*Alive* - Anita Ganeri 2007

This book quite literally comes to life off the page. It is the most imaginative, inspiring, and dramatic human body book on the market. Forget heavy reference books, forget linear narratives, open your eyes and be amazed by the creativity of this human body book. Travel through the body's systems using a host of novelty features - pop-ups, flaps, sound chips, acetate, pull-tabs, fibre optics and much more - to illustrate, inform, stimulate, and entertain. Every special feature works to demystify the miracle of creation that is your body. See the skeleton jump off the page, peel away your organs layer by layer, listen to the heart beat and watch it move within an awe-inspiring 3D ribcage. There's something for all the family in this graphic portrayal of the human body. But not only is it fun, it is also authoritative and well researched. The author, Richard Walker is an award-winning science writer and his text is fresh, revealing and accessible for everyone.

**DK Eyewitness Books: Fossil** - Paul Taylor 2004-08-02

Here is an original and exciting new look at fossils - the remains of long-vanished animals and plants. Stunning real-life photographs of the spectacular remains of ancient lives offer a unique "eyewitness" view of what fossils are, how they were formed, and how they lived millions of years ago. See pearls that are 50 million years old, a dinosaur's toe, a troublesome

"snake" that was turned to stone, a fossilized human being, and a snail made of precious stones. Learn how fossils are formed, how trilobites have been preserved for 590 million years, where to look for a belemnite, and how fossils helped the pharaohs of ancient Egypt. Discover which are the most precious fossils in the world, where ammonites lived, how big mammoths were, what a devil's toenail looks like, and much, much more.
