A Legal Framework from Emerging Business Models - Emily M. Weitzenboeck 2012

The last two decades have witnessed the growth of new forms of entrepreneurial cooperation such as dynamic networks like virtual

enterprises and enterprise pools. These business forms are often hybrid, having elements of both contract-based organizations and corporate forms, in particular partnership. This book examines the relative utility of contract and partnership law in fostering and maintaining these emerging business models, focusing on dynamic networks. The book analyses how dynamic networks are organized and set up through, very often, collaborative contracts and how the behaviour of their member firms is regulated. Good faith and fair dealing as a behavioural criterion in contractual and partnership relations, is an important theme of this work. The background and preconditions for the emergence and growth of such business forms is also investigated. The book contains case studies of such networks from different countries in particular Germany, Austria, Switzerland, England and Norway. It examines relevant legal rules in a number of jurisdictions such as England, Norway, Germany, Italy, France and the US. This detailed book will appeal to postgraduate students and academics in the fields of contract law, comparative law, partnership law and business/commercial law. Academics in

other disciplines such as economics, sociology and business management will also find much to interest them in this study.

Books in Print - 1994

Legal Sources in Business and Human Rights - Martina Buscemi 2020-06-02
Legal Sources in Business and Human Rights takes stock of different aspects of Business and Human Rights practice in order to identify and explore some dynamics that are driving the evolution of the legal sources of international and EU law in the field of B&HRs.

Hacking- The art Of Exploitation - J. Erickson 2018-03-06

This text introduces the spirit and theory of hacking as well as the science behind it all; it also provides some core techniques and tricks of hacking so you can think like a hacker, write your own hacks or thwart potential system attacks.

Digital Entrepreneurship - Mariusz Soltanifar 2020-11-13

This open access book explores the global challenges and experiences related to digital entrepreneurial activities, using carefully selected examples from leading companies and economies that shape world business today and tomorrow. Digital entrepreneurship and the companies steering it have an enormous global impact; they promise to transform the business world and change the way we communicate with each other. These companies use digitalization and artificial intelligence to enhance the quality of decisions and augment their business and customer operations. This book demonstrates how cloud services are continuing to evolve; how cryptocurrencies are traded in the banking industry; how platforms are created to commercialize business, and how, taken together, these developments provide new opportunities in the

digitalized era. Further, it discusses a wide range of digital factors changing the way businesses operate, including artificial intelligence, chatbots, voice search, augmented and virtual reality, as well as cyber threats and data privacy management. "Digitalization mirrors the Industrial Revolution's impact. This book provides a complement of perspectives on the opportunities emanating from such a deep seated change in our economy. It is a comprehensive collection of thought leadership mapped into a very useful framework. Scholars, digital entrepreneurs and practitioners will benefit from this timely work." Gina O'Connor, Professor of Innovation Management at Babson College, USA "This book defines and delineates the requirements for companies to enable their businesses to succeed in a post-COVID19 world. This book deftly examines how to accomplish and achieve digital entrepreneurship by leveraging cloud computing, AI, IoT and other critical technologies. This is truly a unique "must-read" book because it goes beyond theory and provides practical examples." Charlie Isaacs, CTO of Customer Connection at Salesforce.com, USA "This book provides digital entrepreneurs useful guidance identifying, validating and building their venture. The international authors developed new perspectives on digital entrepreneurship that can support to create impact ventures." Felix Staeritz, CEO FoundersLane, Member of the World Economic Forum Digital Leaders Board and bestselling author of FightBack, Germany

Innovative Management in Information and Production - Junzo Watada 2013-06-22

Innovative Management in Information and Production is based on the proceedings of the Third International Symposium on Innovative

Management, Information and Production. This symposium is held by International Society of Management Engineers. The symposium took place on October 8-10, in HCMC, Vietnam. This book examines recent innovative management of information and productions such as digital collection management and operations planning, scheduling and control.

Women, Business and the Law 2021 - World Bank 2021-04-05

Women, Business and the Law 2021 is the seventh in a series of annual studies measuring the laws and regulations that affect women's economic opportunity in 190 economies. The project presents eight indicators structured around women's interactions with the law as they move through their lives and careers: Mobility, Workplace, Pay, Marriage, Parenthood, Entrepreneurship, Assets, and Pension. This year's report updates all indicators as of October 1, 2020 and builds evidence of the links between legal gender equality and women's economic inclusion. By examining the economic decisions women make throughout their working lives, as well as the pace of reform over the past 50 years, Women, Business and the Law 2021 makes an important contribution to research and policy discussions about the state of women's economic empowerment. Prepared during a global pandemic that threatens progress toward gender equality, this edition also includes important findings on government responses to COVID-19 and pilot research related to childcare and women's access to justice.

Calculus for Business, Economics, and the Social and Life Sciences -

Laurence D. Hoffmann 2007-06-01
Calculus for Business, Economics, and the Social and Life Sciences introduces calculus in real-world contexts and provides a sound, intuitive understanding of the basic

concepts students need as they pursue careers in business, the life sciences, and the social sciences. The new Ninth Edition builds on the straightforward writing style, practical applications from a variety of disciplines, clear step-by-step problem solving techniques, and comprehensive exercise sets that have been hallmarks of Hoffmann/Bradley's success through the years.

Big Data, Databases and "Ownership" Rights in the Cloud - Marcelo Corrales Compagnucci 2019-11-02

Two of the most important developments of this new century are the emergence of cloud computing and big data. However, the uncertainties surrounding the failure of cloud service providers to clearly assert ownership rights over data and databases during cloud computing transactions and big data services have been perceived as imposing legal risks and transaction costs. This lack of clear ownership rights is also seen as slowing down the capacity of the Internet market to thrive. Click-through agreements drafted on a take-it-or-leave-it basis govern the current state of the art, and they do not allow much room for negotiation. The novel contribution of this book proffers a new contractual model advocating the extension of the negotiation capabilities of cloud customers, thus enabling an automated and machine-readable framework, orchestrated by a cloud broker. Cloud computing and big data are constantly evolving and transforming into new paradigms where cloud brokers are predicted to play a vital role as innovation intermediaries adding extra value to the entire life cycle. This evolution will alleviate the legal uncertainties in society by means of

embedding legal requirements in the user interface and related computer systems or its code. This book situates the theories of law and economics and behavioral law and economics in the context of cloud computing and takes database rights and ownership rights of data as prime examples to represent the problem of collecting, outsourcing, and sharing data and databases on a global scale. It does this by highlighting the legal constraints concerning ownership rights of data and databases and proposes finding a solution outside the boundaries and limitations of the law. By allowing cloud brokers to establish themselves in the market as entities coordinating and actively engaging in the negotiation of service-level agreements (SLAs), individual customers as well as small and medium-sized enterprises could efficiently and effortlessly choose a cloud provider that best suits their needs. This approach, which the author calls "plan-like architectures," endeavors to create a more trustworthy cloud computing environment and to yield radical new results for the development of the cloud computing and big data markets.

Copyright Reconstructed: Rethinking Copyright's Economic Rights in a Time of Highly Dynamic Technological and Economic Change - P. Bernt Hugenholtz
2018-04-11

About this book: Copyright Reconstructed is the result of a collaborative research project, 'Reconstructing Rights' funded by Microsoft Europe, that normatively examined the core economic rights protected under EU copyright law, with the aim of realigning these rights with economic and technological realities. It follows an interdisciplinary approach, combining economic and legal methods. The book presents various concurring

future models of 'reconstructed' copyright law. The historical evolution of copyright has led to a growing disconnect between the legal definitions of economic rights and the business and technological realities they regulate, eroding copyright's normative content and distorting the scope of its economic rights. What's in this book: This book is structured as follows. Following a historical chapter that illustrates how a structure of media-specific economic rights has developed in international copyright law as copyright's catalogue of rights, a number of alternative models for reconstructing rights are presented in the form of chapters by Europe's most respected copyright scholars and economists focusing on potentially copyright-relevant acts that lie at the borders of exclusive rights: digital resale; private copying; hyperlinking and embedding; cable retransmission; and text and data mining. How this will help you: Offering the most incisive current thinking on copyright's economic rights in an increasingly networked world where acts of usage of works occur on a global or regional scale rather than on a purely national territorial basis, this book will be of immeasurable value not only to academics but also to practitioners and professionals in intellectual property law. This book guides copyright lawyers and scholars in the fields of international and EU copyright law in understanding the nexus between copyright law and technological and economic change. It also helps lawmakers and judges at the European, national and international levels formulate legislative responses to the challenges of the digital environment.

Co-Opetition - Adam M. Brandenburger

2011-07-13

Now available in paperback, with an all new Reader's guide, The New York Times and Business Week bestseller Co-opetition revolutionized the game of business. With over 40,000 copies sold and now in its 9th printing, Co-opetition is a business strategy that goes beyond the old rules of competition and cooperation to combine the advantages of both. Co-opetition is a pioneering, high profit means of leveraging business relationships. Intel, Nintendo, American Express, NutraSweet, American Airlines, and dozens of other companies have been using the strategies of co-opetition to change the game of business to their benefit. Formulating strategies based on game theory, authors Brandenburger and Nalebuff created a book that's insightful and instructive for managers eager to move their companies into a new mind set.

Blue Book on AI and Rule of Law in the World (2020) - Yadong Cui
2023-01-12

This book focuses on the development of artificial intelligence and rule of law in the current world. It covers topics such as AI strategy, policy, law, theoretical research, and practical application. Through an in-depth analysis and thorough evaluation, this book provides a more objective, fair, accurate and comprehensive report. The purpose is to lead the AI and rule of law research and create an AI and rule of law environment which is conducive to the construction of AI and rule of law system. In particular, it aims to play an active role in promoting the establishment of legal systems, policy systems, and codes of ethics that are compatible with the innovative development of AI, thus facilitating the implementation of a new generation of AI development strategies, and ensuring the safe,

reliable, controllable, healthy, and sustainable development of AI.

Complete Digital Marketing Guide Book for SEO, Social Media & Brand awareness - Publicancy 2019-11-07

A step by step guide to digital marketing. It highlights the crucial steps needed to start a digital business. It's a Complete Digital Marketing Guide Book for SEO, Social Media & Brand awareness. Learn Definitive & Hidden Secrets of Digital Marketing to grow your business know that the evolution of technology is constant in our society and unfolding at warp speed. Most, if not all, technology companies have their foot firmly on the accelerator. It's predicted that by 2020, multi-billions of dollars will have been put into the technology revolution. Where does Digital Marketing fit in? The answers to Digital Marketing include the following: Conversion Rate Optimization SEO (Search Engine Optimization) SMM (Social Media Marketing) Email Marketing Internet Reputation Management Blogging Utilizing this digital marketing guide will allow you to apply the knowledge and greatly increase the success of your website & brand.

Extending Deontic Logic for the Formalisation of Legal Rules - L.L. Royackers 2013-04-17

This book describes extensions of deontic logic. Deontic logic is a branch of philosophical logic involving reasoning with norms, obligations, prohibitions and permissions. The extensions concern the logical structure of legal rules and legal reasoning. Their function is to improve the representation of

legal knowledge and enhance deontic logic through increased expressibility. The resulting formulas acquire new meanings, not expressible in standard deontic logic, which are subject to fresh interpretations. The author offers an extensive analysis of the representation of actors, to whom the norms are directed, and authorities who enact the norms. Moreover, a distinction is made between enactment and applicability. A modality of enactment can be used to express inconsistent enacted norms in a consistent way. An authority-hierarchy is introduced to filter out the applicable norms from the set of enacted norms. Some related philosophical questions will be discussed regarding the applications of formalisms that are intrinsic to practical science with respect to 'consistency' and 'universality'. The formalisms and applications considered here are relevant for law, philosophy and computer science, with a special focus on the improvement of legal expert systems and intelligent support for legal professionals.

Getting Everything You Can Out of All You've Got - Jay Abraham 2001-10-12

A consultant to some of America's leading corporations shares key insights and ideas on how to supercharge one's business and career, explaining how to create and develop new opportunities for wealth in any business, enterprise, or venture. Reprint. 50,000 first printing.

Popular Science - 1947-11

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Dynamic Failure of Materials and

Structures - Arun Shukla 2009-10-20
Dynamic Failure of Materials and Structures discusses the topic of dynamic loadings and their effect on material and structural failure. Since dynamic loading problems are very difficult as compared to their static counterpart, very little information is currently available about dynamic behavior of materials and structures. Topics covered include the response of both metallic as well as polymeric composite materials to blast loading and shock loadings, impact loadings and failure of novel materials under more controlled dynamic loads. These include response of soft materials that are important in practical use but have very limited information available on their dynamic response. Dynamic fragmentation, which has re-emerged in recent years has also been included. Both experimental as well as numerical aspects of material and structural response to dynamic loads are discussed. Written by several key experts in the field, *Dynamic Failure of Materials and Structures* will appeal to graduate students and researchers studying dynamic loadings within mechanical and civil engineering, as well as in physics and materials science.

Locas in Love presents the first collection of this ongoing series, highlighting the best moments from the first four issues.

Logical Tools for Modelling Legal

Argument - H. Prakken 2013-04-17

This book is a revised and extended version of my PhD Thesis 'Logical Tools for Modelling Legal Argument', which I defended on 14 January 1993 at the Free University Amsterdam. The first five chapters of the thesis have remained almost completely unchanged but the other chapters have

undergone considerable revision and expansion. Most importantly, I have replaced the formal argument-based system of the old Chapters 6, 7 and 8 with a revised and extended system, which I have developed during the last three years in collaboration with Giovanni Sartor. Apart from some technical improvements, the main additions to the old system are the enrichment of its language with a nonprovability operator, and the ability to formalise reasoning about preference criteria. Moreover, the new system has a very intuitive dialectical form, as opposed to the rather unintuitive fixed-point appearance of the old system. Another important revision is the split of the old Chapter 9 into two new chapters. The old Section 9.1 on related research has been updated and expanded into a whole chapter, while the rest of the old chapter is now in revised form in Chapter 10. This chapter also contains two new contributions, a detailed discussion of Gordon's Pleadings Game, and a general description of a multi-layered overall view on the structure of argumentation, comprising a logical, dialectical, procedural and strategic layer. Finally, in the revised conclusion I have paid more attention to the relevance of my investigations for legal philosophy and argumentation theory.

Web Data Mining - Bing Liu 2011-06-25
Liu has written a comprehensive text on Web mining, which consists of two parts. The first part covers the data mining and machine learning foundations, where all the essential concepts and algorithms of data mining and machine learning are presented. The second part covers the key topics of Web mining, where Web crawling, search, social network analysis, structured data extraction, information integration, opinion mining and sentiment analysis, Web

usage mining, query log mining, computational advertising, and recommender systems are all treated both in breadth and in depth. His book thus brings all the related concepts and algorithms together to form an authoritative and coherent text. The book offers a rich blend of theory and practice. It is suitable for students, researchers and practitioners interested in Web mining and data mining both as a learning text and as a reference book. Professors can readily use it for classes on data mining, Web mining, and text mining. Additional teaching materials such as lecture slides, datasets, and implemented algorithms are available online.

Spider's Bite - Jennifer Estep
2010-01-26

Follow Gin Blanco, a kick-butt female assassin who moonlights at a BBQ joint in Tennessee, as she searches for the person who double-crossed her in this heart-pounding and fresh paranormal romance series. After Gin's family was murdered by a Fire elemental when she was thirteen, she lived on the streets and eventually became an assassin to survive. Now, Gin is assigned to rub out an Ashland businessman, but it turns out to be a trap. After Gin's handler is brutally murdered, she teams up with the sexy detective investigating the case to figure out who double-crossed her and why. Only one thing is for sure—Gin has no qualms about killing her way to the top of the conspiracy.

The Coaching Habit - Michael Bungay Stanier 2016-02-29

Coaching is an essential skill for leaders. But for most busy, overworked managers, coaching employees is done badly, or not at all. They're just too busy, and it's too hard to change. But what if managers could coach their people in 10 minutes or less? In Michael Bungay Stanier's *The Coaching Habit*,

coaching becomes a regular, informal part of your day so managers and their teams can work less hard and have more impact. Coaching is an art and it's far easier said than done. It takes courage to ask a question rather than offer up advice, provide an answer, or unleash a solution. Giving another person the opportunity to find their own way, make their own mistakes, and create their own wisdom is both brave and vulnerable. It can also mean unlearning our 'fix it' habits. In this practical and inspiring book, Michael shares seven transformative questions that can make a difference in how we lead and support. And, he guides us through the tricky part - how to take this new information and turn it into habits and a daily practice. -Brené Brown, author of *Rising Strong* and *Daring Greatly* Drawing on years of experience training more than 10,000 busy managers from around the globe in practical, everyday coaching skills, Bungay Stanier reveals how to unlock your peoples' potential. He unpacks seven essential coaching questions to demonstrate how---by saying less and asking more---you can develop coaching methods that produce great results. - Get straight to the point in any conversation with *The Kickstart Question* - Stay on track during any interaction with *The AWE Question* - Save hours of time for yourself with *The Lazy Question*, and hours of time for others with *The Strategic Question* - Get to the heart of any interpersonal or external challenge with *The Focus Question* and *The Foundation Question* - Finally, ensure others find your coaching as beneficial as you do with *The Learning Question* A fresh, innovative take on the traditional how-to manual, the book combines insider information with research based in neuroscience and behavioural economics, together with interactive

training tools to turn practical advice into practiced habits. Dynamic question-and-answer sections help identify old habits and kick-start new behaviour, making sure you get the most out of all seven chapters. Witty and conversational, *The Coaching Habit* takes your work--and your workplace--from good to great. **The Sciences of the Artificial, third edition** - Herbert A. Simon 1996-09-26 Continuing his exploration of the organization of complexity and the science of design, this new edition of Herbert Simon's classic work on artificial intelligence adds a chapter that sorts out the current themes and tools--chaos, adaptive systems, genetic algorithms--for analyzing complexity and complex systems. There are updates throughout the book as well. These take into account important advances in cognitive psychology and the science of design while confirming and extending the book's basic thesis: that a physical symbol system has the necessary and sufficient means for intelligent action. The chapter "Economic Reality" has also been revised to reflect a change in emphasis in Simon's thinking about the respective roles of organizations and markets in economic systems. Book Review Index - 2000 Every 3rd issue is a quarterly cumulation. Murder on Madison Square - Victoria Thompson 2022-05-03 Sarah and Frank Malloy must catch a scheming killer in this latest gripping installment in the USA Today bestselling *Gaslight Mysteries* Former policeman Frank Malloy is frustrated when a woman requests his private detective services to implicate her wealthy husband in adultery, the only legal grounds for divorce in New York state. Although Mrs. Bing seems genuinely distressed about her marriage and desperate to end it, she

refuses to tell Frank the reason she absolutely must divorce her husband and admits she has no legal grounds. Frank explains he won't manufacture evidence for her and sends her on her way. The following week, Frank and Sarah happen to be attending the first ever auto show in Madison Square Garden when they meet the woman's husband, Alfred Bing, who has invested in a company that produces one of the electric motorcars on display. A few days later, the newspapers report that millionaire Alvin Bing has been found dead, pinned beneath one of the wheels of his very own motorcar. But who was driving it? The obvious suspect is Mrs. Bing, but Frank and Sarah find that nothing is as it seems in their puzzling, dangerous search for truth.

Words on Cassette - 1997

Managing Pension and Retirement Plans

- August J. Baker 2005

The purpose of 'Pension & Retirement Plan Management: A Guide for Managers and Other Fiduciaries' is to provide reliable guidance for regulatory compliance, advice on managerial strategies, and some clarity on the underlying economics and finance of pension and retirement plans.

Cumulative Book Index - 1998

A world list of books in the English language.

The Art of Deception - Kevin D.

Mitnick 2011-08-04

The world's most infamous hacker offers an insider's view of the low-tech threats to high-tech security Kevin Mitnick's exploits as a cyber-desperado and fugitive form one of the most exhaustive FBI manhunts in history and have spawned dozens of articles, books, films, and documentaries. Since his release from federal prison, in 1998, Mitnick has turned his life around and established himself as one of the most sought-after computer security

experts worldwide. Now, in *The Art of Deception*, the world's most notorious hacker gives new meaning to the old adage, "It takes a thief to catch a thief." Focusing on the human factors involved with information security, Mitnick explains why all the firewalls and encryption protocols in the world will never be enough to stop a savvy grifter intent on rifling a corporate database or an irate employee determined to crash a system. With the help of many fascinating true stories of successful attacks on business and government, he illustrates just how susceptible even the most locked-down information systems are to a slick con artist impersonating an IRS agent. Narrating from the points of view of both the attacker and the victims, he explains why each attack was so successful and how it could have been prevented in an engaging and highly readable style reminiscent of a true-crime novel. And, perhaps most importantly, Mitnick offers advice for preventing these types of social engineering hacks through security protocols, training programs, and manuals that address the human element of security.

The Antitrust Paradox - Robert Bork
2021-02-22

The most important book on antitrust ever written. It shows how antitrust suits adversely affect the consumer by encouraging a costly form of protection for inefficient and uncompetitive small businesses.

Introduction to Business - Lawrence J. Gitman 2018

Introduction to Business covers the scope and sequence of most introductory business courses. The book provides detailed explanations in the context of core themes such as customer satisfaction, ethics, entrepreneurship, global business, and managing change. *Introduction to Business* includes hundreds of current

business examples from a range of industries and geographic locations, which feature a variety of individuals. The outcome is a balanced approach to the theory and application of business concepts, with attention to the knowledge and skills necessary for student success in this course and beyond.

Zero to One - Peter Thiel 2014-09-16
#1 NEW YORK TIMES BESTSELLER • “This book delivers completely new and refreshing ideas on how to create value in the world.”—Mark Zuckerberg, CEO of Meta “Peter Thiel has built multiple breakthrough companies, and *Zero to One* shows how.”—Elon Musk, CEO of SpaceX and Tesla The great secret of our time is that there are still uncharted frontiers to explore and new inventions to create. In *Zero to One*, legendary entrepreneur and investor Peter Thiel shows how we can find singular ways to create those new things. Thiel begins with the contrarian premise that we live in an age of technological stagnation, even if we’re too distracted by shiny

mobile devices to notice. Information technology has improved rapidly, but there is no reason why progress should be limited to computers or Silicon Valley. Progress can be achieved in any industry or area of business. It comes from the most important skill that every leader must master: learning to think for yourself. Doing what someone else already knows how to do takes the world from 1 to n, adding more of something familiar. But when you do something new, you go from 0 to 1. The next Bill Gates will not build an operating system. The next Larry Page or Sergey Brin won’t make a search engine. Tomorrow’s champions will not win by competing ruthlessly in today’s marketplace. They will escape competition altogether, because their businesses will be unique. *Zero to One* presents at once an optimistic view of the future of progress in America and a new way of thinking about innovation: it starts by learning to ask the questions that lead you to find value in unexpected places.
