Modelling, Simulation and Control of Two-Wheeled Vehicles - Mara Tanelli  
2014-02-04

Enhanced e-book includes videos Many books have been written on modelling, simulation and control of four-

wheeled vehicles (cars, in particular). However, due to the very specific and different dynamics of two-wheeled vehicles, it is very difficult to reuse previous knowledge gained on cars for two-wheeled

vehicles. Modelling, Simulation and Control of Two-Wheeled Vehicles presents all of the unique features of two-wheeled vehicles, comprehensively covering the main methods, tools and approaches to address the modelling, simulation and control design issues. With contributions from leading researchers, this book also offers a perspective on the future trends in the field, outlining the challenges and the industrial and academic development scenarios. Extensive reference to real-world problems and experimental tests is also included throughout. Key features: The first book to cover all aspects of two-wheeled vehicle dynamics and control Collates cutting-edge research from leading international researchers in the field Covers motorcycle control –

a subject gaining more and more attention both from an academic and an industrial viewpoint Covers modelling, simulation and control, areas that are integrated in two-wheeled vehicles, and therefore must be considered together in order to gain an insight into this very specific field of research Presents analysis of experimental data and reports on the results obtained on instrumented vehicles. Modelling, Simulation and Control of Two-Wheeled Vehicles is a comprehensive reference for those in academia who are interested in the state of the art of two-wheeled vehicles, and is also a useful source of information for industrial practitioners. *The Everything Essential German Book* - Edward Swick 2013-07-18 Learn to speak and write German like

**The End of a Mission** - Heinrich Böll  
1968

Twilight of the Idols - Friedrich Nietzsche 2019-07-17

A "grand declaration of war," this 1889 polemic examines what we worship and why. Intended by Nietzsche as an introduction to his philosophy, it assails "idols" of Western philosophy and culture.

*Translation Studies* - Mary Snell-Hornby 1988-01-01

"Translation Studies" presents an integrated concept based on the theory and practice of translation. The author adapts linguistic approaches and methods in such a way that they may be usefully employed in the theory, practice, and analysis of literary translation. The author develops a more cultural approach through text analysis and cross-cultural communication studies. The book is a contribution to the

development of translation studies as a discipline in its own right.

**Ecopolitics** - Verena Andermatt Conley  
2006-07-13

Ecopolitics is a study of environmental awareness - or non-awareness - in contemporary French theory. Arguing that it is now impossible not to think in an ecological way, Verena Andermatt Conley traces the roots of today's concern for the environment back to the intellectual climate of the late 50s and 60s. The author considers key texts by influential figures such as Michael Serres, Paul Virilio, Gilles Deleuze and Felix Guattari, Michel de Certeau, Hélène Cixous and Luce Irigaray. Ecopolitics rehabilitates some ecological components of French intellectual thought of the past thirty years, and reassesses French

poststructural thinkers who explicitly deal with ecology in their work.

*The Turns of Translation Studies* - Mary Snell-Hornby 2006-06-09

What's new in Translation Studies? In offering a critical assessment of recent developments in the young discipline, this book sets out to provide an answer, as seen from a European perspective today. Many "new" ideas actually go back well into the past, and the German Romantic Age proves to be the

starting-point. The main focus lies however on the last 20 years, and, beginning with the cultural turn of the 1980s, the study traces what have turned out since then to be ground-breaking contributions (new paradigms) as against what was only a change in position on already established territory (shifting viewpoints). Topics of the 1990s include nonverbal communication, gender-based Translation Studies, stage translation, new fields of interpreting studies and the effects of new technologies and globalization (including the increasingly dominant role of English). The author's aim is to stimulate discussion and provoke further debate on the current profile and future perspectives of Translation Studies.

*Legal Translation and Court*

*Interpreting: Ethical Values, Quality, Competence Training* - Annikki Liimatainen 2017-10-24

This multidisciplinary volume offers a systematic analysis of translation and interpreting as a means of guaranteeing equality under the law as well as global perspectives in legal translation and interpreting contexts. It offers insights into new research on • language policies and linguistic rights in multilingual communities • the role of the interpreter • accreditation of legal translators and interpreters • translator and interpreter education in multiple countries and • approaches to terms and tools for legal settings. The authors explore familiar problems with a view to developing new approaches to language justice by learning from researchers,

trainers, practitioners and policy makers. By offering multiple methods and perspectives covering diverse contexts (e.g. in Austria, Belgium, England, Estonia, Finland, France, Germany, Hong Kong, Ireland, Norway, Poland), this volume is a welcome contribution to legal translation and interpreting studies scholars and practitioners alike, highlighting settings that have received limited attention, such as the linguistic rights of vulnerable populations, as well as practical solutions to methodological and terminological problems.

Musical Composition in the Context of Globalization - Christian Utz

2021-03-31

Since the early transformation of European music practice and theory in the cultural centers of Asia, Latin

America, and Africa around 1900, it has become necessary for music history to be conceived globally - a challenge that musicology has hardly faced yet. This book discusses the effects of cultural globalization on processes of composition and distribution of art music in the 20th and 21st century. Christian Utz provides the foundations of a global music historiography, building on new models such as transnationalism, entangled histories, and reflexive globalization. The relationship between music and broader changes in society forms the central focus and is treated as a pivotal music-historical dynamic.

**Biblical Lexicology: Hebrew and Greek**

- Eberhard Bons 2015-07-01

Lexicography, together with grammatical studies and textual

criticism, forms the basis of biblical exegesis. Recent decades have seen much progress in this field, yet increasing specialization also tends to have the paradoxical effect of turning exegesis into an independent discipline, while leaving lexicography to the experts. The present volume seeks to renew and intensify the exchange between the study of words and the study of texts. This is done in reference to both the Hebrew source text and the earliest Greek translation, the Septuagint. Questions addressed in the contributions to this volume are how linguistic meaning is effected, how it relates to words, and how words may be translated into another language, in Antiquity and today. Etymology, semantic fields, syntagmatic relations, word history,

neologisms and other subthemes are discussed. The main current and prospective projects of biblical lexicology or lexicography are presented, thus giving an idea of the state of the art. Some of the papers also open up wider perspectives of interpretation.

**A Place in the Country** - W.G. Sebald  
2014-02-18

A Place in the Country is W. G. Sebald's meditation on the six artists and writers who shaped his creative mind—and the last of this great writer's major works to be translated into English. This edition includes more than 40 pieces of art, all originally selected by W. G. Sebald. This extraordinary collection of interlinked essays about place, memory, and creativity captures the inner worlds of five authors and one

painter. In his masterly and mysterious style—part critical essay, part memoir—Sebald weaves their lives and art with his own migrations and rise in the literary world. Here are people gifted with talent and courage yet in some cases cursed by fragile and unstable natures, working in countries inhospitable or even hostile to them. Jean-Jacques Rousseau is conjured on the verge of physical and mental exhaustion, hiding from his detractors on the island of St. Pierre, where two centuries later Sebald took rooms adjacent to his. Eighteenth-century author Johann Peter Hebel is remembered for his exquisite and delicate nature writing, expressing the eternal balance of both the outside world and human emotions. Writer Gottfried Keller, best known

for his 1850 novel *Green Henry*, is praised for his prescient insights into a Germany where “the gap between self-interest and the common good was growing ever wider.” Sebald compassionately re-creates the ordeals of Eduard Mörike, the nineteenth-century German poet beset by mood swings, depression, and fainting spells in an increasingly shallow society, and Robert Walser, the institutionalized author whose nearly indecipherable scrawls seemed an attempt to “duck down below the level of language and obliterate himself” (and whose physical appearance and year of death mirrored those of Sebald’s grandfather). Finally, Sebald spies a cognizance of death’s inevitability in painter Jan Peter Tripp’s lovingly exact reproductions of life. Featuring the

same kinds of suggestive and unexplained illustrations that appear in his masterworks *Austerlitz* and *The Rings of Saturn*, and translated by Sebald’s colleague Jo Catling, *A Place in the Country* is Sebald’s unforgettable self-portrait as seen through the experiences of others, a glimpse of his own ghosts alongside those of the men who influenced him. It is an essential addition to his stunning body of work. Praise for *A Place in the Country* “Measured, solemn, sardonic . . . hypnotic . . . [W. G. Sebald’s] books, which he made out of classics, remain classics for now.”—Joshua Cohen, *The New York Times Book Review* “In Sebald’s writing, everything is connected, everything webbed together by the unseen threads of history, or chance, or fate, or death. The scholarly

craft of gathering scattered sources and weaving them into a coherent whole is transformed here into something beautiful and unsettling, elevated into an art of the uncanny—an art that was, in the end, Sebald’s strange and inscrutable gift.”—Slate “Magnificent . . . The multiple layers surrounding each essay are seamless to the point of imperceptibility.”—New York Daily News “Sebald’s most tender and jovial book.”—The Nation “Reading [A Place in the Country is] like going for a walk with a beautifully talented, deeply passionate novelist from Mars.”—New York

*Open Space Technology* - Harrison Owen  
2009-03

This book, like all books, comes to an end, but that is by no means the end of the story of Open Space. In

fact it is safe to say that we have barely begun. The total simplicity of Open Space (sit in a circle, create a bulletin board, open a marketplace, and go to work) contrasts radically with the quality of results and speed of achievement. Th...

*Materiality of Writing in Early Mesopotamia* - Thomas E. Balke  
2016-10-24

This volume presents recent research on the relationship between the material format of text-bearing artefacts, the texts they carry, and their genre. The essays cover a vast period, from the counting stones of the late 4th millennium BCE to the time of the Great Hittite Kingdom in the 2nd millennium BCE. The breadth of substantive focus allows new insights of relevance to scholars in both Ancient Middle Eastern studies

and the humanities.

*Spaces and Identities in Border Regions* - Christian Wille 2015-11-30

Spatial and identity research operates with differentiations and relations. These are particularly useful heuristic tools when examining

border regions where social and geopolitical demarcations diverge. Applying this approach, the authors of this volume investigate spatial and identity constructions in cross-border contexts as they appear in everyday, institutional and media practices. The results are discussed with a keen eye for obliquely aligned spaces and identities and relinked to governmental issues of normalization and subjectivation. The studies base upon empirical surveys conducted in Germany, France, Belgium and Luxembourg.

*Cleansing the Czechoslovak Borderlands* - Eagle Glassheim 2016-12-16

In this innovative study of the aftermath of ethnic cleansing, Eagle Glassheim examines the transformation of Czechoslovakia's Sudetenland from

the end of the Second World War, through the Cold War, and into the twenty-first century. Prior to their expulsion in 1945, ethnic Germans had inhabited the Sudeten borderlands for hundreds of years, with deeply rooted local cultures and close, if sometimes tense, ties with Bohemia's Czech majority. Cynically, if largely willingly, harnessed by Hitler in 1938 to his pursuit of a Greater Germany, the Sudetenland's three million Germans became the focus of Czech authorities in their retributive efforts to remove an alien ethnic element from the body politic—and claim the spoils of this coal-rich, industrialized area. Yet, as Glassheim reveals, socialist efforts to create a modern utopia in the newly resettled “frontier” territories proved exceedingly

difficult. Many borderland regions remained sparsely populated, peppered with dilapidated and abandoned houses, and hobbled by decaying infrastructure. In the more densely populated northern districts, coalmines, chemical works, and power plants scarred the land and spewed toxic gases into the air. What once was a diverse religious, cultural, economic, and linguistic “contact zone,” became, according to many observers, a scarred wasteland, both physically and psychologically. Glassheim offers new perspectives on the struggles of reclaiming ethnically cleansed lands in light of utopian dreams and dystopian realities—brought on by the uprooting of cultures, the loss of communities, and the industrial degradation of a once-thriving region. To Glassheim,

the lessons drawn from the Sudetenland speak to the deep social traumas and environmental pathologies wrought by both ethnic cleansing and state-sponsored modernization processes that accelerated across Europe as a result of the great wars of the twentieth century.

**Easy Language – Plain Language – Easy Language Plus** - Christiane Maaß  
2020-09-11

This book shows how accessible communication, and especially easy-to-understand languages, should be designed in order to become

instruments of inclusion. It examines two well-established easy-to-understand varieties: Easy Language and Plain Language, and shows that they have complementary profiles with respect to four central qualities: comprehensibility, perceptibility, acceptability and stigmatisation potential. The book introduces Easy and Plain Language and provides an outline of their linguistic, sociological and legal profiles: What is the current legal framework of Easy and Plain Language? What do the texts look like? Who are the users? Which other groups are involved in the production and use of Easy and Plain Language offers? Which qualities are a hazard to acceptability and, thus, enhance their stigmatisation potential? The book also proposes another easy-to-

understand variety: Easy Language Plus. This variety balances the four qualities and is modelled in the present book.

*Sailing by Starlight* - Alex Capus  
2013-09-10

Capus takes us on an exploratory journey via the loss of a Spanish vessel laden with gold and jewels in the South Seas, the burial of treasure, an ancient map, and a long and dangerous voyage across the Pacific, to prove that Robert Louis Stevenson's "treasure island" actually exists; and that it exists in a place quite different from where hordes of treasure-hunters have been seeking it for generations. In fact, he posits, it was for this reason alone that Stevenson spent the last five years of his life in Samoa. On a long trip round the Pacific islands

with the idea of writing articles for American periodicals, Stevenson, travelling with his beloved wife, Fanny, and stepson Lloyd Osbourne, had no notion of stopping at Samoa when their ship made landfall in December 1889. Yet, only six weeks later, at the age of 39, he would invest all his available assets in a patch of impenetrable jungle and spend the rest of his life there. This book traces what led Stevenson to Samoa and the origins of his famous story. For facing him from this unlikely spot was another island – a conical isle, Tafahi, where legends abound, and it was, Capus suggests, this isle that would cause him to change the course of his life.

*The Birth of Tragedy* - Friedrich Nietzsche 2016-12-01

This classic work of creative criticism from German philosopher Friedrich Nietzsche argues that ancient Greek drama represents the highest form of art ever produced. In the first section of the book, Nietzsche presents an in-depth analysis of Athenian tragedy and its many merits. In the second section, Nietzsche contrasts the refinement of classical tragedy with what he regards as the cultural wasteland of the nineteenth-century.

*Language Hacking German* - Benny Lewis 2017-11-14

It's true that some people spend

years studying German before they finally get around to speaking the language. But here's a better idea. Skip the years of study and jump right to the speaking part. Sound crazy? No, it's language hacking. Unlike most traditional language courses that try to teach you the rules of German, #LanguageHacking shows you how to learn and speak German through proven memory techniques, unconventional shortcuts and conversation strategies perfected by one of the world's greatest language learners, Benny Lewis, aka the Irish Polyglot. Using the language hacks -shortcuts that make learning simple - that Benny mastered while learning his 11 languages and his 'speak from the start' method, you will crack the language code and exponentially increase your language

abilities so that you can get fluent faster. It's not magic. It's not a language gene. It's not something only "other people" can do. It's about being smart with how you learn, learning what's indispensable, skipping what's not, and using what you've learned to have real conversations in German from day one. The Method #LanguageHacking takes a modern approach to language learning, blending the power of online social collaboration with traditional methods. It focuses on the conversations that learners need to master right away, rather than presenting language in order of difficulty like most courses. This means that you can have conversations immediately, not after years of study. Each of the 10 units culminates with a speaking 'mission'

that prepares you to use the language you've learned to talk about yourself. Through the language hacker online learner community, you can share your personalized speaking 'missions' with other learners - getting and giving feedback and extending your learning beyond the pages of the book . You don't need to go abroad to learn a language any more.

The Antichrist - Friedrich Nietzsche  
2014-12-01

The Antichrist (German: Der Antichrist) is a book by the philosopher Friedrich Nietzsche, originally published in 1895. Although it was written in 1888, its controversial content made Franz Overbeck and Heinrich Köselitz delay its publication, along with Ecce Homo. The German title can be

translated into English as both "The Anti-Christ" and "The Anti-Christian".

**W.G. Sebald's Hybrid Poetics** - Lynn L. Wolff 2014-04-02

This book offers a new critical perspective on the perpetual problem of literature's relationship to reality and in particular on the sustained tension between literature and historiography. The scholarly and

literary works of W.G. Sebald (1944–2001) serve as striking examples for this discussion, for the way in which they demonstrate the emergence of a new hybrid discourse of literature as historiography. This book critically reconsiders the claims and aims of historiography by re-evaluating core questions of the literary discourse and by assessing the ethical imperative of literature in the 20th and 21st centuries. Guided by an inherently interdisciplinary framework, this book elucidates the interplay of epistemological, aesthetic, and ethical concerns that define Sebald's criticism and fiction. Appropriate to the way in which Sebald's works challenge us to rethink the boundaries between discourses, genres, disciplines, and media, this

work proceeds in a methodologically non-dogmatic way, drawing on hermeneutics, semiotics, narratology, and discourse theory. In addition to contextualizing Sebald within postwar literature in German, the book is the first English-language study to consider Sebald's oeuvre as a whole. Of interest for Sebald experts and enthusiasts, literary scholars and historians concerned with the problematic of representing the past.

Beyond Good and Evil - Friedrich Nietzsche 2020-10-16

"He who fights with monsters should be careful lest he thereby become a monster. And if thou gaze long into an abyss, the abyss will also gaze into thee." Expanding on his ideas from Thus Spoke Zarathustra, Nietzsche's radical polemic Beyond Good and Evil undermines the

assumptions of traditional morality and encourages us to think more critically about the world in which we live. In this famous text, Nietzsche considers past philosophers and religious leaders from Socrates to Descartes to Schopenhauer with a critical and pessimistic eye.

Questioning the blind following of religious faith, he examines the deeper question of who is truly good or evil. Beyond Good and Evil presents a unique perspective of the human mind offered through the words of one of history's most controversial philosophers.

**Blended Learning and Online Tutoring**

- Dr Janet MacDonald 2012-10-01  
Blended learning provides the flexibility to accommodate the varied requirements of pedagogies, disciplines and levels of course, together with the needs of a wide variety of learners. However, anyone concerned with the integration of online tutoring to support students appropriately may need to reassess current practice. This book adopts a pragmatic and common-sense approach to blended learning by situating the use of online media within a well-grounded teaching and learning strategy. It provides practical ideas for the successful implementation of blended strategies, including good practice in both asynchronous and synchronous tutoring, appropriate assessment design for developing successful blended learners, and

innovative approaches to professional development for distance tutors. It is illustrated with a wide variety of examples and comments from students and practitioners in both distance and campus-based environments in 13 different countries. Since the first edition was published in 2006, there has been great interest in Web 2.0 technologies and their potential for use in an educational environment. This second edition has therefore incorporated many new examples of good practice, making use of a combination of tried and tested tools as well as blogs and wikis for supporting students. There has also been a recent rise in the use of activity-based learning and interest in its potential for supporting students in distance and online environments. The new edition

incorporates many new exemplars of learning activity design in Part Three, to illustrate approaches to the development of critical, independent learners.

**The Portable Nietzsche** - Friedrich Nietzsche 1977-01-27

The works of Friedrich Nietzsche have fascinated readers around the world ever since the publication of his first book more than a hundred years ago. As Walter Kaufmann, one of the world's leading authorities on Nietzsche, notes in his introduction, "Few writers in any age were so full of ideas," and few writers have been so consistently misinterpreted. The Portable Nietzsche includes Kaufmann's definitive translations of the complete and unabridged texts of Nietzsche's four major works: Twilight of the Idols, The

Antichrist, Nietzsche Contra Wagner and Thus Spoke Zarathustra. In addition, Kaufmann brings together selections from his other books, notes, and letters, to give a full picture of Nietzsche's development, versatility, and inexhaustibility. "In this volume, one may very conveniently have a rich review of one of the most sensitive, passionate, and misunderstood writers in Western, or any, literature."

**Technology and Vocational Education for Sustainable Development** -

Margarita Pavlova 2008-12-14

Empowerment is the overarching idea used in this book. The term has a variety of meanings in different sociocultural and political contexts, including "self-strength, control, self-power, self-reliance, own

choice, life of dignity in accordance with one's values, capable of fighting for one's rights, independence, own decision making, being free, awakening, and capability" (The World Bank, 2002, p. 10). However, the World Bank report observed that most definitions focus on issues of "gaining power and control over decisions and resources that determine the quality of one's life" (p. 10). This interpretation of empowerment provides a useful starting point for the development of the series of interconnected arguments explored here.

Establishment of the basis for understanding, identifying and developing strategies through education necessary for individuals to be able to make choices that influence the quality of their lives is

the main aim of this book. There are a number of assumptions and boundaries that frame this analysis. First, the book focuses on "agents"; however, empowerment is often conceptualised in terms of relationships between agency and structure (e. g. , Alsop, Bertelsen, & H- land, 2006). Agency could be defined as "an actor's or group's ability to make purposeful choices – that is, the actor is able to envisage and purposively choose options" (p. 11).
