Global Mobile Satellite  
Communications - Stojce Dimov Ilcev  
2005-12-05  
Global mobile satellite  
communications (GMSC) are specific  
satellite communication systems for  
maritime, land and aeronautical  
applications. It enables connections  
between moving objects such as ships,  
vehicles and aircrafts, and  
telecommunications subscribers  
through the medium of communications  
satellites, ground earth stations,  
PTT or other landline  
telecommunications providers. Mobile  
satellite communications and  
technology have been in use for over  
two decades. Its initial application  
is aimed at the maritime market for  
commercial and distress applications.  
In recent years, new developments and  
initiatives have resulted in land and  
aeronautical applications and the  
introduction of new satellite  
constellations in non-geostationary  
orbits such as Little and Big LEO  
configurations and hybrid satellite  
constellations as Ellipso Borealis  
and Concordia system. This book is  
important for modern shipping, truck,  
train and aeronautical societies  
because GMSC in the present  
millennium provides more effective  
business and trade, with emphasis on  
safety and commercial communications.  
Global Mobile Satellite  
Communications is written to make  
bridges between potential readers and  
current GMSC trends, mobile system  
concepts and network architecture  
using a simple mode of style with  
understandable technical information,  
characteristics, graphicons,  
illustrations and mathematics  
equations. Global Mobile Satellite  
Communications represents  
telecommunications technique and  
technology, which can be useful for

all technical staff on vessels at sea and rivers, on all types of land vehicles, on planes, on off shore constructions and for everyone possessing satellite communications handset phones.

**Creativity & Innovation** - Ashwini Kumar Singh 2021-03-17

“Creativity and innovation are to events, what the heart and soul are to the living.” The book aims at encouraging readers to capture the traits and develop skills for enhancing their creative and innovative capabilities, cultivating the culture of creativity and

innovation. Creativity is inventiveness with new ideas; critical thinking is generating and selecting ideas; and innovation turns creativity into products, processes and services. Creativity + Critical thinking + Innovation = Path of Desired Change The primary difference between creativity and innovation is that the former refers to conceiving a new idea while the latter involves converting that idea into a marketable commodity. Creativity and innovation are an attempt to gain a competitive advantage. Organizations are now focusing on enhancing their employees' creativity and not merely developing their technical competencies and skills. Undoubtedly, creativity is the most important human resource of all without which there would be no progress, and we would be forever repeating the same patterns. Innovation is at the heart of all successful companies.

**Natural Selection and Genetic Drift** -

Joshua Richardson 2016

Natural selection is the process which, being the most important factor of evolution, promotes rising of adaptability and prevents destructive consequences of all other processes. The concept of natural selection is a discordant problem of evolutionary human genetics. Despite popularity of a hypothesis of "neutral evolution", the majority of scientists consider that selection has played main role in evolution of species and has generated all biological diversity of human populations. This book presents research on natural selection and genetic drift. The author of the first chapter provides an all-embracing macroevolutionary perspective on the processes of the evolution of life and culture on earth. The author investigates a complementary form of natural selection that diverges from the traditional form in that it is acting independently of the external environment. The next chapter discusses natural selection and diabetes mellitus. The last chapter examines how the genetic drift among native people from South American the Gran Chaco region affects interleukin 1 receptor antagonist variation.

*The Change Laboratory* - Jaakko

Virkkunen 2013-12-31

A new challenge of learning in work organizations--both in business and public administration--is to master entire life cycles of product, production and business concepts. Meeting this challenge calls--at all levels of the organization--for learning that expand the learners' horizon and practical mastery from individual tasks up to the level of the whole system of the collective

activity and its transformation. The Change Laboratory is a method for formative intervention in work communities that supports this kind of organizational learning. It is a path breaker in the area of work place learning due to its strong theoretical and research basis and the way that it integrates the change of organizational practices and individuals' learning. It provides a way to develop practitioners' transformative agency and capacity for creating and implementing new conceptual and practical tools for mastering their joint activity. This first comprehensive presentation of the already widely used method is written for researchers, consultants, agricultural extension and HRD professionals, as well as practitioners involved in developing activities in their professional field. It explains this novel method as well as its theoretical basis on the Cultural Historical Activity Theory providing also practical examples and tools for carrying out a Change Laboratory intervention. A review is also provided of studies concerning various aspects of expansive learning processes in Change Laboratory interventions.
