Pack a bag and prepare to go to some of the most interesting places in the 50 states. Learn about each state's flag, motto, fun fast facts, and more as you fill up your passport crisscrossing the country! From Native American history to how immigration impacted the nation, you will explore some of the sites and stories that make this vast land remarkable. Did You Know: Montgomery, Alabama, was the site of the first citywide electric trolley system in 1886. Tennessee is home to the largest underground lake in the United States, the Lost Sea, discovered by a 13-year-old boy in 1905. Ohio was home to the first professional baseball team, the Cincinnati Red Stockings in 1869. Benny Benson, an orphan, designed Alaska's distinctive state flag in 1927. Montana's Triple Divide Peak in Glacier National Park is the only place in North America that allows water to flow in three directions - the Pacific Ocean, the Atlantic Ocean, and Hudson Bay. Texas is the only state to have flags of six different countries fly over it, and it was an independent nation from 1836 to 1846.

Elementary Geography - Charlotte Mason 2016-06-01

This little book is confined to very simple "reading lessons upon the Form and Motions of the Earth, the Points of the Compass, the Meaning of a Map: Definitions." The shape and motions of the earth are fundamental ideas—however difficult to grasp. Geography should be learned chiefly from maps, and the child should begin the study by learning "the meaning of map," and how to use it. These subjects are well fitted to form an attractive introduction to the study of Geography: some of them should awaken the delightful interest which attaches in a child's mind to that which is wonderful—incomprehensible. The Map lessons should lead to mechanical efforts, equally delightful. It is only when presented to the child for the first time in the form of stale knowledge and foregone conclusions that the facts taught in these lessons appear dry and repulsive to him. An effort is made in the following pages to treat the subject with the sort of sympathetic interest and freshness which attracts children to a new study. A short summary of the chief points in each reading lesson is given in the form of questions and answers. Easy verses, illustrative of the various subjects, are introduced, in order that the children may connect pleasant poetic fancies with the phenomena upon which "Geography" so much depends. It is hoped that these reading lessons may afford intelligent teaching, even in the hands of a young teacher. The first ideas of Geography—the lessons on "Place"—which should make the child observant of local geography, of the features of his own neighbourhood, its heights and hollows and level lands, its streams and ponds—should be conveyed viva voce. At this stage, a class-book cannot take the place of an intelligent teacher. Children should go through the book twice, and should, after the second reading, be able to answer any of the questions from memory. Charlotte M. Mason

**The History and Geography of the
Bible Story: A Study Manual** - Bob
Waldron 2019-12-03

The History and Geography of the Bible Story: A Study Manual by Bob and Sandra Waldron is one of the best resources of its kind for individual and class study. It is important for each student of the Bible to gain information about the history and geography of the Bible in order to better understand the context of the message of salvation. The Waldrons have demonstrated an ability to take difficult material and make it both understandable and usable. The book can do several things for the user: (1) it will provide a complete survey of the Bible from Genesis to Revelation; (2) it will give one a good summary of the history of the nations involved in sacred history; (3) it will acquaint one with the geography of the Bible lands. The good maps add tremendously to the quality and usefulness of the book. There are a total of 52 lessons. The first lessons discusses man as an intelligent being. The next 7 lessons give a brief look at all the Bible Lands. The rest of the lessons (9-52) correlate the Bible history and geography together. There are plenty of full color maps with corresponding blank maps for the student to fill in. Every few lessons, there is a section of review questions. Charts, lists, and easily read narrative make this a great study for your Bible class or personal study.
