The Future and Its Enemies - Virginia Postrel 2011-05-10

Today we have greater wealth, health, opportunity, and choice than at any time in history. Yet a chorus of intellectuals and politicians laments our current condition -- as slaves to technology, coarsened by popular culture, and insecure in the face of economic change. The future, they tell us, is dangerously out of control, and unless we precisely govern the forces of change, we risk disaster. In *The Future and Its Enemies*, Virginia Postrel explodes the myths behind these claims. Using examples that range from medicine to fashion, she explores how progress truly occurs and demonstrates that human betterment depends not on conformity to one central vision but on creativity and decentralized, open-ended trial and error. She argues that these two opposing world-views -- "stasis" vs. "dynamism" -- are replacing "left" and "right" to define our cultural and political debate as we enter the next century. In this bold exploration of how civilizations learn, Postrel heralds a fundamental shift in the way we view politics, culture, technology, and society as we face an unknown -- and invigorating -- future.

Roll Models - Richard Holicky 2004

"I thought life was pretty much over." Paul Herman "I was afraid people wouldn't see me for who I still was." Cathy Green "I didn't need this to be a better person." Susan Douglas "I wasn't sure I wanted to live "this way."" Kevin Wolitzky The above four people and 49 more just like them went on to find high levels of success and

lead satisfying lives. Together they tell 53 stories of moving forward to meet all the challenges, fears, obstacles, and problems common to the life-altering circumstances after spinal cord injury, and doing it without benefit of wealth, large settlements or solid health coverage. Ranging in age from 21 to 67, disabled from three to 48 years they share 931 years of disability experience. Roll Models is a valuable new resource for recently injured people and their families, and for nurses, therapists, psychologists and all other professionals who treat, work with and care for people with spinal cord injury. Straight from the horse's mouth, survivors explore their experiences with disability and answer many questions those in rehab are asking: Early Thoughts What were your thoughts immediately following injury? What were your initial thoughts and reactions regarding SCI and the future? The First Years What were your biggest fears during that first year or so? How did you get past those early fears? Changes, Obstacles and Solutions How much different are you now, compared to how you were before injury? What's been the biggest obstacle? How did you address these obstacles? Finding What Works What have been the most difficult things for you to deal with since injury? What's the worst thing about having an SCI and using a chair? What's been your biggest loss due to injury? Is SCI the worst thing that ever happened to you? Tell me something about your problem solving skills. How do you deal with stress? What do you do to relieve stress? Salvations, Turning Points and More Was there any one thing that

was your "salvation" or key to your success? Was there a turning point for you when you began to feel things were going to get better? What personal factors, habits and beliefs have helped you the most? SCI and Meaning Do you find any meaning, purpose or lessons in your disability? Did any positive opportunities come your way because of your injury? What's your greatest accomplishment? What are you most proud of? "A wonderful roadmap with many alternate routes to living and thriving with SCI." Minna Hong, SCI survivor and Peer Support Coordinator/Vocational Liaison, Shepherd Center "Avoids the trap of providing a "one size fits all mentality" and provides solutions as varied as the individuals used as examples. Accentuates the positives while not sugar coating the difficulties. Essential reading." Jeff Cressy SCI survivor and Director of Consumer and Community Affairs, SCI Project, Rancho Los Amigos "A great resource for people as they venture out into the world, or search for meaning and a deeper, richer life. Filled with examples of real people and their real experiences." Terry Chase, ND, RN; SCI survivor; Patient & Family Education Program Coordinator, Craig Hospital "A wonderful tool for the newly spinal cord injured individual, as well as the therapists and counselors working with them. This certainly hits the mark in capturing important survival strategies." Jack Dahlberg, SCI survivor, Past President of the National Spinal Cord Injury Association "Artfully crafted and organized, Roll Models sensitively portrays life following spinal cord injury. Informative, creative, sensitive, as well as infused with humor and a kind heart. Recommended with my highest accolades." Lester Butt, Ph.D., ABPP, Director of the Department of Psychology, Craig Hospital

Made to Break - Giles Slade 2009-06-30
Made to Break is a history of twentieth-century technology as seen through the prism of obsolescence. Giles Slade explains how disposability was a necessary condition for America's rejection of tradition and our acceptance of change and impermanence. This book gives us a detailed and harrowing picture of how, by choosing to support ever-shorter product lives, we may well be shortening the future of our way of life as well.

Sick Puppy - Carl Hiaasen 2001-05-01

Brilliantly twisted entertainment wrapped around a powerful ecological plea—from the New York Times bestselling author of *Squeeze Me*. When Palmer Stoa notices the black pickup truck following him on the highway, he fears his precious Range Rover is about to be carjacked. But Twilly Spree, the man tailing Stoa, has vengeance, not sport-utility vehicles, on his mind. Idealistic, independently wealthy and pathologically short-tempered, Twilly has dedicated himself to saving Florida's wilderness from runaway destruction. He favors unambiguous political statements—such as torching Jet-Skis or blowing up banks—that leave his human targets shaken but re-educated. After watching Stoa blithely dump a trail of fast-food litter out the window, Twilly decides to teach him a lesson. Thus, Stoa's prized Range Rover becomes home to a horde of hungry dung beetles. Which could have been the end to it had Twilly not discovered that Stoa is one of Florida's cockiest and most powerful political fixers, whose latest project is the "mall" of a pristine Gulf Coast island. Now the real Hiaasen-variety fun begins... Dognapping eco-terrorists, bogus big-time hunters, a Republicans-only hooker, an infamous ex-governor who's gone back to nature, thousands of singing toads and a Labrador retriever greater than the sum of his Labrador parts—these are only some of the denizens of Carl Hiaasen's outrageously funny new novel.

The Wiley Handbook of Human Computer Interaction Set - Kent Norman 2017-12-28
Once, human-computer interaction was limited to a privileged few. Today, our contact with computing technology is pervasive, ubiquitous, and global. Work and study is computer mediated, domestic and commercial systems are computerized, healthcare is being reinvented, navigation is interactive, and entertainment is computer generated. As technology has grown more powerful, so the field of human-computer interaction has responded with more sophisticated theories and methodologies. Bringing these developments together, *The Wiley Handbook of Human-Computer Interaction* explores the many and diverse aspects of human-computer interaction while maintaining an overall perspective regarding the value of human experience over technology.

Crowned Heads - Thomas Tryon 2013-09-24
Though the greats of Hollywood may fade, their secrets live on forever. Fedora is dead, and movies will never be the same. A star since the early days of Hollywood, she survived the business for an unprecedented four decades before retiring to Crete. As the years wore on and her costars turned wrinkled and worn, Fedora's perfect features never faded. Now that she has finally passed, the secret to her longevity will be told—a shocking revelation that will raise her to the level of myth. These four novellas tell the story of Fedora and three of her costars in 1955's infamous *The Miracle of Santa Cristi*. Alongside the ageless beauty are William Marsh, whose days as a leading man are numbered; Bobbitt, a former child star still trading on his boyish good looks; and Lorna, a dim bulb who's too sexy for her own good. When the film was shot, they were headed in different directions, but all ended up in the same place: forgotten, loathed, and unlamented.

Chrome - George Nader 1978

"More future fiction than science fiction, this galactic love story of Chrome, the brilliant-eyed

cadet from garbage planet Earth, and Vortex, the Warrior King from a far prouder planet, is full of political intrigue, dizzying adventure, romance and an unusual blend of magic and mysticism"--
Dust jacket.

The Class - Erich Segal 2014-11-12

From world-renowned author Erich Segal comes a powerful and moving saga of five extraordinary members of the Harvard class of 1958 and the women with whom their lives are intertwined.

Five lives, five love stories: Danny Rossi, the musical prodigy, risks it all for Harvard, even a break with his domineering father. Yet his real problems are too much fame too soon—and too many women. Ted Lambros spends his four years as a commuter, an outsider. He is obsessed by his desire to climb to the top of the Harvard academic ladder, heedless of what it will cost him in personal terms. Jason Gilbert, the Golden Boy—handsome, charismatic, a brilliant athlete—learns at Harvard that he cannot ignore his Jewish background. Only in tragedy will he find his true identity. George Keller, a refugee from Communist Hungary, comes to Harvard with the barest knowledge of English. But with ruthless determination, he masters not only the language but the power structure of his new country. Andrew Eliot is haunted by three centuries of Harvard ancestors who cast giant shadows on his confidence. It is not until the sad and startling events of the reunion that he learns his value as a man. Their explosive story begins in a time of innocence and spans a turbulent quarter century, culminating in their dramatic twenty-five year reunion at which they confront their classmates—and the balance sheet of their own lives. Always at the center; amid the passion, laughter, and glory, stands Harvard—the symbol of who they are and who they will be.

They were a generation who made the rules—then broke them—whose glittering successes, heartfelt tragedies, and unbridled ambitions would stun the world. Praise for *The Class* "Erich Segal's best."—Pittsburgh Press "First class entertainment."—Cosmopolitan "An absorbing page-turner."—Publishers Weekly "A panoramic saga."—Philadelphia Inquirer

The Antitrust Paradox - Robert Bork 2021-02-22

Working - Studs Terkel 2011-07-26

A Pulitzer Prize winner interviews workers, from policemen to piano tuners: “Magnificent . . . To read it is to hear America talking.” —The Boston Globe A National Book Award Finalist and New York Times bestseller Studs Terkel’s classic oral history *Working* is a compelling look at jobs and the people who do them. Consisting of over one hundred interviews with everyone from a gravedigger to a studio head, this book provides a “brilliant” and enduring portrait of people’s feelings about their working lives. This edition includes a new foreword by New York Times journalist Adam Cohen (Forbes). “Splendid . . . Important . . . Rich and fascinating . . . The people we meet are not digits in a poll but real people with real names who share their anecdotes, adventures, and aspirations with us.” —Business Week “The talk in *Working* is good talk—earthy, passionate, honest, sometimes tender, sometimes crisp, juicy as reality, seasoned with experience.” —The Washington Post

Chrome - George Nader 1979

The Big Sort - Bill Bishop 2009-05-11

The award-winning journalist reveals the untold

story of why America is so culturally and politically divided in this groundbreaking book. Armed with startling demographic data, Bill Bishop demonstrates how Americans have spent decades sorting themselves into alarmingly homogeneous communities—not by region or by state, but by city and neighborhood. With ever-increasing specificity, we choose the communities and media that are compatible with our lifestyles and beliefs. The result is a country that has become so ideologically inbred that people don't know and can't understand those who live just a few miles away. In *The Big Sort*, Bishop explores how this phenomenon came to be, and its dire implications for our country. He begins with stories about how we live today and then draws on history, economics, and our changing political landscape to create one of the most compelling big-picture accounts of America in recent memory.

The Coming Age of Scarcity - Michael N. Dobkowski 1998-03-01

Michael Dobkowski and Isidor Walliman have edited a book that, although ominous, is not a fatalistic look at the future. *The Coming Age of Scarcity* lays out the perils of not recognizing the reality of genocide or of acknowledging the full implications of warfare. Showing how scarcity and surplus populations can lead to disaster, *The Coming Age of Scarcity* is about evil. It tells of "ethnic cleansing" and excavates the world's expanding killing fields. The writers in this volume are all too aware that the future suggests that present-day population growth, land resources, energy consumption, and per capita consumption cannot be sustained without leading to greater catastrophes. The essays in this volume ask: What is the solution in the face of mass death and genocide? As philosopher John K. Roth says in the Foreword, "The essays can sensitize us against despair and indifference because history shows that human-made mass death and genocide are not inevitable, and no events related to them will ever be."

[Educating the Student Body](#) - Committee on Physical Activity and Physical Education in the School Environment 2013-11-13

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension,

osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. *Educating the Student Body* makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

Memory of Water - Stuart Wakefield 2012

Despondent and suicidal over the disappearance of his beloved Leven, Shaun goes from medical observation to the River Thames-where he wades into the freezing water intent upon ending it all. Instead, Shaun finds himself rescuing the mysterious floating body of a man in strange armour. And he learns that Leven is not dead, hope is not lost, love is not over. . .and the world of London is not the world he thought it was at all. Shaun and his sister Beth struggle to save the life of this man so like Leven as to be identical, although he has no memory of Shaun or anything that's happened to him. When their struggle

becomes one of escaping their own tyrannical parents and violent past, it is Beth's wild, uncontrollable art that brings to them the clues Shaun needs to piece together where Leven has been, what happened to him there, who's coming for him now. . .and how only a fine thread of precognition hangs between London and oceanic apocalypse. Before it's too late, Shaun must recover this man's memory- The memory of water.

Engines of Change - Paul Ingrassia 2012-05-01

A narrative like no other: a cultural history that explores how cars have both propelled and reflected the American experience— from the Model T to the Prius. From the assembly lines of Henry Ford to the open roads of Route 66, from the lore of Jack Kerouac to the sex appeal of the Hot Rod, America's history is a vehicular history—an idea brought brilliantly to life in this major work by Pulitzer Prize-winning journalist Paul Ingrassia. Ingrassia offers a wondrous epic in fifteen automobiles, including the Corvette, the Beetle, and the Chevy Corvair, as well as the personalities and tales behind them: Robert McNamara's unlikely role in Lee Iacocca's Mustang, John Z. DeLorean's Pontiac GTO , Henry Ford's Model T, as well as Honda's Accord, the BMW 3 Series, and the Jeep, among others. Through these cars and these characters, Ingrassia shows how the car has expressed the particularly American tension between the lure of freedom and the obligations of utility. He also takes us through the rise of American manufacturing, the suburbanization of the country, the birth of the hippie and the yuppie, the emancipation of women, and many more fateful episodes and eras, including the car's unintended consequences: trial lawyers, energy crises, and urban sprawl. Narrative history of the highest caliber, Engines of Change is an entirely edifying new way to look at the American story.

No Logo - Naomi Klein 2000-01-15

"What corporations fear most are consumers who ask questions. Naomi Klein offers us the arguments with which to take on the superbrands." Billy Bragg from the bookjacket.

Blue Texas - Max Krochmal 2016-10-07

This book is about the other Texas, not the state known for its cowboy conservatism, but a mid-twentieth-century hotbed of community organizing, liberal politics, and civil rights

activism. Beginning in the 1930s, Max Krochmal tells the story of the decades-long struggle for democracy in Texas, when African American, Mexican American, and white labor and community activists gradually came together to empower the state's marginalized minorities. At the ballot box and in the streets, these diverse activists demanded not only integration but economic justice, labor rights, and real political power for all. Their efforts gave rise to the Democratic Coalition of the 1960s, a militant, multiracial alliance that would take on and eventually overthrow both Jim Crow and Juan Crow. Using rare archival sources and original oral history interviews, Krochmal reveals the often-overlooked democratic foundations and liberal tradition of one of our nation's most conservative states. Blue Texas remembers the many forgotten activists who, by crossing racial lines and building coalitions, democratized their cities and state to a degree that would have been unimaginable just a decade earlier--and it shows why their story still matters today.

Contemporary Management - Gareth Jones 2000

Unsafe at Any Speed - Ralph Nader 1966

International Management: Culture, Strategy and Behavior W/ OLC Card MP -

Richard M. Hodgetts 2005-02-16

As a discipline of academy inquiry, International Management applies management concepts and techniques to their contexts in firms working in multinational, multicultural environments.

Hodgetts' Luthans: International Management was the first mainstream International Management text in the market. Its 6th edition continues to set the standard for International Management texts with its research-based content and its balance between culture, strategy, and behavior. International Management stresses the balanced approach and the synergy/connection between the text's four parts: Environment (3 chapters): Culture (4 chapters), Strategy and Functions (4 chapters) and Organizational Behavior /Human Resource Management (4 chapters).

Innovation and Entrepreneurship - Peter Drucker 2014-09-15

How can management be developed to create the greatest wealth for society as a whole? This is

the question Peter Drucker sets out to answer in *Innovation and Entrepreneurship*. A brilliant, mould-breaking attack on management orthodoxy it is one of Drucker's most important books, offering an excellent overview of some of his main ideas. He argues that what defines an entrepreneur is their attitude to change: 'the entrepreneur always searches for change, responds to it and exploits it as an opportunity'. To exploit change, according to Drucker, is to innovate. Stressing the importance of low-tech entrepreneurship, the challenge of balancing technological possibilities with limited resources, and the organisation as a learning organism, he concludes with a vision of an entrepreneurial society where individuals increasingly take responsibility for their own learning and careers.

With a new foreword by Joseph Maciariello
Skink--No Surrender - Carl Hiaasen 2015-12-01
Richard's cousin is missing, and his best hope of finding her rests with the wily, one-eyed, ex-governor of Florida. Carl Hiaasen introduces his iconic character Skink to a younger audience in this nail-biting adventure! A National Book Award Longlist Selection
Classic Malley: her parents are about to ship her off to boarding school, so she takes off with some guy she met online... Poor Richard: he's less of a rebel than Malley, and a lot less trusting. He knows his cousin is in trouble before she does. Wild Skink: he's a ragged, one-eyed, ex-governor of Florida, and enough of a renegade to think he can track Malley down. With Richard riding shotgun, this unlikely pair scour the state, undaunted by blinding storms, crazed pigs, flying bullets, and giant gators. In Carl Hiaasen's outrageous, hilarious, and wildly dangerous state of Florida, there are a million places an outlaw might stash a teenage girl. A million unpleasant ways to die. And two who will risk everything to rescue a friend . . . and to, hopefully, exact a bit of swamp justice.
