New Cutting Edge - Sarah Cunningham 2011

New Cutting Edge - Sarah Cunningham 2005

New Cutting Edge combines the comprehensive syllabus and reliable teaching resources that have made the course so popular with brand-new features, making it even fresher and easier to use.

Practice and Theory for Materials Development in L2 Learning - Alan Maley 2017-03-07

This volume represents a unique addition to the growing body of empirical literature on materials development, adopting a reverse approach to the topic. Rather than applying 'theory to practice', practitioners and researchers from 11 countries reappraise applied linguistics theories through practice. The book also provides evidence for the diversity of materials development around the globe at different levels for different specialities and for different purposes. Each chapter surveys the relevant literature (such as task-based learning and language and culture), describes a specific research project, reports the results of the project, and discusses the implications of these results for the development of materials both in the local context and in general. After each section there are editorial comments highlighting the issues emerging from the research, and there is a conclusion which connects the findings of the various chapters and makes suggestions both for future research and for the principled development of materials for L2 learners. The book will be suitable for teachers, materials developers, academics and students in post-graduate courses in applied linguistics, in TEFL/TESOL and in the teaching of other languages as an L2.

Cutting Edge - Chris Redston 2002

Cutting Edge - Pre-Intermediate - Araminta Crace 2014-02-24

Engaging texts, new video content and a comprehensive digital package are just some of the features that make this fully revised edition even more effective.

New Cutting Edge. Pre-intermediate. Student's Book. Per Le Scuole Superiori. Con CD-ROM - Sarah Cunningham 2007

With a task-based learning approach, the main objective is for students to use the language that they know in order to achieve a particular communication goal. Generally focussed on speaking, tasks are opportunities for in-class communication which encourages fluency and confidence. New Cutting Edge features: * A comprehensive syllabus with thorough grammar, vocabulary and skills work * Systematic vocabulary building which focuses on high-frequency, useful words and phrases * Clearly-structured tasks to encourage student fluency and confidence Challenge your students with the 'Study, Practice, Remember' sections. Motivate your students with the self-study CD-ROMs which have additional grammar and vocabulary practice, plus 'Real life' video sequences. Engage your students with New Cutting Edge Digital -- software for interactive whiteboards. Mini-dictionary included inside every Student's Book New Cutting Edge Pre-Intermediate takes students from A2 to B1 level of the CEF.

* Consolidates and extends essential language covered in the Students' Book * 'Improve your writing' and 'Listen and read' sections systematically develop skills * Pronunciation and spelling sections improve student confidence in typical problem areas * Accompanied by an optional Student Audio CD with exercises on grammar and pronunciation * Includes answer key

Mathematics for Machine Learning - Marc Peter Deisenroth 2020-04-23

The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

Cutting Edge - Araminta Crace 2013-01-01

This fully revised third edition builds on the task based learning approach that has made 'Cutting Edge' so popular. With new DVD-ROM material and digital components, learners can be confident of improving their language skills through a carefully balanced range of activities.

Cutting Edge - Sarah Cunningham 2010-09

Millions of teachers around the world appreciate New Cutting Edge for its fun, thorough, communicative approach. Now it has even more to offer with new editions, new self-study CD-ROMs and software for the interactive whiteboard.

Ratschlag und Entwurf zu einem Gesetz betreffend Abänderung von [Para] 25 des Gesetzes betreffend die Dienstverhältnisse und die Besoldungen der Beamten, Angestellten und Arbeiter des Kantons Basel-Stadt - 1949

Cutting Edge 3rd Edition Elementary Students Book for DVD Pack - Araminta Crace 2013-06-13

This is an elementary level text for learners of the English language.

Engaging texts, new video content and a comprehensive digital package are just some of the features that make this fully revised edition even more effective.

Deep Learning for Coders with fastai and PyTorch - Jeremy Howard 2020-06-29

Deep learning is often viewed as the exclusive domain of math PhDs and big tech companies. But as this hands-on guide demonstrates, programmers comfortable with Python can achieve impressive results in deep learning with little math background, small amounts of data, and minimal code. How? With fastai, the first library to provide a consistent interface to the most frequently used deep learning applications. Authors Jeremy Howard and Sylvain Gugger, the creators of fastai, show you how to train a model on a wide range of tasks using fastai and PyTorch. You'll also dive progressively further into deep learning theory to gain a complete understanding of the algorithms behind the scenes. Train models in computer vision, natural language processing, tabular data, and collaborative filtering Learn the latest deep learning techniques that matter most in practice Improve accuracy, speed, and reliability by understanding how deep learning models work Discover how to turn your models into web applications Implement deep learning algorithms from scratch Consider the ethical implications of your work Gain insight from the foreword by PyTorch cofounder, Soumith Chintala

Straightforward - Philip Kerr 2007

Ideal for teachers looking for an easy-to-use adult general English course, Straightforward, is flexible and simple to use, based around 12 topics per level. It always takes the most suitable methodological approach to what is being taught, resulting in the perfect balance of skills and language work. Extra section including functional language, writing skills, grammar notes and word lists round off the Students Book. Key Features: Simple enough for new teachers to use; flexible enough for the **Cutting Edge 3rd Edition Intermediate Teachers Book for Pack** - Damian Williams 2013-04-29

Opportunities - Michael Harris 2000

Opportunities is a new five-level course for teenagers. Modules of topic-based units provide rich, contemporary content based on a wide variety of information themes.
