Young at Art - Susan Striker 2011-04-01

From the creator of the bestselling Anti-Coloring Book series with more than 600,000 copies sold, a new parenting guide to encouraging creativity in preschool-age children Young at Art is the first and only comprehensive book for the general audience about the nature, value and impact of art on very young children. Directed towards parents and educators of one to five year olds, Susan Striker explains why children's art is not a frill, but the very foundation upon which all later fundamental skills are built. She drives home the idea that encouraging children's artistic growth will have beneficial effects on all other aspects of their emotional

and intellectual development. At the core of this practical guide is the understanding that art is an important tool in teaching young children crucial concepts related to self-expression, reading and writing. As opposed to more structured exercises, such as coloring on dittos and underlining pictures in workbooks, Striker stresses that scribbling and free drawing experiments are the most important art activities a child can engage in; they better prepare children to read independently as they grow. Young at Art provides descriptions for age-appropriate art activities, tips for carrying them out safely, and helps parents recognize what a child's art work should look like at each stage of development. With Young at Art, parents will develop realistic expectations of their children's work, learn how to speak to their children about their art, and facilitate skills well beyond their creativity that will benefit children.

Usborne Science Activities is an innovative series which responds to the growing emphasis on scientific exploration for young children. The text and illustrations are simple and clear so children can enjoy using the books by themselves. Further notes give fuller scientific explanations for adults who wish to work with their children.

Making Art Together - Mark Cooper 2007-08-01

Artist Mark Cooper aims to change the way you think about making art with kids. Working with schools around the country, Cooper has brought together scores of teachers and hundreds of children to make remarkable collaborative art that has enlivened classrooms and public spaces and been displayed in the nation's most prestigious museums. In this inspiring, practical, idea-filled book, Cooper shows how any teacher—not just art teachers—can imagine and execute similar projects in their own classrooms. But more than that, Cooper transforms our sense of possibilities, arguing for a new view of art in schools. Making Art Together is a book about art education structured around big ideas: that adults can flourish in the role of Master Artist, that the perspective of contemporary art offers liberating possibilities for rethinking art in schools, that art can and should be about the larger world, and thus naturally ties in to all areas of the curriculum. Most of all, Cooper shows us the power of collaboration. From mammoth, freestanding sculptures to billboards against violence to maps of the world, the projects here are all planned, designed, and

completed by children themselves. The resulting artwork is complex and ambitious on a scale that would be out of reach for any individual child. Working collaboratively, using a distinctly democratic model, kids actually think and work like adult artists throughout every stage of the project. Together the sky's the limit—the artistic and educational opportunities are boundless. *Making Art Together* is a bold, beautifully illustrated book that could—at a time when art budgets are being slashed—revitalize our sense of what art in schools can accomplish.

Invitation to Draw - Jean Van't Hul 2021-06-15

Help children draw and think more creatively by inspiring them with interesting and challenging art prompts and questions. *Invitation to Draw* offers 99 open-ended drawing prompts, each one proposing a question to investigate that encourages children

to free associate and problem solve. The perforated pages make it easy to tear out prompts for on-the-go activities or allowing multiple kids to draw at the same time. A blank cake provides the chance to decorate a dream confection, an empty house inspires stories about who lives there, and a grid of triangles supplies the chance to explore abstract art. What might be hiding in that tree? What sort of robot can you design? The possibilities are endless! Drawing prompts inspire and encourage kids to think and draw differently, and sometimes more creatively, than they might when faced with a blank page. By offering constraints such as a pair of eyes or an empty car and asking a question, children begin thinking about the possibilities and answering the question in their heads even before they put pen (or marker or crayon!) to paper. And through the act of drawing and observing the drawing unfold, the brain continues to think and problem solve, opening up all kinds of creative possibilities around that specific idea.
