Mid Ocean - T. Rafael Cimino 2009-06-24

Mid Ocean is a Novel of fiction by Author T. Rafael Cimino and is about the war on drugs as it occurs in South Florida in the year 1984. Joel Kenyon has lived in his father's shadow for most of his life. Even after his Dad's death, the man's powerful legacy still haunts him at every turn. As he graduates from the U. S. Custom's Academy, Joel is assigned strategic duty in the 'bad-lands' of U. S. drug enforcement, the Florida Keys. Set in 1984, Mid Ocean shows the lives of the sometimes violent drug smugglers and the men and women sworn to uphold the law in this Caribbean 'wild west'. In the end, Joel Kenyon will question everyone, including himself in a quest for what's right and true. It is here that he will find out the sea holds many secrets.

Understanding Anesthetic Equipment & Procedures - Dwarkadas K Baheti 2018-03-31

This new edition presents practising and trainee anaesthesiologists with the latest advances and guidelines in their field. Beginning with an introduction to the history of anaesthesia, basic physics, and medical gases, the following sections cover the anaesthesia machine, airway and monitoring equipment, and apparatus for central neuraxial and regional blocks. The final chapters discuss interpretation of radiological images, simulators in anaesthesia, maintenance, safety and cleaning; and more. The second edition has been fully revised to provide up to date information and a clear understanding of practices and techniques for anaesthesia. The book features clinical photographs and diagrams and includes two interactive DVD ROMs demonstrating and explain day to day anaesthetic procedures. Key points Fully revised, new edition presenting latest techniques and information in anaesthesia Covers all different aspects of equipment in depth Includes DVD ROMs demonstrating anaesthetic procedures Previous edition (9789351521242) published in 2014

Experimental and Theoretical Advances in Biological Pattern Formation - Hans G. Othmer 2012-12-06

This volume contains the proceedings of the NATO ARW on 'Biological Pattern Formation' held at Merton College, University of Oxford, on 27-31 August, 1992. The objective of the workshop was to bring together a select group of theoreticians and experimental biologists to present the latest results in the area of biological pattern formation and to foster interaction across disciplines. The workshop was divided into 5 main areas: (i) limb development, (ii) Dictyostelium discoideum, (iii) Drosophila, (iv) cell movement, (v) general pattern formation. We thank all the participants for their contributions, enthusiasm, and willingness to collaborate. There was a genuine, open, and extremely fruitful interaction between the experimentalists and theoreticians which made the workshop a success. We also thank The Wellcome Trust for providing additional funding. The local organization fell mainly on Denise McKittrick and Beverley Bhaskhare at the Mathematical Institute, Oxford, and Jeanette Hudson and the staff of Merton College. We greatly appreciate their help and patience. We also thank Jonathan Sherratt, Wendy Brandts and Debbie Benson for helping out in the conference and for providing a happy welcome to participants on a typically cold, wet and windy English summer day.

Drugs in Anaesthesiology - Vipin Kumar Dhama 2017-12-31

This new edition provides clinicians and trainees with the latest information on drugs in anaesthesiology. Presented in tabular format, each section covers a different drug category, explaining and comparing the properties and characteristics of drugs within that group. The second edition features a new chapter on pharmacological terms, and each chapter includes references for further reading. The comprehensive text is further enhanced by clinical images and figures. Key points Fully revised, new edition providing latest information on drug in anaesthesiology Presented in tabular format to allow easy comparison of similar drugs Second edition features a new chapter on pharmacological terms Previous edition (9788184484069) published in 2008

Anesthesia Student Survival Guide - Jesse M. Ehrenfeld 2010-03-10

Anesthesia Student Survival Guide: A Case-Based Approach is an indispensable introduction to the specialty. This concise, easy-to-read, affordable handbook is ideal for medical students, nursing students, and others during the anesthesia rotation. Written in a structured prose format and supplemented with many diagrams, tables, and algorithms, this pocket-sized guide contains essential material covered on the USMLE II-III and other licensing exams. The editors, who are academic faculty at Harvard Medical School, summarize the essential content with 32 informative and compelling case studies designed to help students apply new concepts to real situations. Pharmacology, basic skills, common procedures and anesthesia subspecialties are covered, too, with just the right amount of detail for an introductory text. The unique book also offers a section containing career advice and insider tips on how to receive good evaluations from supervising physicians. With its combination of astute clinical instruction, basic science explanation, and practical tips from physicians that have been there before, this handbook is your one-stop guide to a successful anesthesia rotation.

The Baker's Manual - Joseph Amendola 2012-04-25

Crucial formulas for baking success--an updated edition of the classic reference What do virtually all breads and desserts have in common? They rely on baking formulas, the building block "recipes" that every serious baker must master. For example, behind every tempting Napoleon lies a formula for classic puff pastry, while a truly heavenly chocolate brownie cannot exist without the knowledge of how to temper chocolate. Compiled by a veteran instructor at The Culinary Institute of America, this authoritative reference contains 200 completely up-to-date formulas using essential ingredients found in today's pastry kitchens. From American Pie Dough and Pâté Brisée to Pastry Cream and Crème Anglaise, these recipes are written in small- and large-yield versions to accommodate the needs of the serious home baker as well as the pastry chef.

Endoscopic Pituitary Surgery - Theodore H. Schwartz 2011-11-23

Offering the unique dual perspective of neurosurgeons and otolaryngologists, *Endoscopic Pituitary Surgery: Endocrine, Neuro-Ophthalmologic and Surgical Management* describes both cutting-edge endoscopic techniques and tried-and-true decision-making methodologies that lead to the most successful outcomes. From choosing the right surgical or non-surgical approach for individual patients, to managing complex endocrine and neuro-ophthalmologic issues, this is the first major reference in the field in nearly a decade, making it the go-to guide for all interdisciplinary specialists who treat pituitary tumors. Special Features: Step-by-step descriptions of the newest endoscopic pituitary

and skull base procedures, ensuring that specialists have full mastery of techniques for different tumor types in this surgically challenging area. The clinical wisdom and perspectives of the masters of pituitary surgery, who share insights on patient selection, endoscopic versus open procedures, medical management, and much more. Operative pearls from both neurosurgeons and otolaryngologists. Compelling discussions of the pros and cons of various procedures (e.g., the utility of intraoperative MRI in pituitary surgery cases). Inclusion of detail-revealing 3D endoscopic images (complete with 3D glasses). Rationale for a collaborative neurosurgery--otolaryngology team approach to developing and implementing the most innovative endoscopic and skull base techniques. Enhanced by hundreds of images, decision-making algorithms, and clinical pearls from experts on each tumor type. Endoscopic Pituitary Surgery is a comprehensive guide representing the current palette of available treatment options. It is indispensable for residents in training as well as for practicing neurosurgeons and otolaryngologists who are making the transition to the newest minimally invasive endoscopic procedures in the treatment of pituitary lesions.

Long and Short Cases in Anesthesiology - Puneet Khanna 2020-12-31

This text is a comprehensive revision tool for trainees preparing for examinations in anaesthesiology. Presented in question and answer format, the book provides a selection of 50 long and short cases in line with current curricula. Each case presents a different topic covering anaesthesia associated with a range of different disorders in all systems of the body, and in different sectors of the population. Cases cover both routine and more complicated procedures in common and less common disorders. The text is further enhanced by more than 60 photographs and diagrams to assist learning and revision. Key points. Comprehensive revision tool for anaesthesiology trainees preparing for examinations. Presents 50 long and short cases, in question and answer format. Covers anaesthesia for many different disorders and procedures. Clinical photographs and diagrams further enhance learning.

Angiogenesis - Michael E. Maragoudakis 2013-06-29

Angiogenesis is a multistep process, which involves activation, proliferation and directed migration of endothelial cells to form new capillaries from existing vessels. Under physiological conditions, in the adult organisms angiogenesis is extremely slow, yet it can be activated for a limited time only in situations such as ovulation or wound healing. In a number of disease states, however, there is a derangement of angiogenesis, which can contribute to the pathology of these conditions. Hence, understanding the molecular biology of endothelial cell activation and differentiation and the mechanisms involved in the regulation of angiogenesis, could explain the derangement in disease states and also provide the basis for developing promoters or suppressors of angiogenesis for clinical applications. This book contains the proceedings of the NATO Advanced Study Institute on "Angiogenesis: Molecular Biology, Clinical Aspects" held in Rhodes, Greece, from June 16-27, 1993. This meeting was a comprehensive review of the various aspects of angiogenesis such as embryonic development, endothelial cell heterogeneity and tissue specificity, molecular biology of endothelial cell, mechanisms for the regulation of angiogenesis, disease states in which angiogenesis is involved and potential application of promoters or suppressors of angiogenesis. The presentations and discussions of the meeting provided an opportunity for investigators from many different areas of basic science and medicine to exchange information, evaluate the present status and provide future research directions in the field of angiogenesis.

Blackwell's Five-Minute Veterinary Consult: Reptile and Amphibian -

Javier G. Nevarez 2021-10-12

BLACKWELL'S FIVE-MINUTE VETERINARY CONSULT REPTILE AND AMPHIBIAN STAY UP TO DATE ON THE BEST PRACTICES FOR TREATING COMMON DISEASES IN REPTILES AND AMPHIBIANS. Blackwell's Five-Minute Veterinary Consult: Reptile and Amphibian delivers a comprehensive exploration of the treatment of the most common diseases and disorders in reptiles and amphibians. The book is organized for quick and easy access to information, acting as an indispensable resource for veterinarians engaged in the care of chelonians, lizards, snakes, crocodilians, and amphibians. The book offers readers guidance from leading international voices in the field of reptile and amphibian care, packaged in a perfect clinical manual. Diagnostic and treatment information is laid out in a logical, stepwise

fashion. Readers will also enjoy access to a companion website that provides users with printable history and physical exam forms, images that illustrate venipuncture and intravenous catheterization techniques in various amphibian and reptile groups, and images that illustrate methods of sexing reptiles. The ideal practical manual for veterinary practitioners and students seeking accessible and authoritative information on reptiles and amphibians, the book also offers: The treatment of common diseases and disorders in chelonians, including upper respiratory tract disease, cloacal prolapse, aural abscesses, and shell rot. The treatment of common diseases in lizards, including hypovitaminosis A, nutritional secondary hyperparathyroidism, cryptosporidiosis, abscesses, and fungal infections. The treatment of diseases affecting snakes, including dysecdysis, lower respiratory tract disease, inclusion body disease, stomatitis, and paramyxovirus A. A comprehensive exploration of the treatment of diseases affecting crocodilians, including West Nile virus, chlamydiosis, trauma, abscesses, and gout. Blackwell's Five-Minute Veterinary Consult: Reptile and Amphibian is an indispensable reference for veterinary practitioners, students, residents, and interns who wish to improve their understanding and care of chelonians, lizards, snakes, crocodilians, and amphibians.

Understanding Anesthesia Equipment - Jerry A. Dorsch 1999

The "Bible on Anesthesia Equipment" returns in a new Fifth Edition, and once again takes readers step-by-step through all the basic anesthesia equipment. This absolute leader in the field includes comprehensive references and detailed discussions on the scientific fundamentals of anesthesia equipment, its design, and its optimal use. This thoroughly updated edition includes new information on suction devices, the magnetic resonance imaging environment, temperature monitoring and control, double-lumen tubes, emergency room airway equipment, and many other topics. Readers will have access to an online quizbank at a companion Website.

AJCC Cancer Staging Atlas - Carolyn C. Compton 2012-08-09

Significantly expanded, expertly and beautifully illustrated, The AJCC Cancer Staging Atlas, 2nd Edition, offers more than 600 illustrations created exclusively for this new edition and is fully updated to reflect the concepts discussed in the 7th Edition of both the AJCC Cancer Staging Manual and its companion Handbook. This Atlas illustrates the TNM classifications of all cancer sites and types included in the 7th Edition of the Manual and visually conceptualizes the TNM classifications and stage groupings. Specifically designed for simplicity and precision, the drawings have been verified through multi-disciplinary review to ensure accuracy and relevancy for clinical use. Every illustration provides detailed anatomic depictions to clarify critical structures and to allow the reader to instantly visualize the progressive extent of malignant disease. In addition, nodal maps are included for each site, appropriate labeling has been incorporated to identify significant anatomic structures, and each illustration is accompanied by an explanatory legend. The AJCC Cancer Staging Atlas, 2nd Edition, is an official publication of the American Joint Committee on Cancer, the recognized international leader in state-of-the-art information on cancer staging. This Atlas has been created as a companion to the updated 7th Edition of the AJCC Cancer Staging Manual, which continues to disseminate the importance of anatomical and pathological staging in the management of cancer. This state-of-the-art, invaluable 2nd Edition includes a CD containing PowerPoint slides of all illustrations, additional color, and a user-friendly, easy-to-read layout. The AJCC Cancer Staging Atlas, 2nd Edition will serve as an indispensable reference for clinicians, registrars, students, trainees, and patients.

Equipment, Drugs and Waveforms in Anaesthesia - Pramod Kumar 2019-05-30

This is the thoroughly revised and updated edition of the book which deals with an accurate and relevant account of the equipment and drugs used in anaesthetics. for practical and viva voce examinations. It is also relevant as a ready-reckoner for all practitioners as it gives a graphics and text account of each instrument. The equipment used in the past as well as the modern equipment, even the smallest part of a system, is described and can be recognised easily. The drugs are described in accurate short comparable and tabular format so that the students can learn the difference in the drugs of the same group easily. This account is precise and it relevant for viva voce examinations.

Middle Ear Surgery - Henning Hildmann 2006-10-28

This comprehensive, richly illustrated textbook provides a systematic approach to frequent otological operations. Procedures in surgery of the ear canal, acute and chronic middle ear diseases, otosclerosis, cochlear implantation and vertigo are visualized step-by-step to acquaint the beginner with proven surgical repertoires. The book is written by two famous experts, and even the experienced surgeon will find valuable hints and suggestions to facilitate routine middle ear operations.

Cavernous Malformations of the Nervous System - Daniele Rigamonti 2011-09-01

Questions regarding the nature and appropriate management of cavernous malformation (CM) have clouded researchers and those faced with making clinical decisions for several decades. CMs may be seen as an incidental finding on MRI studies, or they may present with symptoms, such as seizures or intracranial hemorrhage, often causing severe neurologic deficit. *Cavernous Malformations of the Nervous System* provides a comprehensive and authoritative review of the current practice in diagnosis and management of these cerebrovascular disorders. Emphasis has been laid on the understanding of basic sciences with chapters committed to understanding of CCM1, 2 and 3 genes and their role in CCM biology, as well as clinical genetics. Controversial topics which continue to pose treatment challenges such as safety of anticoagulation and prophylactic management during pregnancy are also discussed. This book will be of interest to basic science researchers, neurosurgeons and vascular neurologists both in academic institutions and private practice.

Pediatric Epilepsy Surgery - Oguz Cataltepe 2010

The definitive reference for pediatric epilepsy surgery. Written by internationally recognized authorities in pediatric epilepsy surgery, this cutting-edge book provides essential information about the preoperative assessment of and surgical approaches to the treatment of epilepsy in children. The book opens with an overview of pediatric epilepsy followed by four main sections detailing preoperative assessment, surgical approaches and techniques, outcomes, and recent promising advances. The authors present numerous approaches for managing temporal lobe epilepsy and extratemporal lobe epilepsy and guide clinicians through various surgical techniques for hemispherectomy, disconnection procedures, neuromodulation, and more. Highlights: Complete coverage of the selection of surgical candidates, including young patients with congenital or early lesions. Detailed discussion of the latest surgical techniques such as hippocampal transection, cortical and deep brain stimulation and radiosurgery. Comprehensive presentation of all major hemispherectomy and hemispherotomy techniques. More than 100 illustrations, including 85 in full-color, to elucidate key concepts. Ideal for pediatric neurosurgeons, epilepsy surgeons and pediatric epileptologists, this authoritative text is also a valuable reference for clinicians, residents, and fellows in neurology, neuroradiology, neuropsychology, and neurophysiology with an interest in pediatric epilepsy surgery.

Personalized Medicine in Healthcare Systems - Nada Bodiřoga-Vukobrat 2019-08-02

This book gathers scientific contributions on comprehensive approaches to personalized medicine. In a systematic and clear manner, it provides extensive information on the methodological, technological, and clinical aspects of high-throughput analytics, nanotechnology approaches, microbiota/human interactions, in-vitro fertilization and preimplantation, and various diseases like cancer. Moreover, the book analyzes the social and legal aspects of social security systems, healthcare systems and EU law - e.g. the role of solidarity, regulatory possibilities and obstacles, justice and equality, privacy/disclosure of data, and the right to know - from an interdisciplinary perspective. Lastly, it explores the economical and ethical context in the fields of business models, intellectual property issues, the patient/physician relationship, and price discrimination.

Nurse Anesthesia - E-Book - John J. Nagelhout 2017-05-27

Gain a thorough understanding of nursing anesthesia with the most comprehensive text on the market. Written by leading expert, John Nagelhout, CRNA, PhD, FAAN, and new contributing author Sass Elisha, EdD, CRNA, *Nurse Anesthesia*, 6th Edition features both scientific principles and evidence-based material. Inside you'll find a solid introduction to the history, education, and legal issues of nurse anesthetist, its scientific foundations, equipment and monitoring, and preoperative evaluation and preparation of the patient. This new edition includes chapters on patient centered care and cultural competence, additional drugs of interest, blood and blood component therapy, anesthesia management for patients with cardiac devices, anesthesia for robotic surgery, anesthesia for transplant surgery and organ procurement, and physiology and management of acute and chronic pain. Not only a key reference for practicing nurse anesthetists, this bestseller prepares you for certification and today's clinical anesthesia practice. New coverage includes the latest specifics of pharmacokinetics, drug delivery systems, opiate antagonists, and key induction drugs. Updated information on patient safety, monitoring, and pharmacology. Unique! Expert CRNA authors provide the current clinical information that you will use in daily practice. Over 700 tables and boxes highlight the most essential information in a quick, easy-to-reference format. Easy-to-use organization covers basic principles first, and builds on those with individual chapters for each surgical specialty. Updated TJC standards for monitoring and administering moderate sedation/analgesia. NEW! Expanded content includes; non-OR anesthesia, acute and chronic pain management, anesthesia implications of complementary and alternative medicine, robotic surgery, new and less invasive procedures in interventional radiography, implications of modern implanted cardiac devices, and more! NEW! Full-color design and figures clarify difficult concepts and give the text a contemporary look and feel. NEW! Co-author Sass Elisha brings a fresh perspective to this edition.

Emergency Ultrasound Made Easy E-Book - Justin Bowra 2011-10-24

The use of ultrasound in emergency medicine has proved invaluable in answering very specific, time-critical questions, such as the presence of an abdominal aortic aneurysm, or of blood in the abdomen after trauma. Unlike other imaging modalities (e.g. CT scan) it is a rapid technique that can be brought to the patient with ease. This book, *Emergency Ultrasound Made Easy*, is accessible and easy to use in an emergency. It is aimed mainly at specialists and trainees in emergency medicine, surgery and intensive care; but its broad scope (e.g. rapid diagnosis of DVT) makes it an invaluable addition to the library of any doctor with an interest in ultrasound, whether in primary care or the hospital setting. A pocket-sized and practical guide to the appropriate use of ultrasound in the emergency department. Designed to be used in an urgent situation (e.g. a shocked trauma patient). Written by team of international leading experts. This Second Edition has been comprehensively revised and

updated to reflect the major advances in the practice of bedside ultrasound, and reflects the pioneering efforts of individual clinicians and the high-quality portable machines now available. This edition still firmly adheres to the principles of only using ultrasound where it adds value and only asking simple questions that may be readily addressed using ultrasound.

Pocket Anesthesia - Richard D. Urman 2012-10-22

Designed for easy transport and quick reference, *Pocket Anesthesia*, presents essential information that residents, anesthesiologists, CRNAs, and medical students need on the wards and in the operating room.

Edited by anesthesia faculty at Harvard Medical School, this pocket-size reference is ideally suited for today's fast-paced anesthesia environment—it is concise, easy to read, and evidence-based. Essential information is presented in a well-organized schematic outline format with many tables, algorithms, and diagrams. The book is filled with must-know facts about drugs, frequent intraoperative problems, differential diagnosis, common disease states, patient evaluation, and anesthetic considerations for each subspecialty. New to the revised, second edition, is the inclusion of ultrasound-guided regional anesthesia procedures.

VipIMAGE 2019 - João Manuel R. S. Tavares 2019-09-28

This book gathers full papers presented at the VipIMAGE 2019—VII ECCOMAS Thematic Conference on Computational Vision and Medical

Image Processing—held on October 16-18, 2019, in Porto, Portugal. It discusses cutting-edge methods, findings, and applications related to 3D vision, bio- and medical imaging, computer-aided diagnosis, image enhancement, image processing and analysis, virtual reality, and also describes in detail advanced image analysis techniques, such as image segmentation and feature selection, as well as statistical and geometrical modeling. The book provides both researchers and professionals with extensive and timely insights into advanced imaging techniques for various application purposes.

Graphic Products - Katy Robinson 2010

Textbook of Pediatric Emergency Procedures - Christopher King 2008

Widely acclaimed for its outstanding step-by-step illustrations, comprehensive coverage, and reader-friendly format, *Textbook of Pediatric Emergency Procedures* is now in its thoroughly updated Second Edition. In 137 chapters, the book provides clear, complete instructions on every emergency medicine procedure performed on infants, children, and adolescents. More than 1,000 detailed drawings, most in two-color, show how to perform each procedure. This edition includes a new chapter on new technologies and techniques for managing the difficult airway. Other new topics include use of tissue adhesives in laceration repair, focused abdominal sonography for trauma (FAST), management of priapism, reimplanting an avulsed permanent tooth, use of automatic external defibrillators, and procedures related to bioterrorism.
