The Cambridge Companion to the City in Literature -

Kevin R. McNamara 2014-10-06

From the myths and legends that fashioned the identities of ancient city-states to the diversity of literary performance in contemporary cities around the world, literature and the city are inseparably entwined. The international team of scholars in this volume offers a comprehensive, accessible survey of the literary city, exploring the myriad cities that authors create and the genres in which cities appear. Early chapters consider the literary legacies of historical and symbolic cities from antiquity to the early modern period. Subsequent chapters consider the importance of literature to the rise of the urban public sphere; the affective experience of city life; the interplay of the urban landscape and memory; the form of the literary city and its responsiveness to social, cultural and technological change; dystopian, nocturnal, pastoral and sublime cities; cities shaped by colonialism and postcolonialism; and the cities of economic, sexual, cultural and linguistic outsiders.

To Cast the First Stone - Jennifer Knust 2018-11-13

The story of the woman taken in adultery features a dramatic confrontation between Jesus and the Pharisees over whether the adulteress should be stoned as the law commands. In response, Jesus famously states, "Let him who is without sin be the first to throw a stone at her." To Cast the First Stone traces the history of this provocative story from its first appearance to its enduring presence today. Likely added to the Gospel of John in the third century, the passage is often held up by modern critics as an example of textual corruption by early Christian scribes and editors, yet a judgment of corruption obscures the warm embrace the story actually received. Jennifer Knust and Tommy Wasserman trace the story's incorporation into Gospel books, liturgical practices, storytelling, and art, overturning the mistaken perception that it was either peripheral or suppressed, even in the Greek East. The authors also explore the story's many different meanings. Taken as an illustration of the expansiveness of Christ's mercy, the purported superiority of Christians over Jews, the necessity of penance, and more, this vivid episode has invited any number of creative receptions. This history reveals as much about the changing priorities of

audiences, scribes, editors, and scholars as it does about an "original" text of John. To Cast the First Stone calls attention to significant shifts in Christian book cultures and the enduring impact of oral tradition on the preservation—and destabilization—of scripture.

Language Exploration and Awareness - Larry Andrews
2013-01-11

"Language Exploration and Awareness: A Resource Book for Teachers, Third Edition" shows English teachers how they can expand their curriculum beyond the traditional emphases on grammar and syntax, to help their students learn about many aspects of the English language, including general semantics, regional and social dialects, syntax, spelling, history of the English language, social language conventions, lexicography, and word origins. Clear, practical, and reader-friendly, the text reviews basic aspects of English language study in classrooms, then illustrates how teachers can create student-centered, inquiry-oriented activities for the learners in their classrooms. Written from a sociocultural perspective, this text stresses the uses of authentic language as it is used by real people for real purposes in diverse social contexts. Changes in the Third Edition are: all chapters have been thoroughly updated to address new developments in the world and in the field of English and language arts education; the chapters in Section II include new Student Explorations - activities designed by pre- and in-service teachers that readers can use with students in their classrooms; and new in this edition are references throughout several chapters to Web sites that instructors and students will find useful. This text is intended as text for undergraduate and master's level English language arts courses on the pedagogies of language teaching, and

as an introduction to language or introduction to linguistics courses - particularly those emphasizing language study from a sociocultural perspective; and for courses preparing teachers of English as a new language. The text is also intended as a resource for current classroom teachers.

Patience—A Theological Exploration - Paul Dafydd Jones
2022-11-17

What does it mean to exercise patience? What does it mean to endure, to wait, and to persevere—and, on other occasions, to reject patience in favor of resistance, haste, and disruptive action? And what might it mean to describe God as patient? Might patience play a leading role in a Christian account of God's creative work, God's relationship to ancient Israel, God's governance of history, and God's saving activity? The first instalment of Patience-A Theological Exploration engages these questions in searching, imaginative, and sometimes surprising ways. Following reflections on the biblical witness and the nature of constructive theological inquiry, its interpretative chapters engage landmark works by a number of ancient, medieval, modern, and contemporary authors, disclosing both the promise and peril of talk about patience. Patience stands at the center of this innovative account of God's creative work, God's relationship with ancient Israel, creaturely sin, scripture, and God's broader providential and salvific purposes.

New Spaces of Exploration - Simon Naylor 2009-12-18

For many the dawn of the twentieth century ushered in an era where the world map had few if any blank spaces left to discover. The age of exploration was supposedly dead. "New Spaces of Exploration" challenges this assumption. Focusing specifically on exploration in the twentieth century, the authors demonstrate how new technologies and changing geopolitical configurations have ensured that exploration has remained a key feature of our rapidly globalizing world. Ranging widely in their geographical focus - from the Europe and Asia to Australia, and from the polar regions to outer space - they demonstrate the increasing diversity of modern exploration and reveal the continuing political, military, industrial and cultural motivations at play. The result is a major contribution to our understanding of the significance of exploration in the twentieth century. Contributors include: E. Baigent, C. Collis, K. Dodds, F. Driver, M. Godwin, J. Hill, F. Korsmo, F.

MacDonald, S. Naylor, J. Ryan, N. Thomas, and K. Yusoff.

Play and Exploration in Children and Animals - Thomas G. Power 1999-11

Play is a paradox. Why would the young of so many species--the very animals at greatest risk for injury and predation--devote so much time and energy to an activity that by definition has no immediate purpose? This question has long puzzled students of animal behavior, and has been the focus of considerable empirical investigation and debate. In this first comprehensive and state-of-the-art review of what we have learned from decades of research on exploration and play in children and animals, Power examines the paradox from all angles. Covering solitary activity as well as play with peers, siblings, and parents, he considers the nature, development, and functions of play, as well as the gender differences in early play patterns. A major purpose is to explore the relevance of the animal literature for understanding human behavior. The nature and amount of children's play varies significantly across cultures, so the author makes cross-cultural comparisons wherever possible. The scope is broad and the range multidisciplinary. He draws on studies by developmental researchers in psychology and other fields, ethologists, anthropologists, sociologists, sociolinguists, early childhood educators, and pediatricians. And he places research on play in the context of research on such related phenomena as prosocial behavior and aggression. Finally, Power points out directions for further inquiry and implications for those who work with young children and their parents.

Researchers and students will find Play and Exploration in Children and Animals an invaluable summary of controversies, methods, and findings; practitioners and educators will find it an invaluable compendium of information relevant to their efforts to enrich play experiences.

Explorers 4: Class Book Pack - 2011-01-19

The Ottoman Age of Exploration - Giancarlo Casale 2010-02-25

In 1517, the Ottoman Sultan Selim "the Grim" conquered Egypt and brought his empire for the first time in history into direct contact with the trading world of the Indian Ocean. During the decades that followed, the Ottomans became progressively more engaged in the affairs of this vast and previously unfamiliar region, eventually to the point of launching a systematic ideological, military and commercial challenge to the Portuguese Empire, their main rival for control of the

lucrative trade routes of maritime Asia. The Ottoman Age of Exploration is the first comprehensive historical account of this century-long struggle for global dominance, a struggle that raged from the shores of the Mediterranean to the Straits of Malacca, and from the interior of Africa to the steppes of Central Asia. Based on extensive research in the archives of Turkey and Portugal, as well as materials written on three continents and in a half dozen languages, it presents an unprecedented picture of the global reach of the Ottoman state during the sixteenth century. It does so through a dramatic recounting of the lives of sultans and viziers, spies, corsairs, soldiers-of-fortune, and women from the imperial harem. Challenging traditional narratives of Western dominance, it argues that the Ottomans were not only active participants in the Age of Exploration, but ultimately bested the Portuguese in the game of global politics by using sea power, dynastic prestige, and commercial savoir faire to create their own imperial dominion throughout the Indian Ocean.

Exploration - Stewart Angas Weaver 2015

Class and Colonialism in Antarctic Exploration, 1750–1920 - Ben Maddison 2015-10-06

Between 1750 and 1920 over 15,000 people visited Antarctica. Despite such a large number the historiography has ignored all but a few celebrated explorers. Maddison presents a study of Antarctic exploration, telling the story of these forgotten facilitators, he argues that Antarctic exploration can be seen as an offshoot of European colonialism.

The Oxford History of the British Empire: Volume III: The Nineteenth Century - Andrew Porter 2001-07-26

The Oxford History of the British Empire is a major new assessment of the Empire in the light of recent scholarship and the progressive opening of historical records. From the founding of colonies in North America and the West Indies in the seventeenth century to the reversion of Hong Kong to China at the end of the twentieth, British imperialism was a catalyst for far-reaching change. The Oxford History of the British Empire as a comprehensive study helps us to understand the end of Empire in relation to its beginning, the meaning of British imperialism for the ruled as well as for the rulers, and the significance of the British Empire as a theme in world history. Volume III of The Oxford History of the British Empire covers the long nineteenth century, from the achievement of American independence in the 1780s to the eve of world war in 1914. This was the period of Britain's greatest expansion as both empire-builder and dominant world power. The volume is divided into two parts. The first

contains thematic chapters, some focusing on Britain, others on areas at the imperial periphery, exploring those fundamental dynamics of British expansion which made imperial influence and rule possible. They also examine the economic, cultural, and institutional frameworks which gave shape to Britain's overseas empire. Part 2 is devoted to the principal areas of imperial activity overseas, including both white settler and tropical colonies. Chapters examine how British interests and imperial rule shaped individual regions' nineteenth-century political and socio-economic history. Themes dealt with include the economics of empire, imperial institutions, defence, technology, imperial and colonial cultures, science and exploration. Attention is given not only to the formal empire, from Australasia and the West Indies to India and the African colonies, but also to China and Latin America, often regarded as central components of a British 'informal empire'.

A Risk Reduction Strategy for Human Exploration of Space - National Research Council 2006-04-16

Extending the spatial and temporal boundaries of human space flight is an important goal for the nation and for the National Aeronautics and Space Administration (NASA). However, human space flight remains an endeavor with substantial risks, and these risks must be identified, managed, and mitigated appropriately to achieve the nation's goals in space. The Bioastronautics Roadmap (BR) is the result of extensive, commendable efforts on the part of NASA to prioritize research efforts to meet these challenges. In 2003, NASA asked the Institute of Medicine (IOM), in collaboration with the Division on Engineering and Physical Sciences of the National Academies, to conduct a review of the BR. Specifically, NASA asked the committee to (1) conduct a comprehensive assessment and report of the strengths and weaknesses of the content and processes of the Bioastronautics Roadmap as applied to the missions described in the President's exploration initiative and (2) identify the unique challenges for accomplishing its goals and objectives. In September 2004, the committee

released its preliminary report to NASA entitled Preliminary Considerations Regarding NASA's Bioastronautics Critical Path Roadmap. That document presented the committee's preliminary conclusions about the strengths and weaknesses of the April 2004 version of the BR. This report, A Risk Reductions Strategy for Human Exploration of Space, builds on those preliminary conclusions and provides recommendations to NASA about how to address the issues identified by the committee.
