Obstacles to Ethical Decision-Making - Patricia H. Werhane 2013-02-14

In commerce, many moral failures are due to narrow mindsets that preclude taking into account the moral dimensions of a decision or action. In turn, sometimes these mindsets are caused by failing to question managerial decisions from a moral point of view, because of a perceived authority of management. In the 1960s, Stanley Milgram conducted controversial experiments to investigate just how far obedience to an authority figure could subvert his subjects' moral beliefs. In this thought-provoking work, the authors examine the prevalence of narrow mental models and the phenomenon of obedience to an authority to analyse and understand the challenges which business professionals encounter in making ethical decisions. *Obstacles to Ethical Decision-Making* proposes processes - including collaborative input and critique - by which individuals may reduce or overcome these challenges. It provides decision-makers at all levels in an organisation with the means to place ethical considerations at the heart of managerial decision-making.

Faith and Work - Timothy Ewest 2018-01-01

Those who adhere to a faith tradition are longing for theories and insights into how they can be true to their faith within the workplace and yet be sensitive and respectful to others of varying faith commitments and beliefs. Yet for Christians, respect of other faith traditions is especially difficult since Christianity as the dominant religion has become secularized and institutionalized within the workplace as represented in holidays and days off. Within the multiple theoretical and research dimensions of management, religion and spirituality, this book explores theoretical, conceptual and strategic theories and research which consider how individuals and organizations integrate their Christian faith in the workplace, and how these groups attempt to change society as a whole. This historical movement is characterized by a desire for people to live a holistic life which integrates their Christian faith into the workplace, also deemed "faith at work". Historically, Christian's faith integration is manifested individually or collectively and is demonstrated in the ways it shapes and informs the values systems, ethics, character and attitudes towards work. This edited volume draws themes out of the three historical epochs of the faith and work movement traced by Miller (2007) in the book, God at work: The history and promise of the faith at work movement. These organizing themes, while not congruent to the historical epochs, do capture the ways in which people of faith have historically attempted to integrate their faith into the workplace. These themes include: Individual integration, organizational strategies for integration and societal integration.

Business ethics, corporate social responsibility, corporate citizenship, values-driven management, corporate governance, and ethical leadership are necessary horizons for the legitimacy of corporations in the process of globalization. Based on hermeneutics and institutional analysis, this book discusses the place of values in corporations and the role of ethics in management. With the theories of business ethics as a starting point, it is possible to propose a vision of the good citizen corporation. The book presents theories, concepts of responsibility for stakeholder justice, and basic ethical principles of respect for autonomy, dignity, integrity, and vulnerability. This is the foundation for an analysis of the ethical relations to internal and external constituencies of the firm, i.e. shareholders, owners, investors, management, employees, consumers, and local community. The interaction with the environment is further analyzed with a focus on ethical principles as the basis for sustainability. This investigation culminates with the conceptualization of the firm as a collective and institutional moral agent. The content also includes analysis of concrete political developments in the US, Europe, and the United Nations.
