Development and Review of Plant Specific Emergency Operating Procedures - International Atomic Energy Agency 2006

Emergency operating procedures (EOPs) are essential for maintaining the fundamental safety functions and for preventing core damage during both design basis accidents and beyond design basis accidents in nuclear power plants (NPPs). This publication is applicable for all reactor technologies and comprehensively deals with all aspects of the development, implementation and review of EOPs using state-of-the-art experience. It discusses the elements and key steps that must be included in any programme for the development and implementation of plant specific emergency procedures with the primary objective being to provide guidance and to be used as a reference for teams of experts

Upon the Gardens of Epicurus - William Temple 2004

Sir William Temple, diplomat, statesman, and writer, retired to his garden in the 1680s and wrote what has become one of the key texts, not only of gardening, but also of the English aesthetic. It was he who introduced the idea of the charm of irregularity, and who gave it the allegedly Chinese name sharawadgi. The English style of landscape gardening can be traced in a direct line to this essay, which has not been in print for over 95 years.

Tacky - Rax King 2021-11-02

An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the Catapult column "Store-Bought Is Fine" Tacky is about the power of pop culture—like any art—to imprint itself on our lives and shape our experiences, no matter one's commitment to "good" taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, Sex and the City, Cheesecake Factory's gargantuan menu—into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact, providing thoughtful, even romantic meditations on desire, love, and the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in "You Wanna Be On Top," Rax writes about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much with clarity, heartfelt honesty, and Rax King's trademark humor. **Fire in Montana** - Greg Martin 2006-05

In the summer of 1949 fifteen smokejumpers parachuted into a remote Montana canyon called Mann Gulch. It started as a very small fire in rugged country but within two hours after landing, thirteen of these young men were caught in a raging inferno and were killed. They died bravely, together with their friends, and in the service of their country. Everyone was young and attractive, healthy and strong, enthusiastic and in love. They were bursting into the prime of their lives. There were no malcontents here. Everyone did their best but events overtook them. Until now the actual time line has never been connected to the people involved. Fire in Montana connects the lives of young smokejumpers who lived with a joy of life and expectations of shining futures, the forest rangers and volunteers who fought valiantly to rescue them, and their families, lovers, and friends who were forced to wait and pray, then face the devastating and heart

wrenching loss.

**Probability and Statistics with Applications: A Problem Solving Text** - Leonard Asimow, Ph.D., ASA 2015-06-30

This text is listed on the Course of Reading for SOA Exam P. Probability and Statistics with Applications is an introductory textbook designed to make the subject accessible to college freshmen and sophomores concurrent with Calc II and III, with a prerequisite of just one semester of calculus. It is organized specifically to meet the needs of students who are preparing for the Society of Actuaries qualifying Examination P and Casualty Actuarial Society's new Exam S. Sample actuarial exam problems are integrated throughout the text along with an abundance of illustrative examples and 870 exercises. The book provides the content to serve as the primary text for a standard two-semester advanced undergraduate course in mathematical probability and statistics. 2nd Edition Highlights Expansion of statistics portion to cover CAS ST and all of the statistics portion of CAS SAbundance of examples and sample exam problems for both Exams SOA P and CAS SCombines best attributes of a solid text and an actuarial exam study manual in one volumeWidely used by college freshmen and sophomores to pass SOA Exam P early in their college careersMay be used concurrently with calculus coursesNew or rewritten sections cover topics such as discrete and continuous mixture distributions, non-homogeneous Poisson processes, conjugate pairs in Bayesian estimation, statistical sufficiency, non-parametric statistics, and other topics also relevant to SOA Exam C.

**Paul Kossoff: All Right Now** - J. P. James 2017-11-02

Affectionately known as 'Koss', Paul Kossoff's playing touched people. It still does today, more than forty years after his sad and untimely death at the age of twenty-five. This authorised biography pays fitting tribute to a much-loved and widely admired musician whose influence and inspiration is still very evident. It's all here: Kossoff's musical childhood, his formative years with Black Cat Bones, forming Free at seventeen, that group's dizzying success, breakup, reforming and dissolution, the solo years, Back Street Crawler - the sessions, the tours and big concerts, the triumphs, the tragedies and the heartbreak - J.P. James takes the reader right there. Over four distinct sections, Kossoff's many guitars and the equipment he used to make them sing are fully documented; a brand-new detailed analysis of Kossoff's distinctive playing style and technique is presented for the first time; a broad overview of Kossoff's creative life draws on the voices of family, friends and fellow musicians; and finally, Kossoff's musical influences, approach to

playing and his wider musical interests, hopes and dreams are explored - all drawn from his own words. Cramming so much into his short years, Paul Kossoff left a rich musical legacy, and he is indeed All Right Now. Thoroughly researched and sensitively written, given often in Kossoff's own words and packed with anecdotes from those who were there, musicians and fans alike will enjoy this authoritative and comprehensive biography.

**The Numinous Legacy** - Adair Butchins 2002

Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider tha

**Notes from the Hyena's Belly** - Nega Mezlekia 2015-04-07

In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

**Hard Drive Bible** - Martin Bodo 1996

THE HARD DRIVE BIBLE, EIGHTH EDITION is the definitive reference book for anyone who deals with personal computer data storage devices of any kind. This comprehensive work covers installations, drive parameters, & set up information for thousands of Hard Disk, Optical, DAT Tape, & CD-ROM Drives. A concise history of data storage devices is followed by the most expansive compilation of technical data offered to the public today. Specifications, drawings, charts & photos cover jumper settings, cabling, partitioning & formatting of disk drives. SCSI commands & protocols are addressed, in addition to chapters revealing the intricacies of different interface standards & common troubleshooting procedures. THE HARD DRIVE BIBLE contains the answers to anyone's questions concerning the purchase, installation & use of modern digital data storage devices. The difficulties caused by compatibility mismatches are addressed & solutions are offered. Also featured are controller card information & performance ratings, as well as valuable tips on increasing drive performance & reliability through software. THE HARD DRIVE BIBLE is published by Corporate Systems Center, one of the leaders in the digital storage device field. A CD-ROM included with the book carries CSC's drive performance test software & formatting tools, as well as thousands of drive parameters, specifications, & technical drawings. **Things We Set on Fire** - Deborah Reed 2013

A series of tragedies brings Vivvie's young grandchildren into her custody, and her two estranged daughters back under one roof. Jackson, Vivvie's husband, was shot and killed thirty years ago, and the ramifications have splintered the family into their own isolated remembrances and recriminations. This deeply personal, hauntingly melancholy look at the damages families inflict on each other, and the healing that only they can provide.

*The Chemistry of Superheavy Elements* - Matthias Schädel 2007-05-08

This book is the first to treat the chemistry of superheavy elements, including important related nuclear aspects, as a self contained topic. It is written for those - students and novices -- who begin to work and those who are working in this fascinating and challenging field of the heaviest and superheavy elements,

for their lecturers, their advisers and for the practicing scientists in the field - chemists and physicists - as the most complete source of reference about our today's knowledge of the chemistry of transactinides and superheavy elements. However, besides a number of very detailed discussions for the experts this book shall also provide interesting and easy to read material for teachers who are interested in this subject, for those chemists and physicists who are not experts in the field and for our interested fellow scientists in adjacent fields. Special emphasis is laid on an extensive coverage of the original literature in the reference part of each of the eight chapters to facilitate further and deeper studies of specific aspects. The index for each chapter should provide help to easily find a desired topic and to use this book as a convenient source to get fast access to a desired topic. Superheavy elements - chemical elements which are much heavier than those which we know of from our daily life - are a persistent dream in human minds and the kernel of science fiction literature for about a century.

*Characterization of Remote-Handled Transuranic Waste for the Waste Isolation Pilot Plant* - National Research Council 2002-09-28

The U.S. Department of Energy (DOE) disposes of plutonium-contaminated debris from its 27 nuclear weapons facilities at the Waste Isolation Pilot Plant (WIPP), an underground repository in Carlsbad, New Mexico. After four years of operational experience, DOE has opportunities to make changes to the costly and time-consuming process of "characterizing" the waste to confirm that it is appropriate for shipment to and disposal at WIPP. The report says that in order to make such changes, DOE should conduct and publish a systematic and quantitative assessment to show that the proposed changes would not affect the protection of workers, the public, or the environment.

**eMaintenance** - Diego Galar 2017-06-15

eMaintenance: Essential Electronic Tools for Efficiency enables the reader to improve efficiency of operations, maintenance staff, infrastructure managers and system integrators, by accessing a real time computerized system from data to decision. In recent years, the exciting possibilities of eMaintenance have become increasingly recognized as a source of productivity improvement in industry. The seamless linking of systems and equipment to control centres for real time reconfiguring is improving efficiency, reliability, and sustainability in a variety of settings. The book provides an introduction to collecting and processing data from machinery, explains the methods of overcoming the challenges of data collection and processing, and presents tools for data driven condition monitoring and decision making. This is a groundbreaking handbook for those interested in the possibilities of running a plant as a smart asset. Provides an introduction to collecting and processing data from machinery Explains how to use sensor-based tools to increase efficiency of diagnosis, prognosis, and decision-making in maintenance Describes methods for overcoming the challenges of data collection and processing

**The Graysons** - Edward Eggleston 1887

Edward Eggleston (December 10, 1837 - September 3, 1902) was an American historian and novelist. Eggleston was born in Vevay, Indiana, to Joseph Cary Eggleston and Mary Jane Craig. The author George Cary Eggleston was his brother. As a child, he was too ill to regularly attend school, so his education was primarily provided by his father. He was ordained as a Methodist minister in 1856. He wrote a number of tales, some of which, especially the "Hoosier" series, attracted much attention. Among these are The Hoosier Schoolmaster, The Hoosier Schoolboy, The End of the World, The Faith Doctor, and Queer Stories for Boys and Girls. Eggleston was elected a member of the American Antiquarian Society in 1893. His boyhood home at Vevay, known as the Edward and George Cary Eggleston House, was listed on the National Register of Historic Places in 1973. His summer home, Owl's Nest, in Lake George, New York, eventually became his year-round home. Eggleston died there in 1902, at the age of 64. Owl's Nest was declared a National Historic Landmark in 1971. His daughter, the writer, Elizabeth Eggleston Seelye, was married to Elwyn Seelye, the founder of the New York State Historical Association. (wikipedia.org)

**The Substance of Style** - Virginia Postrel 2009-03-17

Whether it's sleek leather pants, a shiny new Apple computer, or a designer toaster, we make important decisions as consumers every day based on our sensory experience. Sensory appeals are everywhere, and they are intensifying, radically changing how Americans live and work. The twenty-first century has become the age of aesthetics, and whether we realize it or not, this influence has taken over the marketplace, and much more. In this penetrating, keenly observed book, Virginia Postrel makes the argument that appearance counts, that aesthetic value is real. Drawing from fields as diverse as fashion, real estate, politics, design, and economics, Postrel deftly chronicles our culture's aesthetic imperative and argues persuasively that it is a vital component of a healthy, forward-looking society. Intelligent, incisive, and thought-provoking, The Substance of Style is a groundbreaking portrait of the democratization of taste and a brilliant examination of the way we live now.

**StarBriefs Plus** - Andre Heck 2004-03-31

With about 200,000 entries, StarBriefs Plus represents the most comprehensive and accurately validated collection of abbreviations, acronyms, contractions and symbols within astronomy, related space sciences and other related fields. As such, this invaluable reference source (and its companion volume, StarGuides

Plus) should be on the reference shelf of every library, organization or individual with any interest in these areas. Besides astronomy and associated space sciences, related fields such as aeronautics, aeronomy, astronautics, atmospheric sciences, chemistry, communications, computer sciences, data processing, education, electronics, engineering, energetics, environment, geodesy, geophysics, information handling, management, mathematics, meteorology, optics, physics, remote sensing, and so on, are also covered when justified. Terms in common use and/or of general interest have also been included where appropriate.

*Hot Rock Licks* - Franz Abt 1992

**Alphaherpesviruses** - Sandra Knowles Weller 2011

Alphaherpesviruses are a fascinating group of DNA viruses that includes important human pathogens such as herpes simplex virus type 1 (HSV-1), HSV-2, and varicella-zoster virus (VZV): the causative agents of cold sores, genital ulcerous disease, and chickenpox/shingles, respectively. A key attribute of these viruses is their ability to establish lifelong latent infection in the peripheral nervous system of the host. Such persistence requires subversion of the host's immune system and intrinsic antiviral defense mechanisms. Understanding the mechanisms of the immune evasion and what triggers viral reactivation is a major challenge for today's researchers. This has prompted enormous research efforts into understanding the molecular and cellular biology of these viruses. This up-to-date and comprehensive volume aims to distill the most important research in this area providing a timely overview of the field. Topics covered include: transcriptional regulation, DNA replication, translational control, virus entry and capsid assembly, the role of microRNAs in infection and oncolytic vectors for cancer therapy. In addition there is coverage of virus-host interactions, including apoptosis, subversion of host protein quality control and DNA damage response pathways, autophagy, establishment and reactivation from latency, interferon responses, immunity and vaccine development. Essential reading for everyone working with alphaherpesviruses and of interest to all virologists working on latent infections.

*Helping People Overcome Suicidal Thoughts, Urges and Behaviour* - Lorraine Bell 2021-03-31

Helping People Overcome Suicidal Thoughts, Urges and Behaviour draws together practical and effective approaches to help individuals at risk of suicide. The book provides a framework and outlines skills for anyone working with adults who present with suicidal thoughts or intent. Part 1 introduces a basic understanding of our knowledge about suicide and UK policy; Part 2 outlines the research into the treatment of suicidality and the general principles for working in the safest possible way.
