

Essays Grade 12 Business Studies June 2014

If you are craving such a referred **Essays Grade 12 Business Studies June 2014** books that will meet the expense of you worth, get the completely best seller from us currently from several preferred authors. If you desire to droll books, lots of novels, tale, jokes, and more fictions collections are in addition to launched, from best seller to one of the most current released.

You may not be perplexed to enjoy every books collections Essays Grade 12 Business Studies June 2014 that we will utterly offer. It is not with reference to the costs. Its very nearly what you compulsion currently. This Essays Grade 12 Business Studies June 2014 , as one of the most in force sellers here will entirely be in the midst of the best options to review.

Weird - Olga Khazan 2020-04-07

Learn why the concept of "weird" is being reclaimed and turned into a badge of honor, used to show how being different—culturally, socially, physically, or mentally—can be a person's greatest strength. Most of us have at some point in our lives felt like an outsider,

sometimes considering ourselves "too weird" to fit in. Growing up as a Russian immigrant in West Texas, Olga Khazan always felt there was something different about her. This feeling has permeated her life, and as she embarked on a science writing career, she realized there were psychological connections between this feeling

of being an outsider and both her struggles and successes later in life. She decided to reach out to other people who were unique in their environments to see if they had experienced similar feelings of alienation, and if so, to learn how they overcame them. *Weird* is based on in-person interviews with many of these individuals, such as a woman who is professionally surrounded by men, a liberal in a conservative area, and a Muslim in a predominantly Christian town. In addition, it provides actionable insights based on interviews with dozens of experts and a review of hundreds of scientific studies. *Weird* explores why it is that we crave conformity, how that affects people who are different, and what they can do about it. First, the book dives into the history of social norms and why some people hew to them more strictly than others. Next, Khazan explores the causes behind-and the consequences of-social rejection. She then reveals the hidden upsides to being "weird," as well as the

strategies that people who are different might use in order to achieve success in a society that values normalcy. Finally, the book follows the trajectories of unique individuals who either decided to be among others just like them; to stay weird; or to dwell somewhere in between. Combining Khazan's own story with those of others and with fascinating takeaways from cutting-edge psychology research, *Weird* reveals how successful individuals learned to embrace their weirdness, using it to their advantage. Gender and Diplomacy - Jennifer A. Cassidy
2017-07-06

This volume provides a detailed discussion of the role of women in diplomacy and a global narrative of their current and historical role within it. The last century has seen the Ministries of Foreign Affairs (MFAs) experience seismic shifts in their policies concerning the entry, role and agency of women within their

institutional make-up. Despite these changes, and the promise that true gender equality offers to the diplomatic craft, the role of women in the diplomatic sphere continues to remain overlooked, and placed on the fringes of diplomatic scholarship. This volume brings together established scholars and experienced diplomatic practitioners in an attempt to unveil the story of women in diplomacy, in a context which is historical, theoretical and empirical. In line with feminist critical thought, the objective of this volume is to theorize and empirically demonstrate the understanding of diplomacy as a gendered practice and study. The aims of are three-fold: 1) expose and confront the gender of diplomacy; 2) shed light on the historical involvement of women in diplomatic practice in spite of systemic barriers and restrictions, with a focus on critical junctures of diplomatic institutional formation and the diplomatic entitlements which were created for women at these junctures; 3) examine the current state of

women in diplomacy and evaluate the rate of progress towards a gender-even playing field on the basis thereof. This book will be of much interest to students of diplomacy studies, gender studies, foreign policy and international relations.

Collective Genius - Linda A. Hill 2014-05-13

Why can some organizations innovate time and again, while most cannot? You might think the key to innovation is attracting exceptional creative talent. Or making the right investments. Or breaking down organizational silos. All of these things may help—but there's only one way to ensure sustained innovation: you need to lead it—and with a special kind of leadership.

Collective Genius shows you how. Preeminent leadership scholar Linda Hill, along with former Pixar tech wizard Greg Brandeau, MIT researcher Emily Truelove, and *Being the Boss* coauthor Kent Lineback, found among leaders a widely shared, and mistaken, assumption: that a “good” leader in all other respects would also be

an effective leader of innovation. The truth is, leading innovation takes a distinctive kind of leadership, one that unleashes and harnesses the “collective genius” of the people in the organization. Using vivid stories of individual leaders at companies like Volkswagen, Google, eBay, and Pfizer, as well as nonprofits and international government agencies, the authors show how successful leaders of innovation don’t create a vision and try to make innovation happen themselves. Rather, they create and sustain a culture where innovation is allowed to happen again and again—an environment where people are both willing and able to do the hard work that innovative problem solving requires. *Collective Genius* will not only inspire you; it will give you the concrete, practical guidance you need to build innovation into the fabric of your business.

The Precarious Generation - Judith Bessant

2017-05-08

This book draws on a wealth of evidence

including young people’s own stories, to document how they are now faring in increasingly unequal societies like America, Britain, Australia, France and Spain. It points to systematic generational inequality as those born since 1980 become the first generation to have a lower standard of living than previous generations. While governments and experts typically explain this by referring to globalization, new technologies, or young people’s deficits, the authors of this book offer a new political economy of generations, which identifies the central role played by governments promoting neoliberal policies that exacerbate existing social inequalities based on age, ethnicity, gender and class. The book is a must read for social science students, human service workers and policy-makers and indeed for anyone interested in understanding the impact of government policy over the last 40 years on young people.

Understanding Sport Organizations - Trevor

Slack 2020-03-09

The classic groundbreaking text for understanding organizational theory in the sport industry is back in an extensively revised new edition. With an added emphasis on organizational behavior and practical applications of the theory, *Understanding Sport Organizations: Applications for Sport Managers, Third Edition*, provides a logical progression to understanding the many components of and processes in sport organizations. Readers will gain a strong theoretical foundation while learning how it applies within the context of the ever-changing field of sport management. In this third edition, new chapters incorporate critical concepts that sport managers in the current era must be familiar with: Different policy types and the responses of sport organizations to policy Perspectives of marketing of sport and marketing through sport Control in sport organizations Sex and gender in sport organizations Volunteer management in sport

Dimensions and assessment of governance in sport organizations Mental health difficulties and management strategies within sport environments Applying statistical analysis to support analytic decision making in sport Corporate social responsibility Procurement and sport organizations To facilitate comprehension and application, each chapter opens with a list of key concepts and a real-world, contemporary scenario to demonstrate the relevance of theory and behavior in the sport industry. Time Out sidebars offer accounts from actual sport organization situations or from research findings to further illustrate issues being discussed. Chapter summaries and review questions are provided to stimulate discussion about the central issues from each chapter. Key Issues for Sport Managers boxes highlight how chapter content is applied at the level of sport manager, and closing Case for Analysis examples allow readers to directly apply information from each chapter. Real-world examples throughout the

text provide opportunities for additional exploration and application of relevant concepts. Every chapter references key articles that build on the foundational framework presented and includes suggestions for further reading within general management and sport management literature. This thorough presentation of subject matter will guide readers to a greater and more practical understanding of core issues.

Synthesizing modern conceptual and empirical research from many fields of management into a practical, engaging look at the sport management field, *Understanding Sport Organizations: Applications for Sport Managers*, Third Edition, is an invaluable resource for students and current practitioners alike.

Learning Languages in Early Modern England - John Gallagher 2019-08-29

In 1578, the Anglo-Italian author, translator, and teacher John Florio wrote that English was 'a language that wyl do you good in England, but passe Dover, it is woorth nothing'. *Learning*

Languages in Early Modern England is the first major study of how English-speakers learnt a variety of continental vernacular languages in the period between 1480 and 1720. English was practically unknown outside of England, which meant that the English who wanted to travel and trade with the wider world in this period had to become language-learners. Using a wide range of printed and manuscript sources, from multilingual conversation manuals to travellers' diaries and letters where languages mix and mingle, *Learning Languages* explores how early modern English-speakers learned and used foreign languages, and asks what it meant to be competent in another language in the past. Beginning with language lessons in early modern England, it offers a new perspective on England's 'educational revolution'. John Gallagher looks for the first time at the whole corpus of conversation manuals written for English language-learners, and uses these texts to pose groundbreaking arguments about

reading, orality, and language in the period. He also reconstructs the practices of language-learning and multilingual communication which underlay early modern travel. Learning Languages offers a new and innovative study of a set of practices and experiences which were crucial to England's encounter with the wider world, and to the fashioning of English linguistic and cultural identities at home. Interdisciplinary in its approaches and broad in its chronological and thematic scope, this volume places language-learning and multilingualism at the heart of early modern British and European history.

Professional Journal of the United States Army - 2014

Thomas Keneally's Career and the Literary Machine - Paul Sharrad 2019-08-30

Booker Prize winner and Living National Treasure, Thomas Keneally still divides critical opinion: he is both a morally challenging stylist

and a commercial hack, a wise commentator on society and a garrulous leprechaun. Such judgements are located in the cultural politics of Australia but also linked to ideas about what a literary career should look like. 'Thomas Keneally's Career and the Literary Machine' charts Keneally's production and reception across his three major markets, noting clashes between national interests and international reach, continuity of themes and variety of topics, settings and genres, the writer's interests and the publishers' push to create a brand, celebrity fame and literary reputation, and the tussle around fiction, history, allegory and the middlebrow. Keneally is seen as playing a long game across several events rather than honing one specialist skill, a strategy that has sustained for more than 50 years his ambition to earn a living from writing.

The Global Beauty Industry - Meeta Jha 2015-09-16

The Global Beauty Industry is an

interdisciplinary text that uses beauty to explore topics of gender, race, class, colorism, nation, bodies, multiculturalism, transnationalism, and intersectionality. Integrating materials from a wide range of cultural and geo-political contexts, it coalesces with initiatives to produce more internationally relevant curricula in fields such as sociology, as well as cultural, women's/gender, media, and globalization studies.

A Question of Worth - Chris Steed 2016-09-14

We live in a world that has become a resource, a world conditioned by the progressive domination of a monetary scale applied across the board. Our value and worth are contingent upon what we earn, on what we own. Amidst the increasing financialisation that characterises much of the globe, the prevailing ethos is that the only values we can usefully measure are those that can be quantified and expressed in terms of economics. Yet economic value and the value of the human are closely connected: erode the economic and

you erode the personal. In the global economic crash of recent years it has been people who have been under assault not just financial value. The vulnerability of a society shaped solely by economic and monetised transactions is exposed when the economy and the monetisation of everything fails. When the economic machine seizes up, it is people who are devalued and dumped. Drawing upon his experience in government, education and the Church, the author asks: Must we be a market society as well as a market economy? Can we devise a non-economic account of describing human value and worth? Christopher Steed argues that the really important issues that frame the contemporary human situation are those that cannot be measured. Quality is also vital to human flourishing: what, after all, is wealth for? In this timely and important work, the author calls for a wider concept of value - one that encompasses both economic value and human value - and for a society that cultivates the

importance of the human.

Buddhism under Capitalism - Richard K. Payne
2022-10-06

This book argues that Buddhism has spread due to globalized capitalism, and explores how capitalism is also impacting Buddhists and Buddhism today. Edited by two leading scholars in Buddhist studies, the book examines how capitalism and neo-liberalism have shaped global perceptions of Buddhism, as well as specific local practices and attitudes. It examines the institutional practices that sustained the spread of Buddhism for two and a half millennia, and the adaptation of Buddhist institutions in contemporary, global economic systems—particularly in Europe and the United States over the last century and half. These innovative essays on the interfaces between Buddhism and capitalism will prompt readers to rethink the connection between Buddhism and secular society. Case studies include digital capitalism, tourism, and monasticism, and are drawn from

the USA, Tibet, China, Japan, and Thailand.

Work, Labour and Cleaning - Singha, Lotika
2019-07-24

The outsourcing of domestic work in the UK has been steadily rising since the 1970s, but there has been little research into White British women who work as independent providers of cleaning services. *Work, Labour and Cleaning* is a cross-cultural analysis based on new research into two particular social contexts, one in the UK and one in India. It argues that outsourced domestic cleaning can be undertaken either as work (using mental and manual skills) or as labour (usually defined as unskilled, 'natural' women's work) depending on the social context and working conditions in which it occurs. The book challenges feminist dogma and popular myths about housework.

Studying Digital Media Audiences - Craig Hight
2017-01-27

Although many digital platforms continue to appropriate and reconfigure familiar forms of

media experience, this is an environment which no longer consistently constructs an identifiable 'mass' audience in the terms understood by twentieth century audience researchers. The notion of 'audiencing' takes on different characteristics within a digital environment where platforms encourage users to upload, share and respond to content, while the platforms themselves monetise the digital traces of this activity. This environment demands new ways of thinking about audience and user engagement with media technologies, and raises significant questions on methods of conceiving and researching audience-users. This volume addresses ongoing debates in the field of audience research by exploring relevant conceptual and methodological issues concerning the systematic study of digital audiences. Drawing from work conducted by researchers based in Australia and New Zealand, the book uses theoretical frameworks and case study material which are of direct

relevance to audience researchers globally. *Our Social World* - Jeanne H. Ballantine
2018-11-29
Our Social World: Introduction to Sociology inspires students to develop their sociological imaginations, to see the world and personal events from a new perspective, and to confront sociological issues on a day-to-day basis. Organized around the "Social World" model, a conceptual framework that demonstrates the relationships among individuals (the micro level); organizations, institutions, and subcultures (the meso level); and societies and global structures (the macro level), Jeanne H. Ballantine, Keith A. Roberts, and Kathleen Odell Korgen use this framework to help students develop the practice of using three levels of analysis, and to view sociology as an integrated whole, rather than a set of discrete subjects. The Seventh Edition includes new coverage of climate change, the influence of robots and artificial intelligence on workers, race relations

in the Trump era, issues related to transgender identity and gender fluidity, sexual harassment in the workplace and the #MeToo movement, declining marriage rates, the impact of tracking for students at all academic achievement levels, smoking as an example of health and inequality in the US, gun violence and the student movement to control access to guns, social media, and Russian interference in the 2016 election.

Contracts, Patronage and Mediation -

Tuulikki Pietilä 2015-10-21

This book studies the long-term developments in the South African recording industry and adds to the existing literature an understanding of the prevalence of informal negotiations over rights, rewards and power in the recording industry. It argues that patronage features often infiltrate the contractual relationships in the industry.

Constructing Modern Asian Citizenship -

Edward Vickers 2014-12-05

In many non-Western contexts, modernization

has tended to be equated with Westernization, and hence with an abandonment of authentic indigenous identities and values. This is evident in the recent history of many Asian societies, where efforts to modernize – spurred on by the spectre of foreign domination – have often been accompanied by determined attempts to stamp national variants of modernity with the brand of local authenticity: ‘Asian values’, ‘Chinese characteristics’, a Japanese cultural ‘essence’ and so forth. Highlighting (or exaggerating) associations between the more unsettling consequences of modernization and alien influence has thus formed part of a strategy whereby elites in many Asian societies have sought to construct new forms of legitimacy for old patterns of dominance over the masses. The apparatus of modern systems of mass education, often inherited from colonial rulers, has been just one instrument in such campaigns of state legitimation. This book presents analyses of a range of contemporary projects of citizenship

formation across Asia in order to identify those issues and concerns most central to Asian debates over the construction of modern identities. Its main focus is on schooling, but also examines other vehicles for citizenship-formation, such as museums and the internet; the role of religion (in particular Islam) in debates over citizenship and identity in certain Asian societies; and the relationship between state-centred identity discourses and the experience of increasingly 'globalized' elites. With chapters from an international team of contributors, this interdisciplinary volume will appeal to students and scholars of Asian culture and society, Asian education, comparative education and citizenship.

SOC - Nijole V. Benokraitis 2015-02-27

content referenced within the product description or the product text may not be available in the ebook version.

Essays on the Great Depression - Ben Bernanke 2000

These essays explore the Great Depression from the point of view of a scholar whose specialty is macroeconomics. His key assertion is that the Depression is informative about the current economy because it was enormous and it affected most of the world's countries.

The I in Team - Erin C. Tarver 2017-06-26

There is one sound that will always be loudest in sports. It isn't the squeak of sneakers or the crunch of helmets; it isn't the grunts or even the stadium music. It's the deafening roar of sports fans. For those few among us on the outside, sports fandom—with its war paint and pennants, its pricey cable TV packages and esoteric stats reeled off like code—looks highly irrational, entertainment gone overboard. But as Erin C. Tarver demonstrates in this book, sports fandom

has become extraordinarily important to our psyche, a matter of the very essence of who we are. Why in the world, Tarver asks, would anyone care about how well a total stranger can throw a ball, or hit one with a bat, or toss one through a hoop? Because such activities and the massive public events that surround them form some of the most meaningful ritual identity practices we have today. They are a primary way we—as individuals and a collective—decide both who we are who we are not. And as such, they are also one of the key ways that various social structures—such as race and gender hierarchies—are sustained, lending a dark side to the joys of being a sports fan. Drawing on everything from philosophy to sociology to sports history, she offers a profound exploration of the significance of sports in contemporary life, showing us just how high the stakes of the game are.

Ode to Gen X - Melissa Vosen Callens
2021-03-15

Even for the casual viewer, the Netflix series *Stranger Things* will likely feel familiar, reminiscent of popular 1980s coming-of-age movies such as *The Goonies*, *E.T. the Extra-Terrestrial*, and *Stand by Me*. Throughout the series, nods to each movie are abundant. While *Stranger Things* and these classic 1980s films are all tales of childhood friendship and shared adventures, they are also narratives that reflect and shape the burgeoning cynicism of the 1980s. In *Ode to Gen X: Institutional Cynicism in "Stranger Things" and 1980s Film*, author Melissa Vosen Callens explores the parallels between iconic films featuring children and teenagers and the first three seasons of *Stranger Things*, a series about a group of young friends set in 1980s Indiana. The text moves beyond the (at times) non-sequitur 1980s Easter eggs to a common underlying narrative: Generation X's growing distrust in American institutions. Despite Gen X's cynicism toward both informal and formal institutions, viewers also see a more

positive characteristic of Gen X in these films and series: Gen X's fierce independence and ability to rebuild and redefine the family unit despite continued economic hardships. Vosen Callens demonstrates how *Stranger Things* draws on popular 1980s popular culture to pay tribute to Gen X's evolving outlook on three key and interwoven American institutions: family, economy, and government.

[The Debt Age](#) - Jeffrey R Di Leo 2018-06-27

This collection of essays, by some of the most distinguished public intellectuals and cultural critics in America explores various dimensions of what it means live in the age of debt. They ask, what is the debt age? For that matter, what is debt? Is its meaning transhistorical or transcultural? Or is it imbued in ideology and thus historically contingent? What is the relationship between debt and theory? Whose debt is acknowledged and whose is ignored? Who is the paradigmatic subject of debt? How has debt affected contemporary academic

culture? Their responses to these and other aspects of debt are sure to become required reading for anyone who wants to understanding what it means to live in *The Debt Age*.

Media Piracy in the Cultural Economy -

Gavin Mueller 2019-04-15

This book takes a Marxist approach to the study of media piracy - the production, distribution, and consumption of media texts in violation of intellectual property laws - to examine its place as an endemic feature of the cultural economy since the rise of the Internet. The author explores media piracy not in terms of its moral or legal failings, or as the inevitable by-product of digital technologies, but as a symptom of a much larger restructuring of cultural labor in the era of the Internet: labor that is digital, entrepreneurial, informal, and even illegal, and increasingly politicized. Sketching the contours of this new political economy while engaging with theories of digital media, both critical and celebratory, Mueller reveals piracy as a

submerged social history of the digital world, and potentially the key to its political reimagining. This significant contribution to the study of piracy and digital culture will be vital reading for scholars and students of critical media studies, cultural studies, political theory, or digital humanities, and particularly those researching media piracy, digital labor, the digital economy, and Marxist theory.

The Transformation of Citizenship, Volume 1 - Juergen Mackert 2017-03-16

The Transformation of Citizenship addresses the basic question of how we can make sense of

citizenship in the twenty-first century. These volumes make a strong plea for a reorientation of the sociology of citizenship and address serious threats of an ongoing erosion of citizenship rights. Arguing from different scientific perspectives, rather than offering new conceptions of citizenship as supposedly more adequate models of rights, membership and belonging, they deal with both the ways citizenship is transformed and the ways it operates in the face of fundamentally transformed conditions. This volume Political Economy discusses manifold consequences of a decades-long enforcement of neo-liberalism for the rights of citizens. As neo-liberalism not only means a new form of economic system, it has to be conceived of as an entirely new form of global, regional and national governance that radically transforms economic, political and social relations in society. Its consequences for citizenship as a social institution are no less than dramatic. Against the background of both

manifest and ideological processes the book looks at if citizenship has lost the basis it has rested upon for decades, or if the institution itself is in a process of being fundamentally transformed and restructured, thereby changing its meaning and the significance of citizens' rights. This book will appeal to academics working in the field of political theory, political sociology and European studies.

Business Ethics: A Textbook with Cases - William H. Shaw 2016-01-01

BUSINESS ETHICS, 9th Edition is a comprehensive and practical guide that will help you with real life ethical issues that rise in the business world. It will assist you through the process of developing the critical thinking and analytical skills needed to successfully navigate the unique set of problems that emerge when ethics and commerce collide. This book focuses on key ethical concepts and emphasizes the real world importance of critical topics such as the nature of morality, major theories of ethics and

economic justice, and competing views of capitalism and corporate responsibility. It is thorough, flexible, and designed to bolster student involvement with the material for better comprehension and understanding. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Only the Dance - Judith Kitchen 1994

Using the words of others as her wellspring, Kitchen takes us on excursions in time, self, and literature to examine the interconnectiveness of past, present, and future pieces of her life. Longer essays form the vertical threads of Kitchen's autobiographical tapestry, reflecting the shape of her identity as daughter, student, wife, teacher, and finally, well-known writer/editor/reviewer. Her quest defies chronology as she traverses a geography of memories in upstate New York, Brazil, New England, Wyoming, and Washington state. Shorter essays, laden with personal and political

history, trace the horizontal threads of a three-week journey through Scotland, England, and Wales. Extending the spirit of Virginia Woolf and of philosopher Henri Bergson, Kitchen's travels take the reader to destinations where the dimensions of life intersect: past and present, political and personal, literary and literal.

-

Recoded City - Thomas Ermacora 2016-07-01
Recoded City examines alternative urban design, planning and architecture for the other 90%: namely the practice of participatory placemaking, a burgeoning practice that co-author Thomas Ermacora terms 'recoding'. In combining bottom-up and top-down means of regenerating and rebalancing neighbourhoods affected by declining welfare or struck by disaster, this growing movement brings greater resilience. Recoded City sheds light on a new epoch in the relationship between cities and civil society by presenting an emerging range of

collaborative solutions and distributed governance models. The authors draw on their own fresh research of global pioneers forging localist design strategies, public-realm interventions and new stakeholder dynamics. As the world becomes increasingly digital and virtual, a myriad of online tools and technological options is becoming available. These give unprecedented co-creation opportunities to communities and professionals alike, yielding the benefits of a more open - DIY - society. Because of its close engagement with people, place and local identity, the field of participatory placemaking has huge untapped potential. Responding to the challenges of the Anthropocene era, Recoded City is for decision-makers, developers and practitioners working globally to make better and more liveable cities.

Complex Organizations - Charles Perrow
2014-06-16
A classic text in sociology, Complex Organizations provides a succinct overview of

the principal schools of thought of organizational theories, placing each into critical, historical, and cultural context. Vividly written, with many specific, student-oriented examples, *Complex Organizations* offers a critical perspective on organizations, analyzing their impact on individuals, groups, and society as a whole. Charles Perrow's cogent examination of organizational theory has bridged the gap between two academic disciplines, sociology and business administration, and has won over readers (including many students) with its enthusiasm for the subject. Charles Perrow is professor emeritus of sociology at Yale University and visiting professor at Stanford University. His interests include the development of bureaucracy in the 19th century, protecting the nation's critical infrastructure, the prospects for democratic work organizations, and the origins of American capitalism. "In a very real sense, this book is in a class by itself. . . It has achieved the status of a 'classic.' . . .

There is no other single volume which provides such a thoughtful and incisive critique of organizational theory." -Robert Rothman, Professor Department of Sociology University of Delaware "As a work that has influenced the field, *Complex Organizations* is in a sparse, distinguished company. It is widely known and cited and is taken seriously as an articulate critique of much of its field. Its strength lies in its intelligence, its irreverence, and its author's reputation. There is much here, by way of analysis and critique that simply cannot be found in other texts." -Steven Kerr, Associate Dean School of Business Administration University of Southern California
Dalit Capital - Aseem Prakash 2020-11-30
Dalit Capital explores the relation between caste and Indian capitalism. It explores the ways in which caste and social discrimination reinvent themselves under the guise of modern capitalism. It demonstrates how 'inclusion' holds Dalits at a disadvantage, perpetrated by the

state, markets and the civil society.

The Politics of Green Transformations - Ian

Scoones 2015-01-09

Multiple 'green transformations' are required if humanity is to live sustainably on planet Earth. Recalling past transformations, this book examines what makes the current challenge different, and especially urgent. It examines how green transformations must take place in the context of the particular moments of capitalist development, and in relation to particular alliances. The role of the state is emphasised, both in terms of the type of incentives required to make green transformations politically feasible and the way states must take a developmental role in financing innovation and technology for green transformations. The book also highlights the role of citizens, as innovators, entrepreneurs, green consumers and members of social movements. Green transformations must be both 'top-down', involving elite alliances between states and business, but also 'bottom

up', pushed by grassroots innovators and entrepreneurs, and part of wider mobilisations among civil society. The chapters in the book draw on international examples to emphasise how contexts matter in shaping pathways to sustainability. Written by experts in the field, this book will be of great interest to researchers and students in environmental studies, international relations, political science, development studies, geography and anthropology, as well as policymakers and practitioners concerned with sustainability.

Gatekeepers - William Marling 2016-03-15

The romantic idea of the writer as an isolated genius has been discredited, but there are few empirical studies documenting the role of "gatekeeping" in the literary process. How do friends, agents, editors, translators, small publishers, and reviewers-not to mention the changes in technology and the publishing industry-shape the literary process? This matrix is further complicated when books cross cultural

and language barriers, that is, when they become part of world literature. Gatekeepers builds on the work of Pierre Bourdieu, Randall Collins, James English, and Mark McGurl, describing the multi-layered gatekeeping process in the context of World Literature after the 1960s. It focuses on four case studies: Gabriel García Márquez, Charles Bukowski, Paul Auster and Haruki Murakami. The two American authors achieved remarkable success overseas owing to canny gatekeepers; the two international authors benefited tremendously from well-curated translation into English. Rich in archival materials (correspondence between authors, editors, and translators, and publishing industry analyses), interviews with publishers and translators, and close readings of translations, this study shows how the process and production of literature depends on the larger social forces of a given historical moment. William Marling also documents the ever-increasing Anglo-centric dictate on the

gatekeeping process. World literature, the book argues, is not so much a "republic of letters" as a field of chance on which the conversation is partly bracketed by historic events and technological opportunities.

Beyond \$15 - Jonathan Rosenblum 2017-02-07
The inside story of the first successful \$15 minimum wage campaign that renewed a national labor movement With captivating narrative and insightful commentary, labor organizer Jonathan Rosenblum reveals the inside story of the first successful fight for a \$15 minimum wage, which renewed a national labor movement through bold strategy and broad inclusiveness. Just outside Seattle, an unlikely alliance of Sea-Tac Airport workers, union and community activists, and clergy staged face-to-face confrontations with corporate leaders to unite a diverse, largely immigrant workforce in a struggle over power between airport workers and business and political elites. Digging deep into the root causes of poverty wages,

Rosenblum gives a blunt assessment of the daunting problems facing unions today. Beyond \$15 provides an inspirational blueprint for a powerful, all-inclusive labor movement and is a call for workers to reclaim their power in the new economy.

Malevolent Managers - Dr Terry A Sheridan
2016-01-28

Dr Terry A. Sheridan employs a new and unique theoretical perspective to examine how malevolent, tyrannical and mediocre managers commonly use violence in the workplace, not necessarily physical violence, but bullying, overt and covert emotional abuse - all forms of negative behaviour that are damaging to individuals and organisations. The theoretical basis for the author's analysis and prescriptions is the new perspective of Executive Impression Management, which stems from Dr Sheridan's research into the differences between a number of types of executives from their co-workers' point of view. That investigation developed

indicators to identify different negative management types and also helped define what has been called respectful management - the sort exercised by those managers who are good stewards. What makes this book unusual is that it is derived from qualitative research and covers an area where hardly any scholarly work has been produced. The author argues that the research methodology employed has resulted in a better understanding of impression management than has hitherto been possible. It addresses the confusion that often abounds regarding who is a good or bad manager and the fact that we can identify bad management through measures of company or organisational performance, but not how and why it went wrong. It will assist the leadership of organisations to make the right decisions about recruitment and promotion and to identify and challenge poor performance effectively.

Inequality Studies from the Global South - David Francis
2020-05-25

This book offers an innovative, interdisciplinary approach to thinking about inequality, and to understanding how inequality is produced and reproduced in the global South. Without the safety net of the various Northern welfare states, inequality in the global South is not merely a socio-economic problem, but an existential threat to the social contract that underpins the democratic state and society itself. Only a response that is firmly grounded in the context of the global South can hope to address this problem. This collection brings together scholars from across the globe, with a particular focus on the global South, to address broad thematic areas such as the conceptual and methodological challenges of measuring inequality; the political economy of inequality in the global South; inequality in work, households and the labour market; and inequalities in land, spaces and cities. The book concludes by suggesting alternatives for addressing inequality in the global South and around the world. The

pioneering ideas and theories put forward by this volume make it essential reading for students and researchers of global inequality across the fields of sociology, economics, law, politics, global studies and development studies. Free Traders - Malcolm Fairbrother 2019-09-02 Today's global economy was largely established by political events and decisions in the 1980s and 90s, when scores of nations opened up their economies to the forces of globalization. In Free Traders, Malcolm Fairbrother argues that politicians' embrace of globalization was much less motivated by public preferences than by the agendas of businesspeople and other elites. Drawing on over one hundred interviews with decision-makers, and analyses of archival materials from Canada, Mexico, and the U.S., Fairbrother tells the story of how each country negotiated and ratified two agreements that substantially opened and integrated their economies: the 1989 Canada-U.S. and trilateral 1994 North American Free Trade Agreement.

Contrary to what many commentators believe, these agreements-like free trade elsewhere-were based less on mainstream, neoclassical economics than on the informal, self-serving economic ideas of business. While the stakes in the globalization debate remain high, Free Traders uses a comparative-historical approach to sharpen our understanding of how globalization arose in the past to provide us with clearer trajectory for how it will develop in the future.

American Oligarchy - Ron Formisano

2017-09-27

A permanent political class has emerged on a scale unprecedented in our nation 's history. Its self-dealing, nepotism, and corruption contribute to rising inequality. Its reach extends from the governing elite throughout nongovernmental institutions. Aside from constituting an oligarchy of prestige and power, it enables the creation of an aristocracy of massive inherited wealth that is accumulating immense political power. In a

muckraking tour de force reminiscent of Lincoln Steffens, Upton Sinclair, and C. Wright Mills, *American Oligarchy* demonstrates the way the corrupt culture of the permanent political class extends down to the state and local level. Ron Formisano breaks down the ways this class creates economic inequality and how its own endemic corruption infects our entire society. Formisano delves into the work of not just politicians but lobbyists, consultants, appointed bureaucrats, pollsters, celebrity journalists, behind-the-scenes billionaires, and others. Their shameless pursuit of wealth and self-aggrandizement, often at taxpayer expense, rewards channeling the flow of income and wealth to elites. That inequality in turn has choked off social mobility and made a joke of meritocracy. As Formisano shows, these forces respond to the oligarchy 's power and compete to bask in the presence of the .01 percent. They also exacerbate the dangerous instability of an American democracy divided between extreme

wealth and extreme poverty.

Commercial Nationalism - Zala Volcic

2016-02-03

This book intervenes in discussions of the fate of nationalism and national identity by exploring the relationship between state appropriation of marketing and branding strategies on the one hand, and, on the other, the commercial mobilization of nationalist discourses.

Deepening Democracy - Joseph Tharamangalam

2022-12-30

This book examines the renewed interest and commitment that countries across the world have shown in recent decades towards adopting models of decentralising, or "downsizing" the state, and moving towards more participatory models of government. It examines systems of decentralised development such as self-managing co-operatives from a global and comparative perspective with a focus on developing countries. Drawing on examples from Kerala and a few other states in India, as well as

Cuba, Bangladesh and South Africa among other countries, the book offers critical perspectives on the positive impacts of these experiments and the promises these offer for the future. It discusses the challenges of implementing these models, how well these work in coordination with the civil society and the state, issues of transparency and democratic oversight as well as corruption and capture of power due to entrenched structures of inequality. The volume analyses welfare and development models and self-management interventions in countering the effects of the COVID-19 pandemic. It also looks at the merits and demerits of decentralisation in countering the global socioeconomic and environmental crisis and the rise of authoritarian populism in many countries. The book will be of interest to students and researchers of development studies, political science, business, community development, social justice as well as of co-operative management programmes. It will also appeal to

students of political economy as well as

development professionals, think tanks and policymakers.
