Consumer Credit, Debt and Investment in Europe - James Devenney 2012-07-12

Produced under the auspices of an EU-funded Marie Curie research programme, this volume analyses vulnerability in European private law and scrutinises consumer protection in credit and investments in the context of the recent turmoil in financial markets and EU harmonisation initiatives in the area. It explores key issues such as responsible lending, the disclosure of information, consumer confidence, the regulation of consumer investment services and the protection of bank depositors. The chapters emanate from the 'Consumer Protection in Europe: Theory and Practice' duo colloquium which explored consumer protection in Europe in its theoretical and practical dimensions. These topics are even more relevant today given the passage of the Consumer Rights Directive, the appointment of an Expert Group on a common frame of reference, the Green Paper on European Contract Law and the ongoing deliberations surrounding the Common European Sales Law.

Sports Law in Italy - Michele Colucci 2018-05-15
Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Italy deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in Italy will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

Joint Ventures and EU Competition Law - Luís Morais 2014-07-18

This book examines the treatment of joint ventures (JVs) in EU Competition Law, and at the same time provides a comparison with US law. It starts with an analysis of the rather elusive concept of JV, encompassing both concentrative JVs (subject to merger control) and non-concentrative JVs. Although focused on possible definitions of joint ventures in terms of competition law, it also includes a broader perspective (going beyond competition law) on the different legal models of structuring cooperation links between undertakings. At the core of the book is an attempt to build an analytical model for the assessment of JVs in terms of antitrust law, especially as regards Article 101 of the TFEU. The analytical model used proposes a set of sequential analytical levels, taking into account structural factors and specific factors related to the main constituent elements of the functional programmes of JVs. The model is applied to a substantive assessment of four main types of JVs identified on the basis of their prevailing economic function: research and development JVs; production JVs; commercialization JVs; and purchasing JVs. Also covered are particular situations of joint ownership of undertakings falling short of joint control. In the concluding part of the book recent developments in JV antitrust law are put into context within the wider reform of EU Competition Law. The book is also comprehensively updated with the latest developments concerning the reform of the EU framework of horizontal cooperation between undertakings that took place at the end of 2010.

Law and Agroecology - Massimo Monteduro 2015-05-06

This book represents a first attempt to investigate the relations between Law and Agroecology. There is a need to adopt a transdisciplinary approach to multifunctional agriculture in order to integrate the agroecological paradigm in legal regulation. This does not require a super-law that hierarchically purports to incorporate and supplant the existing legal fields; rather, it calls for the creation of a trans-law that progressively works to coordinate interlegalities between different legal fields, respecting their autonomy but emphasizing their common historical roots in *rus* in the process. *Rus*, the rural phenomenon as a whole, reflects the plurality and interdependence of different complex systems based jointly on the land as a central point of reference. "Rural" is more than "agricultural": if agriculture is understood traditionally as an activity aimed at exploiting the land for the production of material goods for use, consumption and private exchange, rurality marks the reintegration of agriculture into a broader sphere, one that is not only economic, but also social and cultural; not only material, but also ideal, relational, historical, and symbolic; and not only private, but also public. In approaching *rus*, the natural and social sciences first became specialized, multiplied, and compartmentalized in a plurality of first-order disciplines; later, they began a process of integration into Agroecology as a second-order, multi-perspective and shared research platform. Today, Agroecology is a transdiscipline that integrates other fields of knowledge into the concept of agroecosystems viewed as socio-ecological systems. However, the law seems to still be stuck in the first stage. Following a reductionist approach, law has deconstructed and shattered the universe of *rus* into countless, disjointed legal elementary particles, multiplying the planes of analysis and, in particular, keeping Agricultural Law and Environmental Law two separate fields.

Impresa, società e poteri pubblici - Felice Emilio Santonastaso 2018-11-26

Questo volume raccoglie alcuni degli "scritti minori" di Felice Emilio Santonastaso, i quali coprono un arco di quasi cinquant'anni di studi, tutti dedicati, pur nella molteplicità delle aree tematiche (il "sistema" delle partecipazioni statali, le società di diritto speciale o di diritto singolare, i poteri speciali, le opere pubbliche) al rapporto fra imprese e poteri pubblici. Gli scritti raccolti sono riconducibili ad una "linea di pensiero che [...] mira a privilegiare interpretazioni ed applicazioni degli istituti e delle norme che assicurino - nelle singole 'porzioni' di attività economica considerate - il più soddisfacente, o, se si preferisce, il meno insoddisfacente, punto di equilibrio fra interessi privati ed interessi pubblici", come ricostruisce Alessandro Nigro nella presentazione del volume. L'iniziativa della raccolta di alcuni scritti di Felice Emilio Santonastaso è di un gruppo di professori o ex professori della Facoltà di Economia della Sapienza Università di Roma.
