The Four Pillars of Real Estate Investing - John Oharenko 2022-07-31
Four Pillars covers the essentials of real estate investing, starting with discussing the resources essential to every venture: land, labor, capital, and entrepreneurship. Four Pillars recommends operating properties to create positive social and environmental outcomes for the community while earning profits. Understanding risk-adjusted investment returns serve as the foundation for Four Pillars. This book organizes realty investing as a risk/reward decision illustrated by four pillars spelling R-E-C-I as follows:(1) Risk/Reward Analysis: Establishing investment profitability goals requires creating risk/reward strategies with measurable benchmarks. Investors should be aware of various risks, including universal, direct ownership, and other known and unknown risks. After understanding such risks, investors review potential rewards, including tangible and intangible benefits.(2) Evaluation of Risk/Reward: Having selected an appropriate investment strategy, the next step in the process focuses on finding specific project opportunities. At this stage, using the 5 P's of Underwriting (People, Place, Project, Performance, Pros/Cons) is a suggested format for sizing risk/reward. Popular financial analysis formulas for measuring economic performance at a specific time include static indices such as ROI, simple ratio tests, front door/back door, and DICE. Dynamic measurements, mainly discounted cash flow analysis, provide expanded financial decision-making corresponding to the projected holding period.(3) Cycles - Risk/Reward Timing: Given the cyclical nature of the real estate industry, wrong timing shatters well-conceived and analyzed ventures. As a result, understanding emerging patterns within liberal, conservative and neutral cycles creates additional opportunities to restructure or abort pending opportunities. However, if acceptable financial loss tolerances exist, maintaining solvency remains the best risk/reward management tool for carrying salvageable assets through unforeseen cycles.(4) Investing - Risk/Reward Launch: Lastly, finding capital to trigger the investment proves one of the most rewarding steps in the analysis process. The investment opportunity converts to a "real deal," in contrast to a financial exercise. The search for funding includes a qualifying capital structure that matches the investors' profitability [risk/reward] goals. The selection process covers funding capacity, compatibility with the ownership team, and various

debt and equity funding sources.

Essentials of Personal Financial Planning - Susan M. Tillery
2018-09-21

ESSENTIALS OF PERSONAL FINANCIAL PLANNING Essentials of Personal Financial Planning was written to challenge the status quo by promoting personal financial planning (PFP) as a profession, not as a

sales tool to gather assets under management or facilitate sales of insurance products. The book takes a comprehensive and integrated approach to PFP for accounting students, allowing them to view the profession through the lens of a CPA - with integrity and objectivity. This book systematically introduces the essentials of all the major PFP topics (estate, retirement, investments, insurance, and tax), as well as: The PFP process, concepts and regulatory environment. Professional responsibilities of a CPA personal financial planner and the requirements of the Statement on Standards in PFP Services. Time value of money concepts. The book then builds on these foundational concepts, showing their interconnectivity and professional opportunities, to provide a deeper understanding of PFP and its application. After reading this book, students will be able to apply the knowledge and skills gained from this course to have an immediate and long-term positive impact for themselves and for the clients they serve.
