**New Directions in the Anthropology of Dreaming** - Jeannette Mageo 2020-10-09

This book presents new directions in contemporary anthropological dream research, surveying recent theorizations of dreaming that are developing both in and outside of anthropology. It incorporates new findings in neuroscience and philosophy of mind while demonstrating that dreams emerge from and comment on sociohistorical and cultural contexts. The chapters are written by prominent anthropologists working at the intersection of culture and

consciousness who conduct ethnographic research in a variety of settings around the world, and reflect how dreaming is investigated by a range of informants in ever more diverse sites. As well as theorizing the dream in light of current anthropological and psychological research, the volume accounts for local dream theories and how they are situated within distinct cultural ontologies. It considers dreams as a resource for investigating and understanding cultural change; dreaming as a mode of thinking through, contesting, altering, consolidating, or escaping from identity; and the nature of dream mentation. In proposing new theoretical approaches to dreaming, the editors situate the topic within the recent call for an "anthropology of the night" and illustrate how dreams offer insight into current debates within anthropology's mainstream.

This up-to-date book defines a twenty-first century approach to culture and the dream that will be relevant to scholars from anthropology as well as other disciplines such as religious studies, the neurosciences, and psychology.

*Mr. Moonlight of the South Seas* - Brandon Oswald  
2017-08-17

Mr. Moonlight of the South Seas examines the life of

American author Robert Dean Frisbie who, at the age of twenty-four, left the United States for the unknown adventurous ports of the Pacific Islands in the early 1920's. He first landed in Papeete, Tahiti, which at the time was a bustling town and the start-off point for many visitors to the region. He would stay a few years learning the Tahitian language, culture, and way of life. He enjoyed sharing his experiences in numerous articles for U.S. publications such as the Atlantic Monthly. Frisbie was fascinated with the number of characters that lived or frequently visited the island. These included Tahitians, sea captains, beachcombers and writers. He would often refer to these characters in his stories. His most notable friend was James Norman Hall, who would eventually co-author the Bounty Trilogy. For the remainder of his life, Hall remained one of the few people in whom Frisbie would confide

his inner-most thoughts. On their first meeting in Papeete, Frisbie was mesmerized by the setting and the different boats in port. He told Hall, "All these ships.... I suppose you can go almost anywhere from here?" After four years on Tahiti, Frisbie began to take his writing career more seriously and craved finding an isolated island where he could dedicate most of his time to writing his great novel, which he called his "Moby Dick." He settled on the lonely atoll known as Pukapuka in the Cook Islands. He got to know the islanders and their language, customs, and lifestyles. He eventually immortalized the island and some of the characters he knew in many sketches, articles and essays. Several of the pieces were collected and made into his most famous book titled The Book of Puka-Puka. Although writing occupied much of his time, Frisbie lived the life of an islander without,

however, becoming what he termed, "native." He believed it was very important to respect the culture of the islanders around him by continuing to acknowledge his separate upbringing. That said, he did enjoy participating in island activities such as fishing, canoeing, and house building. Eventually, Frisbie would marry a Pukapukan girl named Ngatokorua, and together the couple would have five children. His family changed his life and created additional challenges and adventures. The years of living on this lonely atoll would take its toll on Frisbie's health and mind. He could easily go months without talking to another European man, and sometimes a year would pass between ships visiting the island. Frisbie was forced to sail away from Pukapuka due to family tragedies, poor health and a yearning to see other islands. He took his family to Tahiti, Fiji, Samoa, and

Rarotonga. During his South Seas travels, he and his children barely survived a monster cyclone on the island of Suwarrow. Despite his wandering, Frisbie returned to Pukapuka on several occasions in hope of reviving some stability with his family. Frisbie was also constantly trying to justify his choice of lifestyle - simple, yet unpredictable, at a time when not many people had the courage to do so. He never lost faith in writing his "Moby Dick"; and he continued to write articles for American magazines. Before his death, Frisbie would publish six very fascinating books that memorialized the people and cultures of this very unique part of the world.
