Graphic Politics in Eastern India - Nishaant Choksi 2021-03-25
Investigating the communicative practices of indigenous Santali speakers in eastern India, this book examines the overlooked role of script in regional movements for autonomy to provide one of the first comprehensive theoretical and ethnographical accounts of 'graphic politics'. Based

on extensive fieldwork in the villages of southwestern West Bengal, Nishaant Choksi explores the deployment of Santali scripts, including a newly created script called Ol Chiki, in Bengali-dominated local markets, the education system and in the circulation of print media. He shows how manipulating the linguistic landscape and challenging the idea of a

vernacular enables Santali speakers to delineate their own political domains and scale their language on local, regional and national levels. In doing so, they contest Bengali-speaking upper castes' hegemony over public spaces and institutions, as well as the administrative demarcations of the contemporary Indian nation-state. Combining semiotic theory with ethnographically grounded investigation, *Graphic Politics in Eastern India* offers a new framework for understanding writing and literacy practices among ethnic minorities and points to future directions for interdisciplinary research on indigenous autonomy in South Asia.

Therapeutic Group Work with Children - Gisela

Konopka 1949-06-06

Therapeutic Group Work with Children was first published in 1949.

Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions.

This is an account of two significant projects in therapeutic group work with emotionally disturbed adolescents. In detailed and often dramatic reports of many group sessions, the author provides insight into the use of therapeutic group work methods. In a preface to this second printing, Professor Konopka points out that when the book was first published the use of group therapy in the treatment of delinquent or emotionally disturbed youngsters was quite new. Now, the practice has

proved its worth, and the book has become increasingly important as teaching material for social work students, as well as a guide for practicing social workers. It is also helpful to those in other professions who are concerned with the problems of delinquent or disturbed children. The projects described involved a group of delinquent boys under observation by the Minnesota Youth Conservation Commission and a group of emotionally disturbed girls in a child guidance clinic. Through her account, Professor Konopka shows many kinds of situations which arise in group therapy and ways in which they may be handled by a trained social worker. Reviewers have been generous in their appraisal of the book. Saul Bernstein said in *Social Work Journal*: "We have here a rich gold mine for promoting human adjustment." Harleigh B. Trecker, in *Federal Probation*, called it: "a vivid,

clear, warm story of social group work in action." There is a new foreword in this printing by Hyman S. Lippman, M.D., director of the Amherst H. Wilder Child Guidance Clinic, St. Paul, Minnesota.

The Problem of Unbelief in the Sixteenth Century -

Lucien Febvre 1982

Lucien Febvre's magisterial study of sixteenth century religious and intellectual history, published in 1942, is at long last available in English, in a translation that does it full justice. The book is a modern classic. Febvre, founder with Marc Bloch of the journal *Annales*, was one of France's leading

historians, a scholar whose field of expertise was the sixteenth century. This book, written late in his career, is regarded as his masterpiece. Despite the subtitle, it is not primarily a study of Rabelais; it is a study of the mental life, the mentalit , of a whole age. Febvre worked on the book for ten years. His purpose at first was polemical: he set out to demolish the notion that Rabelais was a covert atheist, a freethinker ahead of his time. To expose the anachronism of that view, he proceeded to a close examination of the ideas, information, beliefs, and values of Rabelais and his contemporaries. He combed archives and local records, compendia of popular lore, the work of writers from Luther and Erasmus to Ronsard, the verses of obscure neo-Latin poets. Everything was grist for his mill: books about comets, medical texts, philological treatises, even music and architecture. The result is a

work of extraordinary richness of texture, enlivened by a wealth of concrete details--a compelling intellectual portrait of the period by a historian of rare insight, great intelligence, and vast learning. Febvre wrote with Gallic flair. His style is informal, often witty, at times combative, and colorful almost to a fault. His idiosyncrasies of syntax and vocabulary have defeated many who have tried to read, let alone translate, the French text. Beatrice Gottlieb has succeeded in rendering his prose accurately and readably, conveying a sense of Febvre's strong, often argumentative personality as well as his brilliantly intuitive feeling for Renaissance France.

Social Theory of International Politics -

Alexander Wendt
1999-10-07

Drawing upon philosophy and social theory, Social Theory of International Politics develops a theory of the international system as a social construction.

Alexander Wendt clarifies

the central claims of the constructivist approach, presenting a structural and idealist worldview which contrasts with the individualism and materialism which underpins much mainstream international relations theory. He builds a cultural theory of international politics, which takes whether states view each other as enemies, rivals or friends as a fundamental determinant. Wendt characterises these roles as 'cultures of anarchy', described as Hobbesian, Lockean and Kantian respectively. These cultures are shared ideas which help shape state interests and capabilities, and generate tendencies in the international system. The book describes four factors which can drive structural change from one culture to another - interdependence, common fate, homogenization, and self-restraint - and examines the effects of capitalism and

democracy in the emergence of a Kantian culture in the West.
