a disaster, Exxon or Du Pont for example, restore its reputation? What is the real story behind the rendering of the now infamous Joe Camel? And what is the deeper meaning of living in an ad, ad, ad world?

For a decade, journalist Leslie Savan has been exposing the techniques used by advertisers to push products and pump up corporate images. In the lively essays in this collection, Savan penetrates beneath the slick surfaces of specific ads and marketing campaigns to show how they reflect and shape consumer ~~PROBES~~ Savan's interviews with ad agencies and corporate clients—along with her insightful analyses of influential TV sports—reveal how successful ~~Advertising Policy~~ ~~Ad Health~~ more than command attention. They are signposts to the political, cultural, and social trends that infiltrate the individual consumer's psyche. Think of the products associated with corporate mascots—the drum-beating bunny, the cereal-pushing tiger, the doughboy—that have become pop culture icons. Think cool. Think of the clothing manufacturer that uses multiracial imagery. Think progressive. Buy their worldview, buy their product. When virtually every product can be associate with some positive self-image, we are subtly refashioned into the advertiser's concept of a good citizen. Like it or not, we lead "the sponsored life."

From Critical Thinking to Argument - Sylvan Barnet 2019-10-02

From Critical Thinking to Argument is a brief but thorough guide to argument at a great value. This versatile text gives students strategies for critical thinking, reading, and writing and makes argument concepts clear through its treatment of classic and modern approaches to argument, including Aristotelian, Toulmin, and Rogerian argument, as well as visual rhetoric. For today's increasingly visual learners who are challenged to separate what's real from what's not, new activities and visual flowcharts support information literacy, and an appendix of practical Sentence Guides helps students incorporate the moves of academic writers into their own arguments. With just eighteen readings, this affordable guide can stand alone or complement an anthology.
