Consuming Habits - Jordan Goodman
2014-04-08

Covering a wide range of substances, including opium, cocaine, coffee, tobacco, kola, and betelnut, from prehistory to the

present day, this new edition has been extensively updated, with an updated bibliography and two new chapters on cannabis and khat. **Consuming Habits** is the perfect companion for all those interested in how different cultures have defined drugs across the ages. Psychoactive substances have been central to the formation of civilizations, the definition of cultural identities, and the growth of the world economy. The labelling of these substances as 'legal' or 'illegal' has diverted attention away from understanding their important cultural and historical role. This collection explores the rich analytical category of psychoactive substances from challenging historical and anthropological perspectives.

Drugs, Addiction, and

the Brain - George F. Koob 2014-07-12
Drugs, Addiction, and the Brain explores the molecular, cellular, and neurocircuitry systems in the brain that are responsible for drug addiction. Common neurobiological elements are emphasized that provide novel insights into how the brain mediates the acute rewarding effects of drugs of abuse and how it changes during the transition from initial drug use to compulsive drug use and addiction. The book provides a detailed overview of the pathophysiology of the disease. The information provided will be useful for neuroscientists in the field of addiction, drug abuse treatment providers, and undergraduate and postgraduate students who are interested in learning the diverse effects of drugs of

abuse on the brain. Full-color circuitry diagrams of brain regions implicated in each stage of the addiction cycle Actual data figures from original sources illustrating key concepts and findings
Introduction to basic neuropharmacology terms and concepts
Introduction to numerous animal models used to study diverse aspects of drug use. Thorough review of extant work on the neurobiology of addiction
Drug Use and Misuse - Stephen A. Maisto 2021-06-16
Taking an interdisciplinary approach in its comprehensive coverage of current drug issues, Maisto/Galizio/Connors' DRUG USE AND MISUSE, 9th Edition, weaves historical, social, psychological, cultural, biological and medical

perspectives as it emphasizes the idea that a drug's effects depend not only on its properties, but also on the psychological and biological characteristics of its user. Thoroughly updated with the latest research, emerging social trends and legal changes, the new edition includes the most current survey data available on patterns of drug use in the U.S. and other countries as well as the most recent data available from the Center for Behavioral Health Statistics and Quality and the National Survey on Drug Use and Health (SAMHSA). Timely end-of-chapter essays and critical thinking questions help you focus on the real-world application of chapter concepts. Life Reset - Foojan
Zeine 2017-04-01
Have you ever wished you could just wake up one day, reach across your nightstand and hit the Life Reset button? Let's face it. The struggles and frustrations of everyday life leave millions of women and men around the globe yearning for a new way. Awareness Integration is a new model in the field of psychology synthesizing concepts from cognitive, behavioral, emotional, and body-mind theories that offers an opportunity to choose and reset life. This model enhances self-awareness, increases self-esteem, releases psychological blocks, heals emotional wounds, and reduces anxiety and depression. It promotes a clear, realistic, and positive proactive attitude for learning

and implementing new skills for an effective, productive, functional, and fulfilling life. The hunger for more satisfying relationships, more fulfilling careers, a release of stress and anxiety, and the freedom to be who we really are in our hectic and disconnected culture has become paramount for anyone seeking the best they can be. Life Reset offers a comprehensive resource for re-envisioning and rebuilding your life. This accessible, hands-on guide escorts readers through the steps of the time and trial-tested Awareness Integration Model. Life Reset takes readers on an interactive journey with 12 simple open-ended questions to promote self-awareness. This guided process, designed to facilitate healing past traumas and

removing blocks related to the seven major areas of life, is supported by the author's instructions, guidance and real life examples. Readers visit crucial areas of their lives, examining relationships they have with friends and coworkers, parents, siblings, partners and children. Life Reset is about creating a depth of awareness, understanding, acceptance, responsibility and accountability toward the way we think, feel, and act toward ourselves and others, owning the impact of our attitudes in the worlds we create, healing the past that is creeping constantly into our present, and creating an intention with goals to create a fulfilled and joyous life from here on out.

The authors have integrated their expertise in the fields

of drug abuse, pharmacology, and sociology with their extensive experiences in research, treatment, drug policy making, and drug policy implementation to create an edition that speaks directly to students on the medical, emotional, and social damage drug use can cause.

A Review of the Literature on Sexual Assault Perpetrator Characteristics and Behaviors - Sarah Michal Greathouse 2015

"Sexual assault continues to be a pervasive problem, both for society in general and within the military community. To assist the Air Force in its continued efforts to combat sexual assault within its ranks, we reviewed the existing empirical literature on the characteristics and behaviors of adult perpetrators who commit

sexual assault against other adults. Our search was not limited to studies of military populations. While a vast majority of the existing literature has focused on sole male perpetrators who assault female victims, we identified some research on other types of perpetrators, including female sexual assault perpetrators, men who perpetrate assault against other men, and perpetrators who participate in group sexual assault. This body of research indicates that adult perpetrators are diverse in terms of their demographics, background characteristics, and motivations. Moreover, research indicates that sexual assault perpetration is likely influenced by a combination of factors, including an individual's

developmental and family history; his or her personality, including attitudes/cognitions; and environmental factors, including peer attitudes and alcohol consumption. The complexity of factors that influence sexual assault perpetration and the multiple pathways that lead to an attack make it difficult to predict whether an individual is prone to commit sexual assault. While predicting sexual assault perpetration is problematic, we identified a number of factors related to perpetration that may be relevant for intervention efforts and offer recommendations for the Air Force"--

Drugs and Drug Policy - Clayton J. Mosher 2007
Drugs and Drug Policy: The Control of Consciousness Alteration provides a cross-

national perspective on the regulation of drug use by examining and critiquing drug policies in the United States and abroad in terms of their scope, goals, and effectiveness. In this engaging text, authors Clayton J. Mosher and Scott Akins discuss the physiological, psychological, and behavioral effects of legal and illicit drugs; the patterns and correlates of use; and theories of the "causes" of drug use. Key Features: * Offers more coverage of drug policy issues than competitive books: This book addresses the number of significant developments over the last few decades that suggest the dynamics of drug use and policies to deal with drug use are at a critical juncture. The book also considers the issue of "American exceptionalism" with

respect to drug policies through a detailed analysis of emerging drug policies in other Western nations. * Makes explicit comparisons between legal and illegal drugs: Due to their prevalence of use, this book devotes considerable attention to the use and regulation of legal drugs in society. The book illustrates that commonly prescribed medications are similar to drugs that are among the most feared and harshly punished in society and that drug-related problems do not necessarily result from particular drugs, but from how drugs are used. * Includes many pedagogical tools: With chapter opening photos and more photos throughout, this text presents material in a student-friendly fashion. Highlight boxes provide interesting

examples for readers; encourage further emphasis on issues; and serve as important topics for in class writing exercises. In addition, Internet exercises and review questions reinforce key points made in the chapter and prompt classroom discussion.

Corrections in the Community - Edward J. Latessa 2015-03-27

Corrections in the Community, Sixth Edition, examines the current state of community corrections and proposes an evidence-based approach to making programs more effective. As the U.S. prison system approaches meltdown, options like probation, parole, alternative sentencing, and both residential and non-residential programs in the community continue to grow in importance. This text provides a solid foundation and includes the most salient information available on the broad and dynamic subject of community corrections. Authors

Latessa and Smith organize and evaluate the latest data on the assessment of offender risk/need/responsivity and successful methods that continue to improve community supervision and its effects on different types of clients, from the mentally ill to juveniles. This book provides students with a thorough understanding of the theoretical and practical aspects of community corrections and prepares them to evaluate and strengthen these crucial programs. This sixth edition includes a new chapter on specialty drug and other problem-solving courts. Now found in every state, these specialty courts represent a new way to deal with some of the problems that face our citizens, be it substance abuse or reentry to the community

from prison. Chapters contain key terms, boxed material, review questions, and recommended readings, and a glossary is provided to clarify important concepts. **Drugs & Society** - Glen R. **Women Who Hurt
Themselves** - Dusty
Miller 2005-07-06

Many books have described victims of rape and battering, but scant attention has been paid to another form of harm increasingly common among women. Here at last is a book that provides help for the thousands of women who secretly inflict violence on themselves. Filled with moving stories, this powerful and compassionate book is the first to focus on women who harm themselves through self-mutilation, compulsive cosmetic surgeries, eating disorders, and other forms of chronic injury to the body. *Addiction Treatment* - Katherine van Wormer 2016-12-05
ADDICTION TREATMENT covers the biological, psychological, and social aspects of alcoholism, eating disorders, compulsive gambling, and other addictions. The authors

bridge the gap between the popular twelve-step and harm-reduction approaches, thus illuminating how practitioners can guide clients down a trusted path that is tailored towards the client's particular needs. Through a number of first-person narratives about the experience of addiction, students will discover a realism and depth not commonly found in textbooks. In addition, the authors include student-friendly topics, such as the case against so-called underage drinking laws, to draw students into the material and illustrate the importance of reducing harm within the biopsychological framework that ties the text together. Updated to reflect the DSM-5, this edition also includes the latest insights into social

determinants of health, trauma-informed care, working with transgender populations, and other timely topics. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This title is part of The Duke Series in Child Development and Public Policy, edited by Kenneth A. Dodge and Martha Putallaz.

Loosening the Grip - Jean Kinney 2003

Children of the Great Recession - Irwin Garfinkel 2016-08-21
Many working families continue to struggle in the aftermath of the Great Recession, the deepest and longest economic downturn since the Great Depression. In Children of the Great

Recession, a group of leading scholars draw from a unique study of nearly 5,000 economically and ethnically diverse families in twenty cities to analyze the effects of the Great Recession on parents and young children. By exploring the discrepancies in outcomes between these families—particularly between those headed by parents with college degrees and those without—this timely book shows how the most disadvantaged families have continued to suffer as a result of the Great Recession. Several contributors examine the recession's impact on the economic well-being of families, including changes to income, poverty levels, and economic insecurity. Irwin Garfinkel and Natasha Pilkauskas find that in cities with high

unemployment rates during the recession, incomes for families with a college-educated mother fell by only about 5 percent, whereas families without college degrees experienced income losses three to four times greater. Garfinkel and Pilkauskas also show that the number of non-college-educated families enrolled in federal safety net programs—including Medicaid, the Earned Income Tax Credit, and the Supplemental Nutrition Assistance Program (or food stamps)—grew rapidly in response to the Great Recession. Other researchers examine how parents' physical and emotional health, relationship stability, and parenting behavior changed over the course of the recession. Janet Currie and Valentina Duque find that while

mothers and fathers across all education groups experienced more health problems as a result of the downturn, health disparities by education widened. Daniel Schneider, Sara McLanahan and Kristin Harknett find decreases in marriage and cohabitation rates among less-educated families, and Ronald Mincy and Elia de la Cruz-Toledo show that as unemployment rates increased, nonresident fathers' child support payments decreased. William Schneider, Jeanne Brooks-Gunn, and Jane Waldfogel show that fluctuations in unemployment rates negatively affected parenting quality and child well-being, particularly for families where the mother did not have a four-year college degree. Although the recession affected most

Americans, Children of the Great Recession reveals how vulnerable parents and children paid a higher price. The research in this volume suggests that policies that boost college access and reinforce the safety net could help protect disadvantaged families in times of economic crisis.

Drugs, Behavior, and Modern Society - Charles F. Levinthal 2005

This text provides an introduction to the basic facts and major issues concerning drug-taking behavior. In today's world, drugs and

their use present a social paradox, combining the potential for good and for bad. As a society and as individuals, we can be the beneficiaries of drugs or their victims.
