Me on the Map - Joan Sweeney 2018-09-18
Maps can show you where you are anywhere in the world! A beloved bestseller that helps children discover their place on the planet, now refreshed with new art from Qin Leng. Where are you? Where is your room? Where is your

home? Where is your town? This playful introduction to maps shows children how easy it is to find where they live and how they fit in to the larger world. Filled with fun and adorable new illustrations by Qin Leng, this repackage of Me on the Map will show readers how easy it is to find the places they know and love with help from a map.

Mathematical Literacy, Grade 10 - Karen Morrison 2012-02-23

Study & Master Mathematical Literacy Grade 10 has been especially developed by an experienced author team according to the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Mathematical Literacy. The Teacher's File includes: * a weekly teaching schedule, divided into the four terms to guide the teacher on what to teach * extra project templates for teachers to choose from * solutions to all the activities in the Learner's Book.

Principles of Map Design - Judith A. Tyner
2017-09-12

This authoritative, reader-friendly text presents core principles of good map design that apply regardless of production methods or technical approach. The book addresses the crucial questions that arise at each step of making a map: Who is the audience? What is the purpose of the map? Where and how will it be used? Students get the knowledge needed to make sound decisions about data, typography, color, projections, scale, symbols, and nontraditional mapping and advanced visualization techniques. Pedagogical Features: *Over 200 illustrations (also available at the companion website as PowerPoint slides), including 23 color plates *Suggested readings at the end of each chapter. *Recommended Web resources. *Instructive glossary

Learning to Teach Geography in the Secondary School - David Lambert 2004-08-02

Learning to Teach Geography in the Secondary School provides intending and practising teachers of geography with the practical skills to design, teach and evaluate varied and exciting lessons. It also helps them to acquire a deeper understanding of geography's role, purpose and potential in secondary education. The book explores how teachers may use geography as a vehicle for preparing pupils for uncertain environmental, cultural, social and economic futures.

Exploring Your World - 1989
A family reference work containing
alphabetically arranged articles, with charts,

maps, and photographs, covering physical and human geography.

Map Work And Practical Geography - Gopal Singh 2009-11-01

The book encompasses a wide range of topics on practical geography taught to the B.A./B.Sc. students of Indian universities. Numerous examples and diagrams have been included in the text with the sole aim of enabling the students to have a comprehensive grasp of the subject. Attempt has also been made to present a well-balanced treatment of each topic. Topics like measurement of ground areas from maps, determination of class-interval for choropleth maps, representation of agricultural, industrial and transport data, choice of map projections, interpretation of topo-sheets, etc., have been included in this book and discussed in detail. Books treating various aspects of practical geography need regular up-dates. Therefore, the latest available material has been used to update this edition. Guidance of learned college and

university teachers has enabled the author to present the subject-matter clearly and accurately. It is hoped that in addition to developing a keen interest for practical geography, it will form the basis for a more advanced study of the subject among the students.

World History - James P. Stobaugh 2012

"A new series from respected educator Dr. James Stobaugh that takes you on a journey through history without the filters of revisionist or anti-Christian perspectives. This book is designed for a year's worth of study; 34 powerful

weeks of historical viewpoints. A summary sets the stage for learning so the student can enjoy a daily lesson with thought-provoking questions, and an exam that takes place every fifth day ... Historical content covered in this volume includes the following: Mesopotamia, the Jewish Exile, Egyptian Life, Greece, Life in Athens, Roman Life, Early Church History, Japanese History, Indian (South Asian) History, Persian History, Chinese History, the Middle Ages, the Crusades, the Renaissance, the Reformation, German History, the World Wars, and South Africa"--Page 4 of cover.

Africa In-The-World - Cyrille B. Koné 2021-02

This book is above all an example of philosophical reflection in Africa, refuting traditional commonplaces concerning the continent. The texts comprising this volume disprove the misconceptions that Africa has never understood itself and has never contributed to the enrichment of knowledge, the development of rational thought, philosophy, the

arts, science and technology as well as civilization. For the members of the recently established network Africa In-The-World, the contributions dealing with musical rhythms, dances and the continental humanist philosophy confirm that Africanisation is a process that continues unabated to this day. The multiple and significant African contributions are often difficult to see because they have long since been adopted and integrated into the heritage of humanity. Africa In-The-World is working toward the construction of a universal humanity - one conceived in terms of a "give and take mentality."

Academic Literacy Development - Laura-Mihaela Muresan 2021-03-11

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of

internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

Eating the Sun - Oliver Morton 2009-11-17

Wherever there is greenery, photosynthesis is working to make oxygen, release energy, and create living matter from the raw material of sunlight, water, and carbon dioxide. Without photosynthesis, there would be an empty world, an empty sky, and a sun that does nothing more than warm the rocks and reflect off the sea. Eating the Sun is the story of a world in crisis; an appreciation of the importance of plants; a history of the earth and the feuds and fantasies of warring scientists; a celebration of how the smallest things, enzymes and pigments, influence the largest things, the oceans, the

rainforests, and the fossil fuel economy. Oliver Morton offers a fascinating, lively, profound look at nature's greatest miracle and sounds a much-

needed call to arms—illuminating a potential crisis of climatic chaos and explaining how we can change our situation, for better or for worse. *Cumulated Index to the Books* - 1955
