Policies for Open Innovation: Theory, Framework and Cases -

Corporate Governance and Initial Public Offerings -
Alessandro Zattoni 2012-03-22

Initial Public Offerings (IPOs) are unique economic and governance events as privately held firms issue common stock or shares to the public for the first time. The governance issues surrounding IPOs are relatively unexamined compared to more established, and usually larger, firms. As such, they provide a unique context to study corporate governance and its development around the world. Based on a collaborative international research project, this book analyses the corporate governance of IPOs in twenty-one countries, each of which is characterized by different governance environments and different levels of IPO activity. The end result is a broad and deep assessment of governance practices and IPO activity for an array of economies that represent roughly 80 percent of the global economy. These chapters collectively provide new insights into

what a global theory of corporate governance might look like and offer guidance to policy makers and academics regarding national governance configurations.

Private Equity Demystified - John Gilligan 2020-11-05

Private equity has grown rapidly over the last three decades, yet largely remains poorly understood. Written in a highly accessible style, the book takes the reader through what private equity means, the different actors involved, and issues concerning sourcing, checking out, valuing, and structuring deals.

Venture Capital and Private Equity Funds for Development Index - Thierry Sanders 2005-08

Entrepreneurs face a multitude of challenges when setting up and growing their business venture. This is even more so for entrepreneurs in emerging markets and developing countries. Access to finance is often the main challenge. The Venture Capital and Private Equity for Development Index gives access to the major funds financing business in Latin America, Asia and Africa. This practical guide has an easy to use index with funds listed by key fund attributes such as regions, sectors

and company size financed. It lists over 270 funds investing in developing countries. The Index is compiled by the Business in Development program of Dutch National Committee for International Cooperation and Sustainable Development (NCD0) in cooperation with the Adapppt Foundation in The Netherlands.

Business and Banking - Paulette Kurzer 1993

As part of the postwar settlement, and especially since the 1960s, small European democracies instituted many entitlement programs and redistributive income policies. Each country has responded differently, however, to the economic stagnation that followed the turmoil in world trade and monetary relations of the 1970s. Comparing the recent history of relations among business, labor, and government in four countries, Paulette Kurzer addresses complex questions at the heart of contemporary debates in political economy. Kurzer challenges the assumption that the evolution of social arrangements between government, labor, and employers can be understood without examining the interests of capital and trends toward transnationalization. Business and Banking will be required reading for anyone concerned with the future balance between political and social institutions in Europe - including political scientists, comparativists, political economists, economic historians, and others interested in finance and public policy.

Mezzanine Financing - Luc Nijs 2013-12-09

An in-depth explanation of mezzanine finance Mezzanine finance products, which have grown increasingly popular in recent years, involve a unique and complex form of analysis because of their hybrid nature. Because mezzanine finance involves no collateral, it accentuates legal terms, term sheets, and contracts, in addition to depicting dynamics of both debt and equity. Experienced chairman, lecturer, and professor of investment banking Luc Nijs presents readers with a thorough description of product groups, structuring and pricing, and cultural discrepancies in terms of regulation and application in Mezzanine Financing: Tools, Applications and Total Performance. Nijs analyzes common triumphs and failures encountered in mezzanine financing, and he discusses techniques for risk analysis and risk mitigation. A final study of international capital markets, their products' relevance, attractiveness, and liquidity, and the effects on pure equity/fixed-income risk concludes the book. Conveys a professional's advice through case studies of various regions, industries and contexts Provides the only complete analysis of mezzanine finance as no other books take on the topic as their only subject Details an increasingly popular and globally relevant subject in finance Those seeking a detailed explanation of the complexities within mezzanine financing will encounter a professional account in Nijs's book.

The Alternative Investment Fund Managers Directive - Dirk A. Zetsche 2015-09-14

Apart from MiFID, the Alternative Investment Fund Managers Directive (AIFMD) may be the most important European asset management regulation of the early twenty-first century. In this in-depth analytical and critical discussion of the content and system of the directive, thirty-eight contributing authors – academics, lawyers, consultants, fund supervisors, and fund industry experts – examine the AIFMD from every angle. They cover structure, regulatory history, scope, appointment and authorization of the manager, the requirements for depositaries and prime brokers, rules on delegation, reporting requirements, transitional provisions, and the objectives stipulated in the recitals and other official documents. The challenging implications and contexts they examine include the following: – connection with systemic risk and the financial crisis; - nexus with insurance for negligent conduct; - connection with corporate governance doctrine; - risk management; - transparency; - the cross-border dimension; - liability for lost assets; - impact on alternative investment strategies, and - the nexus with the European Regulation on Long-Term Investment Funds (ELTIFR). Nine country reports, representing most of Europe's financial centres and fund markets add a national perspective to the discussion of the European regulation. These chapters deal with the potential interactions among the AIFMD and the relevant laws and regulations of Austria, France, Germany, Italy, Luxembourg, Liechtenstein, The Netherlands, Malta and the United Kingdom. The second edition of the book continues to deliver not only the much-needed discussion of the inconsistencies and difficulties when applying the directive, but also provides guidance and potential solutions to the problems it raises. The second edition

considers all new developments in the field of alternative investment funds, their managers, depositaries, and prime brokers, including, but not limited to, statements by the European Securities and Markets Authority (ESMA) and national competent authorities on the interpretation of the AIFMD, as well as new European regulation, in particular the PRIIPS Regulation, the ELTIF Regulation, the Regulation on European Venture Capital Funds (EuVeCaR), the Regulation on European Social Entrepreneurship Funds (EUSEFR), MiFID II, and UCITS V. The book will be warmly welcomed by investors and their counsel, fund managers, depositaries, asset managers, administrators, as well as regulators and academics in the field.

Private Equity and Venture Capital in Europe - Stefano Caselli 2021-03-28

Private Equity and Venture Capital in Europe: Markets, Techniques, and Deals, Third Edition introduces private equity, investments and venture capital markets while also presenting new information surrounding the core of private equity, including secondary markets, private debt, PPP within private equity, crowdfunding, venture philanthropy, impact investing, and more. Every chapter has been updated with new data, cases, examples, sections and chapters that illuminate elements unique to the European model. With the help of new pedagogical materials, this updated edition provides marketable insights about valuation and deal-making not available elsewhere. As the private equity world continues to undergo many challenges and opportunities, this book presents both fundamentals and advanced topics that will help readers stay informed on market evolution. Provides a unique focus on Europe for equity investors and long-term investments Contains theoretical knowledge put into practice using with real-world cases and the language and the methodologies of practitioners Presents structured topics that help readers understand increasing levels of difficulty Includes learning tools such as mini-cases, call-outs and boxes that recall previously presented definitions throughout chapters *Venture Capital and Private Equity Contracting* - Douglas J. Cumming 2013-08-21

Other books present corporate finance approaches to the venture capital and private equity industry, but many key decisions require an understanding of the ways that law and economics work together. This revised and updated 2e offers broad perspectives and principles not found in other course books, enabling readers to deduce

the economic implications of specific contract terms. This approach avoids the common pitfalls of implying that contractual terms apply equally to firms in any industry anywhere in the world. In the 2e, datasets from over 40 countries are used to analyze and consider limited partnership contracts, compensation agreements, and differences in the structure of limited partnership venture capital funds, corporate venture capital funds, and government venture capital funds. There is also an in-depth study of contracts between different types of venture capital funds and entrepreneurial firms, including security design, and detailed cash flow, control and veto rights. The implications of such contracts for value-added effort and for performance are examined with reference to data from an international perspective. With seven new or completely revised chapters covering a range of topics from Fund Size and Diseconomies of Scale to Fundraising and Regulation, this new edition will be essential for financial and legal students and researchers considering international venture capital and private equity. An analysis of the structure and governance features of venture capital contracts In-depth study of contracts between different types of venture capital funds and entrepreneurial firms Presents international datasets from over 40 countries around the world Additional references on a companion website Contains sample contracts, including limited partnership agreements, term sheets, shareholder agreements, and subscription agreements

Multilingual Interpretation of European Union Law - Dirk A. Zetzsche 2012-11-01

The Alternative Investment Fund Managers Directive (AIFMD) may be the most important European asset management regulation of the early 21st century. However, a preponderance of practitioners and academics in the field argue that, in its present form, the directive is seriously out of touch with both the system of European financial law and industry practice. In this first in-depth analytical and critical discussion of the content and system of the directive, thirty-four contributing authors – academics, lawyers, consultants, fund supervisors, and fund industry experts – examine the AIFMD from every angle. They cover structure, regulatory history, scope, appointment and authorization of the manager, rules on delegation, reporting requirements, transitional provisions, and the objectives stipulated in the recitals and other official documents. The challenging implications and contexts they examine include the following: connection with systemic risk and the financial crisis; impact on money laundering and financial crime; nexus with insurance for negligent conduct; connection with corporate governance doctrine; risk management; transparency; the cross-border dimension; liability for lost assets; and impact on alternative investment strategies. Ten country reports add a national perspective to the discussion of the European regulation. These chapters deal with the potential interactions among the AIFMD and the relevant laws and regulations of Italy, Switzerland, Luxembourg, The Netherlands, Austria, Liechtenstein, the United Kingdom, Germany, France, and Ireland. The former are

Europe's most vibrant financial centres and markets. Designed to spur a critical attitude towards the emerging new European financial markets framework presaged by the AIFMD, this much-needed discussion not only elaborates on the inconsistencies and difficulties sure to be encountered when applying the directive, but also provides potential solutions to the problems it raises. The book will be warmly welcomed by investors and their counsel, fund managers, depositaries, asset managers, and administrators, as well as academics in the field.

Funding women entrepreneurs - Surya Fackelmann
2020-06-29

Financial and policy measures are needed to improve access-to-finance conditions for women-led companies. EIB's InnovFin Advisory assesses the access-to-risk-capital conditions for women-driven companies in Europe in comparison to mainly the US. While women-led companies still account for a small portion of deal flow and overall volume invested, the rate of growth has increased. Nevertheless, structural inequalities and persistent biases hinder the transition to a better functioning funding environment. The study puts forth a number of innovation finance and policy related recommendations. Restarting the EU economy after the

coronavirus pandemic provides a unique opportunity to include the gender dimension.

International Investments in Private Equity - Peter Klaus Cornelius 2011-02-17

How can private equity investors exploit investment opportunities in foreign markets? Peter Cornelius uses a proprietary database to investigate and describe private equity markets worldwide, revealing their levels of integration, their risks, and the ways that investors can mitigate those risks. In three major sections that concentrate on the risk and return profile of private equity, the growth dynamics of discrete markets and geographies, and opportunities for private equity investments, he offers hard-to-find analyses that fill knowledge gaps about foreign markets. Observing that despite the progressive dismantling of barriers investors are still home-biased, he demonstrates that a methodical approach to understanding foreign private equity markets can take advantage of the macroeconomic and structural factors that drive supply and demand dynamics in individual markets. Foreword by Josh Lerner Teaches readers how to investigate and analyze foreign private equity markets Forecasts private equity investment opportunities via macroeconomic and structural factors in individual markets Draws on data from a proprietary database covering 250 buyout and VC funds and 7,000 portfolio companies.

The German and Dutch Economies - Lei Delsen 2012-12-06
Institutions have both positive and negative effects on economic performance. The theoretical and empirical understanding of the roles played by institutions, norms and culture in the functioning of markets still is limited. This book contributes to a better understanding of the role played by institutions in economic life and to more balanced and better founded policy decisions related to the (re)structuring of industrial economies in response to the structural changes - internationalisation of the economies, the advances in information and communication technology and the ageing of populations - they all are confronted with.
