**Philida** - Andre Brink 2013-02-05

This is what it is to be a slave: that everything is decided for you from out there. You just got to listen and do as they tell you. You don't say no. You don't ask questions. You just do what they tell you. But far at the back of your head you think: Soon there must come a day when I can say for myself: This and that I shall do, this and that I shall not. In *Philida*, longlisted for the Man Booker Prize, André Brink—"one of South Africa's greatest novelists" (The Telegraph)—gives us his most powerful novel yet; the truly unforgettable story of a female

slave, and her fierce determination to survive and to be free. It is 1832 in South Africa, the year before slavery is abolished and the slaves are emancipated. Philida is the mother of four children by Francois Brink, the son of her master. When Francois's father orders him to marry a woman from a prominent Cape Town family, Francois reneges on his promise to give Philida her freedom, threatening instead to sell her to new owners in the harsh country up north. Here is the remarkable story—based on individuals connected to the author's family—of a fiercely independent woman who will settle for nothing and for no one. Unwilling to accept the future that lies ahead of her, Philida continues to test the limits and lodges a complaint against the Brink family. Then she sets off on a journey—from the southernmost reaches of the Cape, across a great wilderness, to

the far north of the country—in order to reclaim her soul.

The purpose of this book is to provide a comprehensive theoretical framework as well as practical strategies—not just for survival but for a true search for excellence in the uncertain and ever-changing world of customer service management. The theoretical framework is based on the notion that customer service contains three key variables: a promise, a process, and people. After going through the step-by-step process of service management, the reader will have the necessary understanding and skill to choose the right strategy for the right circumstances, to design service processes, to identify the means and methods to implement these processes, and to measure the outcome.

Complexity and Postmodernism -  
Paul Cilliers 2002-09-11

In Complexity and

Postmodernism, Paul Cilliers explores the idea of complexity in the light of contemporary perspectives from philosophy and science. Cilliers offers us a unique approach to understanding complexity and computational theory by integrating postmodern theory (like that of Derrida and Lyotard) into his discussion. Complexity and Postmodernism is an exciting and an original book that should be read by anyone interested in gaining a fresh understanding of complexity, postmodernism and connectionism.

Work Explained to Career Starters - Andreas Landman 2018-11

Many young adults start their career every year. Bright-eyed and bushy-tailed and frightened. "Work Explained to Career Starters" explains to young adults that job-hunting is the easy part (even if they have been looking for months and handed out hundreds of CV's). The hard part is deciding who to work for and keeping the job you decided on. The mental image a young adult has of working for a living might be far removed from reality. Being a career starter is daunting. This book will help make it easier for the young adult to move from life at home

to work at a company. The young adult might not even know him- or herself and must decide to start their career at a company where the culture and value system is in line with their own. The young adult must know that all is not as their parents presented it to them - adulthood is hard. Young adults must know that not all of the money promised them would come their way - they must only plan to spend as much as they can reasonably expect to earn. Young adults, as workers, have rights. Their main role, however, is to follow instructions. These instructions must be followed in a safe way. This book will open the young adults' eyes to the world of working for a company.

Revisiting Mathematics Education - Hans Freudenthal 2006-04-11

This book is a product of love and respect. If that sounds rather odd I initially apologise, but let me explain why I use those words.

The original manuscript was of course Freudenthal's, but his colleagues have carried the project through to its conclusion with love for the man, and his ideas, and with a respect developed over years of communal effort. Their invitation to me to write this Preface e- blesses me to pay my respects to the great man, although I am probably incurring his wrath for writing a Preface for his book without his permission! I just hope he understands the feelings of all colleagues engaged in this particular project. Hans Freudenthal died on October 13th, 1990 when this book project was well in hand. In fact he wrote to me in April 1988, saying "I am thinking about a new book. I have got the sub-title (China Lectures) though I still lack a title". I was astonished. He had retired in 1975, but of course he kept working. Then in 1985 we had been helping him celebrate his 80th birthday, and

although I said in an Editorial Statement in Educational Studies in Mathematics (ESM) at the time "we look forward to him enjoying many more years of non-retirement" I did not expect to see another lengthy manuscript.

**Leonardo Pisano (Fibonacci)** - L. E. Sigler 2014-06-28

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most

important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

Macro Federalism and Local Finance - Anwar M. Shah 2008-06-20

The design of a federal system to deal with growth, stabilization, and regional and local development issues is the primary concern of this volume,

edited by Anwar Shah. The book provides analytical tools to address issues arising from globalization, localization, and regional integration. It discusses tax harmonization issues associated with subnational value added tax administration. It provides a framework for fiscal discipline in a federal system. Lessons from international experiences from policies to deal with lagging regions are drawn. The book empirically examines the effect of fiscal decentralization on the overall size of the public sector. Finally, it draws lessons from industrial countries' experiences on local governance. This important new series represents a response to several independent evaluations in recent years that have argued that development practitioners and policy makers dealing with public sector reforms in developing countries and, indeed, anyone with a concern for effective public governance could

benefit from a synthesis of newer perspectives on public sector reforms. This series distills current wisdom and presents tools of analysis for improving the efficiency, equity, and efficacy of the public sector. Leading public policy experts and practitioners have contributed to the series.

**The Rating Agencies and Their Credit Ratings** - Herwig Langohr  
2010-04-01

Credit rating agencies play a critical role in capital markets, guiding the asset allocation of institutional investors as private capital moves freely around the world in search of the best trade-off between risk and return. However, they have also been strongly criticised for failing to spot the Asian crisis in the early 1990s, the Enron, WorldCom and Parmalat collapses in the early 2000s and finally for their ratings of subprime-related structured finance instruments and their role in the current financial crisis.

This book is a guide to ratings, the ratings industry and the mechanics and economics of obtaining a rating. It sheds light on the role that the agencies play in the international financial markets. It avoids the sensationalist approach often associated with studies of rating scandals and the financial crisis, and instead provides an objective and critical analysis of the business of ratings. The book will be of practical use to any individual who has to deal with ratings and the ratings industry in their day-to-day job. Reviews

"Rating agencies fulfil an important role in the capital markets, but given their power, they are frequently the object of criticism. Some of it is justified but most of it portrays a lack of understanding of their business. In their book *The Rating Agencies and their Credit Ratings*, Herwig and Patricia Langohr provide an excellent economic background to the role

of rating agencies and also a thorough understanding of their business and the problems they face. I recommend this book to all those who have an interest in this somewhat arcane but extremely important area." - Robin Monro-Davies, Former CEO, Fitch Ratings. "At a time of unprecedented public and political scrutiny of the effectiveness and indeed the basic business model of the Credit Rating industry, and heightened concerns regarding the transparency and accountability of the leading agencies, this book provides a commendably comprehensive overview, and should provide invaluable assistance in the ongoing debate."

-Rupert Atkinson, Managing Director, Head of Credit Advisory Group, Morgan Stanley and member of the SIFMA Rating Agency Task Force "The Langohrs have provided useful information in a field where one frequently finds only opinions or

misconceptions. They supply a firm base from which to understand changes now underway. A well-read copy of this monograph should be close to the desk of every investor, issuer and financial regulator, legislator or commentator." -John Grout, Policy and Technical Director, The Association of Corporate Treasurers
