Real Wired Child -

Michael Carr-Gregg
2007-09-03

How can you protect your

kids if you don't know where they are? Few parents would let their children wander the streets at all hours or meet with strangers, but kids do that and more on the internet without even leaving their bedrooms. Do you know the people your daughter chats with online every night? Is your son being cyberbullied? Have you seen the videos your

kids are downloading? Michael Carr-Gregg urges parents to venture into the online world inhabited by their children and get in touch with their day-to-day lives. He explains what kids get up to, provides guidelines for family internet safety and advises how to minimise the risks without limiting your children's freedom to learn, explore and communicate online. The internet has changed parenting forever. Carr-Gregg provides an essential guide to the online world of today's real wired children, from toddlers to teenagers.

Digital citizenship education - Divina Frau-Meigs 2017-10-17
Supporting children and young people to participate safely, effectively, critically and responsibly in a world filled with social media and digital technologies is a priority for educators the world over. Most young people in Europe today were born and have

grown up in the digital era. Education authorities have the duty to ensure that these digital citizens are fully aware of the norms of appropriate behaviour when using constantly evolving technology and participating in digital life. Despite worldwide efforts to address such issues, there is a clear need for education authorities to take the lead on digital citizenship education and integrate it into school curricula. In 2016, the Education Department of the Council of Europe began work to develop new policy orientations and strategies to help educators face these new challenges and to empower young people by helping them to acquire the competences they need to participate actively and responsibly in digital society. This volume, the first in a Digital Citizenship Education series, reviews the existing academic and policy literature on digital

citizenship education, highlighting definitions, actors and stakeholders, competence frameworks, practices, emerging trends and challenges. The inclusion of a wide selection of sources is intended to ensure sufficient coverage of what is an emergent topic that has yet to gain a strong foothold in either education or academic literature, but has received wider policy attention.

The Princess Bitchface Syndrome 2.0

- Michael Carr-Gregg 2017-01-30
What do you do when your previously quiet, loving daughter becomes a restless, rebellious stranger who acts like a responsible adult one day and a rude, selfish brat the next? You stay calm, and consult the experts. By the time they turn thirteen, adolescent girls look like they're ready for anything - but they're

not. Our girls are growing up in a society that is rapidly changing and challenging the skills of even the most experienced parents. A roadmap is needed to guide parents through this new landscape, to ensure we bring up happy, healthy young women. This indispensable book focuses on the special trials of raising adolescent girls today, including: adolescent development in a new society pressures at school parenting strategies that work parenting in the digital age sex and drugs mental health. In this fully revised and expanded edition, leading adolescent psychologist Dr Michael Carr-Gregg and researcher Elly Robinson also discuss the single most prolific and influential factor of our times - technology. If you feel like you're losing control when it comes to parenting your daughter, it's time to grab back the reins.

This five-part series helps young viewers navigate the dilemmas surrounding bullying, peer pressure, prejudice, and unresolved anger—with

an additional program focusing especially on conflict management and resolution. Emphasizing character-building as a prime ingredient in overcoming conflict, the series uses no-nonsense dramatizations, candid 'school hallway' interviews, and expert commentary to define basic ideas, illustrate ways in which conflicts often play out, and ultimately present methods for diffusing them--based on honesty, awareness, and respect for others."-- Publisher's web site. Digital Literacies - Nicky Hockly 2014-06-03 Dramatic shifts in our communication landscape have made it crucial for language teaching to go beyond print literacy and encompass the digital literacies which are increasingly central to learners' personal, social, educational and professional lives. By situating these digital literacies within a clear theoretical framework, this book provides educators and students alike with not

just the background for a deeper understanding of these key 21st-century skills, but also the rationale for integrating these skills into classroom practice. This is the first methodology book to address not just why but also how to teach digital literacies in the English language classroom. This book provides: A theoretical framework through which to categorise and prioritise digital literacies Practical classroom activities to help learners and teachers develop digital literacies in tandem with key language skills A thorough analysis of the pedagogical implications of developing digital literacies in teaching practice A consideration of exactly how to integrate digital literacies into the English language syllabus Suggestions for teachers on how to continue their own professional development through PLNs (Personal Learning Networks), and

how to access teacher development opportunities online This book is ideal for English language teachers and learners of all age groups and levels, academics and students researching digital literacies, and anyone looking to expand their understanding of digital literacies within a teaching framework.

Reflections on Media Education Futures -

Sirkku Kotilainen 2015
The conference "Media Education Futures" in Tampere, Finland 2014, highlighted participation, well-being and citizenship as current Nordic perspectives in media education, and discussed media and information literacies contributing to intercultural dialogue. The goal was to display and promote research in the field along with the practices of media education. Research results presented at the conference indicated that the civic skills needed in information societies include critical awareness, which is the basis for understanding media societies. Critical thinking is also the basis for creativity and should be included in the teaching of coding, which has been done in several countries in new school curricula at the basic level. Moreover, broader cooperation among researchers with

different cultural backgrounds, rather than traditional Europe-centred collaboration was echoed. This publication reflects topics including critical awareness, technological citizenry, methodologies in studying young people in urban cities, and youth well-being in relations to media and information literacies. The publication covers articles from different parts of the world including, for example, China and India in Asia and Brazil in Latin America, as well as several European countries. It is divided into two sections - 1) Academic Articles and 2) Practical Papers and Case Studies - as reflections on the futures of media education.

Raising Girls in the 21st Century: Helping Our Girls to Grow Up Wise, Strong and Free - Steve Biddulph

2013-01-17

Steve Biddulph's *Raising Boys* was a global phenomenon. The first book in a generation to look at boys' specific needs, parents loved its clarity and warm insights into their sons' inner world. But today, things have changed. It's girls that are in trouble.

Islam and Citizenship Education - Ednan Aslan
2015-01-14

The scholarly contributors to this volume investigate various means to stimulate and facilitate reflection on new social relations while clarifying the contradictions between religious and social affiliation from different perspectives and experiences. They explore hindrances whose removal could enable Muslim children and youth to pursue equal participation in political and social life, and the ways that education could facilitate this process.
Global E-Security -
Hamid Jahankhani

2008-06-21

In today's society, where technology is ubiquitous, protecting ourselves with firewalls is as important as defending ourselves with firepower. New technology is providing criminals with a world of opportunity, while law enforcement agencies all over the world are struggling to cope. E-security is an issue of global importance. In many ways, cybercrime is no different to more traditional types of crime - both involve identifying targets, using surveillance and psychological profiling of potential victims. The major difference is that the perpetrators of cybercrime are increasingly remote to the scene of their crime and that in some cases their victims may not even realize that a crime is taking place. Knowledge of the techniques being used by criminals and the technology and training available to combat them is essential in fighting cybercrime. Establishing

dialogue between crime-fighting agencies, the security industry, researchers and experts can provide a platform from which e-security can be examined from several global perspectives.

Cyberbullying and Cyberthreats - Nancy E. Willard 2007

Online communications can be extremely cruel and vicious. They can cause great emotional harm and can take place 24/7. Damaging text and images can be widely disseminated and impossible to fully remove. There are increasing reports of youth suicide, violence, and abduction related to cyberbullying and cyberthreats. This essential resource provides school counselors, administrators, and teachers with cutting-edge information on how to prevent and respond to cyberbullying and cyberthreats. It addresses real-life situations that often occur as students embrace the Internet and

other digital technologies: Sending offensive or harassing messages Dissing someone or spreading nasty rumors on sites such as MySpace Disclosing someone's intimate personal information Breaking into someone's e-mail account and sending damaging messages under that person's name Excluding someone from an online group Using the Internet to intimidate The book includes detailed guidelines for managing in-school use of the Internet and personal digital devices, including cell phones. Extensive reproducible appendices contain forms for assessment, planning, and intervention, as well as a 9-page student guide and 16-page parent guide. An accompanying CD of all the reproducible forms and student handouts is included with the book. *Digital Citizenship in Schools, Second Edition* - Mike Ribble 2011-09-21 *Digital Citizenship in Schools, Second Edition*

is an essential introduction to digital citizenship. Starting with a basic definition of the concept and an explanation of its relevance and importance, author Mike Ribble goes on to explore the nine elements of digital citizenship. He provides a useful audit and professional development activities to help educators determine how to go about integrating digital citizenship concepts into the classroom. Activity ideas and lesson plans round out this timely book.

Global Networks, Local Actions - Marcella Milana 2016-12-01
Global Networks, Local Actions: Rethinking adult education policy in the 21st century examines public policy developments in adult education, exploring the policy framing of adult education practice in a range of socio-cultural contexts, and contributing to the development of policy research from global and

comparative perspectives. Drawing from multidisciplinary fields such as adult education, comparative and international education, and sociology, chapters analyse empirically grounded studies from the US, Italy, Argentina and Brazil. Each study helps to identify how political agents interact at international, regional, national and local scales, and what the implications are for publically-funded interventions in adult education. While this book recognises the complexity of adult education policy, it argues for the need to deconstruct the false belief that what is global in adult education may be intrinsically distinct from the characteristics of geographical or social territories in which adult education occurs. Instead, it points to localised norms and ideas on Adult Basic and Secondary Education as ultimately

contained in, and constituting, what is at times perceived as global, or abstracted from definite geographical or social territories. This book calls for a global sociology of adult education in response to global challenges, and makes an important contribution to our understanding of developments in public adult education policy. As such, it will be of key interest to researchers, academics and postgraduate students in the fields of adult education, comparative and international education, education policy and politics, sociology of education, and global studies.

New Digital Technology in Education - Wan Ng
2015-04-25

This book addresses the issues confronting educators in the integration of digital technologies into their teaching and their students' learning. Such issues include a skepticism of the added

value of technology to educational learning outcomes, the perception of the requirement to keep up with the fast pace of technological innovation, a lack of knowledge of affordable educational digital tools and a lack of understanding of pedagogical strategies to embrace digital technologies in their teaching. This book presents theoretical perspectives of learning and teaching today's digital students with technology and propose a pragmatic and sustainable framework for teachers' professional learning to embed digital technologies into their repertoire of teaching strategies in a systematic, coherent and comfortable manner so that technology integration becomes an almost effortless pedagogy in their day-to-day teaching. The materials in this book are comprised of original and innovative contributions, including empirical data, to

existing scholarship in this field. Examples of pedagogical possibilities that are both new and currently practised across a range of teaching contexts are featured.

Applied Practice for Educators of Gifted and Able Learners - Hava E. Vidergor 2015

This book is a comprehensive study and guide for the classroom teacher, the gifted program coordinator, and the graduate student, who are challenged daily to provide for individual children who differ markedly but come under the umbrella of giftedness. It serves as a wellspring that derives from theory while it offers practical application of theoretical construct in a wide variety of international settings from leaders in the field who demonstrate implementation of proven and field-tested techniques and alternative scenarios to accommodate every classroom situation. Contributors are

internationally recognized experts who have come together to provide a sound, reliable source for teachers of the gifted that will be utilized time and time again by practitioners and researchers alike. Among internationally renowned scholars are: Joyce Van Tassel-Baska, Susan Johnsen, June Maker, Belle Wallace, Linda Kreger-Silverman, Dorothy Sisk, Gillian Eriksson, Miraca Gross, Gilbert Clark, Enid Zimmerman, and Rachel McAnallen.

Events and Well-being - Allan Stewart Jepson
2021-06-10

This book is the first to take an in-depth examination of events and well-being, adopting a much-needed critical approach to the study of events. It uses empirical case studies to help us better understand how events foster positive well-being or counter negative well-being for event organisers, participants, spectators, volunteers

and even non-attending local residents. While researchers have long understood socialisation as the major motivation to attend contemporary festivals and events, it is only just being acknowledged that well-being is also a key motivator. Those researching in the field of event studies are yet to clearly articulate "the how, why, where, and impacts of socialisation." This multidisciplinary book draws together empirical research across a range of event types and sizes, from music festivals to mega sports events, to provide a nuanced understanding of their contribution to the well-being of individuals and communities. Case studies are drawn from around the world and apply a diverse range of theoretical lenses to the conceptualisation of well-being as it applies to events and methodologies used to achieve research aims and objectives. This significant volume will

be valuable reading for students and academics in the fields of sport studies, critical event studies, queer studies, cultural studies, tourism, music, sociology and end-of-life studies.

Bullies Are a Pain in
the Brain - Trevor
Romain 2008-12-11

Digital Citizenship -
Karen Mossberger
2007-10-12

This analysis of how the
ability to participate
in society online
affects political and

economic opportunity finds that technology use matters in wages and income and civic participation and voting. Just as education has promoted democracy and economic growth, the Internet has the potential to benefit society as a whole. Digital citizenship, or the ability to participate in society online, promotes social inclusion. But statistics show that significant segments of the population are still excluded from digital citizenship. The authors of this book define digital citizens as those who are online daily. By focusing on frequent use, they reconceptualize debates about the digital divide to include both the means and the skills to participate online. They offer new evidence (drawn from recent national opinion surveys and Current Population Surveys) that technology use matters for wages and income, and for civic engagement and voting. Digital

Citizenship examines three aspects of participation in society online: economic opportunity, democratic participation, and inclusion in prevailing forms of communication. The authors find that Internet use at work increases wages, with less-educated and minority workers receiving the greatest benefit, and that Internet use is significantly related to political participation, especially among the young. The authors examine in detail the gaps in technological access among minorities and the poor and predict that this digital inequality is not likely to disappear in the near future. Public policy, they argue, must address educational and technological disparities if we are to achieve full participation and citizenship in the twenty-first century. Invisible Vinnie - Jenny Millward 2012-08-02 'Zack's not scared of anything. But everyone's

Illustrated by Sue Heap, winner of the Smarties Prize Gold Award.

Girl Wars - Cheryl Dellasega 2007-11-01

The only book with a program that is proven to solve the problem of female bullying, a controversial issue first exposed in the bestselling *Reviving Ophelia*. Stop the Hurting Mary Pipher's bestselling *Reviving Ophelia* triggered widespread interest in the culture of preteen and teenage girls and the seeming epidemic of relational aggression

(bullying) among them. Gossip, teasing, forming cliques, and other cruel behaviors are the basis of this bullying, which harms both victim and aggressor. Until now, no one has been able to offer practical and effective solutions that stop girls from hurting each other with words and actions. But in *Girl Wars*, two experts explain not only how to prevent such behavior but also how to intervene should it happen, as well as overcome the culture that breeds it. Illustrated by compelling true stories from mothers and girls, the authors offer effective, easy-to-implement strategies that range from preventive to prescriptive, such as how to -Adopt a "help, don't hurt" strategy - Provide positive role models -Teach communication skills online and off -Stress assertiveness, not aggressiveness -Learn conflict resolution skills -Identify

alternatives to bullying behavior. With their combined experience in offering and evaluating programs that combat bullying, the authors show that girls not only want to help rather than hurt each other, they can do so with guidance from concerned adults.

The Bully, the Bullied, and the Bystander -

Barbara Coloroso
2010-11-23

It's the deadliest combination going: bullies who terrorize, bullied kids who are afraid to tell, bystanders who watch, and adults who see the incidents as a normal part of childhood. All it takes to understand that this is a recipe for tragedy is a glance at headlines across the country. In this updated edition of *The Bully, the Bullied, and the Bystander*, which includes a new section on cyberbullying, one of the world's most trusted parenting educators gives parents, caregivers, educators—and most of all, kids—the tools to

break the cycle of violence. Drawing on her decades of work with troubled youth, and her wide experience in the areas of conflict resolution and reconciliatory justice, Barbara Coloroso explains: The three kinds of bullying, and the differences between boy and girl bullies. Four abilities that protect your child from succumbing to bullying. Seven steps to take if your child is a bully. How to help the bullied child heal and how to effectively discipline the bully. How to evaluate a school's antibullying policy. And much more. This compassionate and practical guide has become the groundbreaking reference on the subject of bullying.
