

Demographics Of Homelessness Series The Rising Elderly

As recognized, adventure as skillfully as experience more or less lesson, amusement, as well as contract can be gotten by just checking out a ebook **Demographics Of Homelessness Series The Rising Elderly** as well as it is not directly done, you could bow to even more in the region of this life, on the order of the world.

We allow you this proper as capably as easy way to get those all. We find the money for Demographics Of Homelessness Series The Rising Elderly and numerous ebook collections from fictions to scientific research in any way. accompanied by them is this Demographics Of Homelessness Series The Rising Elderly that can be your partner.

The Gerontological Prism: Developing Interdisciplinary Bridges - Jeffrey Michael Clair 2018-10-26

"The Gerontological Prism" promotes disciplinary cooperation in aging research and practice. To some extent, each chapter explores a unified objective, that of generating a disciplinary-blind gerontology. The fundamental assumption throughout this book is that the aging individual and society can be enhanced by an understanding of the correlates of basic social, behavioral, demographic, economic, political, ethical, and biomedical processes involving aging. Each author touches on issues that have both social psychological, and practical policy significance. They aim toward sensitizing the reader to the possibilities of a properly informed interdisciplinary approach to gerontology.

Evidence-Based Treatment with Older Adults - Nancy Kropf 2017

"Provides a detailed examination of research-supported psychosocial interventions for use with older adults. The interventions address the diversity of mental health and late-life challenges that older adults' experience. Comprehensive treatment and research information is provided for each intervention including practice skills, strategies, and adaptations for use with older clients"--

Homelessness, Social Exclusion and Health - Fiona Cuthill 2019-11-01

In a globalised world, the wealthy elite and the rough sleeper negotiate the same streets, jostling for space in the doorways of shops selling

luxury goods, thus the winners and losers of global capitalism meet in the same urban spaces. While the visibility of rough sleepers has become a shorthand to frame poverty and inequality, homelessness is not confined to the doorways of cities. It is experienced in a multitude of different ways: as single homeless people living in hostels, shelters and temporary supported accommodation, as those sofa-surfing and living in overcrowded accommodation and as those who are termed statutory homeless, waiting for a house from a social housing provider. Homelessness is recognised as a multi-dimensional phenomenon. The issue of homelessness and social exclusion has received increasing attention in the wider arena of health and social care policy and practice, the issue of homelessness and health has been the focus of recent Public Health attention in Scotland. Positioned within a health inequalities framework, homelessness is understood to be both a consequence and a cause of poverty, social and health inequality. Homeless people experience poorer physical and mental health than the general population and present a higher prevalence of physical, mental and substance misuse issues. The main aim of this book is to support readers wishing to understand issues of homelessness, social exclusion and health at a local level but to do so by framing these issues in a global context. It expands notions of health by drawing on disciplines outside the fields of housing and health to better comprehend the ways that stigma, identity and urban geographies

shape, frame and present homelessness, especially for those who are rough sleeping.
Case Studies in Geriatric Primary Care & Multimorbidity Management - E-Book - Karen Dick 2019-01-29

Gain expertise in primary care of older adults with a case-based approach to geriatric primary care and multimorbidity management. Written by two leading academic and clinical experts in geriatric primary care, *Case Studies in Geriatric Primary Care and Multimorbidity Management*, 1st Edition uses detailed Exemplar Case Studies and Practice Case Studies to teach you how to think like an expert geriatric clinician. Because most older adults have more than one condition when seeking care, both Exemplar and Practice Case Studies place a strong emphasis on "multimorbidity" management, (the management of patients with a host of complex, interacting conditions). To provide extensive practice in learning how to think like an expert, case studies reflect the reality that care does not necessarily begin or end in the primary care setting. Cases therefore move fluidly from primary care to acute care to inpatient rehabilitation to assisted living to long-term care. Building on foundational introductory chapters, cases also call on you to develop interprofessional collaboration skills and reflect the diversity of today's older adults, in terms of age (young-old to old-old), gender, culture, ethnicity, sexuality, socioeconomic status, and more! As you work through both basic-level and advanced Practice Case Studies, you can make extensive notes in the printed book and then go online to submit answers for grading and receive expert feedback for self-reflection. NEW! Introductory unit on the core principles of caring for older adults gives you a strong foundation in the principles of geriatric primary care and multimorbidity management. NEW! and UNIQUE! Exceptionally detailed, unfolding Exemplar Case Studies demonstrate how an expert advanced practitioner "thinks clinically" to provide care to older adults with multiple conditions. NEW and UNIQUE! Exceptionally detailed, unfolding Practice Case Studies emphasize patient diversity and multimorbidity management across healthcare settings to help you develop advanced clinical reasoning skills for geriatric primary care. NEW and UNIQUE! Strong emphasis on multimorbidity

management focuses on caring for older adults with multiple chronic conditions. NEW! Emphasis on the continuum of care across settings reflects the reality that care does not necessarily begin or end in the primary care setting but can move from primary care to acute care to inpatient rehabilitation to assisted living to long-term care, and so forth. NEW! Online answer submission for grading and expert feedback for self-reflection. NEW! Emphasis on patient diversity reflects the makeup of today's older adult, population in terms of age (young-old to old-old), gender, culture, ethnicity, sexuality, socioeconomic status, and more. NEW! Emphasis on interprofessional collaboration use Exemplar Case Studies and Practice Case Studies to allow you to demonstrate your interprofessional collaboration skills.

Baby Boomer Survival Guide, Second Edition - Barbara Rockefeller 2021-03-30

Fully updated and revised, this new edition of *The Baby Boomer Survival Guide* is the premier roadmap to retirement for anyone focused on financial security. This is a comprehensive, easy-to-understand guide that covers all the significant financial, healthcare, and lifestyle-related considerations today's baby boomer generation need to know.

Gerontology for the Health Care Professional - Regula H. Robnett 2018-09-04

Gerontology for the Health Care Professional, Fourth Edition is a comprehensive, practical text covering the evolving field of gerontology, developed for healthcare students and professionals. Written by experts across many health disciplines, this text presents an up-to-date and realistic assessment of the aging process.

Independent for Life - Henry Cisneros 2012-05-10

Do you want to age independently in your own home and neighborhood? Staying home, aging in place, is most people's preference, but most American housing and communities are not adapted to the needs of older people. And with the fastest population growth among people over 65, finding solutions for successful aging is important not only for individual families, but for our whole society. In *Independent for Life*, former HUD Secretary Henry Cisneros and a team of experts on aging, architecture, construction, health, finance, and politics assess the current

state of housing and present new possibilities that realistically address the interrelated issues of housing, communities, services, and financial concerns. Independent for Life covers a wide range of smart solutions, including remodeling current housing and building new homes for accessibility and safety, retrofitting existing neighborhoods to connect needed services and amenities, and planning new communities that work well for people of all ages. Case studies show how the proposals can be implemented. The authors offer action plans for working with policy makers at local, state, and national levels to address the larger issues of aging in place, including family financial security, real estate markets, and the limitations of public support. Lists of essential resources, including a detailed "to do" list of aging in place priorities and an individual home assessment, complete the volume.

Vulnerability - Henk ten Have 2016-04-08

Alongside globalization, the sense of vulnerability among people and populations has increased. We feel vulnerable to disease as new infections spread rapidly across the globe, while disasters and climate change make health increasingly precarious. Moreover, clinical trials of new drugs often exploit vulnerable populations in developing countries that otherwise have no access to healthcare and new genetic technologies make people with disabilities vulnerable to discrimination. Therefore the concept of 'vulnerability' has contributed new ideas to the debates about the ethical dimensions of medicine and healthcare. This book explains and elaborates the new concept of vulnerability in today's bioethics. Firstly, Henk ten Have argues that vulnerability cannot be fully understood within the framework of individual autonomy that dominates mainstream bioethics today: it is often not the individual person who is vulnerable, rather that his or her vulnerability is created through the social and economic conditions in which he or she lives. Contending that the language of vulnerability offers perspectives beyond the traditional autonomy model, this book offers a new approach which will enable bioethics to evolve into a global enterprise. This groundbreaking book critically analyses the concept of vulnerability as a global phenomenon. It will appeal to scholars and

students of ethics, bioethics, globalization, healthcare, medical science, medical research, culture, law, and politics.

Homelessness, Health, and Human Needs - Institute of Medicine 1988-02-01

There have always been homeless people in the United States, but their plight has only recently stirred widespread public reaction and concern. Part of this new recognition stems from the problem's prevalence: the number of homeless individuals, while hard to pin down exactly, is rising. In light of this, Congress asked the Institute of Medicine to find out whether existing health care programs were ignoring the homeless or delivering care to them inefficiently. This book is the report prepared by a committee of experts who examined these problems through visits to city slums and impoverished rural areas, and through an analysis of papers written by leading scholars in the field.

The New Public Health - Theodore H. Tulchinsky 2023-01-21

The New Public Health has established itself as a solid textbook throughout the world. Translated into 7 languages, this work distinguishes itself from other public health textbooks, which are either highly locally oriented or, if international, lack the specificity of local issues relevant to students' understanding of applied public health in their own setting. Fully revised, the fourth edition of The New Public Health, Fourth Edition provides a unified approach to public health appropriate for graduate students and advance undergraduate students especially for courses in MPH, community health, preventive medicine, community health education programs, community health nursing programs. It is also a valuable resource for health professionals requiring an overview of public health. Provides a comprehensive overview of the field, illustrated with real-life specific examples Updated with new case studies and examples from current public health environment in North American and European regions Includes detailed companion website featuring case studies, image bank, online chapters, and video as well as an instructors' guide

Libraries and Homelessness: An Action Guide - Julie Ann Winkelstein 2021-07-31

Advocating a strategic approach, this book shows how to form a plan, secure funding and support,

and create effective programs for adults, children, and youth who are experiencing homelessness. You'll find guidance for creating partnerships, training staff, and advocating. Taking a holistic approach that will help you to better understand the experience of homelessness within the context of your library community, this book offers new strategies and tools for addressing the challenge of meeting the needs of the entire community, including those who are unstably housed. With basic facts, statistics, and conversations about homelessness, the author makes a case for why libraries should provide support, explains exactly which needs they may be able (or unable) to meet, and shows how this support can be a natural part of the library services you already provide. Topics discussed include trauma-informed care, harm reduction, and mental and physical health challenges; brief stories and concrete examples illustrate the principles and guidelines discussed. Citing innovative services such as Dallas Public Library's "coffee and conversation" program and San Francisco Public Library's social worker program, the book offers both food for thought and tools for action as public librarians strive to understand and meet the needs of a population that has traditionally been stereotyped and excluded. Discusses specific short-term and long-term actions that libraries can take to better address the needs of community members who are experiencing homelessness Outlines steps libraries can take to balance the needs of all library users Shows how to identify and work with potential partners Describes new ways libraries can and are addressing common barriers to library services for those experiencing homelessness

[The Oxford Handbook of Social Work in Health and Aging](#) - Daniel Kaplan 2015-10-13
This Second Edition of the Handbook addresses the evolving interdisciplinary health care context and the broader social work practice environment, as well as advances in the knowledge base which guides social work service delivery in health and aging. This includes recent enhancements in the theories of gerontology, innovations in clinical interventions, and major developments in the social policies that structure and finance health care and senior services. In addition, the policy reforms of the 2010 Patient

Protection and Affordable Care Act set in motion a host of changes in the United States healthcare system with potentially profound implications for the programs and services which provide care to older adults and their families. In this volume, the most experienced and prominent gerontological health care scholars address a variety of populations that social workers serve, and the arenas in which they practice, followed by detailed recommendations of best practices for an array of physical and mental health conditions. The volume's unprecedented attention to diversity, health care trends, and implications for practice, research, policy make the publication a major event in the field of gerontological social work. This is a Must-Read for all social work social work educators, practitioners, and students interested in older adults and their families.

Old and Homeless--double-jeopardy - Diane Wiatt Rich 1995

A guide for those who work with older homeless people.

[Healthcare Access](#) - Umar Bacha 2020-05-27
Healthcare Access - Regional Overviews is a compilation of ten chapters consisting of case studies, research works, reviews, and expert opinions providing insight on the previous and current developments in the field of hygiene and infection control with practices to prevent or minimize the spread of infectious diseases. The book also addresses the status and healthcare access of the most neglected segments in less developed countries. All chapters are written by global researchers are edited by experts in the field. The information presented in this work can be replicated at different levels to accelerate timely and quality healthcare services.

[Cities of Difference](#) - Ruth Fincher 1998-03-20
By adopting an approach that is sensitive to issues of difference as well as to the role of the state, Cities of Difference considers the fragmentation of city life and the complex relationship between identity, power and place.

[Social Work Practice With Older Adults](#) - Jill M. Chonody 2017-11-08

Social Work Practice With Older Adults by Jill Chonody and Barbra Teater presents a contemporary framework based on the World Health Organization's active aging policy that allows forward-thinking students to focus on

client strengths and resources when working with the elderly. The Actively Aging framework takes into account health, social, behavioral, economic, and personal factors as they relate to aging, but also explores environmental issues, which supports the new educational standards put forth by the Council on Social Work Education.

Covering micro, mezzo, and macro practice domains, the text examines all aspects of working with aging populations, from assessment through termination.

Cityscapes in History - Heléna Tóth 2016-05-23

Cityscapes in History: Creating the Urban Experience explores the ways in which scholars from a variety of disciplines - history, history of art, geography and architecture - think about and study the urban environment. The concept 'cityscapes' refers to three different dynamics that shape the development of the urban environment: the interplay between conscious planning and organic development, the tension between social control and its unintended consequences and the relationship between projection and self-presentation, as articulated through civic ceremony and ritual. The book is structured around three sections, each covering a particular aspect of the urban experience. 'The City Planned' looks at issues related to agency, self-perception, the transfer of knowledge and the construction of space. 'The City Lived' explores the experience of urbanity and the construction of space as a means of social control. And finally, 'The City as a Stage' examines the ways in which cultural practices and power-relations shape - and are in turn shaped by - the construction of space. Each section combines the work of scholars from different fields who examine these dynamics through both theoretical essays and empirical research, and provides a coherent framework in which to assess a wide range of chronological and geographical subjects. Taken together the essays in this volume provide a truly interdisciplinary investigation of the urban phenomenon. By making fascinating connections between such seemingly diverse topics as 15th century France and modern America, the collection raises valuable questions about scholarly approaches to urban studies.

The City: Land use, structure, and change in the Western city - Michael Pacione 2002

Homeless Older Populations - Diane Chau

2018-03-28

Offers proven strategies for advancing the care of the homeless elderly Filled with key insights and field-tested knowledge, this is a concise, hands-on guide to how interdisciplinary team strategies can advance the care of older homeless adults. The book encompasses research evidence, education-based initiatives, and systems thinking, and describes how to implement promising health care outlooks for diverse elderly populations in a variety of localities. Chapters address the many challenges to caring for homeless individuals by integrating a team vision for adopting transformation and geriatrics health care workforce education. The book provides an overview of population demographics and trends and discusses specific medical/psychological care challenges including the spread of infectious diseases. It covers the delivery of care to homeless patients, complex ethical and legal issues, housing, social economics, family disruption and abuse, end-of-life considerations, and political and policy challenges. With abundant case studies and discussions about successes and failures in homeless geriatric health care, the book provides a framework for the joint efforts of social worker, nurse, mental health professional, physician, and other health care professionals to provide optimal care for older homeless populations. Key Features: Presents the most current resources, evidence, and developments for interdisciplinary care of older homeless populations Written by an interprofessional health care workforce with abundant clinical and academic experience in the field Focuses on implementing, developing, and adopting health care strategies to provide for care of the frail homeless elderly Includes case studies and discussions of successes and failures Addresses challenges, barriers, resolutions, and opportunities for homeless geriatric care

Permanent Supportive Housing - National Academies of Sciences, Engineering, and Medicine 2018-07-11

Chronic homelessness is a highly complex social problem of national importance. The problem has elicited a variety of societal and public policy responses over the years, concomitant with fluctuations in the economy and changes in the demographics of and attitudes toward poor and

disenfranchised citizens. In recent decades, federal agencies, nonprofit organizations, and the philanthropic community have worked hard to develop and implement programs to solve the challenges of homelessness, and progress has been made. However, much more remains to be done. Importantly, the results of various efforts, and especially the efforts to reduce homelessness among veterans in recent years, have shown that the problem of homelessness can be successfully addressed. Although a number of programs have been developed to meet the needs of persons experiencing homelessness, this report focuses on one particular type of intervention: permanent supportive housing (PSH). Permanent Supportive Housing focuses on the impact of PSH on health care outcomes and its cost-effectiveness. The report also addresses policy and program barriers that affect the ability to bring the PSH and other housing models to scale to address housing and health care needs.

On-Call Geriatric Psychiatry - Ana Hategan 2016-04-13

This text covers basic principles and practice of on-call psychiatric care in the geriatric patient in various medical settings. It compiles the most likely complaints and provides assessment and management tools for each situation. Written and edited by expert geriatric psychiatrists, emergency psychiatrists, consultation/liaison psychiatrists, geriatricians, and other multidisciplinary specialists, this is the first handbook devoted to on-call geriatric psychiatry. Chapters contain an important summary of key points for managing clinical situations, case studies, and reflective questions. This text brings together relevant principles of on-call geriatric psychiatry provided in clinical settings such as emergency, acute and subacute inpatient, outpatient, residential, correctional, and consultation/liaison. It includes clinical topics such as psychopharmacology, psychotherapy, substance abuse, and includes coverage of medical ethics and the law, utilization of contemporary technology, and administrative and public health policy. On-Call Geriatric Psychiatry is the first practical guide to knit together evidence-based medicine and geriatric psychiatric principles and practice guidelines and is a valuable resource for trainees, psychiatrists,

geriatricians, emergency departments, nursing home physicians, and other health professionals working with older adult patients.

Housing Policy in the United States - Alex F. Schwartz 2021-04-29

The fourth edition of Housing Policy in the United States refreshes its classic, foundational coverage of the field with new data, analysis, and comparative focus. This landmark volume offers a broad overview that synthesizes a wide range of material to highlight the significant problems, concepts, programs and debates that all define the aims, challenges, and milestones within and involving housing policy. Expanded discussion in this edition centers on state and local activity to produce and preserve affordable housing, the impact and the implications of reduced financial incentives for homeowners. Other features of this new edition include: • Analysis of the impact of the Tax Cuts and Jobs Act of 2017 on housing-related tax expenditures; • Review of the state of fair housing programs in the wake of the Trump Administration's rollback of several key programs and policies; • Cross-examination of U.S. housing policy and conditions in an international context. Featuring the latest available data on housing patterns and conditions, this is an excellent companion for graduate and advanced undergraduate courses in urban studies, urban planning, sociology and social policy, and housing policy.

Discover Sociology - Daina S. Eglitis 2021-08-26

Discover Sociology is an introductory text that describes the various forms of power and authority in all aspects of social life, demonstrates why inequality matters, and shows how studying sociology can benefit you as an engaged citizen and in your career.

Geriatric Psychiatry - Ana Hategan 2018-04-03

This textbook presents real-world cases and discussions that introduce the various mental health syndromes found in the aging population before delving into the core concepts covered by geriatric psychiatry curricula. The text follows each case study with the vital information necessary for physicians in training, including key features of each disorder and its presentation, practical guidelines for diagnosis and treatment, clinical pearls, and other devices that are essential to students of geriatric psychiatry. With the latest DSM-5 guidelines and with rich learning

tools that include key points, review questions, tables, and illustrations, this text is the only resource that is specifically designed to train both American and Canadian candidates for specialty and subspecialty certification or recertification in geriatric psychiatry. It will also appeal to audiences worldwide as a state-of-the-art resource for credentialing and/or practice guidance. The text meets the needs of the future head on with its straightforward coverage of the most frequently encountered challenges, including neuropsychiatric syndromes, psychopharmacology, eldercare and the law, substance misuse, mental health following a physical condition, medical psychiatry, and palliative care. Written by experts in the field, *Geriatric Psychiatry: A Case-Based Textbook* is the ultimate resource for graduate and undergraduate medical students and certificate candidates providing mental health care for aging adults, including psychiatrists, psychologists, geriatricians, primary care and family practice doctors, neurologists, social workers, nurses, and others.

Social Work Case Management - Michael J. Holosko 2017-01-30

Social Work Case Management: Case Studies From the Frontlines by Michael J. Holosko is an innovative book that equips readers with the knowledge and skills they need to be effective case management practitioners in a variety of health and human service organizations. A must-read for students and professionals in social work, this important work introduces a unique Task-Centered Case Management Model built around the unifying principles of the profession—person-in-environment, strengths-based work, and ecological perspective. Over twenty case studies by case managers and professionals offer innovative practice insights, illustrating the practice roles and responsibilities of today's case managers and the realities of conducting case management in today's growing, exciting, and challenging field.

Poor and Homeless in the Sunshine State - James Wright 2017-07-05

A place like Orlando, Florida is not transformed from swampland to sprawling metropolis through Peter Pan-like flights of fancy, but through theme park expansions requiring developmental schemes that are tough minded and often

worsen relationships between the wealthy and the poor. The homeless arrive with their own hopes and illusions, which are soon shattered. The rest of the local population makes its peace with the system. Meanwhile the homeless are reduced to advocacy models that neither middle- nor working-class folks much worry about. They are modern members of Ellison's "invisible men" but they comprise a racial and social mixture unlike any other in the American landscape. This book is primarily about the dark side of this portrait the poor, near-poor, homeless, and dispossessed who live in the midst of this verdant landscape. The phrase "down and out," has been used to describe people who are destitute or penniless since the late nineteenth century. Here the term is used in a more expansive sense, as synonymous with anyone who lives near, at, or over the edge of financial catastrophe.

Homelessness - Barry V. Coyne 2007

This guide to the literature presents descriptions of books, reports and articles dealing with all aspects of Homelessness including: economic aspects; issues on substance abuse and homelessness; mortality rates; treatment preferences; homeless programs: public opinion; community care; and many more. The book is completely indexed for easy axis.

Late-Life Homelessness - Amanda Grenier 2022-01-15

Around the world and across a range of contexts, homelessness among older people is on the rise. In spite of growing media attention and new academic research on the issue, older people often remain unrecognized as a subpopulation in public policy, programs, and homeless strategies. As such, they occupy a paradoxical position of being hypervisible while remaining overlooked. *Late-Life Homelessness* is the first Canadian book to address this often neglected issue. Basing her analysis on a four-year ethnographic study of late-life homelessness in Montreal, Canada, Amanda Grenier uses a critical gerontological perspective to explore life at the intersection of aging and homelessness. She draws attention to disadvantage over time and how the condition of being unhoused disrupts a person's ability to age in place, resulting in experiences of unequal aging. Weaving together findings from policy documents, stakeholder insights, and observations and interviews with older people,

this book demonstrates how structures, organizational practices, and relationships related to homelessness and aging come to shape late life. Situated in the context of an aging population, rising inequality, and declining social commitments, *Late-Life Homelessness* stresses the moral imperative of responding justly to the needs of older people as a means of mitigating the unequal aging of unhoused elders. *Marriages, Families, and Relationships: Making Choices in a Diverse Society* - Mary Ann Lamanna 2014-01-17

This best-selling text on marriages, families, and relationships combines a rigorous scholarly and applied approach with a theme especially relevant to today's dynamic global environment: making choices in a diverse society. The authors use an engaging narrative to create a highly readable text that offers insightful perspectives on the diversity of our modern society, including different ethnic traditions and family forms. The balanced presentation discusses a variety of theoretical perspectives (e.g., family ecology, structure-functional, interaction-constructionist, family systems, biosocial), emphasizing both social structure and the importance of individual agency, choice, and decision-making. Students are encouraged to question assumptions and reconcile conflicting ideas and values as they make informed choices in their own lives. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. *Developments in Aging* - United States. Congress. Senate. Special Committee on Aging 1994

Clinical Management of the Homeless Patient - Elspeth Cameron Ritchie 2021-05-26

This volume highlights the socioeconomic concerns related to medical care for homeless patients and places them at the interface of common psychiatric and medical problems clinicians encounter. Written by experts in psychiatry and other medical specialties, this volume is a concise, yet comprehensive overview of the homeless crisis, its costs, and ultimately, best practices for improved outcomes. The text begins by examining the scope and epidemiology of the problem and discusses its costs. It then examines the best practices for both physical and psychiatric care before concluding with a

section on working with special populations that have unique concerns across the country including LGBTQ, women, children, veterans, and aging adults. As the first medical book on homelessness, it is designed to cover a broad range of concerns in a concise, practical fashion for all clinicians working with homeless patients. *Clinical Management of the Homeless Patient* is written by and for psychiatrists, general internists, geriatricians, pediatricians, addiction medicine physicians, VA physicians, and all others who may encounter this crisis in their work.

Violence and Abuse in Society - Angela Browne Miller 2012

Suitable for professionals, students, and lay readers alike, this book provides an immensely informative, profoundly moving, and remarkably comprehensive look at the range and nature of violence and abuse by and of humans today. Angela Browne-Miller, PhD, is editor of this comprehensive and unique set of four volumes containing over 110 chapters from over 130 international experts with backgrounds in behavioral science, social science, law, and medicine, as well as researchers, practitioners, and lay persons with varied specialties. These volumes cover the following areas reflected by their titles: Volume One: Fundamentals, Effects, and Extremes; Volume Two: Setting, Age, Gender, and Other Key Elements; Volume Three: Psychological, Ritual, Sexual, and Trafficking Issues; and Volume Four: Faces on Intimate Partner Violence. This collection looks at the range of violence and abuse we see today, conducting a detailed examination against the backdrop of a history of violence and abuse around the globe. The works within focus for the most part on violence and abuse taking place outside of war contexts, discussing road rage, child abuse, elder abuse, abuse of women and girls, sex slavery, violent rituals including female genital cutting, abuse within cults, domestic violence, gun violence, and modern problems fueled by technology, including cyberbullying and cyberstalking. Contributions from experts from more than 20 countries

The Encyclopedia of Elder Care - Elizabeth A. Capezuti, PhD, RN, FAAN 2013-12-11

"The information [in this book] is amazing. I reviewed topics in which I have expertise and

was very satisfied. This is an excellent addition to my library and I will refer to it often, much like a medical dictionary. Score: 90, 4 Stars.--Doody's Medical Reviews "The third edition of this encyclopedia provides 273 comprehensive, yet succinct, entries on a variety of topics related to elder care. ... In addition, many of the entries include see also references that help readers easily navigate the book. Entries are written at an undergraduate level and would be useful for practitioners, students, and caregivers...Recommended."--Choice: Current Reviews for Academic Libraries This interdisciplinary clinical reference encompasses more than 310 current entries on a broad range of topics related to geriatrics and geriatric care across multiple health care disciplines. The third edition reflects the many advances in geriatrics that have occurred since the publication of the second edition in 2006. It contains the updated, evidence-based contributions of more than 260 nationally recognized geriatric healthcare professionals regarding elder-care concerns relating to society, community, caregiving, and the individual. Completely new entries address Geriatric Care Models (acute care for elders, Project BOOST), Geriatric Health Issues (diarrhea in adults, prolonged hospitalization, frailty, fronto-temporal dementia, re-hospitalization, acute urinary retention, personality and aging, primary palliative care), Technology and Aging (Smart home sensors, Telehealth, Surveillance technology), and more. The Encyclopedia is organized alphabetically and includes links to important Web-based resources and Apps. Clinical topics comprehensively address diagnosis, treatment, and disease management. Health care clinicians across the continuum will find this reference—the only one of its kind--to be a valuable guide to making appropriate referrals to social service providers, and social service professionals will be well informed by highly accessible descriptions of diagnoses, clinical syndromes, and care management. Key Features: Includes over 310 updated geriatric and geriatric care clinical entries across multiple healthcare disciplines Contains state-of-the-art contributions from over 260 nationally recognized geriatric healthcare experts Provides clinical content for social service professionals and social care information for clinicians Offers

new information on multiple topics relating to Geriatric Care Models, Geriatric Health Concerns, and Technology and Aging References numerous Web-based resources and Apps

Encyclopedia of Homelessness - David Levinson
2004-06-21

"The first comprehensive resource on this important topic, this set covers the origins of homelessness, current research, and strategies for its prevention. The contributors represent such disciplines as sociology, anthropology, medicine, and social work. Articles address homelessness in eight major American cities and more than 30 cities and nations around the world. Adding depth are bibliographies, a directory of street newspapers, a filmography, and more than 20 primary-source documents offering historical and contemporary perspectives."--"Reference that rocks," American Libraries, May 2005.

Introduction to Aging - Judith A. Sugar, PhD
2019-08-08

The second edition of this engaging text reflects a welcome new paradigm for aging—that of aging as a positive stage of life. Written for undergraduate and masters-level students, it provides an interdisciplinary perspective on the wide variety of subject areas within gerontology, and combines research with engrossing narratives, new trends, and controversial topics. Substantially updated, the second edition features integrated content on the diversity of the aging population. State-of-the-art information includes new science on the biology of aging; chronic conditions; integrated care; changing roles for older adults; new demographics; and critical policy issues. The second edition examines career opportunities in gerontology and includes Practical Applications and Student Activities, new scenarios, and many more charts and graphs. Qualified instructors have access to supplementary material, including PowerPoint slides, a test bank, and an instructor's manual. Key Features: Conceptualizes a positive approach to aging, with an emphasis on the advantages and opportunities presented by the large and growing number of older Americans Delivers comprehensive, interdisciplinary coverage of aging topics Dispels negative myths about aging Engages the reader with vivid narratives and thought-provoking activities Offers a broad range

of subject areas in the field, from biological aging processes, to economics and living arrangements Provides instructor's manual, PowerPoint slides, and test bank for additional learning Includes access to student activities answer key New to the Second Edition: Presents a new chapter on careers in aging, which explores expanding opportunities Explores new and updated demographics Includes new information on personality, palliative care, age-friendly communities, homelessness, social networks, Medicaid, and more Presents a new approach to elder abuse focusing on solutions to social isolation, a major cause of abuse

Primary Care Mental Health in Older People

- Carlos Augusto de Mendonça Lima 2019-08-07

This book is a practical resource that will support the delivery of holistic mental health interventions in the primary and community care setting for older people. Primary care delivery is discussed in relation to both functional mental health problems, such as anxiety, depression, and psychotic and personality disorders, and acquired organic mental disorders of old age, such as dementia, cognitive impairments, and delirium. Careful consideration is paid to the complex relationship between mental and somatic health problems, as well as the impacts of multimorbidity and polypharmacy. Further topics include, for example, epidemiology, wider determinants of health, different care models, history taking, neurocognitive and capacity assessment, and pharmacological, psychological, and physical interventions. The wider goals of the book are to support the development of community resilience and self-care in older people; to promote universal access and equity for older people in order to enable them to achieve or recover the highest attainable standard of health, regardless of age, gender, or social position; and to promote pathways to care for older people with mental health problems respecting their autonomy, independence, human rights, and the importance of the life-course approach. This book will be an invaluable resource for all professionals who work with older adults with mental health problems and those training in these fields including physicians, psychiatrists, family doctors, geriatricians, general practitioners, nurses, psychologists, neurologists, occupational therapists, social

workers, support workers and community health and social care workers.

Group Techniques for Aging Adults - Kathie T. Erwin 2013

The practical ideas Kathie Erwin imparts in this second edition help mental health professionals working with elderly populations to create an interactive, multi-modal program that addresses the issues and needs elders have, divided into holistic contexts of mind, body, society, and spirituality.

Fundamentals for Public Health Practice - Amanda Holland 2022-09-23

A comprehensive textbook providing a complete overview of the multifaceted nature of public health practice. It explores all aspects of public health from communities and wider society, child development and early relationships, inequalities in health, safeguarding, the rapidly changing nature of society and the significance of culture, equality and diversity. The book takes a life-span approach and makes direct links to the UK health and social care context and has been written for an interprofessional audience. It will be essential reading for health and social care students including nurses and midwives, allied health care professionals, social care workers, qualified health and social care practitioners and anyone who plays a role in understanding, promoting, and protecting public health. Key features: Comprehensive, wide-ranging coverage Addresses the realities of public health in a globalised world Applied to the UK four nation context but also considers the global dimension of public health practice

Cities and Homelessness - Joaquin Jay Gonzalez III 2021-04-23

Homelessness in America's cities remains a growing problem. The homeless today face the same challenges as in years past: poverty, tenuous or no ties to family and friends, physical and mental health issues, and substance abuse. Compared to the 1950s to 1970s, more homeless are now sleeping on city streets versus in shelters or single room hotels. Homelessness rates are affected by economic trends, lack of equitable and inclusive healthcare and housing, decline in public assistance programs, and natural and man-made disasters. This collection of essays covers case studies, innovations, practices and policies of municipalities coping

with homelessness in the 21st century.

Rural Crime and Community Safety - Vania A Ceccato 2015-08-27

Crime is often perceived as an urban issue rather than a problem that occurs in rural areas, but how far is this view tenable? This book explores the relationship between crime and community in rural areas and addresses the notion of safety as part of the community dynamics in such areas. *Rural Crime and Community Safety* makes a significant contribution to crime science and integrates a range of theories to understand patterns of crime and perceived safety in rural contexts. Based on a wealth of original research,

Ceccato combines spatial methods with qualitative analysis to examine, in detail, farm and wildlife crime, youth related crimes and gendered violence in rural settings. Making the most of the expanding field of Criminology and of the growing professional inquiry into crime and crime prevention in rural areas; rural development; and the social sustainability of rural areas, this book builds a bridge by connecting Criminology and Human Geography. This book will be suitable for academics, students and practitioners in the fields of criminology, community safety, rural studies, rural development and gender studies.
