The Fire of the Jaguar - Terence Turner 2017
Not since Clifford Geertz's "Deep Play: Notes on the Balinese Cockfight" has the publication of an anthropological analysis been as eagerly awaited as this book, Terence S. Turner's *The Fire of the Jaguar*. His reanalysis of the famous myth from the Kayapo people of Brazil was anticipated as an exemplar of a new, dynamic, materialist, action-oriented structuralism, one very different from the kind made famous by Claude Lévi-Strauss. But the study never fully materialized. Now, with this volume, it has arrived, bringing with it powerful new insights that challenge the way we think about structuralism, its legacy, and the reasons we have moved away from it. In these chapters, Turner carries out one of the richest and most sustained analysis of a single myth ever conducted. Turner places the "Fire of the Jaguar" myth in the full context of Kayapo society and culture and shows how it became both an origin tale and model for the work of socialization, which is the primary form of productive labor in Kayapo society. A posthumous tribute to Turner's theoretical erudition, ethnographic rigor, and respect for Amazonian indigenous lifeworlds, this book brings this fascinating Kayapo myth alive for new generations of anthropologists. Accompanied with some of Turner's related

pieces on Kayapo cosmology, this book is at once a richly literary work and an illuminating meditation on the process of creativity itself.

Closing of the American Mind - Allan Bloom 2008-06-30

The brilliant, controversial, bestselling critique of American culture that "hits with the approximate force and effect of electroshock therapy" (The New York Times)—now featuring a new afterword by Andrew Ferguson in a twenty-fifth anniversary edition. In 1987, eminent political philosopher Allan Bloom published *The Closing of the American Mind*, an appraisal of contemporary America that "hits with the approximate force and effect of electroshock therapy" (The New York Times) and has not only been vindicated, but has also become more urgent today. In clear, spirited prose, Bloom argues that the social and political crises of contemporary America are part of a larger intellectual crisis: the result of a dangerous narrowing of curiosity and exploration by the university elites. Now, in this twenty-fifth anniversary edition, acclaimed author and journalist Andrew Ferguson contributes a new essay that describes why Bloom's argument caused such a furor at publication and why our culture so deeply resists its truths today.

The Culture and Civilisation of Ancient India in Historical Outline - D D Kosambi 2022-09-01
First published in 1965, *The Culture and Civilisation of Ancient India in Historical Outline* is a strikingly original work, the first real cultural history of India. The main features of

the Indian character are traced back into remote antiquity as the natural outgrowth of historical process. Did the change from food gathering and the pastoral life to agriculture make new religions necessary? Why did the Indian cities vanish with hardly a trace and leave no memory? Who were the Aryans - if any? Why should Buddhism, Jainism, and so many other sects of the same type come into being at one time and in the same region? How could Buddhism spread over so large a part of Asia while dying out completely in the land of its origin? What caused the rise and collapse of the Magadhan empire; was the Gupta empire fundamentally different from its great predecessor, or just one more 'oriental despotism'? These are some of the many questions handled with great insight, yet in the simplest terms, in this stimulating work. This book will be of interest to students of history, sociology, archaeology, anthropology, cultural studies, South Asian studies and ethnic studies.

In Defense of Legal Positivism - Matthew H. Kramer 2003

As an uncompromising defense of legal positivism, this book insists on the separability of law and morality. After distinguishing among three main dimensions of morality, the book explores a variety of ways in which law has been perceived by natural-law theorists as integrally connected to each of those dimensions. Some of the chapters pose arguments against major philosophers who have written on these issues, including David Lyons, Lon Fuller, Antony Duff, Joseph Raz, Ronald Dworkin, John Finnis, Philip Soper, Neil MacCormick, Robert Alexy, Gerald Postema, Stephen Perry, and Michael Moore. Several other chapters extend rather than defend legal positivism; they refine the insights of positivism and develop the implications of those insights in strikingly novel directions. The book concludes with a long discussion of the obligation to obey the law a discussion that highlights the strengths of legal positivism in the domain of political philosophy as much as in the domain of jurisprudence.

Watchmen and Philosophy - William Irwin
2009-05-04

Alan Moore's *Watchmen* is set in 1985 and chronicles the alternative history of the United States where the US edges dangerously closer to nuclear war with the Soviet Union. Within this world exists a group of crime busters, who don elaborate costumes to conceal their identity and fight crime, and an intricate plot to kill and discredit these "superheroes." Alan Moore's *Watchmen* popularized the graphic novel format, has been named one of Time magazine's top 100 novels, and is now being made into a highly anticipated movie adaptation. This latest book in the popular Blackwell Philosophy and Pop Culture series peers into Moore's deeply philosophical work to parse and deconstruct the ethical issues raised by *Watchmen*'s costumed adventurers, their actions, and their world. From nuclear destruction to utopia, from governmental authority to human morality and social responsibility, it answers questions fans have had for years about *Watchmen*'s ethical quandaries, themes, and characters.

Eating Animals - Jonathan Safran Foer
2010-09-01

Part memoir and part investigative report, *Eating Animals* is a groundbreaking moral examination of vegetarianism, farming, and the food we eat every day that inspired the documentary of the same name. Bestselling author Jonathan Safran Foer spent much of his life oscillating between enthusiastic carnivore and occasional vegetarian. For years he was content to live with uncertainty about his own dietary choices-but once he started a family, the

moral dimensions of food became increasingly important. Faced with the prospect of being unable to explain why we eat some animals and not others, Foer set out to explore the origins of many eating traditions and the fictions involved with creating them. Traveling to the darkest corners of our dining habits, Foer raises the unspoken question behind every fish we eat, every chicken we fry, and every burger we grill. A must-read for anyone who cares about building a more humane and healthy world, *Eating Animals* is a book that, in the words of the Los Angeles Times, places Jonathan Safran Foer "at the table with our greatest philosophers."

Modelling Learners and Learning in Science Education - Keith S. Taber 2013-12-11

This book sets out the necessary processes and challenges involved in modeling student thinking, understanding and learning. The chapters look at the centrality of models for knowledge claims in science education and explore the modeling of mental processes, knowledge, cognitive development and conceptual learning. The conclusion outlines significant implications for science teachers and those researching in this field. This highly useful work provides models of scientific thinking from different field and analyses the processes by which we can arrive at claims about the minds of others. The author highlights the logical impossibility of ever knowing for sure what someone else knows, understands or thinks, and makes the case that researchers in science education need to be much more explicit about the extent to which research onto learners' ideas in science is necessarily a process of developing models. Through this book we learn that research reports should acknowledge the role of modeling and avoid making claims that are much less tentative than is justified as this can lead to misleading and sometimes contrary findings in the literature. In everyday life we commonly take it for granted that finding out what another knows or thinks is a relatively trivial or straightforward process. We come to take the 'mental register' (the way we talk about the 'contents' of minds) for granted and so teachers and researchers may readily underestimate the challenges involved in their work.

The Hardest Job in the World - John Dickerson 2020-06-16

NEW YORK TIMES BESTSELLER • From the veteran political journalist and 60 Minutes correspondent, a deep dive into the history,

evolution, and current state of the American presidency, and how we can make the job less impossible and more productive—featuring a new post-2020–election epilogue “This is a great gift to our sense of the actual presidency, a primer on leadership.”—Ken Burns Imagine you have just been elected president. You are now commander-in-chief, chief executive, chief diplomat, chief legislator, chief of party, chief voice of the people, first responder, chief priest, and world leader. You’re expected to fulfill your campaign promises, but you’re also expected to solve the urgent crises of the day. What’s on your to-do list? Where would you even start? What shocks aren’t you thinking about? The American presidency is in trouble. It has become overburdened, misunderstood, almost impossible to do. “The problems in the job unfolded before Donald Trump was elected, and the challenges of governing today will confront his successors,” writes John Dickerson. After all, the founders never intended for our system of checks and balances to have one superior Chief Magistrate, with Congress demoted to “the little brother who can’t keep up.” In this eye-opening book, John Dickerson writes about presidents in history such a Washington, Lincoln, FDR, and Eisenhower, and and in contemporary times, from LBJ and Reagan and Bush, Obama, and Trump, to show how a complex job has been done, and why we need to reevaluate how we view the presidency, how we choose our presidents, and what we expect from them once they are in office. Think of the presidential campaign as a job interview. Are we asking the right questions? Are we looking for good campaigners, or good presidents? Once a candidate gets the job, what can they do to thrive? Drawing on research and interviews with current and former White House staffers, Dickerson defines what the job of president actually entails, identifies the things that only the president can do, and analyzes how presidents in history have managed the burden. What qualities make for a good president? Who did it well? Why did Bill Clinton call the White House “the crown jewel in the American penal system”? The presidency is a job of surprises with high stakes, requiring vision, management skill, and an even temperament. Ultimately, in order to evaluate candidates properly for the

job, we need to adjust our expectations, and be more realistic about the goals, the requirements, and the limitations of the office. As Dickerson writes, "Americans need their president to succeed, but the presidency is set up for failure. It doesn't have to be."

The Count of Monte Cristo - Alexandre Dumas

1926

On the 24th of February, 1815, the look-out at Notre-Dame de la Garde signalled the three-master, the Pharaon from Smyrna, Trieste, and Naples. As usual, a pilot put off immediately, and rounding the Chateau d'If, got on board the vessel between Cape Morgion and Rion island. Immediately, and according to custom, the ramparts of Fort Saint-Jean were covered with spectators; it is always an event at Marseilles for a ship to come into port, especially when this ship, like the Pharaon, has been built, rigged, and laden at the old Phocée docks, and belongs to an owner of the city. The ship drew on and had safely passed the strait, which some volcanic shock has made between the Calasareigne and Jaros islands; had doubled Pomegue, and approached the harbor under topsails, jib, and spanker, but so slowly and sedately that the idlers, with that instinct which is the forerunner of evil, asked one another what misfortune could have happened on board. However, those experienced in navigation saw plainly that if any accident had occurred, it was not to the vessel herself, for she bore down with all the evidence of being skilfully handled, the anchor a-cockbill, the jib-boom guys already eased off, and standing by the side of the pilot, who was steering the Pharaon towards the narrow entrance of the inner port, was a young man, who, with activity and vigilant eye, watched every motion of the ship, and repeated each direction of the pilot. The vague disquietude which prevailed among the spectators had so much affected one of the crowd that he did not await the arrival of the vessel in harbor, but jumping into a small skiff, desired to be pulled alongside the Pharaon, which he reached as she rounded into La Reserve basin. When the young man on board saw this person approach, he left his station by the pilot, and, hat in hand, leaned over the ship's bulwarks. He was a fine, tall, slim young fellow of eighteen or twenty, with black eyes, and hair as dark as a raven's wing; and his whole appearance bespoke that calmness and resolution peculiar to men accustomed from their cradle to contend with danger.

Proxies - Dylan Mulvin 2021-08-17

How those with the power to design technology, in the very moment of design, are allowed to

imagine who is included--and who is excluded--in the future. Our world is built on an array of standards we are compelled to share. In *Proxies*, Dylan Mulvin examines how we arrive at those standards, asking, "To whom and to what do we delegate the power to stand in for the world?" Mulvin shows how those with the power to design technology, in the very moment of design, are allowed to imagine who is included--and who is excluded--in the future. For designers of technology, some bits of the world end up standing in for other bits, standards with which they build and calibrate. These "proxies" carry specific values, even as they disappear from view. Mulvin explores the ways technologies, standards, and infrastructures inescapably reflect the cultural milieus of their bureaucratic homes. Drawing on archival research, he investigates some of the basic building-blocks of our shared infrastructures. He tells the history of technology through the labor and communal practices of, among others, the people who clean kilograms to make the metric system run, the women who pose as test images, and the actors who embody disease and disability for medical students. Each case maps the ways standards and infrastructure rely on prototypical ideas of whiteness, able-bodiedness, and purity to control and contain the messiness of reality. Standards and infrastructures, Mulvin argues, shape and distort the possibilities of representation, the meaning of difference, and the levers of change and social justice.

The Old Curiosity Shop - Charles Dickens
2008-12-11

`... holding her solitary way among a crowd of wild, grotesque companions; the only pure, fresh, youthful object in the throng.' `Little Nell' cares for her grandfather in the gloomy surroundings of his curiosity shop. Reduced to poverty the pair flee London, pursued by the grotesque and vindictive Quilp. In a bizarre and shifting kaleidoscope of events and characters the story reaches its tragic climax, an ending that famously devastated the novel's earliest readers. Dickens blends naturalistic and allegorical styles to encompass both the actual

blight of Victorian industrialization and textual echoes of Bunyan, the Romantic poets, Shakespeare, pantomime and Jacobean tragedy. Contrasting youth and old age, beauty and deformity, innocence and cynicism, *The Old Curiosity Shop* is a compelling mixture of humour and brooding meance. This edition uses the Clarendon text, the definitive edition of the novels of Charles Dickens, and includes the original illustrations. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Rules of Play - Katie Salen Tekinbas 2003-09-25

An impassioned look at games and game design that offers the most ambitious framework for understanding them to date. As pop culture, games are as important as film or television—but game design has yet to develop a theoretical framework or critical vocabulary. In *Rules of Play* Katie Salen and Eric Zimmerman present a much-needed primer for this emerging field. They offer a unified model for looking at all kinds of games, from board games and sports to computer and video games. As active participants in game culture, the authors have written *Rules of Play* as a catalyst for innovation, filled with new concepts, strategies, and methodologies for creating and understanding games. Building an aesthetics of interactive systems, Salen and Zimmerman define core concepts like "play," "design," and "interactivity." They look at games through a series of eighteen "game design schemas," or conceptual frameworks, including games as systems of emergence and information, as contexts for social play, as a storytelling medium, and as sites of cultural resistance. Written for game scholars, game developers, and interactive designers, *Rules of Play* is a textbook, reference book, and theoretical guide. It is the first comprehensive attempt to establish a solid theoretical framework for the emerging discipline of game design.

One Stroke, Two Survivors - Berenice Kleiman 2006

The pilgrim's progress - John Bunyan 1820

Things Fall Apart - Chinua Achebe 2009-06-05
THINGS FALL APART tells two overlapping, intertwining stories, both of which center around Okonkwo, a "strong man" of an Ibo village in Nigeria. The first of these stories traces Okonkwo's fall from grace with the tribal world in which he lives, and in its classical purity of line and economical beauty it provides us with a powerful fable about the immemorial conflict between the individual and society. The second story, which is as modern as the first is ancient, and which elevates the book to a tragic plane, concerns the clash of cultures and the destruction of Okonkwo's world through the arrival of aggressive, proselytizing European missionaries. These twin dramas are perfectly harmonized, and they are modulated by an awareness capable of encompassing at once the life of nature, human history, and the mysterious compulsions of the soul. THINGS FALL APART is the most illuminating and permanent monument we have to the modern African experience as seen from within.

The Reconstruction of Economic Theory -

Philip Mirowski 2007-06-30

"The mandate given to the editor of the present volume was succinct and to the point: gather together some of the most recent attempts to remake economic theory at its most fundamental levels, and avoid the two debased brands of academic revolutions. Now, anyone would have realized that this would be a devilishly difficult task, more likely than not to backfire; but, in retrospect, the editor still marvels at the complacency with which he embarked on the enterprise. It was quite easy to identify the critics of conventional economics who had little more than criticism to offer; it was much more difficult to feel certain that he had actually stumbled upon a substantive divergence from the orthodoxy that appeared to promise further fruitful developments. ... Forewarned and forearmed, the prospective reader should then be equipped to judge for him- or herself whether truth in advertising has been further abused, or if something a little more interesting and entertaining is afoot."--Pages 1-2

The Plague Year - Lawrence Wright 2021-06-08
From the Pulitzer Prize-winning author of *The Looming Tower*, and the pandemic novel *The End of October*: an unprecedented, momentous account of Covid-19—its origins, its wide-ranging repercussions, and the ongoing global fight to contain it "A book of panoramic breadth ... managing to surprise us about even those episodes we ... thought we knew well ... [With] lively exchanges about spike proteins and nonpharmaceutical interventions and disease waves, Wright's storytelling dexterity makes all this come alive." —The New York Times Book Review From the fateful first moments of the outbreak in China to the storming of the U.S. Capitol to the extraordinary vaccine rollout, Lawrence Wright's *The Plague Year* tells the story of Covid-19 in authoritative, galvanizing detail and with the full drama of events on both a global and intimate scale, illuminating the medical, economic, political, and social ramifications of the pandemic. Wright takes us inside the CDC, where a first round of faulty test kits lost America precious time . . . inside the halls of the White House, where Deputy National Security Adviser Matthew Pottinger's early alarm about the virus was met with confounding and drastically costly skepticism . . . into a Covid

ward in a Charlottesville hospital, with an idealistic young woman doctor from the town of Little Africa, South Carolina . . . into the precincts of prediction specialists at Goldman Sachs . . . into Broadway's darkened theaters and Austin's struggling music venues . . . inside the human body, diving deep into the science of how the virus and vaccines function—with an eye-opening detour into the history of vaccination and of the modern anti-vaccination movement. And in this full accounting, Wright makes clear that the medical professionals around the country who've risked their lives to fight the virus reveal and embody an America in all its vulnerability, courage, and potential. In turns steely-eyed, sympathetic, infuriated, unexpectedly comical, and always precise, Lawrence Wright is a formidable guide, slicing through the dense fog of misinformation to give us a 360-degree portrait of the catastrophe we thought we knew.

Out of the Ordinary - Michael Dillon/Lobzang Jivaka 2016-11-01

Now available for the first time—more than 50 years after it was written—is the memoir of Michael Dillon/Lobzang Jivaka (1915–62), the British doctor and Buddhist monastic novice chiefly known to scholars of sex, gender, and sexuality for his pioneering transition from female to male between 1939 and 1949, and for his groundbreaking 1946 book *Self: A Study in Ethics and Endocrinology*. Here at last is Dillon/Jivaka's extraordinary life story told in his own words. *Out of the Ordinary* captures Dillon/Jivaka's various journeys—to Oxford, into medicine, across the world by ship—within the major narratives of his gender and religious journeys. Moving chronologically, Dillon/Jivaka begins with his childhood in Folkestone, England, where he was raised by his spinster aunts, and tells of his days at Oxford immersed in theology, classics, and rowing. He recounts his hormonal transition while working as an auto mechanic and fire watcher during World War II and his surgical transition under Sir Harold Gillies while Dillon himself attended medical school. He details his worldwide travel as a ship's surgeon in the British Merchant Navy with extensive commentary on his interactions with colonial and postcolonial subjects, followed by his "outing" by the British press while he was

serving aboard *The City of Bath*. *Out of the Ordinary* is not only a salient record of an early sex transition but also a unique account of religious conversion in the mid-twentieth century. Dillon/Jivaka chronicles his gradual shift from Anglican Christianity to the esoteric spiritual systems of George Gurdjieff and Peter Ouspensky to Theravada and finally Mahayana Buddhism. He concludes his memoir with the contested circumstances of his Buddhist monastic ordination in India and Tibet. Ultimately, while Dillon/Jivaka died before becoming a monk, his novice ordination was significant: It made him the first white European man to be ordained in the Tibetan Buddhist tradition. *Out of the Ordinary* is a landmark publication that sets free a distinct voice from the history of the transgender movement.
