Second-language Discourse in the Digital World - Ilona Vandergriff
2016-08-17

Second-language Discourse in the Digital World illustrates a new, practice-driven approach to technology in second-language (L2) learning that begins with what L2 users do when they connect with others online. With its rich set of examples from a number of different languages and a variety of digital platforms, in and beyond the classroom, this book provides a structured account of L2 computer-mediated discourse. The book is divided into four sections. Section I considers how new media have changed language learning. Section II is about L2 participation in digital forms and practices in online communities. Sections III centers around L2 linguistic and other semiotic practices, including the use of multimodal and multilingual resources while section IV analyzes social practices to explore how networked L2 users build, maintain and challenge relationships. Written in accessible style, the volume will be an important read to anyone interested in L2 use and learning in Web 2.0. Finalist for the AAAL 2019 book award.

Corpus Linguistics and Translation Tools for Digital Humanities - Stefania M. Maci 2022-07-14

Presenting the digital humanities as both a domain of practice and

as a set of methodological approaches to be applied to corpus linguistics and translation, chapters in this volume provide a novel and original framework to triangulate research for pursuing both scientific and educational goals within the digital humanities. They also highlight more broadly the importance of data triangulation in corpus linguistics and translation studies. Putting forward practical applications for digging into data, this book is a detailed examination of how to integrate quantitative and qualitative approaches through case studies, sample analysis and practical examples.

Social Media Discourse, (Dis)identifications and Diversities - Sirpa Leppanen 2016-12-08

This volume serves as an in-depth investigation of the diversity of means and practices that constitute (dis)identification and identity construction in social media. Given the increasing prevalence of social media in everyday life and the subsequent growing diversity in the types of participants and forms of participation, the book makes the case for a rigorous analysis of social media discourses and digital literacy practices to demonstrate the range of semiotic resources used in online communication that form the foundation of (dis)identification processes. Divided into two major sections,

delineating between the (dis)identification of the self across various social categories and the (dis)identification of the self in relation to the "other", the book employs a discourse-ethnographic approach to highlight the value of this type of theoretical framework in providing nuanced descriptions of identity construction in social media and illuminating their larger, long-term societal and cultural implications. This volume is a key resource for researchers, and students in sociolinguistics, discourse studies, computer-mediated communication, and cultural studies.

Language, Social Media and Ideologies - Sender Dovchin
2019-08-08

This book seeks to contribute to the critical applied linguistics by investigating the dynamic role of English on social media, focusing on EFL university students in East Asia – Mongolia and Japan. Drawing on sets of Facebook data, the book primarily emphasizes that the presence of English on social media should be understood as ‘translingual’ not only due to its multiple recombinations of resources, genres, modes, styles, and repertoires but also due to its direct connections with a broader socio-cultural, historical and ideological meanings. Secondly, EFL university students metalinguistically claim multiple ideologies of linguistic authenticities in terms of their usage of ‘translingual Englishes’ on social media as opposed to other colliding language ideologies such as linguistic purity and linguistic dystopia. The question of how they reclaim the notion of linguistic authenticity, however, profoundly differs, depending on their own often-diverse criteria, identities, beliefs, and ideas. This shows that mixing and mingling at its very core, the existence of ‘translingual Englishes’ on social media provides us with a significant view to accommodate the multiple co-existence and multiple origins of authenticity in the increasingly interconnected world. The book concludes the possibility of applying the ideas of ‘translingual Englishes’ on social media in critical EFL classroom settings, in their careful re-

assessment of the complexity of contemporary linguistic experiences and beliefs of their EFL learners.

Discourse and Identity on Facebook - Mariza Georgalou
2017-06-15

Social network sites are dynamic online socio-cultural arenas which give users ample and unprecedented opportunities for self-presentation through the meshing of language with other semiotic modes. With a focus on Facebook, one of the most widely-used online social network sites, this book brings together ideas and concepts related to language online, multimodality, and identity through five topical issues. These include place, time, profession and education, stance-taking, and privacy. The book features a discourse-centred online ethnography that provides authentic verbal and multimodal Facebook posts in both Greek and English . These are complemented with insights from interviews with Facebook participants. The examples bring to life various engaging instances of self- and other-presentation on Facebook identifying the ways in which users can: - locate themselves in terms of place and time; - announce activities, share and broaden their expertise and buttress solidarity among colleagues and fellow students; - communicate emotions, tastes, thoughts, opinions and assessments; - control the flow of textual information on their Facebook profiles to secure their privacy. Focusing on discourse manifestations of identity, this book also shows how Facebook can function as a space for vernacular literacy practices, a silo of relationships, a digital memory bank, a research tool, a knowledge forum, a cardiograph of a society, and a grassroots channel.

Digital Discourse - Crispin Thurlow 2011-12-01

Digital Discourse offers a distinctly sociolinguistic perspective on the nature of language in digital technologies. It starts by simply bringing new media sociolinguistics up to date, addressing current technologies like instant messaging, textmessaging, blogging, photo-sharing, mobile phones, gaming, social network sites, and video sharing. Chapters cover a range of communicative contexts (journalism, gaming, tourism, leisure, performance, public debate), communicators (professional and lay, young people and adults, intimates and groups), and languages (Irish, Hebrew, Chinese, Finnish, Japanese, German, Greek, Arabic, and French). The volume is organized around topics of primary interest to sociolinguists, including genre, style and stance. With commentaries from the two most internationally recognized scholars of new media discourse (Naomi Baron and Susan Herring) and essays by well-established scholars and new voices in sociolinguistics, the volume will be more current, more diverse, and more thematically unified than any other collection on the topic.

Englishes in a Globalized World: Exploring Contact Effects on Other Languages - Alexander Onysko 2022-11-03

Indexing 'Chav' on Social Media - Emilia Di Martino 2022-10-17

The book sets out to examine the concept of 'chav', providing a review of its origins, its characterological figures, the process of enregisterment whereby it has come to be recognized in public discourse, and the traits associated with it in traditional media representations. The author then discusses the 'chav' label in light of recent re-appropriations in social network activity (particularly through the video-sharing app TikTok) and subsequent commentary in the public sphere. She traces the evolution of the term from its use during the first decade of the twenty-first century to make sense of class, status and cultural capital, to its resurgence and the ways in which it is still associated with appearance in gendered and classed ways. She then draws on recent developments in linguistic anthropology and embodied sociocultural linguistics to argue that social media users draw on communicative resources to perform identities that are both situated in specific contexts of discourse and dynamically

changing, challenging the idea that geo-sociocultural varieties and mannerisms are the sole way of indexing membership of a community. This volume contends that equating 'chav' with 'underclass' in the most recent uses of the concept on social networks may not be the whole story, and the book will be of interest to sociocultural linguistics and identity researchers, as well as readers in anthropology, sociology, British studies, cultural studies, identity studies, digital humanities, and sociolinguistics.

New Media and the Mediatisation of Religion - Gabriel Faimau 2018-10-01

New media, including digital and social media, play a central role in producing and reproducing socio-cultural and religious practices. Its presence has not only resulted in changes to the ways in which religious beliefs are practiced, but has also altered the way religious meanings are expressed. How has new media technology informed and influenced religious engagement and participation? In what ways has new media technology enabled religious groups to practice and preach their religious beliefs to a broader audience? To what extent has the emergence of social media and social networking sites shaped religious discourses and religious practices? This volume offers a unique, Africa-centred perspective in response to these questions. While presenting new

scholarly developments in the fields of media, religion and culture in Africa, this book also provides empirical and theoretical insights into the intersection between new media and religion.

Analyzing Digital Discourses - Marjut Johansson 2022-01-12

This book contributes to the scholarly debate on the forms and patterns of interaction and discourse in modern digital communication by probing some of the social functions that online communication has for its users. An array of experts and scholars in the field address a range of forms of social interaction and discourses expressed by users on social networks and in public media. Social functions are reflected through linguistic and discursive practices that are either those of 'convergence' or 'controversy' in terms of how the discourse participants handle interpersonal relations or how they construct meanings in discourses. In this sense, the book elaborates on some very central concerns in the area of digital discourse analysis that have been reported within the last decade from various methodological perspectives ranging from sociolinguistics and pragmatics to corpus linguistics. This edited collection will be of particular interest to scholars and students in the fields of digital discourse analysis, pragmatics, sociolinguistics, social media and communication, and media and cultural studies.

Taking Offence on Social Media - Caroline Tagg 2017-08-04

This book explores communication on Facebook, developing the new theoretical concept of context design as a way of understanding the dynamics of online interaction. Against a backdrop of fake news and other controversies surrounding online political debate, the authors focus on inadvertent acts of offence on Facebook; that is, when users of the site unwittingly offend or are offended by the airing of political or religious views, or of opinions deemed racist or sexist. Drawing on a survey of Facebook users, they explain why instances of offence occur and what users report doing in response. They argue that Facebook users contribute to the construction of a particular social space, one that is characterised by online conviviality and a belief that Facebook is not the place for serious debate. These views in turn shape the kind of political debate that can take place on the site. This thought-provoking book will appeal to scholars and students of applied linguistics, and anyone interested in the role of social media in contemporary political and social life.

Storytelling in the Digital World - Anna De Fina 2019-06-15

Storytelling in the Digital World explores new, emerging narrative practices as they are enacted on digital platforms such as Amazon, Facebook, Twitter, and YouTube. Contributors' online ethnographies investigate a wide range of themes including the nature of processes of transformation and recontextualization of offline events into digital narratives; the effects of digital anonymity and pseudonymity on narrative practices; the strategies through which virtual communities discursively work together to solidify and negotiate their sociocultural identities; the tensions between the affordances that characterize different online media and the communicative needs of users; the structures and modes in which virtual users construct and enact participatory practices in these environments; and the significance of different spatiotemporal dimensions in the encoding, sharing and appreciation of stories. More generally, the volume engages with some of the theoretical and methodological challenges that the growing presence of digital technologies and media poses to narrative analysis. Exploring Digital Communication - Caroline Tagg 2015-04-10

Routledge Introductions to Applied Linguistics is a series of introductory level textbooks covering the core topics in Applied Linguistics, primarily designed for those beginning postgraduate studies or taking an introductory MA course, as well as advanced undergraduates. Titles in the series are also ideal for language professionals returning to academic study. The books take an innovative 'practice to theory' approach, with a 'back-to-front' structure. This leads the reader from real-world problems and issues, through a discussion of intervention and how to engage with these concerns, before finally relating these practical issues to theoretical foundations. Exploring Digital Communication aims to discuss real-world issues pertaining to digital communication, and to explore how linguistic research addresses these challenges. The text is divided into three sections (Problems and practices; Interventions; and Theory), each of which is further divided into two subsections which reflect linguistic issues relating to digital communication. The author seeks to demystify any perceived divide between online and offline communication, arguing that issues raised in relation to digital communication throw light on language use and practices in general, and thus linguistic interventions in this area have implications not only for users of digital communication but for linguists' general understanding of language and society. Including relevant research examples, tasks and a glossary, this textbook is an invaluable resource for postgraduate and upper undergraduate students taking New Media or Communication Studies modules within Applied Linguistics and English Language courses.

Language, Identity and Cycling in the New Media Age - Patrick Kiernan 2017-09-21

This book examines how identities associated with cycling are evoked, narrated and negotiated in a media context dominated by digital environments. Arguing that the nature of identity is being impacted by the changing nature of the material and semiotic resources available for making meaning, the author introduces an approach to exploring such identity positioning through the interrelated frameworks of Systemic Functional Linguistics and Multimodal Analysis, and illustrates how this happens in practice. The book is divided into three parts, each of which focuses on a different aspect of identity and media environment. Part I considers celebrity identities in the conventional media of print and television. Part II investigates community and leisure / sporting identity through an online cycling forum, while Part III examines corporate identity realised through corporate websites, consumer reviews and Youtube channels. This unique volume will appeal to students and scholars of discourse analysis, applied linguistics and the world of cycling.

Digital Discourse - Crispin Thurlow 2011-10-26

Digital Discourse offers a distinctly sociolinguistic perspective on the nature of language in digital technologies. It starts by simply bringing new media sociolinguistics up to date, addressing current technologies like instant messaging, textmessaging, blogging, photo-sharing, mobile phones, gaming, social network sites, and video sharing. Chapters cover a range of communicative contexts (journalism, gaming, tourism, leisure, performance, public debate), communicators (professional and lay, young people and adults, intimates and groups), and languages (Irish, Hebrew, Chinese, Finnish, Japanese, German, Greek, Arabic, and French). The volume is organized around topics of primary interest to sociolinguists, including genre, style and stance. With commentaries from the two most internationally recognized scholars of new media discourse (Naomi Baron and Susan Herring) and essays by well-established scholars and new voices in sociolinguistics, the volume will be more current, more diverse, and more thematically unified than any other collection on the topic.

Identity and Ideology in Digital Food Discourse - Alla Tovares
2020-11-26

Exploring food-related interactions in various digital and cultural contexts, this book demonstrates how food as a discursive resource can be mobilized to accomplish actions of social, cultural, and political consequence. The chapters reveal how social media users employ language, images, and videos to construct identities and ideologies that both encompass and transcend food. Drawing on various discourse analytic frameworks to digital communication, contributors examine interactions across Facebook, Twitter, YouTube, and Instagram. From the multimodal discourse of a Korean livestreaming online eating show, to food activism in an English blogging community and discussions of a

food-related controversy on Omani Twitter, this book shows how language and multimodal resources serve not only to communicate about food, but also as a means of accomplishing key aspects of everyday social life.

Mobile Messaging and Resourcefulness - Caroline Tagg
2022-03-23

This book advocates a new post-digital linguistic ethnography approach to unpacking mobile communication and enabling a more informed understanding of individuals' communicative practices in cities today. Drawing on data from a group of ordinary working people, multilingual individuals from superdiverse cities across the United Kingdom, the volume brings observations from this data together to form a new concept of 'resourcefulness' as a means of explaining the emergent sense of agency individuals develop towards remediating existing forms of technology in their everyday lives. The book in turn establishes the notion of the 'networked individual' by way of demonstrating the ways in which communicative practices cross spaces and platforms. Further chapters detail examples to highlight resourcefulness at work in enabling more efficient business communication, routes to self-expression and the creation and development of social support systems, while a concluding chapter looks at both the limitations and possibilities of resourcefulness and directions for future research. This innovative volume will be of particular interest to students and researchers in applied linguistics, sociolinguistics, linguistic ethnography, and media and communication studies.
