*Arthur Young's Travels in France* - Arthur Young 1905

*The Roman Market Economy* - Peter Temin 2017-09-05

What modern economics can tell us about ancient Rome The quality of life for ordinary Roman citizens at the height of the Roman Empire probably was better than that of any other large group of people living before the Industrial Revolution. The Roman Market Economy uses the tools of modern economics to show how trade, markets, and the Pax Romana were critical to ancient Rome's prosperity. Peter Temin, one of the world's foremost economic historians, argues that markets dominated the Roman economy. He traces how the Pax Romana encouraged trade around the Mediterranean, and how Roman law promoted commerce and banking. Temin shows that a reasonably vibrant market for wheat extended throughout the empire, and suggests that the Antonine Plague may have been responsible for turning the stable prices of the early empire into the persistent inflation of the late. He vividly describes how various markets operated in Roman times, from commodities and slaves to the buying and selling of land. Applying modern methods for evaluating economic growth to data culled from historical sources, Temin argues that Roman Italy in the second century was as prosperous as the Dutch Republic in its golden age of the seventeenth century. The Roman Market Economy reveals how economics can help us understand how the Roman Empire could have ruled seventy million people and endured for centuries.

**Grotesque Figures** - Virginia E. Swain 2020-03-03

Charles Baudelaire is usually read as a paradigmatically modern poet, whose work ushered in a new era of French literature. But the common emphasis on his use of new forms and styles overlooks the complex role of the past in his work. In *Grotesque Figures*, Virginia E. Swain explores how the specter of the eighteenth century made itself felt in Baudelaire's modern poetry in the pervasive textual and figural presence of Jean-Jacques Rousseau. Not only do Rousseau's ideas inform Baudelaire's theory of the grotesque, but Rousseau makes numerous appearances in Baudelaire's poetry as a caricature or type representing the hold of the Enlightenment and the French Revolution over Baudelaire and his contemporaries. As a character in "Le Poème du hashisch" and the *Petits Poèmes en prose*, "Rousseau" gives the grotesque a human form. Swain's literary, cultural, and historical analysis deepens our understanding of Baudelaire and of nineteenth-century aesthetics by relating Baudelaire's poetic theory and practice to Enlightenment debates about allegory and the grotesque in the arts. Offering a novel reading of Baudelaire's ambivalent engagement with the eighteenth-century, *Grotesque Figures* examines nineteenth-century ideological debates over French identity, Rousseau's political and artistic legacy, the aesthetic and political significance of the rococo, and the presence of the grotesque in the modern.

*Second-language Classroom Interaction* - Ann C. Wintergerst 1994

"This book analyzes teacher and student interaction in the context of twelve ESL lessons, with the purpose of exploring the extent of student language output. Research has confirmed that teacher speech dominates the second-language classroom. Not surprisingly, 'teacher talk' has been investigated in numerous studies, but 'student talk' has been largely overlooked: this study addresses that imbalance. Questions are one means of engaging student attention, promoting verbal responses, and evaluating student progress. They facilitate interaction by establishing the topic, the speaker, and the respondent. However, as the author shows, some teacher questions encourage communication while others inhibit it." "In this analysis of teacher and student questions and answers, Professor Wintergerst offers new perspective on second-language development and classroom learning in general."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. **Touching the World** - Paul John Eakin 1992-04-15

Paul John Eakin's earlier work *Fictions in Autobiography* is a key text in autobiography studies. In it he proposed that the self that finds expression in autobiography is in fundamental ways a kind of fictive construct, a fiction articulated in a fiction. In this new book Eakin turns his attention to what he sees as the defining assumption of autobiography: that the story of the self does refer to a world of biographical and historical fact. Here he shows that people write autobiography not in some private realm of the autonomous self but rather in strenuous engagement with the pressures that life in culture entails. In so demonstrating, he offers fresh readings of autobiographies by Roland Barthes, Nathalie Sarraute, William Maxwell, Henry James, Ronald Fraser, Richard Rodriguez, Henry Adams, Patricia Hampl, John Updike, James McConkey, and Lillian Hellman. In the introduction Eakin makes a case for reopening the file on reference in autobiography, and in the first chapter he establishes the complexity of the referential aesthetic of the genre, the intricate interplay of fact and fiction in such texts. In subsequent chapters he explores some of the major contexts of reference in autobiography: the biographical, the social and cultural, the historical, and finally, underlying all the rest, the somatic and temporal dimensions of the lived experience of identity. In his discussion of contemporary theories of the self, Eakin draws especially on cultural anthropology and developmental psychology.

*Art Worlds, 25th Anniversary Edition* - Howard S. Becker 2008-04-08

This classic sociological examination of art as collective action explores the cooperative network of suppliers, performers, dealers, critics, and consumers who—along with the artist—"produce" a work of art. Howard S. Becker looks at the conventions essential to this operation and, prospectively, at the extent to which art is shaped by this collective activity. The book is thoroughly illustrated and updated with a new dialogue between Becker and eminent French sociologist Alain Pessin about the extended social system in which art is created, and with a new preface in which the author talks about his own process in creating this influential work.

The specialists contributing here—including general linguists in France and French linguists in the Netherlands—take formal approaches to semantics and its interface with syntax and pragmatics, highlighting meaning in its relation to both structure and use. Their results should be of particular interest to French and Romance linguists who want to study French from a formal semantic perspective and to general linguists who are interested in cross-linguistic semantics.

*Uniting of Europe* - Ernst B. Haas 2020-11-15

The University of Notre Dame Press is pleased to bring Ernst Haas's classic work on European integration, *The Uniting of Europe*, back into print. First published in 1958 and last printed in 1968, this seminal volume is the starting point for anyone interested in the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the "power to redirect the loyalties and expectations of political actors." In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a "united Europe" took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, *The Uniting of Europe* is a must-have for political scientists and historians of modern and contemporary Europe. This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.

*The Logic of Violence in Civil War* - Stathis N. Kalyvas 2006-05-01

By analytically decoupling war and violence, this book explores the causes and dynamics of violence in civil war. Against the prevailing view that such violence is an instance of impenetrable madness, the book demonstrates that there is logic to it and that it has much less to do with collective emotions, ideologies, and cultures than currently believed. Kalyvas specifies a novel theory of selective violence: it is jointly produced by political actors seeking information and individual civilians trying to avoid the worst but also grabbing what opportunities their predicament affords them. Violence, he finds, is never a simple reflection of the optimal strategy of its users; its profoundly interactive character defeats simple maximization logics while producing surprising outcomes, such as relative nonviolence in the 'frontlines' of civil war.
