Reproductive Rights as Human Rights - Zakiya Luna 2020-09-01

Reveals both the promise and the pitfalls associated with a human rights approach to the women of color-focused reproductive rights activism of SisterSong How did reproductive justice—defined as the right to have children, to not have children, and to parent—become recognized as a human rights issue? In *Reproductive Rights as Human Rights*, Zakiya Luna highlights the often-forgotten activism of women of color who are largely responsible for creating what we now know as the modern-day reproductive justice movement. Focusing on SisterSong, an intersectional reproductive justice organization, Luna shows how, and why, women of color mobilized around reproductive rights in the domestic arena. She examines their key role in re-framing reproductive rights as human rights, raising this set of issues as a priority in the United States, a country hostile to the concept of human rights at home. An indispensable read, *Reproductive Rights as Human Rights* provides a much-needed intersectional perspective on the modern-day reproductive justice movement.

Strategies for Governing - Alasdair Roberts 2020-01-15

With the fields of public administration and public management suffering a crisis of relevance, Alasdair Roberts offers a provocative assessment of their shortfalls. The two fields, he finds, no longer address urgent questions of governance in a turbulent and dangerous world. *Strategies for Governing* offers a new path forward for research, teaching, and practice. Leaders of states, Roberts writes, are constantly reinventing strategies for governing. Experts in public administration must give advice on the design as well as execution of strategies that effective, robust, and principled. *Strategies for Governing* challenges us to reinvigorate public administration and public management, preparing the fields for the challenges of the twenty-first century.

Putting Social Development to Work for the Poor - 2005

This publication examines the effectiveness of aid agency projects in relation to social development work, which are based on four key concepts of social sectors; safety nets; inclusion, equity and empowerment; and social relations. The report draws on recent and ongoing OED evaluations supplemented by other data including a portfolio review, a literature review, individual surveys and a review of country assistance strategies. Four main recommendations are made to improve policy outcomes, including the need to ensure that stated Bank

or policy priorities receive adequate treatment across regions and countries, with better strategic planning to address current skills and monitoring and evaluation gaps.

Innovation, Entrepreneurship and Organizations' Business Performance - Milena Ratajczak-Mrozek 2018

If there are concepts that have huge academic literature and are of outstanding practical significance in corporate practice, then business performance is certainly one of them. However, the authors of this special issue add interesting and exciting elements to our knowledge regarding business success and performance in many ways. This special issue underlines that business success, which has both financial and social components, depends to a great extent on the knowledge, skills, and cooperative skills of people in the organization, and their openness to the world of external and internal stakeholders. The behavior of people, when heavily influenced by the values of the organization and its associated business ethics, has a major impact on business success. This is also true for ethically and socially controversial industries, such as pharmaceutical, alcohol and tobacco. The research results of the authors in this special issue show that different organizational frameworks and solutions can lead to the success of a business. There is, of course, no single, infallible "recipe" leading to success. However, developing project management skills and applying a project management approach within an organization can increase the organization's entrepreneurial ability. The key feature of such a solution is that the organization becomes more open to stakeholders and processes in its local environment. This also means that an organization's ability to innovate, and improve the efficiency of its innovation processes, increases. It is an exciting feature of the special issue that most of the studies deal with a specific area of the global economy, namely Central and Eastern Europe. Empirical research carried out in Poland, the Czech Republic and Hungary, and a comparative analysis of them, is a valuable contribution to the increasingly rich literature dealing with this region, as well as the academic literature in the more general sense. The first paper by Majra Hodžić and Helena Hrůzová, "A study of project management practices in the Czech Republic," addresses the importance of project management for organizations' innovation and performance. Based on the example of the Czech Republic, Hodžić and Hrůzová study current practices used in the field of project management and underline the importance of stakeholders' main demands and requests, and the level of use of project management methods. The results that are presented provide practical implications, especially for new start-ups wanting to boost their competitiveness and innovativeness, by displaying success factors for project management and the necessity for innovation in this area. The subject of project management is continued in the second paper by Katarzyna Grzesik and Katarzyna

Piwowar-Sulej entitled "Project managers' competencies and leadership styles from the perspective of organizations functioning in Poland." Grzesik and Piwowar-Sulej discuss the significance of project managers' different competencies and project leadership styles, which are especially important nowadays considering the increasing dynamics of the organizations' environment. The needed and adopted competences are compared between the strictly project-oriented organizations (implementing projects for external clients) and organizations that manage projects for internal purposes. The authors identify competencies which are important for organizations' success in the area of project management and may, in turn, lead to better business performance. The importance of human capital for organizations' performance and competitive advantage is addressed in the third paper by Łukasz Bryl called "Human capital orientation and financial performance. A comparative analysis of US corporations". In the paper, Bryl verifies whether human capital oriented organizations generate a positive or even above-average financial performance due to: higher skills of employees, greater motivation and, thus, higher overall effectiveness. The paper has significant practical implications for both managers aiming at increased competitive advantage and investors in terms of the possible directions of stock market investments aimed at achieving above-average returns. Financial success and high performance may also be gained by innovativeness. In the fourth paper, "An innovation capability development process for firms in developing countries: A theoretical conceptual model," Gezahegn Tesfaye and Daniel Kitaw analyze the problem of innovation capability development. The much-needed complexity of the analysis is reflected by combining both the technical and the financial aspects of innovation capability development. The proposed model identifies three key innovation capability constructs and is of practical value, especially to organizations from developing countries, as it helps to progress the innovation capabilities more effectively. The fifth paper by Włodzimierz Sroka and Richard Szántó, "CSR and business ethics in controversial sectors: analysis of research results," addresses the issue of organizations' performance from a different perspective, namely the particular obligations toward society or the environment constituted by corporate social responsibility. Based on the example of controversial sectors of the economy (pharmaceutical, tobacco and alcohol) Sroka and Szántó examine the scale and scope of the use of business ethics principles and practices in Poland and Hungary. The analysis provides not only significant fresh insights in this field but also shows that business ethics have an influence on business success and the corporate image of organizations. The sixth paper, "The themes of entrepreneurship discourse: A data analytics approach" by Philip T. Roundy and Arben Asllani, considers the importance of the language used by entrepreneurs. Roundy and Asllani identify five dominant themes in entrepreneurship discourse which address, among other things, technology and professional investments. The analysis of the most recurring themes in entrepreneurship discourse, and their change over time, sets directions for future research and indicates the importance of entrepreneurship discourse for organizations' business success. We would like to thank all the authors for their contribution to this special issue and for sharing their research. We believe that this new research represents a valuable input to our knowledge regarding business success and organizations' performance. We also want to thank the reviewers whose comments contributed to the improvement of the papers and the whole of this special issue. We hope the articles presented here will be of interest to readers, scholars and researchers around the world, and that they will inspire them on to further scientific and practical

research in the field of business performance.

Government/Industry/Academic Relationships for Technology Development - National Research Council 2005-03-15

NASA's Human Exploration and Development of Space (HEDS) program within the Office of Space Flight has proposed a new framework for space technology and systems development "Advanced Systems, Technology, Research, and Analysis (ASTRA) for future space flight capabilities. To assist in the development of this framework, NASA asked the National Research Council to convene a series of workshops on technology policy issues concerning the relationship of the various stakeholders in advancing human and robotic exploration and development of space. The second workshop, which is summarized in this report, focused on the interrelationship between government, industry, and academia in the development of technology. Examples from Defense Advanced Research Projects Agency, the Department of Defense, and the National Science Foundation were covered in order to discuss best practices of such cooperative efforts as possible lessons for NASA's space exploration activities.

Business, Human Rights and Transitional Justice - Irene Pietropaoli 2020-05-29

This book considers the efficacy of transitional justice mechanisms in response to corporate human rights abuses. Corporations and other business enterprises often operate in countries affected by conflict or repressive regimes. As such, they may become involved in human rights violations and crimes under international law – either as the main perpetrators or as accomplices by aiding and abetting government actors. Transitional justice mechanisms, such as trials, truth commissions, and reparations, have usually focused on abuses by state authorities or by non-state actors directly connected to the state, such as paramilitary groups. Innovative transitional justice mechanisms have, however, now started to address corporate accountability for human rights abuses and crimes under international law and have attempted to provide redress for victims. This book analyzes this development, assessing how transitional justice can provide remedies for corporate human rights abuses and crimes under international law. Canvassing a broad range of literature relating to international criminal law mechanisms, regional human rights systems, domestic courts, truth and reconciliation commissions, and land restitution programmes, this book evaluates the limitations and potential of each mechanism.

Acknowledging the limited extent to which transitional justice has been able to effectively tackle the role of corporations in human rights violations and international crimes, this book nevertheless points the way towards greater engagement with corporate accountability as part of transitional justice. A valuable contribution to the literature on transitional justice and on business and human rights, this book will appeal to scholars, researchers and PhD students in these areas, as well as lawyers and other practitioners working on corporate accountability and transitional justice.

Regulating the Business of Labour Migration

Intermediaries - Beate Andrees 2021-01-05

The business of labour migration intermediation has existed as long as people traded and migrated across territories, countries and continents. Recent technological innovations and the global expansion of production and trade have led to an unprecedented increase in international labour migration, providing a fertile ground for labour migration intermediaries. As many recipient countries have created high entry barriers, especially for low-skilled workers, migrants are often at the mercy of informal recruiters. In the worst case, they end up in the clutches of unscrupulous smugglers and traffickers. The growing trend towards informal labour migration intermediation creates regulatory challenges, which are discussed in the book. Which regulatory regimes are best suited to formalize the migration intermediation business, and to protect migrants from exploitation and abuse? Under what conditions will they most likely occur? The study uses a mix of qualitative methods, including a comparative analysis of the regulation of labour migration intermediaries in the United Kingdom and the Russian Federation. In both countries, international standards, particularly on human trafficking and private employment agencies, guided regulatory initiatives. Their outcomes, however, depended on a range of factors, including the creation of alliances between business and workers.

Project Delivery in Business-as-Usual Organizations - Tim Carroll 2016-04-08

Business organizations are highly successful at delivering 'business as usual'; the day-to-day tasks of managing customer transactions, marketing and production activities, and motivating employees. But there is a growing requirement for such organizations also to deliver business change projects successfully. 'Business as usual organizations' represent a particularly challenging environment for achieving this because of the fundamentally different mindset and culture required to deliver projects in this context. Tim Carroll's book provides an authoritative guide to improving project delivery in such organizations by: ϕ building a project management capability and culture that is appropriate to BAU organizations; ϕ aligning projects more closely with the strategic agenda of the organization, through the use of programmes; ϕ using portfolio management to improve this alignment and ensure the effectiveness of project investments; ϕ demonstrating the business context for projects and their contribution to the organization's agenda of strategic change. The author argues convincingly that project management hasn't travelled well from its traditional roots in construction and engineering to business-as-usual organizations. New approaches are called for, in particular to embed project delivery capabilities more deeply within the organization rather than treat it as a specialist discipline. This is a 'must-read' book to help managers responsible for strategy and change in all business-as-usual organizations (such as banks, insurance, business and consumer service companies, hospitals, local and national government) to realize the value that project management can bring to the long-term development of their organization.

Fundamentals of Game Design - Ernest Adams 2010-04-07

To create a great video game, you must start with a solid game design: A well-designed game is easier to build, more entertaining, and has a better chance of succeeding in the marketplace. Here to teach you the essential skills of player-centric game design is one of the industry's leading authorities, who offers a first-hand look into the process, from initial concept to final tuning. Now in its second edition, this updated classic reference by Ernest Adams offers a complete and practical approach to game design, and includes material on concept development, gameplay design, core mechanics, user interfaces, storytelling, and balancing. In an easy-to-follow approach, Adams analyzes the specific design challenges of all the major game genres and shows you how to apply the principles of game design to each one. You'll learn how to: Define the challenges and actions at the heart of the gameplay. Write a high-concept document, a treatment, and a full design script. Understand the essentials of user interface design and

how to define a game's look and feel. Design for a variety of input mechanisms, including the Wii controller and multi-touch iPhone. Construct a game's core mechanics and flow of resources (money, points, ammunition, and more). Develop appealing stories, game characters, and worlds that players will want to visit, including persistent worlds. Work on design problems with engaging end-of-chapter exercises, design worksheets, and case studies. Make your game accessible to broader audiences such as children, adult women, people with disabilities, and casual players. "Ernest Adams provides encyclopedic coverage of process and design issues for every aspect of game design, expressed as practical lessons that can be immediately applied to a design in-progress. He offers the best framework I've seen for thinking about the relationships between core mechanics, gameplay, and player—one that I've found useful for both teaching and research." – Michael Mateas, University of California at Santa Cruz, co-creator of *Faça*

Entrepreneurial Finance - Miranda S. Lam 2015-07-16
Entrepreneurial Finance: Concepts and Cases addresses issues that are often overlooked in traditional finance textbooks, namely, how to handle the unique financial challenges faced by start-ups and small businesses. The book is structured around seven modules or building

blocks designed to be taught across a full semester with natural break points built into each chapter within the modules. The building blocks present macro-concepts which are explored in greater detail in each of the chapters. A starting chapter provides guidance about the use of cases for students and a concluding chapter delivers information about how to win business plan competitions. Each concept is illustrated by a short case, and followed by thoughtful questions to enhance learning. The cases, previously unpublished, are written by an international group of experienced case writers

from the field of finance, and deal with real companies, real problems, and currently unfolding issues. A case teaching manual geared to finance in general, and short cases in particular, is provided for the instructor and includes specific tips, techniques, and activities for each case in the text. Written for upper level undergraduate students of entrepreneurship, this highly accessible book breaks down complex concepts, and includes hands-on cases and exercises, making learning a breeze!
