

E Din En Iso 12944 9 Paints And Varnishes Corrosion

Thank you totally much for downloading **E Din En Iso 12944 9 Paints And Varnishes Corrosion** .Most likely you have knowledge that, people have see numerous period for their favorite books gone this E Din En Iso 12944 9 Paints And Varnishes Corrosion , but stop taking place in harmful downloads.

Rather than enjoying a good book later a mug of coffee in the afternoon, on the other hand they juggled in the manner of some harmful virus inside their computer. **E Din En Iso 12944 9 Paints And Varnishes Corrosion** is open in our digital library an online permission to it is set as public thus you can download it instantly. Our digital library saves in multiple countries, allowing you to acquire the most less latency time to download any of our books considering this one. Merely said, the E Din En Iso 12944 9 Paints And Varnishes Corrosion is universally compatible past any devices to read.

General Catalogue of Printed Books to 1955 - British Museum. Dept. of Printed Books 1967

Corrosion Tests and Standards - Robert Baboian 2005

Industrielle Pulverbeschichtung - Judith Pietschmann 2019-08-26

Mit diesem Fachbuch liegt ein umfassendes Praxisnachschlagewerk auf dem Gebiet der Industriellen Pulverbeschichtung vor. Es bietet eine systematische und vollständige Beschreibung der Grundlagen, Anwendungen und Verfahren zur sicheren Beherrschung von Prozessen. In ausführlicher Form werden die Methoden zur Lackherstellung, Eigenschaften der Pulverlacktypen, Applikationstechnik und Mess- und Prüfmethode anschaulich vorgestellt und behandelt. Darüber hinaus bilden die Vorbehandlung sowie das Trouble-Shooting bei Lackfehlern und deren Vermeidung Schwerpunkte dieses Buches. Die vorliegende Auflage wurde komplett überarbeitet und um das Kapitel Umwelt ergänzt.

Sixty Years of Inorganic Zinc Coatings - R. A. Francis 1999

Aluminium - 2006

Beschichtungsstoffe - 2001

Paints and Varnishes. Reactive Coatings for Fire Protection of Metallic Substrates. Definitions, Requirements, Characteristics and Marking - British Standards Institute Staff 1915-02-28

Paints, Varnishes, Coatings, Fire safety, Definitions, Properties, Marking, Fire Plaster, Render, Paint and Coatings - Alexander Reichel 2005-01-01

Plasters, paints and coatings are what define surfaces, create spatial effects and interplay with light. How they are used is decisive for a building's appearance, and they also serve as a protective layer. A new volume in the DETAIL practice series, Plaster, Render, Paint and Coatings presents a survey of impressive proven and innovative solutions. The authors describe and define the basic essentials, show what to look for and offer valuable tips for practical applications. Taking two example buildings, the authors also document the structural design of all important connection points at a scale of 1:10. New building or renovation: solutions for the application of plaster and paint Guide: Which paint for which surfaces? Design details for solutions with external thermal insulation composite systems Separate manufacturer's guidelines for plasters and paints

Modern Surface Technology - Friedrich-Wilhelm Bach 2006-12-13

This translation of a successful German title provides a broad and fundamental overview of current coating technology. Edited by experts from one of the largest research centers for this field in Germany, this valuable reference combines research and industrial perspectives, treated by authors from academia and industry alike. They discuss the potential of the many innovations introduced into industrial application in recent years, allowing materials scientists and engineers to find the appropriate solution for their own specific coating problems. Thus, with the aid of this book, it is possible to make coating technology an integral part of R&D, construction and production.

Guidelines for the Design of Fender Systems - Maritime Navigation Commission. Working Group 33 2002

Handbook of Hot-dip Galvanization - Peter Maaß 2011-03-31

Hot-dip galvanization is a method for coating steel workpieces with a protective zinc film to enhance the corrosion resistance and to improve the mechanical material properties. Hot-dip galvanized steel is the material of choice underlying many modern buildings and constructions, such as train stations, bridges and metal domes. Based on the successful German version, this edition has been adapted to include international standards, regulations and best practices. The book systematically covers all steps in hot-dip galvanization: surface pre-treatment, process and systems technology, environmental issues, and quality management. As a result, the reader finds the fundamentals as well as the most important aspects of process technology and technical equipment, alongside contributions on workpiece requirements for optimal galvanization results and methods for applying additional protective coatings to the galvanized pieces. With over 200 illustrated examples, step-by-step instructions, presentations and reference tables, this is essential reading for apprentices and professionals alike.

Polymer Nanocomposites Containing Graphene - Mostafizur Rahaman 2021-08-22

Polymer Nanocomposites Containing Graphene: Preparation, Properties and Applications provides detailed up-to-date information on the characterization, synthesis, processing, properties and application of these materials. Key topics that are covered in the book include: the methods of synthesis and preparation of graphene as well as different processes and methods of functionalization and modification of graphene for improving composite properties. The preparation techniques focus on which method is advantageous for getting improvements in properties along with their drawbacks. The structure and property relationships are also discussed in detail. The issues related to graphene dispersion in polymer matrices is also addressed as well as the use of graphene as reinforcement in

thermoset resins. The different properties of the composites like mechanical, electrical, dielectric, thermal, rheological, morphology, spectroscopy, electronic, optical, and toxicity are reviewed from the geometrical and functional point of view. Applications cover electrical and electronic fields, flame and fire retardancy, structural, sensing and catalysis, membrane, in fuel cell and solar energy, hydrogen production, aerospace engineering, packaging, and biomedical/bioengineering fields. Up-to-date patents on graphene-polymer nanocomposites are also covered. Those working in graphene-based materials will benefit from the detailed knowledge presented in this book on graphene synthesis, composite preparation methods, and the related problems associated with them. The book will enable researchers to select the appropriate composite as per their respective field of application. Presents novel approaches for the preparation of graphene, its modification and nanocomposites with enhanced properties for state-of-the-art applications. Special attention is given to how graphene is synthesized through different routes, their functionality, dispersion related matters and structural aspects controlling the composite properties for various applications. All synthesis methodology and functionalization procedure for graphene is discussed.

Corrosion in Systems for Storage and Transportation of Petroleum Products and Biofuels - Alec Groysman 2014-02-17

This book treats corrosion as it occurs and affects processes in real-world situations, and thus points the way to practical solutions. Topics described include the conditions in which petroleum products are corrosive to metals; corrosion mechanisms of petroleum products; which parts of storage tanks containing crude oils and petroleum products undergo corrosion; dependence of corrosion in tanks on type of petroleum products; aggressiveness of petroleum products to polymeric material; how microorganisms take part in corrosion of tanks and pipes containing petroleum products; which corrosion monitoring methods are used in systems for storage and transportation of petroleum products; what corrosion control measures should be chosen; how to choose coatings for inner and outer surfaces of tanks containing petroleum products; and how different additives (oxygenates, aromatic solvents) to petroleum products and biofuels influence metallic and polymeric materials. The book is of interest to corrosion engineers, materials engineers, oil and gas engineers, petroleum engineers, chemists, chemical engineers, mechanical engineers, failure analysts, scientists, and students, designers of tanks, pipelines and other systems for storage and transportation fuels, technicians. The book is of interest to corrosion engineers, materials engineers, oil and gas engineers, petroleum engineers, chemists, chemical engineers, mechanical engineers, failure analysts, scientists, and students, designers of tanks, pipelines and other systems for storage and transportation fuels, technicians. The book is of interest to corrosion engineers, materials engineers, oil and gas engineers, petroleum engineers, chemists, chemical engineers, mechanical engineers, failure analysts, scientists, and students, designers of tanks, pipelines and other systems for storage and transportation fuels, technicians.

Physics Of Space Plasmas - George K Parks 2019-08-21

This textbook was developed to provide seniors and first-year graduate students in physical sciences with a general knowledge of electrodynamic phenomena in space. Since the launch of the first unmanned satellite in 1957, experiments have been performed to study the behavior of electromagnetic fields and charged particles. There is now a considerable amount of data on hand, and many articles, including

excellent review articles, have been written for the specialists. However, for students, new researchers, and non-specialists, a need still exists for a book that integrates these observations in a coherent way. This book is an attempt to meet that need by using the theory of classical electrodynamics to unify space observations. The contents of this book are based on classroom notes developed for an introductory space physics course that the author has taught for many years at the University of Washington. Students taking the course normally have had an undergraduate course in electricity and magnetism but they come with very little knowledge about space.

Coil Coating - Jörg Sander 2014-01

The Mission of this new book is to know everything about coil coatings and how they can be used successfully. From the basic principle underlying the coil coatings process to substrate preparation, selection of raw materials, coil coatings line equipment, performance testing and research topics through to standardisation. A noteworthy section of the book looks at application areas involving cans and buildings. It also covers the diverse application procedures and their drying as well as wet spraying, powder coatings, UV-hardening, IR and EB. The major research findings on functional coatings and nanotechnology are included. To provide a solid grounding in all the important principles of coil coatings - essential for the successful development of can and coil coatings. Jörg Sander writes this book for formulators seeking to stay abreast of the latest developments in can and coil coatings as well as immersing themselves in the topic, along with experts looking for detailed information about surface preparation, materials, application, standardisation and test methods. Anyone involved in the coil coating manufacturing process who needs a full understanding of the relationships involved.

Future Development of Thermal Spray Coatings - Nuria Espallargas 2015-06-29

Future Development of Thermal Spray Coatings discusses the latest developments and research trends in the thermal spray industry. The book presents a timely guide to new applications and techniques. After an introduction to thermal spray coatings by the editor, Part One covers new types and properties of thermal spray coatings. Chapters look at feedstock suspensions and solutions, the application of solution precursor spray techniques to obtain ceramic films and coatings, cold spray techniques and warm spray technology amongst others. Part Two of the book moves on to discuss new applications for thermal spray coatings such as the use of thermal spray coatings in environmental barrier coatings, thermal spray coatings in renewable energy applications and manufacturing engineering in thermal spray technologies by advanced robot systems and process kinematics. Timely guide on the current advancements and research trends in thermal spray technology. Reviews different types of thermal spray coatings. Presents a wide variety of applications for this emerging technology.

Handbook of Engineering Practice of Materials and Corrosion - Jung-Chul (Thomas) Eun 2020-09-04

This handbook is an in-depth guide to the practical aspects of materials and corrosion engineering in the energy and chemical industries. The book covers materials, corrosion, welding, heat treatment, coating, test and inspection, and mechanical design and integrity. A central focus is placed on industrial requirements, including codes, standards, regulations, and specifications that practicing material and corrosion engineers and technicians face in all roles and in all areas of responsibility. The comprehensive resource provides expert guidance on general corrosion mechanisms and recommends materials for the control

and prevention of corrosion damage, and offers readers industry-tested best practices, rationales, and case studies.

Epoxy Resins - Michael Dornbusch 2016

Aufbau, Struktur und Eigenschaften der Epoxidharze werden für lösemittelhaltige als auch für wässrige Systeme in dem neuen Fachbuch Epoxidharze dargestellt. Die 1K- und die 2K-Systeme werden beleuchtet und die lacktechnischen Grundlagen effizient hervorgehoben. Dem Leser werden unterschiedliche Anwendungsmöglichkeiten der Epoxidharzsysteme und deren Vor- und Nachteile nahegebracht. Außerdem verschafft das Buch einen Einblick in anwendungstechnische Anforderungen und deren Überprüfung.

BASF Handbook on Basics of Coating Technology - Artur Goldschmidt 2003

The new Handbook on Basics of Coating Technology is a classic reference recently updated with 18 years worth of new technology, standards, and developments in the worldwide coating industry. This is an indispensable reference for anyone in the industry. Whether you are involved in traditional processes or the most innovative, this handbook will be a critical addition to your daily routine. Full of color images, graphs, and figures, the handbook comes complete with standard tables, general classification figures, definitions, and an extensive keyword index. Both engineers and technicians will find the answers they need within its pages. Instead of solving problems "after the fact," this handbook helps avoiding them in the first place, saving time and money. This reference also gives beginners and practically oriented readers a journey through the different coating segments clearly illustrated with lots of pictures. It also outlines the social changes in the industry concerning environmental compatibility and toxicology which have seriously affected product development.

Structural Engineer's Pocket Book British Standards Edition - Fiona Cobb 2020-12-17

The Structural Engineer's Pocket Book British Standards Edition is the only compilation of all tables, data, facts and formulae needed for scheme design to British Standards by structural engineers in a handy-sized format. Bringing together data from many sources into a compact, affordable pocketbook, it saves valuable time spent tracking down information needed regularly. This second edition is a companion to the more recent Eurocode third edition. Although small in size, this book contains the facts and figures needed for preliminary design whether in the office or on-site. Based on UK conventions, it is split into 14 sections including geotechnics, structural steel, reinforced concrete, masonry and timber, and includes a section on sustainability covering general concepts, materials, actions and targets for structural engineers.

Automotive Paints and Coatings - Hans-Joachim Streitberger 2008-09-08

Now in its second edition and still the only book of its kind, this is an authoritative treatment of all stages of the coating process -- from body materials, paint shop design, and pre-treatment, through primer surfacers and top coats. New topics of interest covered are color control, specification and testing of coatings, as well as quality and supply concepts, while valuable information on capital and legislation aspects is given. Invaluable for engineers in the automotive and paints and coatings industry as well as for students in the field.

Corrosion Prevention and Protection - Edward Ghali 2007-01-30

Corrosion Prevention and Protection: Practical Solutions presents a functional approach to the various forms of corrosion, such as uniform corrosion, pitting corrosion, crevice corrosion, galvanic corrosion, stress corrosion, hydrogen-induced damage, sulphide stress cracking, erosion-corrosion, and corrosion fatigue

in various industrial environments. The book is split into two parts. The first, consisting of five chapters: Introduction and Principles (Fundamentals) of Corrosion Corrosion Testing, Detection, Monitoring and Failure Analysis Regulations, Specifications and Safety Materials: Metals, Alloys, Steels and Plastics Corrosion Economics and Corrosion Management The second part of the book consists of two chapters which present: a discussion of corrosion reactions, media, active and active-passive corrosion behaviour and the various forms of corrosion, a collection of case histories and practical solutions which span a wide range of industrial problems in a variety of frequently encountered environments, including statues & monuments, corrosion problems in metallurgical and mineral processing plants, boilers, heat exchangers and cooling towers, aluminum and copper alloys, galvanized steel structures as well as hydrogeological environmental corrosion This text is relevant to researchers and practitioners, engineers and chemists, working in corrosion in industry, government laboratories and academia. It is also suitable as a course text for engineering students as well as libraries related to chemical and chemical engineering institutes and research departments.

Hydroblasting and Coating of Steel Structures - A. Momber 2003-12-18

KEY FEATURES: • This technique is growing in importance. • The first comprehensive book in this subject. A practical and comprehensive account of the technology and applications of hydroblasting, a technique used more and more in the preparation of steel and other surfaces. Steel surfaces will corrode unless they are properly prepared and coated. Such corrosion can have disastrous effects (eg bridge collapse) therefore the preparation of the surface is of major importance. Due to environmental pressure to move away from grit-blasting, high-pressure water can now be used to prepare surfaces, with few environmental costs. This book systematically and critically reviews the state of current hydroblasting technology and its applications. The book is essentially practical in nature and is written by an expert in the field.

Applied Metallurgy and Corrosion Control - Amiya Kumar Lahiri 2017-08-23

This book serves as a comprehensive resource on metals and materials selection for the petrochemical industrial sector. The petrochemical industry involves large scale investments, and to maintain profitability the plants are to be operated with minimum downtime and failure of equipment, which can also cause safety hazards. To achieve this objective proper selection of materials, corrosion control, and good engineering practices must be followed in both the design and the operation of plants. Engineers and professional of different disciplines involved in these activities are required to have some basic understanding of metallurgy and corrosion. This book is written with the objective of serving as a one-stop shop for these engineering professionals. The book first covers different metallic materials and their properties, metal forming processes, welding, and corrosion and corrosion control measures. This is followed by considerations in material selection and corrosion control in three major industrial sectors, oil & gas production, oil refinery, and fertilizers. The importance of pressure vessel codes as well as inspection and maintenance repair practices have also been highlighted. The book will be useful for technicians and entry level engineers in these industrial sectors. Additionally, the book may also be used as primary or secondary reading for graduate and professional coursework.

Recommendations of the Committee for Waterfront Structures Harbours and Waterways EAU 2012 - HTG 2015-06-29

The "EAU 2012" takes into account the new generation of standards, which is

shortly to be introduced into the building control system; it consists of Eurocode 7, the associated national application documents and additional national regulations (DIN 1054:2010). In certain cases, partial safety factors are determined differently based on experience in practice. This means that the safety standard of sea and port buildings remains in place; the recommendations nevertheless satisfy the requirements for international recognition and application regarding the planning, design, specification, tender procedure, construction and monitoring, as well as the handover of - and cost accounting for - port and waterway systems under uniform criteria.

Blast Cleaning Technology - A. Momber 2007-12-15

The first comprehensive monograph in blast cleaning technology, this book provides a comprehensive review of the technology, with an emphasis on practical applications. The author first systematically and critically reviews the theory behind the technology. Next you'll learn about the state of current blast cleaning, surface quality aspects, and the effects of blast cleaning on the performance of applied coatings. You'll also discover many of today's cutting-edge applications, including micro-machining, polishing, maintenance, and surface preparation for coating applications. Finally, the author describes recent advanced applications in the machining industry, including blast cleaning-assisted laser milling.

Steel Designers' Manual Fifth Edition: The Steel Construction Institute - Institute Steel Construction 1993-01-18

This classic manual for structural steelwork design was first published in 1956. Since then, it has sold many thousands of copies worldwide. The fifth edition is the first major revision for 20 years and is the first edition to be fully based on limit state design, now used as the primary design method, and on the UK code of practice, BS 5950. It provides, in a single volume, all you need to know about structural steel design.

Thomas Register of American Manufacturers and Thomas Register Catalog File - 1997 Vols. for 1970-71 includes manufacturers catalogs.

Inorganic Pigments - Gerhard Pfaff 2017-09-11

The book provides a complete overview on inorganic pigments and their use in dye industry. Each chapter introduces a certain class of pigment in respect of fundamentals, manufacture, properties and toxicology and thus being very valuable for paint chemists and materials specialists. The readers will benefit from a concise and well-structured text, numerous examples and a set of test questions in the end of each chapter.

Mediation in International Commercial and Investment Disputes - Catharine Titi 2019

Until now, the resolution of international commercial and investment disputes has been dominated almost exclusively by international arbitration. But that is changing. Whilst they may be complementary mechanisms, international mediation and conciliation are now coming to the fore. Mediation rules that were in disuse gather momentum, and dispute settlement centres are introducing new mediation rules. The European Union is encouraging international mediation in both the commercial and investment spheres. The 2019 Singapore Mediation Convention of the United Nations Commission on International Trade Law (UNCITRAL) is aiming to ensure enforcement of international commercial settlement agreements resulting from mediation. The first investor-State disputes are mediated under the International Bar Association (IBA) rules. The International Centre for Settlement of Investment Disputes (ICSID)'s conciliation mechanism is resorted to more often

than in the past. The International Chamber of Commerce (ICC) has recently administered its first mediation case based on a bilateral investment treaty, and a new training market on mediation is flourishing. Mediation in Commercial and Investment Disputes brings together a line-up of outstanding, highly-qualified experts from academia, mediation and arbitration institutions, and international legal practice, to address this highly topical, complex subject from a variety of angles.

Facade Construction Manual - Thomas Herzog 2004-01-01

«Facade Construction Manual» provides a systematic survey of contemporary expertise in the application of new materials and energy-efficient technologies in facade design. It surveys the facade design requirements made by various types of buildings, as well as the most important materials, from natural stone through to synthetics, and documents a diversity of construction forms for a wide range of building types.

Advances in Green Synthesis - Inamuddin 2021-05-18

This edited book focusses on green chemistry as the research community endeavours to create eco-friendly materials and technologies. It provides an in-depth overview of the fundamentals, key concepts and experimental techniques for eco-friendly synthesis of organic compounds and metal/metal oxide nanoparticles/nanomaterials. It also emphasizes the mechanisms, designing and industrial technologies for green synthesis and its applications. Each chapter brings the recent developments, state of the art, challenges and perspectives which cover all the aspects in one place, and which concern the green synthesis and evolution. Authored by world-renowned experts in a broad range of green chemistry sectors, this book is an archival reference guide for researchers, engineers, scientists and postgraduates working in the field of sustainable science, green chemistry, environmental science, engineering sciences and industrial technologies.

Corrosion Control Through Organic Coatings - Ole Øystein Knudsen 2017-04-28

Corrosion Control Through Organic Coatings, Second Edition provides readers with useful knowledge of the practical aspects of corrosion protection with organic coatings and links this to ongoing research and development. Thoroughly updated and reorganized to reflect the latest advances, this new edition expands its coverage with new chapters on coating degradation, protective properties, coatings for submerged service, powder coatings, and chemical pretreatment. Maintaining its authoritative treatment of the subject, the book reviews such topics as corrosion-protective pigments, waterborne coatings, weathering, aging, and degradation of paint, and environmental impact of commonly used techniques including dry- and wet-abrasive blasting and hydrojetting. It also discusses theory and practice of accelerated testing of coatings to assist readers in developing more accurate tests and determine corrosion protection performance.

Metallic and Other Non-organic Coatings - International Organization for Standardization 1984

Each Woman's Menopause: An Evidence Based Resource - Patricia Geraghty 2021-12-02

This book is designed to meet the needs of nurse practitioners, other advanced practice nurses, and allied health professionals working in women's health, primary care, and other specialties. The multiple roles the clinician embraces in menopause management include that of direct caregiver, manager of therapeutics, educator, and interdisciplinary team member or leader. This book provides updated, evidence based information on the menopause transition from the late reproductive

stage to post-menopause to optimize the interaction of the clinician and the individual woman in each of those roles. Women's lived experiences of menopause and women's concerns regarding both the menopause transition and the choice of care options are included as critical components of shared therapy decisions. The review of natural menopause physiology and the variability of menopause symptoms are inclusive of diverse women and diverse trajectories. The impact of menopause on chronic disease, sleep, weight and nutrition, mood and cognition, urogenital health and sexuality, as well as vasomotor symptoms are each developed as individual topics by experts in those fields. Evidence based management using hormonal and non-hormonal options, and life-style and other complementary interventions are discussed with the most updated advantages and disadvantages of each treatment option. Consistent with advanced practice nursing theory, the approach is whole patient focused.

Construction Materials Manual - Manfred Hegger 2013-02-12

Until now, the few existing systematic texts on construction materials have primarily been directed at building engineers. An overview for architects, which also considers the importance of construction materials in the sensory perception of architecture—including tactile qualities, smell, color, and surface structure—has not been available. With the publication of the Construction Materials Manual, all that has changed. As a basic work aimed equally at the questions and perspectives of architects and building engineers, it will bring together all of the above-mentioned viewpoints. It addresses fundamental questions of sustainability, including life-span, environmental impact, and material cycles, while also presenting material innovations. All of the principal conventional and innovative construction materials are comprehensively documented, with attention to their production, manufacture, fabrication, treatment, surfaces, connections, and characteristics. International examples help to illustrate their use in architecture, where a building's appearance is often defined by a single material. Thus, the Construction Materials Manual will support the daily work of architects

and engineers in the choice of construction materials in a comprehensive and at the same time vivid and stimulating manner.

Petroleum Refining - James H. Gary 2007-03-05

Petroleum refiners must face billion-dollar investments in equipment in order to meet ever-changing environmental requirements. Because the design and construction of new processing units entail several years' lead time, refiners are reluctant to commit these dollars for equipment that may no longer meet certain conditions when the units come on stream. Written by experts with both academic and professional experience in refinery operation, design, and evaluation, *Petroleum Refining Technology and Economics*, Fifth Edition is an essential textbook for students and a vital resource for engineers. This latest edition of a bestselling text provides updated data and addresses changes in refinery feedstock, product distribution, and processing requirements resulting from federal and state legislation. Providing a detailed overview of today's integrated fuels refinery, the book discusses each major refining process as they relate to topics such as feedstock preparation, operating costs, catalysts, yields, finished product properties, and economics. It also contains end-of-chapter problems and an ongoing case study.

The Killing of Cynthia Sykes - E.W. MacNeill 2020-06-18

It starts out with a protagonist a Philadelphia detective who is assigned to investigate the murder of a rich business woman. He is a veteran of twenty years as a detective and is considered very good at his job. During the course of his investigation he interviews a person of interest who is the vice president of the victims company. He interviews her for a second time and there starts a romantic connection between the two. The antagonist in this book is a Russian operative named Jason who is tasked to acquire secrets from a high level American diplomat. The romantic interest in this novel name is Susan Conway and she is the vice president of the Sykes Empire. Cynthia Sykes is the victim in this novel.

Pressure Vessel Handbook - Eugene F. Megyesy 1977

European Coatings Handbook - Thomas Brock 2000
