Strategic thinking in Government - Great Britain:
Parliament: House of Commons: Public Administration
Select Committee 2012-04-24

In the light of recent concerns about a strategic vacuum at the centre of Government, this Report explores the capacity of Ministers and officials to carry out long-term strategic thinking to tackle the complex, diverse and unpredictable domestic and global challenges the country faces. It finds that an absence of clear and precise definition of terms meant that policy and different levels of strategy became muddled, leading to unintended and unwelcome outcomes. Drawing on the evidence it received, the Report sets out clear definitions for national or 'grand' strategy, operational strategy and policy. PASC have produced a number of recommendations to overcome the barriers to working strategically in Government. Central to these recommendations is that the Government should publish an annual 'Statement of National Strategy' in Parliament which reflects the interests of all parts of the UK and the devolved policy agendas. The report states that the Cabinet and its committees are accountable for decisions, but there remains a critical unfulfilled role at the centre of Government in coordinating and reconciling priorities across departments, and of long-term and short-term goals. The report concludes that the government's six strategic aims as provided to PASC are "too meaningless to serve any useful purpose". The strategic aims of the Government, informed by public opinion, should reflect the UK's national character, assets, capabilities, interests and values, and provide an indication of the objectives which policies must achieve

Teams in Government - Jerry W. Koehler 1996-03-14

Like American business executives, many government leaders realize that a continuation of the traditional management of objectives approach will achieve failure. Those willing to change are searching for a new approach to managing government. The authors of Teams in Government believe the best approach is Total Quality Management (TQM). Why TQM? Because it consists of gradual, unending improvement activities that involve every person in the organization in a totally integrated effort to improve performance and quality at every level and to increase customer satisfaction. The government has two types of customers-the person who receives the benefits of its services and the taxpayer who supplies the money to fuel an efficient and effective operation. If you are looking for the tools and techniques that will enable you to deliver government services that not only meet but exceed the expectations of your customers, to do it right the first time, you need Teams in Government. Any government organization that wants to switch from focusing solely upon meeting the needs of the bureaucracy (primarily on meeting objectives and quotas designed by the upper echelon), who are furthest from your customers, will find TQM to be extremely effective.

United States Code - United States 2013

"The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited "U.S.C. 2012 ed." As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact

the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office"-- Preface.
