Psychology at Work in Asia - Anila Kamal 2013-02-21

This book provides important information about the development of psychology as a discipline in Asia. Several research papers related to organizational psychology and the influence of psychology on quality of life in countries throughout Asia are included. The papers which appear herein were originally presented at the 3rd Convention of the Asian Psychological Association in Darwin, Australia during July, 2010; the 4th Convention of the Asian Psychological Association in Jakarta, Indonesia during July, 2012; and the International Conference on Industrial and Organizational Psychology at the National Institute of Psychology in Islamabad, Pakistan during April, 2012. The information presented here provides a valuable window into how psychology is taught and practiced throughout Asia, especially in the work place. Indigenous trends in research, theory and application are provided by authors who are native to, live and teach in the countries represented in the studies reported here. It is a must-read, not only for those in academic psychology and higher education, but also for those in business who are affected by changes in globalization of business practices. Psychologists, counselors, educators, and those with research interests in social sciences and cross-cultural research will find a wealth of current information.

Literary Detective Work on the Computer - Michael P. Oakes 2014-05-15

Computational linguistics can be used to uncover mysteries in text which are not always obvious to visual inspection. For example, the computer analysis of writing style can show who might be the true author of a text in cases of disputed authorship or suspected plagiarism. The theoretical background to authorship attribution is presented in a step by step manner, and comprehensive reviews of the field are given in two specialist areas, the writings of William Shakespeare and his contemporaries, and the various writing styles seen in religious texts. The final chapter looks at the progress computers have made in the decipherment of lost languages. This book is written for students and researchers of general linguistics, computational and corpus linguistics, and computer forensics. It will inspire future researchers to study these topics for themselves, and gives sufficient details of the methods and resources to get them started.

Literacy Development in Early Childhood - Beverly Otto 2019-02-14

Widely recognized as a leading text in its field, this popular guide explores literacy development beginning in infancy and through fourth grade. The latest edition continues to prepare teachers to create and implement literacy-rich curricula in early childhood classrooms, while providing updates to federal legislation and highlighting the impact of state standards on educational settings. Recent technology is integrated into activities used to enhance literacy competencies. Throughout the book, the author's approach to reflective teaching empowers teachers to become effective decision makers and thoughtful mediators in children's transactions with

literacy. A conceptual and theoretical foundation for describing reading and writing processes is followed by research-based descriptions of the signs of emergent literacy and developmentally appropriate instructional strategies. The emphasis on linguistic and cultural diversity includes an array of approaches for supporting English language learners. Chapter extension activities challenge readers to apply concepts through observation, research, curriculum development, and discussion. Sample observation and assessment forms assist in determining children's progress in developing literacy.

Advances in Cognitive Research, Artificial Intelligence and Neuroinformatics - Boris M. Velichkovsky 2021-05-19

This book reports on theoretical and experimental research answering key questions in neuroscience, philosophy of mind, and cognitive research. It gives a special emphasis on findings achieved within the territory of the former U.S.S.R, which has remained largely unknown to an international readership. The volume gathers authoritative studies on cognitive development, consciousness, attention and perception. It covers research on eye movements, language, speech and semantics, emotion, as well as brain functional states, and a variety of decision-making processes. It also highlights important advances in cognitive robotics and artificial intelligence, discussing brain-computer interfaces and other practically-relevant technologies. It includes studies on human subjects, in both healthy and disease conditions, and investigations on the molecular mechanisms of cognition in animal models. Chapters are based on invited lectures and peer-reviewed contributions to the 9th International Conference on Cognitive Sciences, Intercognsci-2020, held on October 10-16, 2020, in Moscow. The conference was organized by the Interregional Association of Cognitive Studies, with the participation of the Pavlov Society for Neurophysiology and Higher Nervous Activity, and supported by the Russian Academy of Sciences, the Russian Foundation for Basic Research and a number of the north eastern European research institutions. All in all, this book provides cognitive scientists around the world with a timely snapshot of interdisciplinary research and cutting-edge models, and a major source of inspiration for future collaborations in the areas of artificial intelligence and cognitive neuroscience.

Bilingual Special Education for the 21st Century: A New Interface - Col'n, Gliset 2022-05-13

Bilingual students with disabilities have an established right to be educated in their most proficient language. However, in practice, many culturally and linguistically diverse students still do not receive the quality of education that they are promised and deserve. Multilingual learners with disabilities must be acknowledged for the assets they bring and engaged in classroom learning that is rigorous and relevant. Bilingual Special Education

for the 21st Century: A New Interface addresses the complex intersection of bilingual education and special education with the overlay of culturally and linguistically sustaining practices. This work provides practical solutions to current dilemmas and challenges today's educators of multilingual learners with disabilities face in the classroom. Covering topics such as dual language education, identification practices, and transition planning, this book is an essential resource for special education experts, faculty and administration of both K-12 and higher education, pre-service teachers, researchers, and academicians.

Parallel Learning of Reading and Writing in Early Childhood - Mary Shea 2011-04-28

Parallel Learning of Reading and Writing in Early Childhood explores why it's important to provide a balanced language learning environment for young children and offers approaches for children to practice and explore language. Writing – a different but parallel process – can open the door to reading, and an effective writing approach in the home and early childhood classrooms leads to the development of phonemic awareness, understanding of phonetic principles, vocabulary, fluency, and comprehension. Effective early childhood teachers are those that extend the knowledge children have amassed at home and use the knowledge of how children learn naturally in the world to inform their practice. This book offers the purpose, context, and outcomes of including writing right from the start in young children's literacy learning. Through analysis of writing samples, research, and principles of best practices, Shea outlines the essential ingredients for early language learning and provides a developmentally appropriate approach to language learning. Throughout the chapters, Shea integrates discussion of assessment, classroom environment, instructional/teacher scaffolding, and differentiating instruction across developmental levels along with the supporting theory. Special features: vignettes and descriptions of Pre-K, K, and Grade 1 classrooms that incorporate writing across the day artifacts of children's writing that demonstrate an evolution of knowledge related to both message and word construction concept labeling words and topic specific terms defined throughout the book to support the reader's understanding of professional terminology discussion of seminal and current research as well as best practices Companion Website with lesson ideas and abundant writing samples from a wide range of demographic, cultural, and language contexts for readers to view, analyze, and discuss. This text offers pre- and in-service early childhood education teachers the content and resources to develop a deeper understanding of language learning, to prompt an examination of current practice, and to stimulate curricular re-designs that foster meaningful, joyful, and motivated learning.

Handbook of Early Literacy Research - Susan B. Neuman 2011-10-10

The field of early literacy has seen significant recent advances in theory, research, and practice. These volumes bring together leading authorities to report on current findings, integrate insights from different disciplinary perspectives, and explore ways to provide children with the strongest possible literacy foundations in the first 6 years of life. The Handbook first addresses broad questions about the nature of emergent literacy, summarizing current knowledge on cognitive pathways, biological underpinnings, and the importance of cultural contexts. Chapters in subsequent sections examine various strands of knowledge and skills that emerge as children become literate, as well as the role played by experiences with peers and families. Particular attention is devoted to the challenges involved in making schools work for all children, including members of linguistic and ethnic minority groups and children living in poverty. Finally, approaches to instruction, assessment, and early intervention are described, and up-to-date research on their effectiveness is presented.
