The Last Interview - Eshkol Nevo 2020-10-13
National Jewish Book Award Finalist Wingate
Literary Prize Shortlist Named a Notable

Translated Book of the Year by World Literature Today From the internationally best-selling author of *Three Floors Up*, a literary page-turner that delves into the deepening cracks in a carefully constructed public persona. A writer tries to answer a set of interview questions sent to him by a website editor. At first, they stick to the standard fare: Did you always know you would be a writer? How autobiographical are your books? Have you written any stories you would never publish? Usually his answers in these situations are measured, calculated, cautious. But this time, when his heart is about to break and his life is

about to crumble, he finds he cannot tell anything but the truth. The naked, funny, sad, scandalous, politically incorrect truth. Every question the writer tackles opens a door to a hidden room of his life. And each of his answers reveals that at the heart of every truth, there is a lie—and vice versa. Surprising, bold, intimate, and utterly engrossing, *The Last Interview* shows just how tenuous the lines are between work and life, love and hate, fact and fiction. And in exploring the many, often contradictory facets of an Israeli author's identity, Eshkol Nevo also gives us a nuanced, thought-provoking portrait of a country at odds with itself.

Structured Interview for DSM-IV Personality -
Bruce Pfohl 1997

Updated for DSM-IV, the Structured Interview for DSM-IV Personality (SIDP-IV) is a semi-structured interview that uses nonpejorative

questions to examine behavior and personality traits from the patient's perspective. The SIDP-IV is organized by topic sections rather than disorder to allow for a more natural conversational flow, a method that gleans useful information from related interview questions and produces a more accurate diagnosis. Designed as a follow-up to a general psychiatric interview and chart review that assesses episodic psychiatric disorders, the SIDP-IV helps the interviewer to more easily distinguish lifelong behavior from temporary states that result from an episodic psychiatric disorder. During the session, the interviewer can

also refer to the specific DSM-IV criterion associated with that question set. In the event that the clinician decides to interview a third-party informant such as family members or close friends, a consent form is provided at the end of the interview. With this useful, concise interview in hand, clinicians can move quickly from diagnosis to treatment and begin to improve their patient's quality of life.
