Filming Politics - Malek Khouri 2007
The National Film Board of Canada (NFB) was

created in 1939 to produce, distribute, and
promote Canadian cinema both domestically and

abroad. In *Filming Politics*, author Malek Khouri explores the work of the NFB during this period and argues that the political discourse of the films produced by this institution offered a counter-hegemonic portrayal of working class people and presented them as agents of social change. *Filming Politics* brings to light a number of films from the early years of the NFB, most of which have long been forgotten.

Good and Cheap - Leanne Brown 2015-07-14
A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master's candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even

desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for *Good and Cheap* is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish

shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace. *Microeconomics, Fifteenth Canadian Edition Plus NEW MyEconLab with Pearson EText -- Access Card Package* - Christopher T. S. Ragan

[The Theory and Practice of Online Learning](#) - Terry Anderson 2008
"Neither an academic tome nor a prescriptive

'how to' guide, *The Theory and Practice of Online Learning* is an illuminating collection of essays by practitioners and scholars active in the complex field of distance education. Distance education has evolved significantly in its 150 years of existence. For most of this time, it was an individual pursuit defined by infrequent postal communication. But recently, three more developmental generations have emerged, supported by television and radio, teleconferencing, and computer conferencing. The early 21st century has produced a fifth generation, based on autonomous agents and intelligent, database-assisted learning, that has been referred to as Web 2.0. The second edition of "*The Theory and Practice of Online Learning*" features updates in each chapter, plus four new chapters on current distance education issues such as connectivism and social software innovations."--BOOK JACKET.

Pearson FlexText, Microeconomics -
2018-04-30

Pearson FlexText ...setting you up for success in school and at work The study of economics requires a different style of thinking from what you may encounter in other courses. Economists

make extensive use of assumptions to break down complex problems into simple, analytically manageable parts. This analytical style, while not ultimately more demanding than the styles of thinking in other disciplines, feels unfamiliar to most students and requires practice. Our experience has taught us that what first-year economics students want most from a FlexText is help in mastering course material to do well on examinations. We have developed this FlexText to respond specifically to that demand. Mobile Learning - Mohamed Ally 2009 This collection is directed towards anyone interested in the use of mobile learning for various applications. Readers will discover how to design learning materials for delivery on mobile technology and become familiar with the best practices of other educators, trainers, and researchers in the field as well as the most recent research initiatives in mobile learning. Businesses and governments can find out how to deliver timely information to staff using mobile

devices. Professors and trainers can use this book as a textbook in courses on distance education, mobile learning, and educational technology. In fact, the book can be used by anyone interested in delivering education and training at a distance, but especially by graduate students of emerging technology in learning.

[America's Children and the Environment](#) - United States. Environmental Protection Agency

2014-09-18

America's Children and the Environment (ACE) is EPA's report presenting data on children's environmental health. ACE brings together information from a variety of sources to provide national indicators in the following areas: Environments and Contaminants, Biomonitoring, and Health. Environments and Contaminants indicators describe conditions in the environment, such as levels of air pollution. Biomonitoring indicators include contaminants measured in the bodies of children and women of child-bearing age, such as children's blood lead levels. Health indicators report the rates at which selected health outcomes occur among U.S. children, such as the annual percentage of children who currently have asthma. Accompanying each indicator is text discussing the relevance of the issue to children's environmental health and describing the data used in preparing the indicator. Wherever possible, the indicators are based on data

sources that are updated in a consistent manner, so that indicator values may be compared over time.

Human-Centered AI - Ben Shneiderman
2022-01-13
The remarkable progress in algorithms for

machine and deep learning have opened the
doors to new opportunities, and some dark
possibilities. However, a bright future awaits
those who build on their working methods by
including HCAI strategies of design and testing.
As many technology companies and thought
leaders have argued, the goal is not to replace
people, but to empower them by making design
choices that give humans control over
technology. In Human-Centered AI, Professor
Ben Shneiderman offers an optimistic realist's
guide to how artificial intelligence can be used
to augment and enhance humans' lives. This
project bridges the gap between ethical
considerations and practical realities to offer a
road map for successful, reliable systems. Digital
cameras, communications services, and
navigation apps are just the beginning.
Shneiderman shows how future applications will
support health and wellness, improve education,
accelerate business, and connect people in
reliable, safe, and trustworthy ways that respect

human values, rights, justice, and dignity.

Macroeconomics for Life - Avi J. Cohen

2019-10-23

"The Updated second edition of Macroeconomics for Life retains the focus on the question "What do we really want our students to remember of what we teach them in an introductory economics class?" The focus is on essential economic concepts students need to know to become economically literate citizens, delivered in an engaging, narrative style. Those concepts are now illustrated with the core graphs that are at the heart of thinking like an economist. Because fewer topics are covered in more depth, this literacy-targeted approach allows instructors to spend more time in the classroom helping students master the core concepts, supported by active learning exercises, group work, economic experiments, and other forms of engagement that are integrated into both the student exercises and the Instructor's Manual."--
