**Postgraduate Orthopaedics** - Paul A. Banaszkiwicz 2012-08-16

This book has been written specifically for candidates sitting the oral part of the FRCS (Tr & Orth) examination. It presents a selection of questions arising from common clinical scenarios along with detailed model answers. The emphasis is on current concepts, evidence-based medicine and major exam topics. Edited by the team behind the successful Candidate's Guide to the FRCS (Tr & Orth) Examination, the book is structured according to the four major sections of the examination; adult elective orthopaedics, trauma, children's/hands and upper limb and applied basic science. An introductory section gives general exam guidance and end section covers common diagrams that you may be asked to draw out. Each chapter is written by a recent (successful) examination candidate and the style of each reflects the author's experience and their opinions on the best tactics for first-time success. If you are facing the FRCS (Tr & Orth) you need this book.

**Oxford Textbook of Orthopedics and Trauma** - Christopher Bulstrode 2002

**Miller's Review of Orthopaedics E-Book** - Mark D. Miller 2015-11-27

For nearly a quarter century Miller's Review of Orthopaedics and the accompanying annual Miller Review Course ([www.MillerReview.org](http://www.MillerReview.org)) have been must-have resources that residents and practitioners have turned to for efficient and effective exam preparation. This 7th Edition continues to provide complete coverage of the field's most-tested topics, now reorganized to be more intuitive, more user-friendly, and easier to read. Numerous study aids help you ace your exams: a superb art program, including full-color tables, images, and pathology slides; improved concise, bulleted text design; "testable facts" in every chapter; multiple-choice review questions written by experts in the field; and much more. Content and topic emphasis are fully aligned with the ABOS (American Board of Orthopaedic Surgery) and OITE (Orthopaedic In-Service Training Exam) exams, giving you the confidence you need to prepare for certification and recertification. Completely revised sections on anatomy, spine, and tumors, along with input from many new authors, keep you fully up to date. An increased emphasis on imaging, along with the most current results and techniques, ensure that you're prepared for today's exams. Includes new coverage of femoroacetabular impingement, spine trauma, common medications used in orthopaedics, and recent advances in basic sciences.

**Pelvic Ring Fractures** - Axel Gänsslen 2020-11-25

This book provides in-depth coverage of all aspects of pelvic ring fractures and their management. The opening chapters supply essential information on surgical anatomy, biomechanics, classification, clinical evaluation, radiological diagnostics, and emergency and acute management. The various operative techniques, including navigation techniques, that have been established and standardized over the past two decades are then presented in a step-by-step approach. Readers will find guidance on surgical indications, choice of approaches, reduction and fixation strategies, complication management, and optimization of long-term results. Specific treatment concepts are described for age-specific fractures, including pediatric and geriatric injuries, and secondary reconstructions. Pelvic ring fractures represent challenging injuries, especially when they present with concomitant hemodynamic instability. This book will help trauma and orthopaedic surgeons at all levels of experience to achieve the primary treatment aim of anatomic restoration of the bony pelvis to preserve biomechanical stability and avoid malunion with resulting clinical impairments.

**Fracture Classifications in Clinical Practice** - Seyed Behrooz Mostofi 2006-02-28

- Contains descriptions of all the major fracture classifications in a portable and practical format

*Trauma and Orthopaedic Classifications* - Nick G. Lasanianos 2014-12-12

This illustrated textbook is an essential and invaluable guide to young clinicians and researchers of Trauma and Orthopaedics, reporting all classification systems which are currently utilised in the clinical setting. It

includes classifications relevant to both Elective Orthopaedic Practice and Orthopaedic Trauma. Clear graphic illustrations accompany the description of all different classification schemes in a comprehensive manner, together with a structured presentation of existing clinical evidence. In this manner each chapter of the different anatomical sites and pathologies assists the decision making of the readers regarding treatment strategy as well as informed consent of their patients. It is envisaged that this textbook will be a point of reference not only to the surgeons in training (residents) but also to senior surgeons and academic clinicians.
