School Library Media Centers in the 21st Century - Kathleen W. Craver 1994

School library media centers are at a critical juncture. Over the next decade, schools will undergo fundamental technological, economic, societal, instructional, and administrative changes. Craver discusses the major forces for change confronting school libraries, analyzes their implications as a guide for future decision making, and recommends that school library media specialists assume a leadership role in meeting these challenges. The work provides current data and statistics on future trends in

technology, employment, education, society, instruction, and school administration that can help the school library media specialist to formulate forceful arguments for the acquisition of new technologies, instructional reform, and full implementation of resource-based learning. School library media specialists who need to plan and make decisions about the future of their school libraries will find this book an invaluable resource. To visualize the future, Craver creates contrasting scenarios of utopian and dystopian school library media centers in the 21st century. Chapter 1, Technological Trends, discusses the digitalization of all media and the implications of the technological revolution on the school library media center. Chapter 2, Economic Trends, considers the impact of demographic changes and declining budgets and how to deal with them.

Chapter 3, Employment Trends, outlines future trends in the workforce and suggests ways in which the school library can respond. Chapter 4, Educational Trends, charts the decline in literacy and the growing school reform movement. Chapter 5, Social and Behavioral Trends, discusses the change from a nation with minorities to a nation of minorities and the transformation of the American family. Chapter 6, Instructional Trends, shows how the instructional role of the school library media specialist will change with the presence of advanced technologies. Chapter 7, Organizational and Managerial Trends, describes the role the school library media specialist will have to assume as the technological, economic, educational, and cultural changes affect the daily business of the media center. Chapter 8, Challenges, focuses on a series of challenges in technology, performance-based programs,

collection development, instruction, and organization and management of the library media center.

Supplement 19: Accreditation and the Academic Library to The Use of an Animated Tutor in Teaching Chinese

**Meaning and Method in Information Studies** - Ian V. Cornelius 1996

. . . frustrated philosophers everywhere- especially epistemologists- will enjoy this work. It is written by someone who appreciates the occasional nuances afforded by languages other than English. Moreover, it has a handy list of references, a serviceable back-of-the-book index, and an author index that is a veritable Who's Who of people who, like the author, have committed monography in their quest for a better understanding of our field. - Library and Information Science Research The focus of this volume is on the creation of meaning in the practice of library and information studies, and the need for an overall view and methodology of what the field is, how it develops, and how we identify our place within it when it is changing so rapidly. Succeeding versions of what the field is and what its practitioners

do have left us unsure of where legitimacy lies- and how our own future can be reconciled to prevailing trends and impending changes. At the same time, there has been a movement to get away from positivist, or scientific, models of research practice. This book argues that those models should be rejected because they take no account of how human science's work or how people in service professions construct theory.

Strategic Marketing in Library and Information Science - Irene Owens 2002  
Combine marketing and strategic planning techniques to make your library more successful! With cutting-edge research studies as well as theoretical chapters that have not been seen before in the marketing literature for LIS, this book examines the current and quite limited state of marketing by LIS practitioners and institutions. It provides you with examples of how

marketing can be made more widely applicable within LIS and illustrates some of the usefulness of marketing in special LIS settings and contexts. The book explains how and why managers should combine marketing strategy with strategic planning and demonstrates the means by which LIS could move toward a more full-fledged use of marketing relationship marketing and social marketing in particular. In order to be a more effective tool, *Strategic Marketing in Library and Information Science* is divided into two sections: *The Basis and Context for Marketing* (theoretical information) and *The Application of Marketing* (practical applications that you can put to use in your institution). Chapters cover: existing literature on marketing in LIS what it has to offer and what it lacks strategic planning that must take place before marketing money is spent the branding process and

how it can be helpful in LIS marketing a marketing method for bridging the gap between staffing needs and the current shortage of librarians a way to use relationship marketing techniques to respond to the challenge of marketing electronic resources marketing applications relevant to theological libraries the effective use of social marketing at the Austin History Center a fascinating case study! a fresh marketing approach to bridging gaps between cultural history and education the importance of marketing for public libraries

## **Library and Information Science**

**Annual** - Bohdan S. Wynar 1998-09-15

Answering the call for a standard of bibliographic control & a critical analysis of the literature of library & information science, the return of this annual will be hailed as a boon to the profession. The work features more than 400 in-depth, evaluative reviews of English-language library science monographs, reference books, & selected library & information science periodicals published in the United States, Canada, & Great Britain. In addition, a large section devoted to doctoral dissertations in Library & Information Studies (1988-1996) was compiled by Ken Haycock & Ann Curry, making this the most comprehensive guide for library science educators, students, researchers, & practitioners.

**Ethics and Librarianship** - Robert Hauptman 2010-06-28

Over the last few decades, there has been a

dramatic increase in the number of papers and journal articles dealing with various ethical issues in librarianship, but only a few books. Information workers find themselves rendering new services and providing new kinds of information without much recourse to universally accepted ethical standards. This work is an up-to-date and comprehensive overview of the subject. It promotes the view that as information managers, librarians must join with other professionals to renew a commitment to and interest in ethics. The book deals with such topics as ethics in general, the control of ideas, building collections, acquisitions and cataloging, access services, the reference function, special libraries, research and publication, and intellectual property and copyright. A chapter discusses why ethics matters. Encyclopedia of Library and Information Science - Allen Kent 1989
